TO HIS MAJESTY,

KAMEHAMEHA III.,

KING OF THE SANDWICH ISLANDS.

SIRE—

I have the honor to dedicate to YOUR MAJESTY the NOTES, on these Islands, their population, religion, agriculture, and commerce, written by me, which have been printed in successive numbers of the FRIEND, beginning on the first of May last.

It is possible that I may have been misinformed on some matters of fact, and that I may have erred in many of my views. All men are liable to mistakes, and to be led away by their own theories or fancies; I may have been so misled, to a degree unknown to myself; if so, others will point out my errors, and truths useful to your MAJESTY, your Dominions, and your People, may be elicited by their refutation.

One only credit I claim, and that is, for the sincerity of my desire to aid in promoting the prosperity of these Islands, and the happiness of their native inhabitants.

That it may please the ALMIGHTY to permit you long to reign over a religious, sober, virtuous, contented and happy people, is the earnest prayer of,

Sire,

Your Majesty's most
Obedient humble servant,
ROBERT CRICHTON WYLLIE.

Honolulu, December 16, 1844.

INDEX.

Missionary Statistics, - - - - - - 47,116,121
Table of whale and other ships at Oahu for 20 years, - 49
Whale Fishery, general remarks, - - 49,61,113,114
Average length of voyage to the S. I. from all foreign ports, 50
Ships of war that have arrived at the S. I. from 1824 to 22d February 1844, (vide Omissions) - - - - - - 50
Trade of the Port of Honolulu, its rates for anchorage and pilotage, rules, duties levied, fines imposed, weights, measures, rates of exchange, monetary circulation. - - - - - 50
Public debt, (Note 9th) - - - - - - - - 50
Table of the weather at Honolulu for a whole year, from observations registered by Dr. Rooke, - - - - - - 51
Analytical view alphabetically arranged, of the whole trade of Honolulu, for 1843, - - - - - - - - - 56
Table of imports and exports from 1835, - - - 58
Hints to the custom house, founded on the disparity of prices given in for the calculation of the *ad valorem* duty - - 58
British Commission, - - - - - - - 61,124
Native produce, value exported, - - - - 61,63
Want of foreign markets for that produce, - - 61
Population of the Sandwich Islands, - - - 61,64
Land tenure, - - - - - - 61,65,72,77,89,90
Decrease of the population, - - - - - - 61,65
Policy of the government, - 62,63,64,65,72,77,89,91,99
Taro root—one mile square of land cultivated with it, will support 15,000 people, - - - - - - - - - 62
Chief productions of the Islands, - - - 62,114,115
Diseases and remarks on Hospitals for foreign seamen, - 62
Wages for laborers and *truck* system, - - 63,114,115
Savings Bank, and wealth acquired by labor, - - - 63
Time and expense of journey from Oahu to America or Europe, via Mexico, - - - - - - - - - - 63
Belgian land company, - - - - - - - 64
Character and doings of the Missionaries, 47,64,116,121,122
Parochial clergy, suggestions for, - - - - - 64,124
Ionian Islands, New South Wales, Canary Islands, Phillipine Is., shew what might be done in the Sandwich Islands, - 64
Testimony of Mr. Jarvis in favor of the Missionaries - 64
Rev. Samuel C. Damon, Seamen's chaplain, his extensively useful labors to all seamen, - - - - - - - - - 69
Churches and schools in Honolulu, - - - - - 70
Young Chiefs, their ages, parentage and Rank, and how educated under Mr. and Mrs. Cooke, - - - - - 71,122
Schools, native, Mr and Mrs. Johnstone's, Missionary for children, (Oahu charity school) - - - - - - - - 71
Rev. Abbe Maigrets Catholic schools, and general statistics of the society for the propogation of the Catholic faith, - - 72
School of Arts and progress of refinement, remarks upon, 72

Mr. Wyllie's letter to the Rev. SAMUEL C. DAMON, - 125

ERRATA.

In table of whale ships, in place of 69, American ships for 1824, read 48, and in place of 22 American ships for 1825, read 38 For 18 British whalers in 1824, read 15, and for 14 British whalers in 1825, read 17.

I was led into the above mistakes from the faintness of the original manuscript, leading me to include in 1824, part of the ships that belonged to 1825.

There are other *errata* in the orthography, punctuation and figures, in several places, but as the reader will easily detect them, and as they do not affect the sense, I omit noticing them.

HOLBROOK LIBRARY PACIFIC SCHOOL OF RELIGION

OBJECTIONS.

1. My remarks under the head of *hints* to the Custom House, page 58, were complained of as affixing an unmerited stigma upon the resident merchants in this place. I disavowed any such intention, in a communication to the Polynesian, to which I must refer.

2. Dissent was also expressed from my remarks upon the inadequacy of the wages paid to native laborers, in my 19th note, page 63. Relatively to the cheapness of subsistence, in these Islands, the wages may favorably compare with those paid in other countries, but this is a new country, where labor is scarce, and a comparison to be fair, ought to be with other new countries, such as the United States, Canada, Australia, New Zealand, &c. *not* with an overpopulated country, such as Great Britain. The main question is, could not the tenure of land be so altered as to conduce to a rise in the price of native labor, to the wealth of the Kingdom and power of the *King*?

3. An involuntary omission, to the prejudice of Messrs. James Robinson & Co., page 78, will be found corrected at page 97.

4. Objections were started to my remarks page 77, upon the injurious effect of short leases, with a reversion to the government, at their termination, of the buildings erected thereon, and other improvements, and the example of *Hong Kong* was cited, in proof that the same thing was done in British colonies.

But my remarks applied not to *sites* of cities or *building lots*, but to the leasing of land generally for agricultural purposes. What the system of Great Britain is, in her colonies, I endeavored to show, at pages 89 and 90, but in case the instances I gave should not have been sufficiently intelligible, I here add copy of an extract from a title to land, of the richest soil, in the Island of Ceylon, granted to my friends in London, *Messrs. A. & R Crowe & Co.* "grant on behalf of Her Majesty, of 491 acres, a square rood and 29-44 square perches, £143,15,5 1-4 to A. & R. Crowe & Co, to have and to hold for ever, on a yearly quit rent of a pepper corn, if demanded, subsequent to such regulations as may exist or be enacted respecting lands, right of government to make roads and bridges, and to timber, stone, &c. to keep the same in repair, to the mines, minerals, gold, silver, copper, iron, tin, lead and other metals, and with full powers of entry thereto, and to make the same

Given at *Kandy*, in the Island of Ceylon, under the public seal thereof, this 29th day of January, 1840."

To me it matters not on what terms land may continue to be leased or sold in the Sandwich Islands, except in so far as I wish well to the King, to the chiefs, and to the natives generally.

5. My observations under the head of *Oath of Allegiance*, page 61, have been taken up by *Legamen* under a latitude of meaning which I do not think my words conveyed. I meant to confine my remarks to the case of British subjects taking the oath of allegiance to this or any other foreign government. Notwithstanding the argument of *Legamen*, for whose intentions, learning and talent I have every respect, I cling, on this subject, to the opinion of *Lord Ashburton*, as given to the *Honorable Daniel Webster*, in August, 1842.

In short, I hold that the maxim of English law is NEMO POTEST EXUERE PATRIAM, admitted to be such by the high authority of Blackstone, Chitty, Vattel and others.

In a *Scotch Encyclopædia*, I find the following definition of *natural allegiance*. "It is due from all men born within the King's dominions. For immediately upon their birth, they are under the King's protection, at a time too, when they are incapable of protecting themselves. Natural allegiance is therefore a debt of gratitude, which cannot be forfeited or altered by any change of time, place, or circumstance, nor by any thing but the united concurrence of the legislature. A Briton who removes to France or to China, owes the same allegiance to the King of Britain there, as at home, and 20 years hence as well as now. For it is a principle of universal law, that the natural born subjects of one Prince cannot by any act of his own, not even by swearing allegiance to another, put off or discharge his natural allegiance to the former; for this natural allegiance was intrinsic, primitive and antecedent to the other, and cannot be divested without the concurrent act of that Prince, to whom it was first due. *Natural allegiance* is therefore held in law to be perpetual; whereas local, is only temporary."

Legamen and I, I fear, are not likely to agree upon this point, nor is it necessary we should, for as I stated in my note 65, page 91, I do not object to those parties taking the oath of allegiance to this government who have a mind to do so. My private opinion can hurt no body, who thinks differently.

6. A controversy on Egyptian Chronology, in which, it was not for me to enter, was started on a *passing remark* made by me, in my 49th note, page 77, with referrence to the Egyptians. Perhaps the referrence was ill judged and not sufficiently explained, but in making it, I had my eye to the fulfilment of scripture prophecy, and I owe it to the public, to state my grounds.

Dr. Keith, in his Evidence of the Christian Religion, 13th edition, at page 315, writes as follows,—

"Such is the state of Egypt. Deprived twenty-three centuries ago of her natural proprietors, she has seen her fertile fields successively a prey to the Persians, the Macedonians, the Romans, the Greeks, the Arabs, the Georgians, and, at length, the race of Tartars distinguished by the name of Ottoman Turks. The Mamelukes, purchased as slaves and introduced as soldiers, soon usurped the power and elected a leader. If their first establishment was a singular event, their continuance is not less extraordinary. They are replaced by slaves *brought from their original country*. The system of oppression is methodical. Every thing the traveller sees or hears, reminds him he is in the country of slavery and tyranny." "A more unjust and absurd constitution cannot be devised than that which condemns the natives of a country to perpetual servitude, under the arbitrary dominion of *strangers* and slaves. Yet such has been the state of Egypt above five hundred years. The most illustrious sultans of the Baharite and Borgite dynasties, were themselves promoted from the Tartar and Circassian bands; and the four and twenty Beys, or military chiefs, have ever been succeeded, not by their sons, but by their servants." These are the words of Volney and of Gibbon;—and what did the ancient prophets foretell? "*I will lay the land waste, and all that is therein, by the hands of strangers. I the Lord have spoken it. And there shall be no more a prince of the land of Egypt. The sceptre of Egypt shall depart away.*" The prophecy adds,—"*they shall be a base kingdom; it shall be the basest of kingdoms.*"

OMISSIONS.

To list of ships of war, page 50, that have arrived at the Sandwich Islands from 1824, add the following:

1834, July 21, H. B. M. S. Challenger.
1826, Oct. 8, French ship Bonite.
1837, July 8, H. B. M. Schr. Starling.

THE FRIEND,

OF TEMPERANCE AND SEAMEN.

VOL. II. HONOLULU, OAHU, SANDWICH ISLANDS, WEDNESDAY, MAY 1, 1844. No. V.

Sandwich Islands.

OFFICIAL.

[Copy]

DECLARATION.

Her Majesty, the Queen of the United Kingdom of Great Britain and Ireland, and His Majesty, the King of the French, taking into consideration the existence in the Sandwich Islands of a Government capable of providing for the regularity of its relations with Foreign Nations, have thought it right to engage, reciprocally, to consider the Sandwich Islands as an Independent State, and never to take possession, neither directly or under the title of Protectorate, or under any other form, of any part of the Territory of which they are composed.

The undersigned, Her Britannic Majesty's Principal Secretary of State for Foreign Affairs, and the Ambassador Extraordinary of His Majesty, the King of the French, at the Court of London, being furnished with the necessary powers, hereby declare, in consequence, that their said Majesties take reciprocally that engagement.

In witness whereof, the undersigned have signed the present declaration, and have affixed thereto the seals of their arms.

Done, in duplicate, at London, the twenty-eighth day of November, in the year of our Lord one thousand eight hundred and forty-three.

(Signed,) ABERDEEN. L. S.

EDITOR'S CORRESPONDENCE.

The following extracts are taken from letters received by the editor from gentlemen on board the frigate "United States."

"MAZATLAN, March 27, 1844.

"Dear sir,—I have time to write you only a few lines, which I doubt not will be very unexpected. We have just arrived here, thirty-three days from Callao; where we left Com. Dallas, on board the flag-ship "Savannah," who had arrived only a few days before we sailed. *Com. Jones left Callao in the U. S. Frigate Constellation, for home, about two weeks before Com. Dallas arrived.* We were ordered here for the purpose of procuring specie; and as soon as we can obtain the amount requisite, we shall proceed direct to Callao, and then, I hope, to the U. S. Our stay at this port will not be longer than three weeks."

Another writes, under date of March 26th, as follows:

"Com. Jones and Lt. Dulany returned home in the frigate Constellation. Com. Dallas arrived in the frigate Savannah, the month after, and immediately we were sent hither, where we arrived to-day—33 from Callao. The Cyane had left Feb. 7, via. Acapulco. Com. Dallas had had an attack of paralysis, but was better. It is reported that we return home via. Canton; if so, we shall see you again, which is the most pleasant part of the prospect. Our friends on board are all well——zealous as ever in temperance."

Most sincerely do we hope that our temperance friends on board the frigate "United States" and every other vessel that floats the ocean, will

——"undismayed go on."

Let them remember that the friends of the cause on land are untiring in their efforts. The President of the Am. Sea. F. Society, writes under date of January 29, 1844, (the very latest date from the U. S) that "memorials are going in to Congress from all quarters, to abolish the spirit-ration in the navy; and it being recommended by the Secretary of the Navy, we have great hopes that it will pass."

The following extract from another letter, written by the Pres. of the Seamen's F. Society, under date of "New York, Dec. 1, 1843," shows that the friends of the long neglected sailor are coming up to their duty:

"Yesterday we had a grand turn out of sailors and others, to consecrate a new Episcopal Mariners' Floating Chapel, which they have commenced building, in front of our Sailor's Home. Bishop Onderdonk officiated, with about twenty other clergymen. The Baptist, are beginning to wake up about their Bethel, and the Methodist, commence a separate effort for seamen next Sabbath; and what is best of all, the good old "Mariner's Church" in Roosevelt st. was never better attended. May we not hope that the seamen's cause will now progress more rapidly than it has done, and the time soon, very soon come, when a majority of these interesting men will enlist under our Great Captain, and not only aid the mission-

ary, but go ahead and prepare the way. The change, even during the past year, in this port, is very apparent. Thousands have become temperate, and I trust hundreds have been 'born again.'"

H. M. S. CARYSFORT.
Mazatlan, Jan. 19, 1844.

Dear sir,—I enclose you a few lines by an old shipmate, the master carpenter of H. M. Ship Modeste. I hope it may find you and all dear to you in perfect health; and that you are able to adopt the language of the Psalmist in the 103 Ps. as your own. This day we have buried William Leyden, a native of Liverpool; one whom I think, if only one is to reach Heaven of our whole crew, he will be that person. I am not aware if you knew him. Since we left Oahu he has verily led a life of prayer. A party of men went to fish with the sein When the boat landed, he went to jump on shore, was out of his depth, and in an instant the tide swept him out, and whilst the rest thought him playing in the water, he was summoned to that world "from whose bourne no traveller returns." Thanks to our Heavenly Father, I have good health; and our tee-totallers now amount to *ten*—and I am furnished with an admirable argument in the following case: When we arrived at this place in Nov. last, three distressed British subjects were sent on board by the Consul, for medical treatment—Hearing that one of them had been a midshipman in the navy, and in command of a vessel belonging to the East India Company, curiosity prompted me to enter into conversation with him; in course of which, I recognized him as an old shipmate in the East Indies with me. He was then an officer. His tale is short:

At an early age he formed an appetite for strong drink, which prevented his promotion in the navy. Interest procured him employ in the East India Company's service. He commanded a packet mounting four guns. In the course of a drunken spree, which continued about two months, he struck a superior officer, and was placed under arrest; and whilst waiting for a sufficient number of officers to try him, drank doubly hard, and sooner than stand his trial, secreted himself on board a ship bound to Valparaiso. He has served the last year as a common sailor, depending on the casual bounty of others for the necessaries of life, whilst his father in England has servants in livery, his other sons at college, but is totally unable to tell whether the poor prodigal is dead or *alive*. I urge him to go home—he may, perhaps, obtain the fatted calf He seems sensible that king Alcohol is a severe taskmaster and requires not only wealth but health.

My kind regards to all christian friends, and hoping to hear soon of your welfare,

Believe me yours,
Very truly,
JOHN BELLOWS.

PITCAIRN'S ISLAND, Jan. 11, 1844.

Rev. S. C. DAMON, Sea. Chap.:

Dear sir,—Your letter to me dated Sept 29, 1843, and forwarded by Capt. Richmond, is now in my possession, and I am about to comply with your wishes:—The magistrate or chief ruler is chosen yearly, by the people. On the first of Jan. all the inhabitants that are eligible to vote, (from 18 years old and upward,) give in their votes for a magistrate or counsellor. After the magistrate is chosen, he has the privilege of choosing an assistant if he pleases. It is his duty to hear all grievances, assemble the people together, state the object of the meeting, hear the complainant and the defendant, and commit the case to a jury of seven persons; whatever the jury decide, he is to see it executed. As regards religion, I am sorry to say it is very low. Trade and traffic are all the go at present. There are some who still regard religion; and family worship morning and evening is still held up by the major part of the families, and public service twice on the Sabbath-day; but, alas! public school and weekly meetings for perusing the scripture, are entirely given up, by the whole inhabitants; so I may safely say religion is on a decline. In the days of the venerable Mr. John Adams, all the duties were strictly regarded.—O for such a man as he was, to start us on afresh. The next thing you desire to know is the produce of the Island; to which, I reply,—yams, sweet-potatoes Irish ditto, onions, plantains, corn, &c.; fruits of various kinds, such as cocoa-nuts, oranges, pine-apples, &c.; animal food,—hogs, goats, ducks, &c. I mention these, in particular, that I may be able to inform you of their different prices—say yams, $2 per bbl.; sweet-potatoes, $2 per ditto; Irish ditto, $3 per ditto; onions, $3 per ditto; plantains, four bunches per dollar; cocoa-nuts, $2 per hundred. Fruits, no fixed price—hogs and goats the same. Fowls, $3 per dozen. In exchange,—cotton cloth, (white and blue,) price twenty-five cents per yard; calicoes, of various kinds, price according to the quality; cotton shirts, both coarse and fine, price according to the quality; tea, fish-hooks and all kinds of earthen ware, knives of all kinds, soap, &c. No vessels are owned by the people. No proper schoolmaster, and no appointed minister, are among us. As to your last request, I am not able to inform you aright; but I believe the government here is supported by the British government. Write to me as often as you can, and believe me to be,

Your most obedient and
Humble servant.
ARTHUR QUINTAL, jr.

A BEAUTIFUL ARGUMENT.—To a young infidel who was scoffing at christianity, because of the misconduct of its professors, the late Dr. Mason said—"Did you ever know an uproar to be made because an infidel went astray from the paths of morality?" The infidel admitted that he had not—"Then don't you see," said Dr. M. "that by *expecting* the professors of christianity to be *holy*, you admit it to be a holy religion, and thus pay it the highest compliment in your power?" The young man was silent.

HONOLULU, April, 17, 1844.

Rev. S. C. DAMON:

Dear sir,—Herewith I send you some statistics of the American Protestant Mission, established on these islands, in which some of your readers may feel an interest.

In addition to results stated in the statistics, it may be remarked that the Government has assumed a more stable character. Written laws have been enacted, by which the people are better secured from oppressive exactions on the part of their rulers, and encouraged to cultivate industrious and virtuous habits. The security, stability and value of property, has been greatly enhanced.

Diplomatic intercourse has been opened with other and greater nations, some of whom have been pleased to acknowledge the independence of the islands, and express an interest in their prosperity.

These political improvements are not placed as results of missionary labors in the statistics, because other causes combined with missionary efforts have tended to produce them, and as also being without the pale of direct missionary efforts

But although the civil benefits derived from missionary labors may be regarded more as incidental than direct, yet a reflecting mind will hardly fail to perceive that they are to a greater or less extent the natural consequence of them; and that the introduction of the pure and mild precepts of the christian religion, and the increased light of knowledge, must have exerted an important and we may say an indispensable influence in ameliorating the political condition of the people.

The facts stated abundantly testify to the deep interest which the missionaries, and the christian community by whom they are sustained, feel in every thing, both civil and religious, that pertains to the well-being of the Hawaiian people. Labor and money have been freely expended, and no other return sought than their moral and physical elevation in the scale of being—their *true* conversion to christianity.

A great change for the better, we think, has already taken place,—which is, we doubt not, in a great measure, in consequence of the Divine blessing upon the efforts that have been made.

It is true that society is still in a crude state, and is susceptible of vast improvement: but it is not the less true, that the change through which it has passed during

the last twenty-five years, is probably without parallel in the annals of ancient or modern times. And although there is very much to disapprove, in the civil and religious condition of the people, yet we trust they are making some progress, and we may hope the day is not distant when a far higher standard of temperance and morality than the present, will be raised and sustained in *this* community.

Yours most truly,

S. N. CASTLE.

MISSIONARY STATISTICS AT THE SANDWICH ISLANDS.

MISSIONARIES AND TIME OF LABOR.

Seven male and seven female missionaries sailed from Boston, Mass., in October, 1819, and arrived at Hawaii, March 31, 1820, twenty-four years ago. On the 8th of April following, the king and chiefs consented to their landing and residing upon the islands At the first, their consent could be obtained for one year only.

The first reinforcement, consisting of seven males and six females, arrived in the spring of 1823.

The second reinforcement, of six males and ten females, arrived in the spring of 1828.

Third reinforcement, of four males and four females, arrived in the spring of 1831.

Fourth reinforcement, of ten males and nine females, arrived in the spring of 1832.

Fifth reinforcement, of two males and two females, arrived in the spring of 1833.

Sixth reinforcement, of three males and five females, arrived in the spring of 1835.

Seventh reinforcement, of fifteen males and seventeen females, arrived in the spring of 1837.

Eighth reinforcement, of four males and four females, arrived in the spring of 1841.

Mr. A. B. Smith and lady, from the Oregon mission, joined the mission at the islands, January, 1842.

Ninth reinforcement, of two males and two females, from the United States, arrived September, 1842.

Whole number of males, sixty one.

Whole number of females, sixty seven.

Of these, some have died, some have returned to the United States, from failure of health and other causes, and a few, for various reasons, have become disconnected with the mission and board, some of whom have returned to the United States, whilst others remain at the islands.

The greatest number of laborers in the field at one time, has not exceeded about eighty adults or forty families; which has been near the average number for the last seven years.

The terms of missionary labors, from the establishment of the mission to the present time, when reduced to the time of a single family or individual, have been nearly as follows:

	For a family.		For an individual.	
First missionaries,	93	years.	186	years
First reinforc'ment,	80	"	160	"
Second do	67	"	134	"
Third do	38	"	76	"
Fourth do	103	"	206	"
Fifth do	22	"	44	"
Sixth do	32	"	64	"
Seventh do	92	"	184	"
Eighth do	12	"	24	"
Mr. and Mrs. S.,	2	"	4	"
Ninth reinforcm'nt,	3	"	6	"
	544		1,088	

EXPENDITURES.

These have been incurred in sustaining the missionaries and providing them with dwellings; for the printing and binding departments, and for the seminary and other public schools; aid has also been rendered, to some extent, in the erection of churches and common school houses; and large sums have been expended in the publication and circulation of books The whole amount of expenditures have been nearly as follows:

By the Am Board Com. For. Missions,	1819,	Preparatory expenses,	132 50
	1820,	do	10,329 30
	1821,	do	669 70
	1822,	do	1,071 00
	1823,	do	12,074 67
	1824,	do	6,746 30
	1825,	do	9,764 89
	1826,	do	10,241 94
	1827,	do	9,761 31
	1828,	do	19,434 84
	1829,	do	8,092 92
	1830,	do	11,166 91
	1831,	do	13,942 91
	1832,	do	20,631 75
	1833,	do	15,833 67
	1834,	do	11,738 02
	1835,	do	16,173 98
	1836,	do	30,034 83
	1837,	do	63,521 09
	1838,	do	41,915 90
	1839,	do	39,835 45
	1840,	do	33,286 65
	1841,	do	33,620 02
	1842,	do	42,175 46
	1843,	do	40,443 66
	1844,	do	36,400 00
			$539,089 67
By the Am Bible Society,			50,000 90
By the Am. Tract Society,			19,774 51
		Total,	$608,865 08

[NOTE.—The $36,400 for 1844, is the grant by the Am. Board for the financial year ending July 31, 1844; the last quarter of which, yet remains. The expenses of the year cannot, of course, be accurately ascertained at the present time, but as a reinforcement is about joining the mission, it will probably exceed the grant as it ordinarily does in such cases.—*S. N. C.*]

STATIONS AND BUILDINGS.

The Stations are as follows, viz: *Waimea, Koloa* and *Waioli* on KAUAI; *Honolulu, Ewa, Waialua* and *Kaneohe* on OAHU; *Kaluaahu* on MOLOKAI; *Lahaina, Lahainaluna, Wailuku* and *Hana* on MAUI; and *Hilo, Kau, Kealakekua, Kailua, Waimea* and *Kohola* on HAWAII; being eighteen in all.

Forty permanent dwelling-houses, two printing-offices and a bindery, and commodious seminary and school buildings have been erected; the latter for the mission and female seminaries and boys' boarding school.

In addition, many permanent meeting and school houses have been built, chiefly by the labor and at the expense of the natives, under the direction of the missionaries.

RESULTS.

Christianity has been introduced, and adopted as the religious system of the nation.

The language has been reduced to writing.

Three separate editions of the New Testament, of ten thousand copies each, have issued from the press, making thirty thousand copies.

One duodecimo edition of the whole bible, of ten thousand copies.

One octavo edition of the whole bible, of ten thousand copies; making in all, fifty thousand copies of the New and twenty thousand copies of the Old Testament.

In addition, several editions of from one to ten thousand copies each, of various portions of the scriptures, were issued from the press before the translations of either the Old or New Testament were completed.

Upwards of seventy different works have been translated and compiled and issued from the press. About thirty five of these have been school books of various kinds, the remainder being chiefly religious books and tracts, also sacred and profane history, &c.

The scriptures have been printed at the expense of the American Bible Society.

A considerable proportion of the religious books and tracts were published at the expense of the American Tract Society.

All elementary school books and scientific and miscellaneous works have issued at the expense of the American Board

Schools have been established, and nearly one half of the adult population taught to read.

At present the schools are mostly confined to children, about twenty thousand of whom are gathered into them in the different parts of the islands.

A Mission Seminary, where the higher branches are taught, has been in operation for several years. Number of students about 130.

A Female Seminary of similar character has been established with about eighty pupils. These are situated on Maui.

A Boarding School for boys, numbering about sixty scholars, and one for girls, of about twenty-five in number, are in operation on Hawaii.

There is a Boarding School for the young chiefs at Honolulu, also a number of select schools at the various stations throughout

the islands, under the care of gentlemen and ladies connected with the mission.

Reading, writing, geography and the simpler rules of arithmetic are taught in the common schools, and astronomy, geometry, trigonometry, mensuration, surveying, navigation, algebra, arithmetic, geography, history, philosophy, &c. are taught in the Mission Seminary, and to a greater or less extent in the boarding and select schools.

Twenty-three churches have been gathered, of which there were, on the first of April 1843, 23,804 members in regular standing.

HAWAIIAN BIBLE SOCIETY.

MINUTES OF ANNUAL MEETING, 1843.

A meeting of the Hawaiian Bible Society was held in the native school house, Honolulu, Wednesday, May 31st, 1843.

R. W. Wood, M. D., President in the chair.

The meeting was opened with prayer, by the Rev. Lorrin Andrews.

The Secretary read the annual report, which was adopted.

The Treasurer read his report of monies received, which was adopted.

The meeting then proceeded to the choice of officers.

The following persons were elected for the present year:

Robt. W. Wood, M. D., Prest.
Rev. Lowell Smith, 1st Vice-Prest.
Rev. Richard Armstrong, 2d do.
Levi Chamberlain, Secy.
Amos S. Cooke, Treas'r.
Rev. Sam. C. Damon, Mr. Andrew Johnstone, Mr. Edwin O. Hall. } Executive Com'tee.

After some discussion, the following resolutions were passed, viz:

Resolved, That application be made to the American Bible Society, for a grant of Bibles and Testaments, in different languages, and of various style and kind, for sale and distribution at this place.

Resolved, That the Executive Committee be instructed to appoint some person to deliver an address at the next annual meeting.

Resolved, That the missionaries at the different stations on all the islands, be requested to use their influence to obtain subscribers to this Society, and to exert an influence in its favor.

Resolved, That the Annual Report, together with the Constitution* of the Society, be published. Adjourned.

Prayer, by Rev. S. C. Damon.

LEVI CHAMBERLAIN, *Sec'y.*

HONOLULU, May 31, 1843.

Report.

Having in the good providence of God arrived at the second anniversary of the Hawaiian Bible Society, it will be expected of me that I present some statement of proceedings and occurrences that come into the history of the year.

A communication was addressed to the Secretary of the parent Society, Sep. 10, 1842, with a copy of the report of the previous year, and list of officers of the current year.

In October a letter was received from the Corresponding Secretary of the parent Soc'y acknowledging the receipt of the letter which announced the formation of this Society, and it was accompanied by a certificate recognizing this Society as an Auxiliary of the American Bible Society, and entitled to the privileges of an auxiliary.

A grant of $3,000 was made last June to the funds, for printing the Scriptures in the Hawaiian language; making the whole amount of their grants for this object $34,500. In addition to this, the Prudential Committee of the A. B. C. F. M. have become responsible for the sum of $6,000 to to sustain our liabilities in completing the editions of the Bible and Testament now in hand, and some other objects of a kindred nature.

The printing of the 8vo edition of the Bible has advanced from the 80th Psalm, to which it had been brought at the last annual meeting, to the 8th chapter of Gospel of John—carrying the work forward to the 1256 page; making 736 pages of matter during the year, and 736,000 pages.

A new edition of 10,000 copies duodecimo of the New Testament has been commenced, which it is hoped will be finished during the present year.

The call for the Scriptures appears to be pretty uniform.

The Binder's account is as follows:

	Bound the past year.	Distributed the past year.	Now on hand.
Tew Testament	4100	4000	1200
Old Test., 1st vol.,	800	496	1800
do 2d "	1400	396	3600
12 mo Bibles,	400	400	

The whole amount of proceeds reported is $166 05. The Auxiliary at Lahaina has not yet communicated the result of its proceedings.

During the past, as in former years, the distribution of the Scriptures has, to a great extent, been gratuitous. And where payment has been made, only a small part has been in cash. Vegetables for the tables, fuel, house-timber, labor, and such articles as the missionaries could employ towards their support have been rendered. The people are poor, and it is with much difficulty that the mass can obtain the money requisite for the payment of their taxes. The distribution has been in proportion to the readers in all parts of the field. Our plan of division is to give to each missionary station a just proportion of all the books printed: so that the divisions of islands where the people are poorest and least able to pay, are furnished as amply as the portions enjoying greater means and facilities.

The influence of the Bible on all classes throughout the islands is most happy. The precepts of the Bible have formed the basis of the laws; and it is believed that more than the laws themselves and the penalties annexed to enforce them, the principles of the Bible have operated to regulate the conduct of a great portion of the people. We have then great cause for thanksgiving and praise, and may thank God and take courage.

Our organization is approved by the parent Society, and will serve as an acceptable medium of communication for the Bible-cause in this part of the world. Through this Society Bibles for seamen and others may be transmitted for sale or gratuitous distribution.

Tho' our object is not to print the Scriptures in the English language, but in the Hawaiian, yet it is our privilege to co-operate with that noble institution the Am. Bible Soc. in dispensing the Word of Life to the destitute: and we may hold out to those perishing in ignorance and sin, a gift which, with the blessing of God, shall prove to many the bread which came down from Heaven, whereof if a man eat he shall never die.

LEVI CHAMBERLAIN, *Sec'y.*

HONOLULU, May 31, 1843.

HONOLULU, 15 March, 1844

MY DEAR SIR,—I send herewith the table of the shipping, commerce and regulations of the port. It was my intention to have had it published in one of the London journals, but as you were pleased to express a wish to publish it in the periodical which you so usefully conduct, I am happy to have an opportunity of placing it at your disposal.

Since the evening when we first spoke of it, I have endeavored to add, in notes, all the information most desirable for the captain or supercargo of a foreign vessel visiting this port.

Through the kindness of Mr. Brewer and Mr. Peck, I expect to obtain sufficient data to enable me to prepare a similar table of the port of Lahaina, Maui; which table, when ready, I shall also submit to you.

Notwithstanding all the laudable efforts of the missionaries to improve the condition of the natives, it is painful to think that their number still decreases so rapidly. Their regular employment in healthful labor, and the addition to their comforts which industry will procure, will be found to be potent auxiliaries in prolonging their lives and rendering them more prolific. And secluded as the islands are, it is only by foreign commerce that a permanent support can be given to the industry of the natives.

Yours, sincerely,

ROBERT C. WYLLIE.

Rev. SAMUEL C. DAMON, *Seamen's Chaplain, &c.*

*The Constitution omitted this month for want of room.

Notes.

1. So far as the number of whaleships touching at the Sandwich Islands, affords an index of the whale fishery in the Pacific, by far the greatest proportion of it belongs to the United States, whose inhabitants first commenced it. This superiority is the more creditable to the Americans, that they have maintained it, from first to last, without any legislative protection.

The average value of the hulk of each American whaler may be considered $22,000, and of the outfit, $18,000.

The adventure is divided into *lays* or shares, of which the captain's *lay* is generally one seventeenth of the whole; the first officer's, one twentieth; the second officer's, one forty-fifth; the third officer's, one sixtieth; the boat-steerers' from one eightieth to one 120th; and the common sailors' from one 120th to one 150th.

Great Britain, during the 11 years from 1813 to 1824 inclusive, allowed the large sum of £82,700 in bounties to 490 ships, without fully establishing the fishery. This result is evident from the fact that in 1791 Great Britain had afloat 75 south-seamen; that the average yearly number for the above 11 years, was only 44, and that during the last year of the 11, namely, 1824, it was reduced to 31.

No bounty has been allowed since 1824, yet the number of British south-sea-whalers is still about 30.

The French whalers in the Pacific are estimated at about 70; most of which belong to Havre. The government, from 1st March, 1842, to 31st December, 1850, allows the following bounties, viz:

On depart. 40 fr. per ton on ships, crews wholly French.
" " 29 " " " " " " partly "
On return, 27 " " " " " " wholly "
" "141-2" " " " " " partly "

The following further allowances are made to French whalers in the Pacific, which have been out 30 months and upwards, and have taken their fish beyond the 28th degree of north latitude, viz:

20 francs on every 200 pounds of oil and head-matter, up to 31st Dec., 1845.

15 francs on every 200 pounds of oil and head-matter, from 1st January, 1846, until the 31st December, 1850.

The same ships often touch twice during the same year.

2. It will be seen that ships of late years have not generally succeeded in obtaining as much sperm oil as they did 20 years ago. I have attempted to demonstrate the exact amount of the decrease, by selecting as they occur in Mr. Reynolds' lists, 6 ships for each year, out, respectively, the same number of months. But as it is impossible to find that number of ships for every year, out precisely the same time, blanks occur which cannot be filled up, and hence the comparison is incomplete.

Upon this important question, some additional light is thrown by the following calculations, of the average quantity of oil taken per month, after allowing six months passage for each vessel:

Years.	Vessels.	Flag.	Season.	Aggte time out.	Tot. am't.	Av. bbls. per month
1834	58	American	Fall	mos.	75,980	80
1835	12	American	Spring	226	9,050	58
1835	50	American	Fall	987	62,550	91
1835	10	British	Fall	189	10,140	78
1836	12	American & British	Spring	172	8,750	87
1836	52	" "	Fall	1312	69,640	69
1837	16	" "	Spring	240	8,090	56
1837	51	" "	Fall	1247	64,497	68
1838	22	American	Spring	392	18,686	71
1838	1	British	Spring	19	1,060	81
1838	2	French	Spring	17	340	68
1838	41	American	Fall	1092	45,780	54
1838	9	British	Fall	233	10,920	61
1838	1	French	Fall	10	350	87

I regret that I cannot find any data showing this comparison for a longer period.

3. In classifying the trading vessels, I have arranged them according to the port or country to or from which they proceeded, as the most natural way of showing the countries or places with which the Sandwich Islands have mercantile relations. The reader, therefore, is not to suppose that the vessels which appear as to or from Mexico, Peru, Tahiti, &c., bore the flag of or belonged to those countries. The vessels put down as American trading vessels, are only those which appear to have come direct from the United States; besides them, a majority of all the other trading vessels were under the American flag.

4. The facility of communication between the Sandwich Islands and the countries and ports with which they trade, is shown by the following averages of passages:

3 vessels from Acapulco, averaged - - 35 days
29 vessels from Boston, averaged - - 153 days
4 vessels from Bonin Islands, averaged - 47 days
1 vessel from Bodega arrived in - - 15 days
31 vessels from China, averaged - - 60 days
1 vessel from Cobija arrived in - - - 40 days
37 ves. from N. W Coast and Columbia, av. 25 days
3 vessels from Coquimbo, averaged - 42 days
1 vessel from Copiapo arrived in - - 40 days
7 vessels from Cape San Lucas, averaged 19 days
76 vessels from California ports, averaged 20 days
7 vessels from Guayaquil, averaged - 34 days
1 vessel from Huasco arrived in - - 50 days
6 vessels from Kamschatka, averaged - 31 days
4 vessels from La Paz, averaged - - 27 days
48 vessels from Lima or Callao, averaged 38 days
13 vessels from London, averaged - - 159 days
19 vessels from Mazatlan, averaged - - 24 days
7 vessels from Manila, averaged - - 75 days
3 vessels from Marquesas, averaged - 17 days
4 vessels from New Zealand, averaged - 87 days
9 vessels from New York, averaged - 146 days
12 vessels from Norfolk Sound, averaged 30 days
3 vessels from Panama, averaged - - 55 days
2 vessels from Payta, averaged - - 34 days
44 vessels from San Blas, averaged - - 24 days
2 vessels from Sidney, N. S. W., averaged 84 days
3 vessels from Sitka, averaged - - 26 days
1 vessel from Talcuano arrived in - - 51 days
2 from Tres Marias, near San Blas, aver. 19 days
24 vessels from Tahiti, averaged - - 26 days
25 vessels from Valparaiso, averaged - 49 days

5. Till of late years, the Sandwich Islands have been rarely visited by ships of war. This will be best shown by the following statement:

Year.	Arrived.	Name of vessel.
1825	July 9,	H. B. M. S. Blonde.
1826	January 14,	U. S. Sch. Dolphin.
1826	April 20,	H. B. M. S. Blossom.
1826	October 11,	U. S. S. Peacock.
1827	January 27,	H B M. S Blossom.
1828	April 16,	Sp. Privateer, Greek.
1829	October 13,	U S. S. Vincennes.
1832	July 22,	U. S. S. Potomac.
1836	September 6,	U. S. Sch. Enterprise.
1836	September 7,	U. S. S. Peacock.
1836	October 23,	H. B. M. S. Actæon.

6. The commerce of this port for the year 1843, was as follows, viz:

Vessels.	Value of Goods consumed.	Amount of Duties paid.
25 American, - -	$109,267 88 - -	$3,520 93
9 British, - - -	37,849 08 - -	1,164 32
4 French, - - -	2,931 60 - -	148 58
1 Spanish, - - -	4,559 89 - -	136 86
1 German, - - -	2,026 76 - -	60 80
Rec. from sundry ships for transit duties,		239 31
	$156,565 21	$5,270 74

As all whalers are allowed to sell goods to the amount of $200 each, without paying any duty whatever, I think I may fairly add 15,000 for goods introduced under that privilege. If I am right in this, the yearly consumption of goods in Honolulu, may be put down at $171,565, *official value.*

7. The only import duty is 3 per cent., *ad valorem*, upon all goods indiscriminately.

Goods are allowed to be transhipped or re-exported on payment of a duty of one half per 100 ad valorem; or where the import duty has been paid, a drawback of two and a half per 100 is allowed.

All duties on the export of gold and silver were abolished as injurious to commerce, by the law of 28th April, 1843.

There is no export duty on any of the productions of the islands.

The captain, supercargo or agent of all vessels arriving for purposes of traffic, is required to subscribe the following oath: "I, do solemnly swear that the entry now subscribed with my name, and delivered by me to the collector of Honolulu, contains a true account of all goods imported for sale, for me, or on my account, or on account of any house of trade or partnership in which I am concerned at this port, or which actually came consigned to me, or to any house of trade or partnership in which I am concerned, in the whereof is master, from that the said entry contains a just and true account in of the cost thereof, including all charges as per original invoice. So help me God."

No other process whatever is used to determine the cost and quantity of the goods on which the duty is to be charged; there are no appraisers or custom house guards; every thing is left to the honor and oath of the importer or agent, yet I am assured the duties are easily and faithfully collected, at an expense to the government of $500 a year.

8. The harbor dues at this port are the following, viz:

20 cents per ton, on merchant vessels.
6 " " " on whale ships and merchant vessels entering for the purpose of obtaining refreshments only.
$2 for the use of the buoys.
$1 for certificate of clearance.
$1 per foot pilotage for taking a vessel in or out.

No harbor dues are exacted of a vessel having a Hawaiian register, or of a vessel belonging to a resident foreigner who has taken the oath of allegiance.

A vessel owned by a foreigner who has not taken the oath of allegiance, but who resides permanently on shore, in the occupation of a dwelling house or shop, pays only one half of the usual dues.

9. The net revenue of the kingdom, in 1842, was about $35,000; in 1843, it was $50,000; and under wise laws to promote agriculture and population, it is susceptible of great and rapid increase.

The public debt does not exceed $30,000; the interest upon the whole, averages about 12 per cent., and is regularly paid. Ten per cent. of the rents for lands is appropriated for the redemption of the debt. The whole public expenditure is under $45,000; but some of the salaries require to be much increased; and the government desires to establish a regular mail communication with Europe and America, via. San Blas, which will demand a considerable yearly outlay.

The accounts of the treasury, since that department was placed under the superintendence of Dr. Judd, have been kept by double entry, in the native language and by native clerks, with great clearness and regularity.

10. The islands are capable of producing arrow-root, cotton, castor-oil, coffee, silk, indigo, tobacco, turmeric, rice, &c., to a considerable extent; but hitherto little capital has been devoted to the cultivation of these articles.

About 600 tons of sugar and 80,000 gallons of molasses are produced yearly, chiefly through the enterprizing exertions of one American house, Messrs. Ladd & Co.

The yearly produce of kukui or paint-oil, is about 10,000 gallons.

11. Cattle, hogs, horses, sheep and goats, are abundant and rapidly multiplying. Most of the necessaries of life, are cheap and good.

12. The whole population is estimated not to exceed 110,000 souls. The progress of decrease has been lamentably rapid, since the time of Captain Cook, who attributed to these islands a population of nearly 400,000. The evil is not yet staid, notwithstanding all the many social and moral ameliorations introduced by the missionaries.

13. The amount of money in actual circulation, in Honolulu, is thought not to amount to $50,000; but it is believed as much more exists, in deposit, to be used for speculative purposes, when suitable occasions offer.

The amount of bills yearly negotiated for supplies to whalers and ships of war, is variously estimated at from 137,000 to 200,000 dollars; and the rates of exchange are extremely high. The rates of 4s. 10d on Navy bills on London, and of 120 for $100 on New York and Paris, are not unusual.

14. The rules and regulations most important to be known by a stranger, on visiting Honolulu, are the following, viz:

The captain, supercargo or agent is required to present a correct manifest, before landing any goods, under penalty of one fourth of the goods, otherwise landed.

All boats and seamen are required to return to their ships at nine o'clock, P. M., when the first gun is fired from the fort.

THE UNDERMENTIONED FINES ARE ENFORCED:

$10 on any ship throwing rubbish into the harbor, for the first offence; 20 for the second, and then the fine is doubled for every repetition of the same offence.

$1000 on any captain of a vessel, for landing a passengor, without written notice.

$1000 for a breach of the quarantine laws.

Hanging, as a murderer, for knowingly and maliciously violating those laws, whereby a contagious disease is communicated on shore.

$500 on any captain for refusing obedience to the health officer, or to any requisition of the quarantine laws.

$400 for taking on board any native, without the written permission of the Governor.

$400 for taking away any prisoner, and the latter to be returned.

$60 on any captain who leaves on shore any of his men, without leave in writing, from the Governor.

HIST. SOC. OF CALIFORNIA

$100 on every vessel which leaves the port without a certificate of clearance.

$10 for coming on shore with a knife, sword-cane, or any other dangerous weapon.

$2 for every seaman seized on shore, after the firing of the second gun from the fort, at half past nine o'clock, P. M.

$10 on every person who aids, secretes or entertains a seaman on shore, after that hour; and the same *fine* on every person who, by force, opposes the police, in their search for such seaman

$1 to 5 for hallooing or making a noise in the streets, at night.

$6 for striking another in a quarrel.

$5 for racing or swift riding in the streets or frequented roads.

$1 for desecrating the Sabbath for the first time.

$2 " " " " " " second time; and then the fine is doubled for every repetition of the offence.

$6 for drunkenness.

$5 " fornication.

$30 " adultery.

$50 " rape.

$10 " lewd, seductive and lascivious conduct.

$200 on any captain of a vessel touching for repair or refreshments, who does not first render in writing a clear and explicit account of what he intends to purchase, and how and in what articles he is to pay for the same.

$6 reward for catching every deserter near to the harbor; 12 ditto if ten miles off.

For the partial exemption of whalers, in the payment of duties, see note 6th.

Ships can supply themselves with abundance of good water, at the pumps in the village, by paying three cents per barrel of thirty gallons; or by going up the river, they can water without any charge whatever.

Vessels requiring repairs, can have them well done and at a reasonable rate, by Messrs. Robinson & Co; and as for provisions and refreshments generally, no other islands in the Pacific afford equal facilities to those enjoyed at these islands.

15. The weights and measures used are the following, viz:

1 foot of 12 inches.	1 nail of 2 and 1-4th inches.
1 yard of 3 feet.	1 quarter-yard of 4 nails.
1 fathom of 2 yards.	1 yard of 4 quarters.
1 cham of 11 fathoms.	1 fathom of 2 yards.
1 furlong of 10 chains.	1 pio of 3 yards.
1 mile of 8 furlongs.	
1 pound of 16 ounces.	1 pint of 4 gills.
1 quarter of 25 pounds.	1 quart of 2 pints.
1 cwt. of 4 quarters.	1 gallon of 4 quarts.
1 ton of 20 cwt.	1 hogshead of 63 gallons.
	1 pipe of 2 hogsheads
	1 ton of 2 pipes or 252 gals.

16. The coins most current are the Spanish or Spanish American, namely; dollars, half-dollars, quarter-dollars, rials and half-rials; but the undermentioned foreign coins are also taken in payment:

Gold.		*Silver.*	
Doubloon at	$16	Shilling at	25 cts.
Eagle at	$10	Francs 5 at	$1
Guinea at	$4 50	Rix dollars of Hamb. at	$1
Sovereign at	$4 50	Ruble at	75 cts.
Napoleon at	$4	Rupee at	50 cts.
Ruble at	$2	Rix dollar of Denm'k at	$1
Ducat of Holland	$2	Rix dollar of Holland at	$1

Other foreign coins will also be received, and the value relatively to the dollar, determined by weight.

The legal interest for money is one per cent. per month.

ROBERT CRICHTON WYLLIE.

Honolulu, 25th March, 1844.

To the Reverend Samuel C. Damon, Seamen's Chaplain, &c &c. &c.

P. S. Since writing the foregoing account of whaleships in the Pacific, through the kindness of G. Brown, Esquire, Commissioner from the United States, I have been furnished with the *Whalemen's Shipping List*, of 21st November, published in New Bedford.

According to that List, there were then at sea from different parts of the United States, 593 whaling vessels, including one employed sealing, and 82 vessels remained in port.

The distribution of these 593 whalers, at that time was as follows:

In the Pacific, including 70 on the N. W. Coast,	324
In the Indian Ocean,	114
In the Atlantic,	35
In the South Atlantic,	31
In the South Seas,	22
About the Crozette Islands,	18
On the Coast of New Holland,	14
On the Coast of New Zealand,	10
In the Indian and Pacific Oceans,	9
Vessels whose locality was then unknown,	15
Employed in sealing,	1
	593

Thus have the Americans, in this bold and adventurous fishery, exceeded the predictions of the eloquent Burke, in his speech on American affairs, in 1774. No nation has ever posessed such a fleet of whaling vessels as the United States possess at this moment. In 1774, Mr. Burke observed, "While we follow them among the tumbling mountains of ice, and behold them penetrating into the deepest frozen recesses of Hudson's Bay and Davis' Straits,—while we are looking for them beneath the arctic circle, we hear that they have pierced into the opposite region of polar cold. * * * No sea but what is vexed with their fisheries: no climate that is not witness of their toils. Neither the perseverance of Holland, nor the activity of France, nor the dexterous and firm sagacity of English enterprise, ever carried this most perilous mode of hardy industry to the extent to which it has been pursued by this rocent people; a people who are still in the gristle, and not hardened into manhood!" What would he have said now?—*R. C. W.*

The port of Honolulu, Oahu, is in latitude 21° 18′ north, and longitude 158° 1′ west from Greenwich.

The climate of Honolulu is subject to little variation from year to year; and therefore, the above table will give to a foreign visitor a very correct idea of the weather that he may reasonably expect at any particular season of the year. More rain has fallen during the present year than what is usual; as has been the case, also, in Mexico.—[R. C. W.

POETRY.

For the Friend.

AN EARLY IMPRESSION.

BY A SAILOR.

How oft, when but a child, I've roamed
Among the tomb-stones gray,
And marked the records of the dead,
Whose ashes round me lay.

Here stood a splendid monument,
Erected o'er the great,
Who, all unconscious, slept beneath,
Nor cared for earthly state.

While there the simple head-stone marked
The peasant of the soil,
Whose bones amidst his father's dust
Reposed from earthly toil.

Here lay the young, and there the old,
In one unnumbered heap;
Who, till the Resurrection Day,
The Earth hath charge to keep.

While viewing o'er the various throng
Of Adam's fam'ly there,
My heart, though young, would ponder deep,
And something say, "*prepare!*"

Although since then I've wander'd far
O'er seas, and mountains high,
That inward voice hath ne'er been hushed,
"*Prepare, for thou must die!*" G. M. R.

Eng. W. Ship PERUVIAN, Apr. 2, 1844.

THE FRIEND.

HONOLULU, MAY 1, 1844.

The valuable statistical information which this No. contains, has induced the publisher to issue an extra number of copies.

This sheet contains the very best statistical table upon the commerce of the Sand. Islands which has ever been published. Those who will give Mr. Wyllie's table and notes an attentive perusal, will feel themselves much indebted to him for his laborious researches, and to Mr. Reynolds for his diligence in preserving a register of the port for twenty years.

The numerous valuable contributions to our columns necessarily exclude such editorial remarks as we might otherwise have to offer.

The undersigned gladly embraces this opportunity of expressing his very grateful acknowledgments to those Parents and Guardians whose children have constituted his "Select School," during its first Term; and begs leave to state, that a second Quarter will commence on Monday, 13th prox.

A Vacation of two Weeks, at the expiration of each Term, or twelve Weeks.

ANDREW JOHNSTONE.

Honolulu, April 29th, 1844.

DIED.

In Honolulu, April 20, HENRY A. SHERWOOD, a native of New York City, where reside his father, Isaac, and brother, Gilbert, and a nephew, whose name is "John Henry Ludlam"

At Punahou, Honolulu, April 27th, Mrs. EMILY B., aged 26, wife of Rev. Daniel Dole, Principal of the Missoun Boarding School.

On board Ann, of Sag Harbor, WM. E. ROGERS, March 26th, 1844.

Drowned, at Hilo, Hawaii, March 26th, ISRAEL BRITTON, belonging to W. S. Nantucket.

PASSENGERS.—Arrived April 8, on board Am. ship Congaree, Weston, master, from Boston, Mr. Marshall and lady; Mrs. Weston, wife of the master; Miss Marshall; Mr. J. J. Jarves, author of History of Sand Is.; Mr. B. H. Penhallow, printer; Mr. C. Lafranger; Mr. Peter Voss; and Mr. W. P. Reynolds.

April 13th, on board W. S. Hannibal, from New London, Ct., Thos. S. Perkins, Esq.

April 20th, on board brig Ann, from Sydney, via. Tahiti, Major Low, of Beng al land forces; Mr. Bastian; Mr. Suwerkroop; and Mr. Anderson.

April 22d, on board barq. Conception, Bossum, master, from Mazatlan, J. C. Jones, Esq.; and Mr. Jos. Thompson

April 27th, on board Am. ship Lausanne, Spaulding, master, from New York, Rev. Geo. Gary, and lady. Mr. G is the newly appointed superintendent of the methodist mission in the Oregon territory. Mr. G. W. Whistler; Mr. P B. Schemerhorn; Mr. E. S. Fenson, U. S. naval store keeper for this port; Mr. J. Wiley; Mr. B. Spaulding; and Mr. A. A. Luff.

April 26th, on board Eng. brig Phœbe, Bernet, master, from Sydney, Mr. Godfrey Rhodes.

April 26th, on board bk. Brothers, from England, Mr. Roberts and lady.

April 29, on board brig La Fayette, Winchester master, from Boston, Mr. Geo. Parker.

DONATIONS.—From General Miller, $20 00, for chaplaincy. For publishing the Friend, from Capt. Morgan, Am. W. S. Herald, $5 00. From two sailors, $1 50.

The Friend of Temperance and Seamen, published monthly, 8 pages, or semi-monthly, 4 pages, by SAMUEL C. DAMON, Seamen's Chaplain.

TERMS.—$1 50, per annum, One Copy, payable in advance; $3 00, Three Copies; $4 00, Five Copies; $6 00, Ten Copies. Single No. 12 1-2 Cents.

THE FRIEND,

OF TEMPERANCE AND SEAMEN.

VOL. II. HONOLULU, OAHU, SANDWICH ISLANDS, SATURDAY, JUNE 1, 1844. No. VI.

PITCAIRN'S ISLAND.

The readers of the Friend will doubtless peruse with interest the two letters found in this and a former number, written a few weeks since, by a native inhabitant of Pitcairn's Island. The reading world may almost regard the "Quintal family" of Pitcairn's Island, as old acquaintance. Although a history of the settlement on that island has frequently been presented to the public, still a few items of statistical information may not inappropriately be introduced.

The British Government having determined to introduce the bread-fruit into the West-India Islands, sent the ship Bounty to the Society Islands, under command of Capt. Bligh. The vessel sailed from London Dec. 1787. Having obtained a collection of plants, amounting to 1015, Capt. B. left the islands, April 4, 1789, and on the 23d of the same month touched at one of the Friendly Islands. On the 26th, the Bounty again sailed. After being at sea two days, a mutiny took place, headed by Mr. Christian, the mate. The following extract is made from the 7th vol. of the Sailor's Magazine, p. 258:

Pitcairn's Island.

Condensed from the Family Magazine.

Pitcairn's Island is about six miles long, and about three miles broad. The soil is very rich, and it is mostly covered with wood. It lies under the parallel of 25° s. L., and in the midst of the wide expanse of the Pacific Ocean. The climate is fine, and adapted for the growth of all the vegetable productions of every part of the globe. The coast is fringed with formidable barriers, which seem to present insurmountable obstacles to all access: tall spiral rocks appear on every side; and lofty cliffs, skirted at their bases with thickly branching evergreens, afford a welcome retreat from the burning rays of an almost vertical sun. This island has become an interesting spot from the circumstance of its having afforded a shelter to the mutineers of the British ship Bounty, about forty years ago. The British government having determined to introduce the bread fruit into the West-India Islands, sent the ship Bounty into the Pacific Ocean, under the command of Capt. Bligh. She sailed from London in Dec. 1787, and having completed his collection of plants, Capt. Bligh was about to return, in April 1789 Throughout the voyage various misunderstandings had existed between the captain and the crew, the merits of which can hardly be ascertained at this distance of time. At length, just as they were on the eve of sailing for home, a difficulty took place, in the course of which, a Mr. Christian, the mate of the ship, fell under the displeasure of the Captain. In consequence of this, he had determined to leave the ship, on a raft which he had provided for the purpose, and to spend the remainder of his days on the Society Islands. Just as he was about to put his plan in execution, it was suggested to him by a young officer that the disaffection was very general in the ship, and that he had better take the ship, and put Capt. Bligh and those who adhered to him on shore. This proposal was adopted. The captain with eighteen others were forcibly put into the launch, with a small stock of provisions, and set adrift. After enduring almost incredible hardships, the launch arrived at the island of Timor; from thence they got passage to Batavia, and thence to England. The mutineers who took possession of the ship, amounted in all to twenty-five persons. Mr. Christian, the mate, was chosen captain, and they sailed for Tahiti, the principal of the Society Islands. After cruising about for some months, sixteen of the crew took their proportion of the property on board the ship, and landed at Tahiti, with the design of spending their lives there; the remainder took on board thirty-five natives, men, women and boys, and put to sea, and for many years were not heard of. It was currently supposed the ship had foundered, and that they were all lost. After the return of Capt Bligh to England, the frigate Pandora was despatched to the Society Islands, to secure the mutineers, if they could be found. On arriving at Tahiti, they succeeded in apprehending fourteen of the sixteen who had landed there, the other two having been killed in a quarrel with the natives. With these fourteen prisoners the Pandora sailed for England, accompanied by a schooer which the mutineers had built at Tahiti. On the passage home the Pandora was wrecked, and four of the mutineers were drowned. When they reached England, the remaining ten were put on trial; four were acquitted, as having acted under constraint; one was discharged on account of informality in the indictment; five were found guilty, and condemned to death, but two of these were afterwards pardoned, and three were executed. Here the whole thing rested for twenty years, and was almost forgotten. About the year 18 0, Capt. Folger, in ship Topaz of Boston, discovered the descendants of the mutineers on Pitcairn's Island. Three years after this, Sir Thomas Staines, in the English ship Briton, sailing from the Marquesas Islands to Valparaiso, fell in with Pitcairn's Island. It does not appear that he had heard of the report made by Capt. Folger; for on arriving in the offing, it being night, he hove to, in order to ascertain whether the island was inhabited. In the morning, he was surprised to see the land laid out in regular plantations, and scattered with huts more neatly constructed than the native dwellings in the neighboring islands. When about two miles from the shore, they saw some natives bringing down a canoe on their shoulders, which being launched, two of them stepped into it, and dashing through the surf, rowed up alongside of the ship. But what was the astonishment of Capt. Staines and his crew in hearing one of them call out in good nautical English, "Won't you heave us a rope now?" This was complied with, and the strangers were instantly on deck, and soon explained the mystery. The name of the oldest was "Thursday October Christian," the first-born on the island, and son of the identical Fletcher Christian, the mate of the Bounty, and leader of the mutineers. His companion was "George Young," son of another of the mutineers. Capt. Staines invited the young men to go below, and take some refreshments; where the surprise and interest of the officers was not a little increased, when on having the provisions set before them, Christian rose up, and placing his hands in a devotional posture, repeated in a serious and pleasing tone of voice "For what we are going to receive, will the Lord make us truly thankful." From these young men, Capt. Staines learnt that one only of the mutineers was living. His original name was Smith, which he had changed to that of "John Adams." He was at first greatly alarmed at the visit of Capt. Staines, thinking he had come to apprehend him; but becoming quieted on that score, the officers and crew were received with cordiality. In 1825, Capt. Beechy visited Pitcairn's Island, and received a full account of that part of the Bounty's crew who settled there, which Adams signed with his own hand.

It seems that after leaving Tahiti, Christian directed his course to Pitcairn's Island, of which he had some knowledge. It was then uninhabited. He run the ship into a little bay, called at the present time "Bounty Bay," from this circumstance. There they landed, stripped the ship of every thing valuable, and burnt her up. They divided the island among themselves, took the native women they had brought with them for their wives, and with the greatest injustice, made slaves of the native men. For about two years things went on in tolerable prosperity, when the native men rose on the whites and murdered all but four. The native women, widows of the whites, in retaliation sought an opportunity and killed the native men. This was on the third of October, 1793. There then remained on the island John Adams with three other men, ten women and several children. Two of the surviving mutineers were quarrelsome, wicked men. One of them named M'Coy, had some knowledge of the process of distilling, and after many experiments he suc-

ceeded in obtaining an intoxicating liquor, and drinking it freely, he became delirious, and threw himself from a cliff and was killed. His wicked companion, named Quintal, having lost his wife about the year 1799, demanded the wife of one of his companions, and on being refused threatened to murder them both, and being a very vile man would probably have executed his threat, had they not for their own safety and that of their infant colony put him to death. Adams and Young were now the sole survivors of the mutineers. They were both, and particularly Young, of a serious turn of mind. The scenes through which they had passed had made a deep impression upon them, and they resolved to devote the remainder of their days to penitence, and the instruction of their children and those of their misguided companions, together with the native females who remained with them. They established religious services on the Sabbath, and on other days. The education of Young was tolerable, and greatly assisted them in their laudable undertaking. But he did not long survive his repentance. An asthmatic complaint terminated his life in about a year after the death of Quintal, and Adams was left as the only survivor of the mutineers of the Bounty. The loss of his companion was a severe affliction to Adams, and disposed him more than ever to repentance, and to the execution of the pious resolutions he had formed. Young died about the year 1800. The population of the island then consisted of nine native women, all widows, with the exception of Mrs. Adams; nineteen children, all between the ages of seven and nine; and John Adams, the only man, and patriarch of the whole colony, who was then forty years of age. The moment was a favorable one though the work was arduous, particularly as it related to the conversion of the native women. In this, however, Adams was very successful, and their example had a powerful influence on the children, and produced those effects which so much astonished those who discovered the colony. In 1825, when Capt. Beechy visited the island, the colony consisted of sixty-six persons, viz: Adams, five native women, and sixty young persons, married and unmarried, together with children. Adams died in March, 1829, at the age of sixty-six years.

As the colony increased, some apprehensions were entertained that the island might prove inadequate to the support of the inhabitants, and in March 1831, the whole colony accepted an offer made them by a British vessel, and embarked for Tahiti. Their stay, however, was short. The manners of the Tahitians were different from their own, and their morals were in some measure corrupted. They were also attacked with diseases new to them, and seventeen of their number died. They requested to be allowed to return, and were put on board an American vessel and taken back to their native island."

No. 2.

PITCAIRN'S ISLAND, Feb. 9, 1844.

REV. S. C. DAMON, SEA. CHAP.:

Dear sir,—I return you many thanks for the papers you sent me for the benefit of the Island; and I will endeavor, as far as I am able, to satisfy your demands, by answering you, in the first place, that religion is very low at present; public school, weekly meetings for perusing the scriptures and Sunday school for children, are entirely given up by the school-master and minister of the island, to the great grief of many parents who are entirely unable to teach their own children the common art of reading, writing and arithmetic. We shall esteem it a great favor if you will represent our case to the missionary society at home, and see what is to be done. Ever since the death of John Adams, I may safely say religion has been on a decline. The Island contains one hundred and fifteen inhabitants. Twenty are married persons, and their names are as follows: John Quintal to Dinah Young; Thursday Christian to Mary Young; John Buffett to Dolly Young; Arthur Quintal, jr. to Martha Quintal; Matthew M'Coy to Margarett Christian; Charles Christian to Charlotte Quintal; Fletcher Christian to Peggy Christian; John Adams to Caroline Quintal; George Nobbs to Sarah Christian; John Evans to Rachel Adams. Persons under twenty years of age, eighty-five in number; above twenty years, thirty. The eldest native-born, is about fifty years of age. One of the Bounty's women is still alive, viz: Edward Young's wife; and I should take her to be about eighty. There are several of age to marry—say ten males and about twenty females. There are three Englishmen living amongst us; their names I have mentioned before—G. Nobbs, J. Buffett and J. Evans;—no Americans. Ships touching for supplies last year, were thirty-two in number; and whilst I am writing, there are six ships laying off and on—all wanting supplies; some thirty bbls, some twenty bls., some more and some less. But they are forbidden to sell any quantity of rum here. In fact, almost all the natives have signed a pledge never to drink rum; and if there are no buyers there can be no sellers.

We are well provided with books at present; but if ever it should fall in your power to send some writing-paper and some pens, it will be very acceptable indeed. The principal employments are farming and carpentering. The school is maintained by the people. We enjoy preaching twice on the Lord's day. How can religion prevail when a man who is well known to be a common sailor officiates?

Most truly, and
Affectionately, yours,
ARTHUR QUINTAL, jr.

OUR NEW-YORK CORRESPONDENT.

NEW YORK, October 9, 1843.

DEAR FRIEND,—Last Friday, the 6th inst., I wrote you a running line, so hastily as to satisfy neither of us. It has occurred to me that a sort of miscellaneous epistle, made up of odds and ends, like a Yankee hash, will be acceptable both to yourself and your good wife: so taking time by the forelock I begin. I shall call to my aid such members of my family as are disposed to send their thoughts around the "Horn;" and filling this sheet, perhaps sheets, piece-meal, we shall be ready for the next vessel going to the Sand. Islands. I shall study no connection of topics, but clap them down as they occur. And,

1st, HIGH CHURCH EPISCOPACY.—*Rare Developments.*—A young man by name Carey, was ordained recently in this city by Bishop Onderdonk. Now Carey was and is a Romanist! The Evangelical Episcopalians, and almost the entire "secular," with the religious press of all denominations, are out against this outrage on the principles and practices of Protestants. The High Chh. are crying, "*Hush! Hush!* Don't make such a fuss about *nothing!* Be quiet brethren. Don't be guilty of the enormous sin of Schism. Don't rend the seamless garment of Christ!

We cannot now tell even the beginning of the end of this matter. But we devoutly pray God to sift the arrogance, the exclusiveness and Romanism of prelacy out of our land

2d, TRINITY CHURCH—A new edifice going up on Broad-way, at the head of Wall st., New York. Cost at least half a *million!* Designed to have more chiselling on its walls, better painting, a richer finish and the highest steeple in the U. S. Designed to glorify both God and man; but *man* the most!

3d, ABOLITIONISM.—Its ultraism dead or dying; while sounder views on the subject of slavery are gaining currency and strength in this country.

4th, MILLERISM.—or, *End-of-the World-ism*,—Nearly gone by its own limitations; while some of its advocates seem quite wrathy that the world should be *too wet* to burn up yet.

5th, MORMONISM,—*with Joe Smith & Co.*—This fanatical sect seems to hold its own, at Nauvoo, Ill.; I know not why, unless it is because the human heart is too proud too recant, or *total* depravity is too wicked to get worse.

6th, The Rev. E. N. Sawtell has accepted the office of Fin. Sec. of the For. Evangelical Soc'y, and is now on his way from Havre to New York.

Oct. 10.—As I write, at odd times, I write *numerically*, so that at a glance I may see what I have said; so you now have—

7th, REVIVALS.—As you have heard doubtless from various sources, the last has been a wonderful year for the out-pouring of the Holy Spirit. These revivals have been characterized by great solemnity, depth of convictions and clearness of conversions; consequently, they have been devoid of morbid excitement, and very healthful in their influence on the community. The churches have gained valuable accessions

8th, TEMPERANCE.—So much piety, religious principle and weight of character have been enlisted in this work, as to move it steadily onward; while the hand of the Most High has directed, and educed the most glorious results. Sailors, even man-o'-war's-men are enlisting in the enterprize, with *a will;* and you know what *agents* they make. The Marine Temperance Society of this city now numbers about 11,000 members.

9th, BUSINESS.—In its various branches, there is a decided improvement. Long faces are growing short, and short purses growing long.

10th, HOME MISSIONS.—Since you left the U. S., this subject has had a steady and healthful gain in the public mind and heart, as well as in the amount of its receipts. It is destined, as it deserves, to rise still higher.

11th, FOREIGN MISSIONS.—This subject has also a strong hold on the sympathies, prayers and efforts of the good; yet the Board (A. B. C. F. M.) has been greatly embarrassed. The gain in this department, though obvious, has not been so manifest as the Home Missions.

12th, THE SEAMEN'S CAUSE, is coming *up, up;* and indeed it is *high time.* In all our cities movements for the benefit of the sons of the sea are either in contemplation or successful progress. Success crowns all judicious efforts; and here effects become new *causes*

to produce other effects; and thus, with God's blessing, this work is destined to move on gloriously. Our new Sailor's Home is attracting great attention, and is doing great good. Boston is now collecting funds to erect a Home, to cost about $30,000. Mariner's Churches are generally better filled, and the Word preached is eminently efficacious.

13th, The Independence of your Islands, will be acknowledged; Lord Geo. Paulet to the contrary, notwithstanding. But were not his doings abominable? I have heard but one feeling and sentiment expressed, and that one of *indignation*.

14th, Politics — This is almost *terra incognita* to me; as my mind and heart are too full of other matters to dip into these turbid waters. Henry Clay now has as good a chance of living in the White House as any of the boys. Van B. has but little respect, and less love, from anybody. Why Dan. Webster is not run into the Presidential Chair, I know not; unless the unprincipled fear he will have too much *integrity* to answer their selfish designs. The political papers are pushing forward their notions and candidates as if determined to carry by storm what cannot be achieved by manly encounter. But avast there! Don't you marvel at my *studied connection* of topics. Yours till another day

Oct. 14.—Colleges.—The colleges in the U. S. have had fewer students than usual, of late. They seem now to be renewing their numerical strength. The *monetory* State, of the valley of the Miss. well nigh ruined some of her best institutions Dr. Beecher is holding on at Lane Sem. Illinois College, Wabash College, Marietta College and Hudson College have united with Lane Sem'y in a sort of College Society; the object of which is, to beg funds at the East to keep the breath of life in them. Report says that Rev. Theron Baldwin of Ill. is to be their agent.

16th, Romanism.—Really I have no sympathy in the cry that the R. Catholics are to take this land. True they are straining every nerve, especially in the Great Valley, yet infallible Rome is so antipodes to fallible republicanism, that I do not believe it possible for the Pope to reign here Everything *foreign* is an *exotic* here, and cannot thrive along-side of native plants.

17th, Since writing the above the truth of the tidings of the *independence* of your islands has been confirmed, and gives the most hearty satisfaction to everybody.

18th, Visitors.—For several weeks our city has been thronged, and now comes the famous Gen. Bertrand; the man who strewed the fields of Europe in carnage and blood under Napoleon Bonaparte; who attended his fallen commander in exile at St. Helena; who closed his eyes and buried his poor remains; who received the Emperor's bones when removed, and deposited them in the heart of the French Capitol. If mere human attachment be worthy of praise, none deserve the meed more than B. Yet I look upon such a man as a *Great Butcher's Aid;* as having shed more blood than a world could make atonement for! Yet our citizens and the French residents of this city are gathering around to glorify him.

19th, Storm.—What a night for the poor sailor was the last. We shall hear of many a poor fellow "gone down quick,"

"And not a stone tell where he lies."

20th, Mesmerism.—This, like its subjects, is going to sleep; yet it has some staunch advocates, and I must confess there are some strange *staggering things* about it not satisfactorily accounted for to my mind. Of this, however, et id omne genus, I am constrained to ask, cui bono?—Of what practical benefit to anybody?

21st, The Bible in Common Schools.—The R. Catholics, the Universalists and Jews have united in an effort to drive the Bible and all Evangelical books from our schools in this city. They have been triumphantly defeated, and signally rebuked. Amen.

22d, Murders.—Last night a man just in my neighborhood murdered his wife. Crimes of this kind are, I know not why, becoming of alarming frequency Some time since a Mr. O'Sullivan, a man of considerable talent, made a strong effort to arouse the community to abolish capital punishment. The Legislature of Conn. came near doing it. so also have some other States. O'Sullivan came to this city, and was met in public debate on the subject, by Rev. G. B. Cheever.—Cheever *annihilated* him. Since that time, public sentiment has again been setting strongly in the direction of shedding the blood of the man who sheds the blood of others.

Oct. 31.—I have given you a long, and I fear tedious chapter of *miscellany:* so I will stop the *press* here. Having given you time to breathe, after reading this, you shall have another.

Yours, affectionately, S.

Rev. S. C. Damon, *Chaplain, Honolulu, Sand. Is.*

THE FRIEND.

Honolulu, June 1, 1844.

THE POLYNESIAN.—NEW SERIES.

Who is not rejoiced to see the "Polynesian" revived, under the editorial management of the gentleman who formerly conducted this journal? A weekly journal has for a long time been much needed, and now we most sincerely hope that the reading public will exhibit a liberal spirit in sustaining Mr. Jarves, in the prosecution of his laborious and expensive undertaking. The typographical execution and general appearance of the specimen number, is a pleasing earnest of what the reader may expect in future. We take pleasure in publishing the "prospectus," hoping thereby to aid in the circulation of the paper:

"Prospectus, for publishing a new series of the Polynesian—*A weekly journal of four pages.*—To contain more matter than the old Polynesian, and to be devoted to the interests of the country, commerce, agriculture and literary and scientific intelligence Its columns will be open to the discussion of all subjects which may interest the community, avoiding all personality or intemperate declamation. It will be the steady endeavor of the Editor to sustain it in an independent and impartial manner,—its general principles being similar to those maintained in the former Polynesian; and, by the aid of the Foreign Residents, he hopes to make it deserving of a liberal share of their patronage.

"*Terms* —$6 per annum.

"The paper will be continued annually, without fail, provided it secures sufficient subscribers to defray the cost of publication."

SPELLING-BOOKS WANTED IN THE FORECASTLE.

Very soon after the Editor entered upon his duties as Seamen's Chaplain, sailors began to apply to him for spelling-books. It may in truth be said that there has been a constant application. Englishmen, Americans and Portuguese have been among the applicants. Recently, a Dane applied. Those who may say there is no encouragement to labor for sailors, are most wofully ignorant of the real truth in regard to their situation. Sailors are a reading people. If they have good books, those will be read; but if not, bad ones will take their place. Many among them not having enjoyed the advantages of an early education, or not having improved those advantages which they have enjoyed, feel mortified and are sincerely desirous of improving their condition. Who that luxuriates in the rich banquet of the "printed page," does not rejoice to learn that others are striving to become fellow guests? For our own part, next to the privilege of pointing an inquiring sinner to the "Lamb of God," is that of introducing an uneducated mind to "the glowing field of letters."

In consequence of arrangements made eighteen months since, two dozen spellingbooks and other primary reading books have recently been placed in our hands for distribution, by the Am. Sunday School Union. During that period, several dozen have been disposed of among seamen. Our present supply will soon be exhausted; hence the Seamen's Chaplain would respectfully solicit donations of spelling-books, arithmetics and other school-books, for distribution. More upon this subject hereafter. To corroborate the foregoing remarks, the following appeal from the forecastle of a whaleship is inserted:

Forecastle of Whale-Ship Hannibal,
Honolulu, Oahu, S. I., May 22, 1844

Rev. S. C. Damon:

Respected sir,—Although much has been said and written on the privations which are incident to those whose "business is upon the mighty deep," and different means used to make their situation more agreeable, in a moral point of view, still you will bear with me, while from my own short *experience* I shall endeavor to point out one method for improving the sailor while at sea. On this voyage, as well as a previous one, I have met with young men of bright intellects, but to their regret if not shame, could not read or write their own names. There are many, very many, of this stamp on board of all our ships; and on this account how very desirable that a good quantity of "Spelling-Books" should be on hand for circulation. I have never met with any of them who exhibited the least unwillingness to study, but on the contrary seized with the greatest avidity every opportunity to gain some information whereby their situation might be improved and their minds stored with useful knowledge. As soon as our ship anchored and the first boat put off for the shore, three men came and asked me to procure spelling-books for them if possible. I inquired at the different stores, but found none; and I saw disappointment seated on their brows when I gave the intelligence of my inability to procure them. But thinking that I might possibly obtain them of you, I made the inquiry, and procured them. While I am writing, men of twenty-two and twenty-three are spelling out the first lessons in reading, from the books you gave. The influence of the spelling-book on board ship is great. It promotes a desire for knowledge, and thus it is that every Tract, Magazine, &c., that is sent on board is carefully preserved and perused, while in many instances the spelling-book is the first cause, under the blessing of God, of many conversions which take place at sea. I have found considerable difficulty in procuring them at the different places we have been at. We have many on board our ship, who, had they the knowledge of a spelling-book, would speedily rise to the situation of mates and masters of ships, while now they must be content with petty offices and small remuneration for their services. And now, sir, if when at home they do grow careless, and when at sea imbibe a desire to learn, should there not be a good supply of elementary books kept at such a place as Honolulu, that their desire may be gratified and society benefitted?

Perilous enough is the life of the man who rises from one step to another, and becomes a master; yet how much increased is the situation of him who plods his weary way in the same capacity as a common sailor, with no encouragment of promotion. In almost all ships there are some who are willing to show their "shipmates" anything that will improve their minds and prepare them for future action. Thus the spelling-book opens the way for the reception of Tracts and other books designed to lead the wanderer to Him,

Who guards and guides where e'er he roams,
And brings him safely to his home.

Yours, truly,

A Sailor.

ditto, sperm; bbls 240
Tortoise-shell; lbs 300
Whale-bone; lbs 118,682

NOTES.

1. By deducting the goods entered outwards and those transhipped, from the goods entered inwards, a very exact idea will

be formed of the total consumption of the Honolulu market, for the year 1843, so far as official documents show it.

The value, as given in to the customhouse, of the goods imported, exported and consumed, in 1843, is thus stated by Mr. William Paty, collector of customs:

Imports, $223,383 38 cts.; exports, $66,818 17 cts.; consumption, $156.565 21 cts

2. Some knowledge of the commerce of the place may be gleaned from the following results of statements prepared by Messrs. Peirce & Brewer, respectable merchants of Honolulu, which were published in the Polynesian, on 12th September, 1840, and 4th September, 1841:

IMPORTS INTO THE PORT OF HONOLULU, DURING THE YEARS,—	UNITED STATES.	CALIFORNIA & ISLANDS ADJACENT.	CHILI.	MEXICO.	CHINA.	ASCENSION AND TAHITI AND OTHER SOUTHERN ISLANDS.	NORFOLK SOUND, COLUMBIA RIVER AND N. W. COAST	GREAT BRITAIN.	PRUSSIA.	MANILLA.	TOTAL VALUE.
	Consisting of cottons, bleached, unbleached and blue prints, chintz, hardware, copper, cordage, canvass, naval stores, flour, bread, wines and spirits, furniture, soap, iron, paints, &c.	Sea and land otter skins, furs, hides, tallow, wines horses, &c.; but principally otter skins and bullock hides.	Almonds, nuts, and same articles as those from the United States.	Specie and bullion principally.	Blue nankeens, blue cottons, teas, silks and some British goods.	Turtle shell, oil, pearls and pearl shell, sugar, &c.	Lumber, spars, salmon &c.	Long cloths, prints and chintz, hardware, glassware, woollens, hosiery, spirits, &c.	Cotton goods, broad-cloths, gin, glassware, &c.	Goods Chinese, British, American; cigars, rope, coffee, hats, mats, &c.	
1836	151,000	73,900	29,000	36,600	70,000	21,500	24,000	10,000			[illegible]
1837	170,000	49,500	23,000	29,000	47,000	10,500	8,000	8,000	5,000		350,500
1838	73,000	61,900	10,000	20,000	30,000	1,500	5,000	5,600			207,000
1839	231,000	26,500	31,000	42,000	31,000		5,000	10,000	2,000		378,500
Up to 17th Aug., 1840	117 000	17,000	28,000	20,000	15 000		4,000	2,000		15,000	228,000
From 17 Aug. 1840, up to 17th Aug., 1841	193,000	42,700	39,000	20,000	40,000	6,500	12,000	92,000			445,200

EXPORTS OF NATIVE PRODUCE, DURING THE YEARS,—	Sandal wood, at $7 per picul.	Bullock hides, at $2 each.	Goat skins, at 23 cts. each.	Salt, at $1 1-4 per bar rel.	Leaf tobacco, at 15 cts. per pound.	Sugar, at 5, 6 and 7 cts. per pound.	Molasses and syrup, at 25, 25, 30 and 37 cts. per gallon.	Kakui oil, made from the cruddle nut, and used for paint.	Sperm oil, taken by Oahu vessel.	Arrow root, at 5 cents per pound	Provisions, salt fish, vegetables & fresh, sold to ships of war, and to whaling and merchant vessels.	TOT'L VAL
1836	$26,000	12,000	4,600	4,400	500			400		300	25,000	73,200
1837	12,000	13,000	4,500	2,700	300	300	1,000	600		200	45,000	79,600
1838	6,000	10,000	3,000	1,400		6,200	3,450	500		300	35,000	65,850
1839	21,000	6,000	1,000	2,000		6,000	3,000	500	1,000		[illegible]	[illegible]
Up to 17th Aug., 1840		18,000	10,000	2,250	300	18,000	7,300	500		1,700	16,000	75,050
From 17 Aug. 1840, up to 17th Aug., 1841		10,000	4,140	2,250		3,000	1,390	2,090 k.oil, to-bic. &c	9,900	3,320	69,200	93,280

The above table shows a total amount of imports, for five and a half years, of 2,012,200 dollars; of which, the yearly average is $365,854; against which, we have only $223,383 38 cts. for 1843, according to Mr. Paty's statement. But from these data we are not to infer a proportionate decrease in the imports for 1843; for the duties received by the customhouse in 1843, were larger than in any previous year. And Mr Paty gives only the value of goods imported as officially declared by the importers, whereas Messrs. Peirce & Brewer gave the invoice value only where they knew that value; and where they did not, they fixed the value of invoices according to the sales actually made of the same on the spot. Besides, the table formed from the calculations of Messrs. Peirce & brewer, comprises goods imported into Honolulu, purchased by traders there, and re-exported to California, the Russian settlements, and other islands in the Pacific. Neither their statement nor that by Mr. Paty, includes the large quantity of merchandise brought to Honolulu, but destined for and carried away to other markets, without being landed or exchanging hands.

3. The difference in the value of imports, taking that value from the prices declared on entry, in place of the prices obtained by sale here, may be seen by the prices in the entries, fixed on the following goods, viz:

	(RANGE OF PRICES.)
Beer,	45 cts., $1 50, $2, and $2 75 per dozen.
Beaver skins,	$3 each.
Brandy,	22 1-2, 35 and 40 cts. per gallon.
Beaverteens,	$6 per piece.
Beef,	$5 per barrel
Biscuit,	$3 to $3 50 per cwt.
Broad cloth, (blue)	$35 92 cts per piece.
Canvass,	$11 to $20 per bolt.
Copper nails,	20 1-2 cents per lb.
Coffee,	6, 8 and 10 dolls. per cwt.
Champagne,	5 and 9 dolls. per dozen.
Cottons, (blue)	10, 11 and 12 cts. per yard.
ditto, (brown)	5 cts. per yard.
Calico,	6 and 10 cts. per yard.
Cotton, (white)	8 1-3 cts. per yard.
Duck,	7, 10 and 12 dolls. per piece.
Drill, (blue)	9 cts. per yard.
Flour,	$1 50, 5 and 6 dolls. per barrel.
Gin,	$2 per dozen.
Grass cloth,	12½ per piece.
Hides, (bullock)	$1 50 and $2 each.
Horses, (California)	$15 each.
Hats,	$2 each.
Handkerchiefs, (cotton)	44 cts and $1 68 per dozen.
ditto (black silk)	$5 50 per piece.
ditto (red do)	$8 per piece.
ditto (white do)	$6 per piece.
Ham,	7 cts per lb.
Mares, (California)	$6 each.
Muslins,	$4 per piece.
Otter skins, (land)	$3 each.
Otter skins, (sea)	$32 54, 36 and 40 dolls each.
Oil, (sperm)	50 cts per gallon.
ditto (whale)	25 cts per gallon.
Plank,	4 cts per foot.
Prints,	11 and 13 cts per yard.
Pork,	$5 per barrel.
Pepper, (black)	5 1-2 cts per lb.
Rum,	15 1-2 to 20 cts per gallon.
Rice,	$1 50 per bag.
Soap, (California)	at 10, 13, 15, 16 and 18 cts per box.
Saddles, (riding)	$10 each.
Shingles,	from 60 cts to $4 per M.
Shawls, (crape)	$6 63 each.
Shoes,	90 cts per pair.
Stockings, (silk)	$4 per dozen.
Tallow,	$1 50 per arroba (of 25 lbs.)
Tobacco,	15 cts per lb.
Wine, (Spanish)	$4 per barrel.
Whale-bone,	15, 16, 18 and 22 cts per lb.
Wine, (California)	$12 per cask.
Whiskey,	15 cts per gallon.

4. HINTS FOR THE CUSTOM-HOUSE.—The great difference in the price of the same article, as delivered to the custom-house, in different invoices, is very remarkable. It is no entirely to be accounted for by the difference of original prices in the different ports whence the goods proceed I fear some importers feel the obligation of their oaths, subscribed to each entry, less stringently than others But where the duties are so moderate, and where all is left to the good faith of the importers, the government has a right to impose some check upon the values which they declare. And I do not see that a less objectionable check could be contrived than the enactment of a law providing that the government, whenever they have reason to believe the declared value to be incorrect, should have the power to take, on their own account, the goods so undervalued, at the prices declared, adding to the same as much more as may be sufficient to pay all charges, and a moderate profit to the importer.

To allow of the adoption of this or any other reasonable check, the entries would require to be more specific and detailed than in the present regulations require them to be. Amongst the items of entries which I have examined, are the following, viz:

Broadcloth,	1 case,	at	$437 90
Calicoes, brown,	4 bales,	"	73 00
Cloth, long,	9 bales,	"	518 00
Cottons, brown,	11 bales,	"	325 00
ditto, ditto,	11 bales,	"	712 94
ditto, white and printed,	7 bales,	"	875 97
ditto goods,	6 bales,	"	389 88
Crockery ware,	8 casks,	"	439 12
Drill, striped,	4 cases,	"	161 00
Dry goods, assorted,	4 pckgs,	"	1,497 55
ditto ditto,	7 boxes,	"	9 7 77
Drilling, sheeting & bedtick,	18 bales,	"	777 27
Furniture,	15 boxes,	"	452 15
Glass, window,	30 boxes,	"	86 25
Hardware,	27 pckgs,	"	1,848 05
Handkerchiefs, red,	1 case,	"	149 00
Jewelry,	1 box,	"	70 00
Lacquered ware,	48 cases,	"	656 00
Madapollams,	9 cases,	"	518 00
Prints,	6 cases,	"	1,258 72
Silk hdkfs, assorted,	19 cases,	"	3,944 00

Besides these there are many others, but these suffice to show the expediency of requiring the importers of goods, in their manifests, to specify the marks and numbers of the packages, the description of goods contained, the number of pieces, yards, weight and measure, and the price per piece, yard, cwt., pound, gallon, or otherwise, as the case may be.

Under such a system, not only would it be more

easy to compare one invoice with another, and to detect any attempted fraud, but there would be a facility, at the end of every year, to make out an exact statement of the goods consumed, during that year; the advantages of which, both to the government and to the merchant, are sufficiently obvious.

At present, nothing so exact can be attempted; yet in justice to this young government, and to Mr. Judd and Mr Paty, who conduct its financial affairs, I may mention that the very possibility of forming from their official papers even the imperfect table which I have given above, reflects much honor upon their administration. I am not sure that in Spain, or any of her former colonies, unless it be in Chili, it would be possible to render such a statement from any records they keep: if *possible*, I am convinced it would at least cost much more trouble than I have found with the custom-house records of Honolulu; access to which, has been kindly and liberally allowed me.

(TO BE CONTINUED)

CONSTITUTION OF THE HAWAIIAN BIBLE SOCIETY.

1. This Society shall be called the Hawaiian Bible Society, auxiliary to the American Bible Society.

2. The sole object of this institution shall be to facilitate the circulation of the Holy Scriptures at the Sandwich Islands, "without note or comment."

3. All persons contributing one dollar annually to the funds of the Society, shall be members, and allowed to purchase Bibles and Testaments at cost prices.

4. Any person contributing ten dollars at one time, to the funds of the Society, shall be a life-member.

5. The funds of the Society arising from contributions, sales of Bibles, grants from the American Bible Society, or from any other source, shall be employed in printing and circulating the Holy Scriptures, at the Sandwich Islands.

6. The Society shall elect annually a President, two Vice-Presidents, a Secretary, Treasurer, and an Executive Committee, consisting of the Secretary, Treasurer, and three other members, who, in case of a failure of an annual election, shall hold their offices until a new election is made.

7. The President, and in case of his absence, one of the Vice-Presidents shall preside at all meetings of the Society, and have power, by a suitable notice to call especial meetings of the same. In case the presiding officers are absent, a chairman may be provided for the occasion.

8. The Secretary shall notify all meetings of the Society, and of the Executive Committee, arrange the business to be brought before them, and keep the minutes of their doings; shall notify the persons chosen officers at an annual meeting, when not present, of their appointment; shall conduct the correspondence of the Society, and prepare a report for the annual meeting; a copy of which, including the list of officers, he shall forward soon after to the secretary of the American Bible Society.

The Treasurer shall take charge of all funds belonging to the Society, keep an accurate account of the same, and hold them subject to the direction of the Executive Committee, and shall make a report at the annual meeting of the Society.

10. The Executive Committee, a majority forming a quorum, shall meet from time to time, to manage the business of the Society. They shall direct the Treasurer in the appropriation of all monies, and regulate the procuring and distribution of the Scriptures; they shall enact their own by-laws, fill vacancies in their body, make arrangements for the annual meeting, and adopt the most energetic measures in their power to advance the interests of the Society.

12. Any Bible Society or Association which shall become a Branch of this Auxiliary, and shall forward its annual report and monies collected, shall be furnished with books from this Society at cost price; and all persons paying into the treasury of said Society a sum equal to the amount necessary to constitute a membership of this Auxiliary, shall be a member of this Society.

12. There shall be an annual meeting of the Society on the last Wednesday in May, when the accounts of the Treasurer properly audited, shall be presented; the annual report read, officers chosen, and such other business transacted as shall be deemed expedient.

13. This Constitution may be altered at an annual meeting of the Society, by a vote of two thirds of the members present.

For the Friend.

OBITUARY TRIBUTE.

Mrs. Emily H. Dole, who was called on the 27th ult. from the sorrows and labors of this world to the felicities of eternity, was born in Hallowell, a beautiful town on the Kennebeck river, in the state of Maine. Her father was a sea captain, who died at New Orleans, of the yellow fever, leaving a wife and eight children to mourn their irreparable loss. The following sentences from her own pen, portray some of her early history:

"I came from a family bound together by such a tie of joys and sorrows as seldom has been the lot of any family within the circle of my acquaintance.

"I was the first whose heart was reached and whose eyes were opened to see our lost condition, as a family, without God and without hope. This was in early life. The sudden, and to us, dreadful providence of God, in the removal of our dear father, was the means of my deep awakening. I struggled on in alternate hope and despair, for several years, without one spiritual adviser, until at length the Savior opened to my thirsting soul the fountains of living joy. Since that time, the conversion of my family has been the first and crowning object of my wishes. Prayers and tears, and groanings of spirit which could not be uttered, were on their account my attendants."

Her prayers and faithful efforts for their spiritual good were not in vain; for she continues, "My Heavenly Father has done more than I had much reason to expect in so short a time; and I cannot doubt but that he will carry on his work in the hearts of all who remain."

Nor were her efforts confined to the members of her own family. Being often engaged in teaching school, and being aware that her influence would extend beyond this life, she directed her efforts accordingly. Having gained the confidence and affection of her pupils by the interest she manifested in all that pertained to them, it was her great object to induce them to remember their Creator in the days of their youth; and she had the satisfaction of knowing that these efforts in some instances were crowned with success.

As a teacher, she was successful and popular. Possessing an insatiable thirst for knowledge herself, she was able to enkindle a degree of enthusiasm of the same character in the bosoms of her pupils.

In the Spring of 1837, she took charge of the female academy just established in Norridgewock, Me., and here her efforts were unremitted in teaching the young ladies of her charge science and the fear of the Lord. Here also she was a Sabbath school teacher. And indeed, wherever she spent a few weeks, her love for children drew her into the Sabbath school, and urged her to do what she could for their spiritual welfare. This was emphatically her delightful employment. To be thus engaged, was more than her meat and drink. It was during this year that she decided upon a missionary life, and henceforth her heart was beyond the sea."

In the Fall of 1840 she bade a sorrowful farewell to friends and native land—more sorrowful to her than to most, on account of the intensity of her feelings: for she seemed to give the whole of her heart to each of her friends. The sundering of such ties caused her heart to bleed. Sometimes, when the chords of her heart were touched, it gave forth sweet but melancholy music:

"My early home, I love
To turn with chastened memory back to thee,
And hand in hand with those I used to see,
About thy dear haunts rove;
To feel my mother's hand upon my head
In silent blessing: then, how sorrow fled,
And fixed the spirit's love!

"Sweet sister, only thou
Canst ever give affection purest, deepest:
Thy peace within the heart thou gently keepest,
Shrine-like; where, ever bow
All holy impulses, and love, which wears
Too many ties to break——its lovely——tears
Are all that's left me now."

In less than a year after her arrival at Honolulu, she heard of the death of a brother. Her feelings are recorded in the following words: "In the midst of youth and prosperity, while all around seemed to promise a long and useful life; while old age and female helplessness were clinging fondly to him as their supporter, "the spoiler came," health vanished, bright prospects were shaded, hope sank, and death has covered all—all but the memory of him we loved. Always has he been a joy and consolation to all around him; ever ready to cheer in time of depression, to lighten the pressure of earthly cares, and to pour spiritual balm into our wounded hearts when death has entered our dwelling. Now, who will be the comforter?—for he, whose very voice was a charm,—the sound of whose step was the signal for cheerfulness, is gone. There is a Comforter, mightier than any or all the good and loved of earth. O may we, as a family, in this dark hour turn to him as we have never before done for consolation and sanctification!

"Sixteen, ten and eight years have passed, since our father, brother and sweet sister were laid in the dust; but the *grief* was never buried; and now, in this deep affliction, all seems revived, as if each event were as recent as the last. Oh! it is more than human nature, unsustained, could bear. But I can bless my heavenly Father that while my aching heart seems ready for bursting, for my own and others' woes, he teaches me to submit without a murmur."

In entering upon the duties of the station to which she had been appointed by the mission, she felt that she was assuming "heavy responsibilities;" and that she could not go forward unless the Lord should go with her, and the angel of his presence sustain her; and she resolved to "put her trust in him and be comforted."

When health permitted, and often when unwell, she spent two hours daily in the school; and on the Sabbath she called her pupils together in order to explain and enforce the teachings and precepts of the bible.

Accustomed to do with her might what her hand found to do, she accomplished much in little time. The work of life was speedily performed.

For some months previous to her death, her health was far from being good; and as she felt that her strength was wasting away she employed her thoughts more and more upon the scenes of eternity. Heaven was full of attractions, and she longed to be there: yet the desire of doing good made her contented to remain and suffer on earth. She meditated on death with cheerful confidence; for she knew in whom she trusted; and she was assured that what she had committed to his hand was safe.

The last note written by her, about ten days before her death, contains the following sentences: "It seems sometimes as though I should sink, but a kind Supporter ever near keeps me from it, and gives me the assurance that all will be well in his hands. Generally, I am calm and happy, but suffer not a little daily. How pleasant Heaven looks from these dim spots!"

Though she often thought the time of her acceptance near, it was doubtless nearer than she had anticipated. On the morning of the 27th of April, after suffering in-

tensely from headache for a few hours, she became delirious, and in a state of insensibility which succeeded, at one o'clock, P M her spirit took its upward flight, as we confidently believe If so, then what she once beheld with an eye of faith is now, in its fruition, surpassingly blissful and glorious.

"The veil is drawn aside —O infinite
And unconceived before, the glorious things
That burst upon my vision! * * *
And I shall pass and stand before the throne
Where the redeeming Lamb, my Advocate,
Reigns in his glory, and with his Father, God,
Makes the pure temple, and the temple's light.

May 24, 1844.

POETRY.

For the Friend.

THE MOTHER AND HER INFANT.

LINES UPON THE DEATH OF CHARLES PECK, INFANT SON OF MR. SHERMAN PECK, WHO DIED AT LAHAINA, MAUI, MAY 9TH, AGED ELEVEN MONTHS.

MOTHER.

Oh! stay thee, my child, in our home of love,
Nor pant for thy brighter abode above.
I have made soft and easy thy cradle bed;
I've twined hope's bright garland for thy infant head;
Thy loved form I've cherished, with tenderest care;—
Oh! stay, my sweet child, with thy mother here.

CHILD.

Yes—easy and soft is my cradle now,
And fragrant the wreath that encircles my brow;
Very tender and watchful my mother's care;
Yet I pant for those regions of bliss more fair,
To repose in their bowers of celestial shade,
Whose leaves never wither and flowers never fade.

MOTHER.

Oh! stay from thy flight my innocent dove,
To bless with thy presence our home of love;
Still cheer us with music from thy gentle voice,
That in thy life's sunshine we yet may rejoice.
Gently I'll guide thy young feet in the way
Which leads from earth up to eternal day.

CHILD.

Let me go from thy home, my mother dear,
To my rest far removed from pain and care.
Rich music from heaven falls soft on my ear;
Holy angels are waiting my coming there.
Now, pain is the path to those regions of day,
Ere sin dims my vision, or guilt clouds my way.

MOTHER.

Oh! stay thee, my child, from thy home above,
'Till I've taught thee a crucified Savior's love;
How he left his bright mansion of bliss in the sky
For us, helpless sinners, to suffer and die.
Together we'll kneel at his cross in prayer,
And after long years thou shalt go to him there.

CHILD.

Let me go, mother dear, on his bosom to rest,
By whom, while on earth, little children were blest.
I will *there* learn the song of "Redeeming Love"
From the harps of the ransomed in glory above.
Heaven's blessings attend thee, my mother dear;
Thy life's sorrows o'er, I will welcome thee there.

MOTHER.

Then go, my fair child, to thy heavenly home,
Where sin never enters, and sorrows ne'er come.—
Oh! deep is the anguish that pierces my heart,
As I yield to the summons which calls us to part:
Yet the Shepherd who takes this sweet lamb from my view.
Will soon shelter the mother in safety too.

HONOLULU, May 24, 1844.

DIED.

In Honolulu, May 21, Mr. PETER VOSS, cabinet-maker, aged 24. He was a native of Hasslou, near Hamburgh.

At U. S. hospital, Honolulu, May 21, WILLIAM WELLS, aged 26. He was a native of Hatfield, Mass., and had been at the hospital one year.

In Honolulu, May 25, Mr. NATHANIEL BURTON, aged 44. He was a native of Boston, and had resided many years upon the islands.

In Honolulu, May 13, JAMES DENNY, a colored man. He was a native of the U. S. and had resided here many years. He left a wife and two children.

The New York Organ for Aug. 19, 1843. contains the following:

"Lewis Tappan, who has just returned from England, tells the following: In the steamer Acadia, a large number refused the wine or even to treat. But some drank lustily. In entering Boston Bay, they were in a fog, and in much danger. Guns were fired, and soon a small boat with a single individual, was under the stern. All thought it a pilot; but no, it was a fisherman who had heard the guns, and come to tell us where we were. We all thanked him heartily, and the captain offered him a bottle of brandy. "I don't use that article, sir," said he, and rowed off. A rich Liverpool merchant, who had drank more than any other person, said, "That is a sight you never see in England." It was the first word he heard spoken by an American, and a noble testimony to the cause of temperance—"I DON'T USE THAT ARTICLE!"

Items Respecting Whale-Ships.

On the 6th Dec. 1843, two boat steerers and a boat's crew stole a boat from the Levi Starbuck in the night, near Mariah Island, and started for the main land about 100 miles distant. Soon after they left, it commenced blowing a gale, and there can be but little doubt that all were lost. Their names were—

George Maters, Halifax, N S.
Augustus H Bell, New York City.
Thomas Higgins, Albany, N. Y.
John Oliver,
James Flores,
John Williams,
Thomas Williams, } Unknown.

PORT AND HARBOR DUES, LAHAINA, MAUI.

Anchorage and pilotage, .	$10 00
Light house, . . .	1 00
Clearance, . . .	1 00
Canal, ...	3 00
Watering Ship,* (cash, $2 50, one piece of cloth, $3 50,) .	6 00
	$21 00

*The natives will take the casks on the beach, fill, raft and return them, for the above sum

Ship Sophie spoke Am brig Chenamus, N. L. 26° W., Long. 157°—crew and passengers all well.

A boat's crew left the South America at Lahaina on the 2d, and probably went to Molokai.

Ansel Gibbs parted her cable and drove out to sea, from the Lahaina Roadsted, April 13th, and lost her best anchor.

On board Calumet, Stonington, Cyrus Kellogg fell from aloft and was drowned, soon after leaving home. John Henly, Thos. Shirley, Benj. Sullivan, Henry Brown and John Brown were drowned by lowering for whales off Cape Horn in Feb 1844.

Abner B. Ryder, belonging to Am. W S. Barclay, Nantucket, fell from aloft and was killed, in January, 1844.

John Young, of St. Helena, fell overboard and was drowned. He belonged to Am, W. S. Hamilton, Bridgport.

Thomas S. Perkins, Esq., late from Kauai, reports Am. W. S. Stonington, Hamley, New London, at Waimea, May 20—8 1-2 mos., 350 w., 50 sp. All hands in health. Last from Hobart Town; and bound N. W.

W. S. Samuel Robertson, recently underwent repairs in this harbor—mizzen mast defective; and new one obtained.

W. S. Sophie, returned leaky, April 10.

PORT OF HONOLULU.

ARRIVED.

May 8, brig Sir J. Byng, from Sydney, via Tahiti.
May 20, Am. W. S. Hannibal. She returned from her cruise on the N. W. in consequence of Capt. Brown's illness. When she started, May 9, on her return passage, she was in long. 177° E. and lat. 35° N.
May 24, bk. Conception She returned from her passage to Callao, in consequence of a bad leak, discovered in 16° N. and 107° W. The captain and crew entertained serious fears that they should not be able to reach this port in safety.

SAILED.

May 1, Am. ship Trident, Black, to cruise.
May 1, Am. ship Cossack, Delano, to cruise.
May 2, Eng. bk. Brothers, Pierce, for Col. River.
May 3, Am ship Congaree, Weston, for Kamschatka.
May 5, Fr ship Neree, Freemont, to cruise.
May 6, Eng. bk. Indian, Maughn, to cruise.
May 6, Am. W. ship Sam. Robertson, Warner.
May 22, Am. ship Lausanne, Spaulding, for Manilla.
May 28, Am. ship Fama, Nye, for California.

PORT OF LAHAINA.

ARRIVED.

April 22, Thomas Williams, Manwarriff, Stonington, 22 mos., 200 sp., 1900 w.
April 23, Newton, Sawyer, New Bedford, 5 mos.
April 26, Lagoda, Colt, New Bedford, 5 1-2 mos., 35 sp., 65 w.
April 27, Calumet, Hancox, Stonington, 5 1-2 mos., 200 sp.
April 27, Richmond, Ludlow, Cold-prings, 4 1-2 mos., 20 sp.
April 29, Hamilton, Peck, Bridgeport, 6 mos., 130 sp.
April 29, Mt. Vernon, Covell, New Bedford, 5 mos., 60 sp.
April 30, Vermont, Nash, Mystic, 5 mos
May 9, Jeannette, Mayhew, New Bedford, 24 1-2 mos., 4450 sp., 50 w.
May 10, Young Eagle, Lathrop, Nantucket, 5 mos., 100 sp
May 10, Israel, Finch, New Bedford, 5 mos., 20 sp.
May 13, bk. Gem, Worth, Sag Harbor, 7 mos., 800 w.
May 14, Barclay, Barker, Nantucket, 7 mos., 140 sp.
May 14, Baltic, Butler, Fair Haven, 5 mos.
May 14, Sarah, Myrick, N. York, 4 mos., 50 w.

PASSENGERS.—Rev. George Gary and lady, on board bk. Brothers, for Columbia River. On board ship Fama, for California, J. C. Jones, Esq; Mr. Jos. Thompson; Capt E. Grimes; Mr. Dedman; and Mrs. John Paty, with two children On board Lausanne, Mr. P. B. Schemerhorn; and Mr. Luff.

DONATIONS.—For temperance, or publishing the Friend, $2, from Mr. Pitman, Hilo, Hawaii; from Mr. Ripner, 2d officer of Saml Robertson, $1; and from two sailors, 50 cents each; a friend, $3; for seamen's chapel, from Major Low, $5.

FOR SALE.—Vol. 1., of the Temperance Advocate & Seamen's Friend, bound—$1 25—at the Study of the Seamen's Chaplain.

ALSO,—"Commercial, Meteorological and Missionary Statistics, Relating to the Sandwich or Hawaiian Islands," by R. C. Wyllie, Esq., Dr. T. C. B Rooke and Mr. S. N. Castle. 12 1-2 cents single copy, and $1 per dozen.

N. B.—The Seamen's Chaplain has for sale and gratuitous distribution, Bibles and Testaments, in the English, French, Swedish, Portuguese, Spanish and Danish languages.

The Friend of Temperance and Seamen, published monthly, 8 pages, by SAMUEL C. DAMON, Seamen's Chaplain.

TERMS.—$1 50, per annum, One Copy, payable in advance; $2 00, Three Copies; $4 00, Five Copies; $6 00, Ten Copies. Single No. 12 1-2 Cents.

THE FRIEND,

OF TEMPERANCE AND SEAMEN.

VOL. II. HONOLULU, OAHU, SANDWICH ISLANDS, MONDAY, JULY 1, 1841. No. VII.

For the Friend.

NOTES

On the Shipping, Trade, Agriculture, Climate, Diseases, Religious Institutions, Civil and Social Condition, Mercantile and Financial Policy of the Sandwich or Hawaiian Islands, viewed in relation to other groups of islands, and to the natural and acquired advantages of the Sandwich or Hawaiian Islands. By ROBERT CRICHTON WYLLIE, Esquire.

(*Continued from No.* VI., *page* 54.)

5. CUSTOM-HOUSE, UNDER THE BRITISH COMMISSION.—I have already stated that the duties paid in 1843 were larger than they had ever before been. This was in some measure, but *not wholly* accounted for, by the one per cent. additional duty charged by the British Commission, whose administrative functions commenced on the 25th of February, and ceased on the 31st of July. Against that additional duty, I find a *protest*, duly recorded at the foot of the entry dated 24th July, of the brig Delaware, from Boston. It is in the following terms: "I,—— ——, do solemnly protest against Lord George Paulet and John Frere, or the British Commissioners, in consequence of the payment, by compulsion, of the extra-duty of one per cent. laid upon all importations by order of said commissioners, as being contrary to the express laws of the Sandwich Island government, and hold them responsible for all damages which may accrue to me in consequence thereof."

This protest applies to a duty of $54 61 cents, and is formally authenticated by his excellency Kekuanaoa, governor of Oahu.

I do not find any similar protest appended to any other entry, not even to one of the same brig, of the same date, comprised of articles in forty-six lines, of which the total value was only carried out at bottom, rendering it impossible to affix a precise value to any one article.

The duties are calculated "ad valorem," upon the principle of adding the charges to the invoice cost. I here give a practical illustration of this, in the last entry of the brig referred to, viz:

Total amount carried out, -	$5,513 13	
Charges, - - - - - - - -	66 20	
		5,579 33
Government duties, - - - - -	$167 38	
Br. Comm. ditto, - - - - - -	55 79	
		223 17

If the government continue to permit such entries, *in mass*, it will be impossible to check any undervaluations of goods that may be made.

6. EXPORTS FOR 1843.—It will be seen by that part of the above table that refers to exports of native produce, that their whole amount for five and a half years, from 1835 to 17th Aug. 1841, was only $481,380; averaging yearly $87,523, against an yearly average of imports of $365,854. This would leave a balance of $278,331, on an average, every year, to be provided for, by specie or bills, or in some other way, not very apparent.

I have taken some pains to ascertain the quantities of native produce exported during the year 1843. They appear to have been as follows:

Sugar,	1,115,010 lbs.;	valued at	4 cts.;	$45,800
Molasses,	64,320 galls.;	"	" 20 cts.;	12,864
Kukui oil,	8,620 galls.;	"	" 40 cts.;	3,448
Bullock hides,	10,686	"	" $2 each;	21,372
Goat skins,	29,800	"	" 18 cts.;	5,364
Arrow root,	35,140 lbs;	"	" 4 cts pr lb;	1,405
Mustard seed,	39,700 lbs.;	"	" 2 1-2 cts.;	992
				$91,245

7. DECREASE OF POPULATION.—It appears, therefore, that the productions of the islands is upon the increase. This is a matter of the utmost importance to the government, the people, and all foreign merchants established here. To improve and extend the agriculture of the country, ought to be the great aim of the government. It will be found to be the best means of checking the lamentable decrease in the native population, of attracting and employing foreign settlers, of extending commerce, and of augmenting the revenue. But, little good will be done, until the government enact new laws regulating the tenure of land, and encouraging all industrious inhabitants, whether native or foreign, to lay the waste land,—which every where abounds,—under proper cultivation. This is clearly the interest of the king and chiefs; for their present policy of retaining the land in their own right, and of granting only short leases, will depopulate the islands in a few years. It may also become dangerous to persist in it, with a people every day becoming more enlightened, knowing more wants, and desiring more comforts.

8. NECESSITY FOR INCREASE OF POPULATION.—The increase in the population of the islands must go hand in hand with the development of their agricultural resources. For these islands cannot at present calculate much upon foreign markets for the consumption of their surplus produce. In Europe, Asia, Australasia, North America, Chili, Peru, Ecuador, New Granada, Central America and Mexico, they will be undersold by similar produce from other countries, or from some of these countries themselves. The only foreign markets that the Sandwich Islands, so far as I can judge, can reasonably count upon, are the settlements on Columbia River, Kamscatka, Sitka on the N. W. Coast, and perhaps California while the Mexican government does not extend their prohibitive system to that department.

The stream of population which is now directing itself, by hundreds and by thousands, into the *Oregon* Territory, is likely to establish the largest and the best market for the produce of the Sandwich Islands, which again will consume the lumber, salmon, flour, &c., produced in that territory. In this commerce, Messrs. Pelly & Allan, agents for the Hudson's Bay co., are extensively engaged, and the Americans are likely to participate largely in the trade. Its increase will be commensurate with the increase of the population of Oregon, and of the Sandwich Islands.

9. CONSUMPTION OF GOODS IN THE ISLANDS.—The consumption of goods in the Sandwich Islands is not to be measured by the native population, numerically considered. Regard must be had to the foreign population, which is now very considerable, and the *rates* of whose consumption is much greater than that of the ill-clothed and *poi*-fed natives. Nor must we overlook the floating market arising from the immense fleet of *whalers* that touch yearly at these islands during the two seasons of spring and fall. Each of these whalers is supposed to purchase vegetables, beef and other produce of the islands, to the yearly amount of $200, on an average, and from 600 to 13,000 dollars in other articles bought from the stores. I take this wide range, because some old residents estimate the total consumption of each whaler at $800, while others estimate it as high as $1500. I have been assured that when the English whalers frequented this port, the average consumption of each used to be from £250 to £350.

10. DEPENDENCE OF THE ISLANDS ON WHALERS.—But, even were the consumption much less, it is obvious that the prosperity of these islands has depended, and does depend, *mainly* upon the whaleships that annually flock to their ports; many of them coming twice a year. Were the whale fishery to fall off, as seems in some measure to be the case, or were the vessels engaged in it to abandon these islands for some others in this ocean, or for ports on the *Main*, the Sandwich Islands would relapse into their primitive insignificance. The government seems to be aware of this; for, as I have shown in the notes to my Table of the 25th March, published in the "Friend" of the 1st instant, there are exceptions in favor of whalers, both in the duties and port-dues. My only doubt is, whether these exceptions have been carried far enough. I incline to the belief that whale-ships should be exempted from all port-dues, and that the police regulations towards sailors ought to be the most liberal that the maintenance of public order will permit.

11. VISITS OF SHIPS OF WAR ADVANTAGEOUS.—The frequent visits of ships of war tend also greatly to promote the commerce and wealth of the Sandwich Islands. The officers of H. B. M. ships *Dublin*, *Hazard* and *Modeste*, generally prefer Honolulu to any port in the Pacific excepting Valparaiso. I am told the same partiality exists amongst the American officers who have visited this port; and as an agent of the United States government has arrived to establish a naval *depot* here, frequent visits of their ships of war may be expected; and this will be a new source of prosperity to these islands.

12. PROBABLE TRADE WITH FRENCH SETTLEMENTS.—The French settlements ot the *Marquesas* and the *Society* Islands, are also creating fresh markets for the produce of the Sandwich Islands.

13. POPULATION AND EXTENT OF THE SAND-ISLANDS.—What the Sandwich Islands are capable of, under good government, is evident from the following table, from data in Mr. Jarves' recent interesting work on the Sandwich Islands:

	Length.	Breadth.	Square miles.	Population as estimated in 1823.	Census of 1832.	Census of 1836.
HAWAII.	88	73	4,000	85,000	45,792	39,364
MAUI.	48	30	620	20,000	35,062	24,199
LANAI.	17	19	100	2,500	1,600	1,200
MOLOKAI.	40	7	190	3,500	6,000	6,000
KAHOOLAWE.	11	8	60	50	80	80
OAHU.	46	25	530	20,000	29,755	27,809
KAUAI.	22	24	500	10,000	10,977	8,934
NIIHAU.	20	7	90	1,000	1,047	993
	292	193	6,090	142050	130313	108579

If the above calculation be correct, the whole population of the Sandwich Islands is at present less than 18 to the square mile; while if the celebrated British navigator Capt. Cook is to be believed, the population in his day (1778) was nearly 66 to the square mile.

As his calculation was founded only on the crowds of natives whom he saw at the ports he visited, and not upon any accurate computation, it may have been exaggerated; but the above table shows a decrease of 33,471 in 13 years from 1823. From this fact, it may reasonably be inferred, without taking into account the pestilence which raged in 1803 and 1804, during the reign of Tamehameha I., and the loss of life arising from his wars, that the population has decreased at least to the extent of 200,000 since 1778.

It appears from the above table that the decrease, since 1823, has been confined to six of the islands; and, that in the two islands of Molokai and Kahoolawe, there has been an increase of 2,530 since that year. This in some measure warrants the hope that the decrease is not the necessary effect of causes permanent and irremovable in their nature, but rather of something wrong in the habits, morals, government of the people or laws affecting marriages.

One of the missionaries, the Rev. W. P. Alexander, in 1838, calculated that there were annually, in the group, 6,838 deaths, and only 3,335 births. I have conversed with other well-informed missionaries, who all agree in stating that the yearly deaths still greatly exceed the yearly births, and that little more than one-half, if so many, of the marriages lead to offspring.

As the climate is of surpassing salubrity, and as the means of subsistence are abundant and easily procured, the results I have mentioned are the more surprising. Most of the missionaries and of the medical men attached to the mission, particularly Dr. Chapin, have

ascribed them to the almost universal prevalence and uncontrolled progress of a disease said to have been introduced by the first white men who visited the islands. There no doubt has been, and I fear still to a great extent exists a cause, in the laxity of native morals, why that disease should be propagated with unusual universality, and that very cause will add to the effect of the disease in preventing offspring; but the outward appearance of fat and health, more general here amongst the natives, than amongst the indian tribes of Mexico, or any other country in South America, is opposed to the belief of such an inward rotteness as could render the race unprolific, without the influence of other causes.

14. POLICY OF THE GOVERNMENT.—What these other causes are, it behoves the Government carefully to investigate, with the view of applying a prompt and efficient remedy. The primary concern of every Government is to secure the existence and promote the increase of their people. It is satisfactory to find that the Government of king Kamehameha III. has not neglected this duty in their recent legislation. Laws have been enacted to discourage idleness and luxury, to extend agriculture, and apply to each soil the peculiar cultivation to which it is best adapted. But example is a practical science; it is not to be taught by precept, but by example; and it would be expecting too much from the natives to suppose that they can carry into effect the improvements recommended by the government, without the example of foreign agriculturists, and without the aid of foreign capital. To obtain these advantages, new laws regulating the tenure of land are required. Laws have also been enacted, abating the taxes and labour days for the king and landlord, according to the number of children, or of old, weak and infirm persons which every man has to support. These exemptions certainly do hold out inducements to marriage, and for parents to take care of their children; but they have not yet been sufficiently long in operation to produce any visible effect in staying the great evil of depopulation.

15. FOOD CHEAP AND ABUNDANT.—Under favorable circumstances, the population ought to increase here more rapidly than in almost any other part of the world. A native, in the country, can support himself in health and vigor at an expense of little more than a cent per day. The staff of life amongst the natives is the *taro* or *kalo root* (*Arum Esculentum*) prepared in the form of paste, and eaten either alone or with dried fish. It is a wholesome food and highly nutritious. It is cultivated on sloping grounds, where refreshed by frequent showers; but the best is that which grows wholly immersed excepting only the large green leaves. In an interesting paper on the resources of these islands, from the pen of William Ladd, Esquire, published in the *Hawaiian Spectator*, under date 30th January 1839, it is stated that 40 feet square of land planted with *taro* will support a man for a year; and that one mile square so cultivated, would feed 15,151 individuals, while not more than one twenty-fifth of that number would be required to cultivate it. Mr. Ladd still upholds the correctness of his calculations, but there are others who admit its truth only as applied to the very best lands and the first year of their cultivation. It appears that *taro* very soon exhausts the land, and that to ensure an equal crop the ground must be frequently changed. Nevertheless, it is not to be denied that a given extent of land cultivated for *taro*, will produce a far greater quantity of food for man than if cultivated for any other plant. This would be a great advantage in a country over-populated, but in these islands, where population is the great want, it may be doubted whether the facility of feeding themselves on *taro* does not obstruct other modes of cultivation, more laborious, but also more promotive of industry. Thus, I am not sure that the very cheapness of living here, which ought to augment the population, has not an opposite effect through the habits of indolence which it perpetuates.

16. CHIEF PRODUCTIONS OF THE ISLANDS.—The Islands produce maiz, wheat, rice, potatoes, yams, bananas, arrow-root, beans, peas, melons, pumpkins, cabbages, onions, radishes, lettuce, grapes, pine-apples, papayas, oranges, lemons, figs, straw-berries, gooseberries, cucumbers, olives, tomatoes, chirimoyas, sugar, coffee, mustard-seed, cotton, indigo, silk, hemp, cocoa, tobacco, ginger, turmeric, kukui-nuts, and cattle of all kinds; so that they afford a wide range of products for the reward of native industry; but I repeat, foreign example and capital are wanting to stimulate and direct that industry.

17. EPIDEMIC DISEASES, &c.—While the means of subsistence are most abundant in the Sandwich Islands, the diseases to which the natives are subject are few and simple. After consulting two able papers, published by Dr. Judd and Dr. Chapin, I may state that the chief diseases are asthma, croup, cutaneous eruptions, apoplexy, diarrhea, dysentery, catarrhs, whooping-cough, dropsy, fevers, ophthalmia, influenza, inflamatory and rheumatic ailments, scrofula, syphilis, ulcers, teething and other infantile complaints. In a valuable manuscript paper of Dr. Rooke's, to which I have had access, he adds puerperal fever, as very common and very fatal. Excepting that disease, apoplexy, croup and dropsy, the others are stated to be generally mild, yielding easily to proper care and medical treatment,—two comforts, however, which the natives cannot easily procure in their present condition. Dr Chapin considers that most of the diseases to which the natives are subject arise from cold, bad houses and bad clothing. The means of preventing the operation of these causes, are to be sought for only in the diffusion of wealth, created by general industry, for which there are superabundant elements.

18. DISEASES OF SEAMEN, &c.—I have taken some pains to ascertain the diseases common amongst foreign seamen who visit this port, and the facilities which exist for their cure. The following letters from Doctors Wood, Rooke and Gibson, will be read with interest by all friend of seamen; and I have personally visited the houses where the sick American and British sailors are now accommodated, and I fully concur with these gentlemen in thinking that a regular hospital for seamen is much wanted in this place. I think it would be the policy as well as the interest of the government to grant a site for the erection of hospitals, in some favorable situation. Supposing only an average of 20 sick seamen in hospital, every year, their support and medical attendance, at the rate of a dollar a day, would amount to $7,300 yearly, of which the country would receive the full benefit. Besides, the native assistants employed would acquire knowledge and experience, fitting them to be useful among their own countrymen.

Dr. WOOD'S *remarks upon the diseases of American seamen, and the want of an hospital for seamen.*

"HONOLULU, May 11th, 1844.

"My dear sir,—In the enclosed list of cases of disabled seamen, those only are included, which have been chargable to the United States consulate, established at these islands.

"No record has been kept of the cases of seamen not *destitute*,—or for whose support provision has been made by the masters of vessels from which they were discharged. The number of this class does not much exceed that of the cases described as destitute.

"In the classification of the diseases of the above mentioned list of sick and destitute seamen, no account has been made of cases of sickness incurred by them during their residence in this port.

"No record has been made of the termination of the above list of cases, excepting the deaths; nor has this been deemed a matter of much interest—as nearly all, with the exception of a few cases of incurable diseases, have recovered and re-shipped, or been sent home.

"In those cases classed under the head of *accidental injuries* (to which whalemen are specially exposed) are included fractures, dislocations, ruptures, wounds, contusions or injuries of important viscera.

"Under the head of *mercurial rheumatism* are classed those cases in which the rheumatic affection appeared to have been induced by the injudicious administration of mercurial remedies during exposures incidental to, or but little heeded, by sailors.

"There is no public hospital or infirmary (properly so called) at Honolulu; no suitable buildings having been erected with special reference to the accommodation of the sick. Buildings have been rented for the reception of sick and disabled American seamen, where they are provided with board, lodging, washing, nursing and medical attendance, at an expense to the U. States government of about one dollar per day. And although the accommodations are the best which the town of Honolulu at present affords, there are few ports where a well regulated hospital would contribute more to the relief of disabled seamen.

"The want of such an establishment is in part compensated for by the salubrity and uniform temperature of the climate; and to this circumstance may be attributed the recovery of as large a proportion of cases as appear in the reports of well-conducted infirmaries in other countries.

"With the respectful regards of
"Your friend and ob't serv't,
"(Signed.) R. W. WOOD.

"R. C. Wyllie, Esq., Honolulu."

Table of the number of admissions into the hospital for sick and destitute American seamen, at Honolulu, from April 1st, 1839, to April 1st, 1844, condensed from the table furnished by Dr. R. W. Wood:

YEARS.	Admissions.	Discharges.	Deaths.
1840, year ending 31st March,	40	24	3
1841, " " " "	58	57	1
1842, " " " "	55	29	1
1843, " " " "	45	51	
1844, " " " "	100	65	5
	295	216	10

Of these, there were 25 cases of injury by accident; 36 cases of mercurial rheumatism; 31 of common rheumatism; 26 of secondary syphilis; 16 of primary syphilis; 11 of scurvy; 10 of chronic dysentery; 10 of stricture; 10 of fistula; 8 of bronchitis; 8 of chronic gastritis; 7 of hepatitis; 7 of pericarditis; 7 of sciatica; 6 of hydrocele; 4 of fever; 4 of lumbago; 4 of paraplegia; 4 of ophthalmia; 4 of insanity; 3 of chronic enteritis; 2 of hemiplegia; 2 of nephritis; 2 of dropsy; 1 of epilepsy; 1 of orchitis; 1 of cataract; 1 of thoracic aneurism; 1 of lumbar abscess and 1 of cystitis.

Dr. ROOKE'S *remarks on the diseases of British seamen, and suggestions for the erection of an hospital for British seamen, in Honolulu:*

"HONOLULU, May 13th, 1844.

"Sir,—In reply to your enquiries respecting the provision made for sick and distressed British seamen and others of her Majesty's subjects not being seamen, during the fifteen years past, I beg leave to forward you the following statement, which though short, I hope will convey the necessary information.

"Previous to the year 1833, or thereabouts, the sick and distressed British subjects and seamen were boarded by such different individuals as could be found to undertake the care of them—sometimes in the hovels of natives, and sometimes in those of foreigners. At or about this period, their board was contracted for by an Englishman keeping a public house, with whom they were placed until 1840. During this time, their abode was miserable in the extreme; although as good as could be procured; the hovel they were lodged in being scarcely more than shelter from the rays of the sun—but really, hardly any from the rain or wind, without any conveniences or comforts necessary for invalids, except such as were supplied by the medical attendant and charged to the British government as medical comforts. Those who recollect the squalid filth of the abode they then inhabited, can only wonder that cures were ever effected or health regained in such a place.

"On my return to practice in 1841, after an absence of two years, from ill health, the sick and distressed English seamen were placed under the care of the person who now victuals them. Although their situation from this time was much improved to what it was during the previous eleven years, still much remains to be amended. From this time (April 1841) they have been lodged in a thatched building, perfectly pervious to the winds—so much so, that in cases requiring particular attention, they have to seek the shelter of an old garment or mat, hung up against the side of the house, to ward off the damp wind, during the inclement season. It is also situated in the same enclosure with a common grog-shop, in the most noisy part of the town; subject to the noisy and often dangerous intrusion of drunken sailors, with all the concomitant evils and disturbance to the patients; mixed also with casual boarders from different ships, who come and go almost daily, rendering it almost impossible to keep secure the bedding and other effects belonging to government. In respect to their diet, they are well and amply provided. Soap, washing, nursing, and other incidental expenses, are provided as medical comforts, when the cases urgently require them. The accompanying list of admissions with medical treatment, will show the nature of the cases which have occurred during the last 37 months.

"There have been 77 men *subsisted* during the last 37 months, for 7129 days; giving an average of nearly 92 and a half days for each man. Previous to July 1842, the charge for subsistence was 43 cents each man per diem; but this not being found adequate, it was increased to 50 cents per diem, which is the rate now paid.

"The average expense of each man to the government, for medicine, board, lodging, clothing, funeral expenses, &c. &c., may be obtained by reference to the official documents in Mr. Sea's possession.

"During the last fifteen years, I have represented on different occasions the evils arising from the manner in

which the men were lodged, stating that a saving might be made by having a proper building erected, for the abode of the sick, and under the charge of the medical attendant. I have also offered to be at one half the expense of such building, provided I might have the privilege of using the *vacant* beds for others than distressed British subjects.

"I have the honor to be, sir,

"Your most ob't servant,

"J. Chas. Byde Rooke.

"To Robt. C. Wyllie, Esq."

The admissions to medical care above referred to, during the 37 months ending 30th April 1844, were 71; of these, 8 were cases of casualties; 7 of ulcers; 5 of dysenteria; 5 of dyspepsia; 5 of syphilis; 4 of fracture; 4 of pneumonia; 4 of rheumatism; 3 of hernia; 3 of hydrarthus; 3 of stricture urethræ; 2 of cynanche; 1 of abscessus; 1 of arthritis; 1 of cystitis; 1 of febris intermittens; 1 of gastritis; 1 of hæmoptisis; 1 of hepatitis cum abscessu; 1 of intususceptio; 1 of mania; 1 of ophthalmia; 1 of periostitis; 1 of phthisis; 1 of diseased prostate; 1 of diseased rectum; 1 of tabes; 1 of poison; 1 of vulnus; and 1 of cancer pylori.

Of these, the case of cancer pylori, that of hepatitis cum abscessu, and that of phthisis, ended fatally.

The above is a condensed statement from that sent by Dr. Rooke.

On the 14th, I addressed a note to Dr. John Gibson, the surgeon of H. B. M. ship *Modeste*, soliciting any observations he might have to offer upon the statements made by Dr. Wood and Dr. Rooke. Having no local interest to serve, Dr. Gibson's opinion, in support of that of Doctors Wood and Rooke, adds much weight to their suggestions, *in favor of a better provision for sick seamen*, than any that Honolulu at present affords. It would be worthy of the charity and philanthropy which so eminently characterize the governments of *Great Britain* and of the *United States*, to take this subject into their consideration. The following is the letter received from Dr. Gibson:

"H. M. S. Modeste,

"Honolulu, 18th May, 1844.

"My dear sir,—I have to acknowledge the receipt of your note of the 14th inst. with the accompanying remarks of Doctors Rooke and Wood, upon the diseases to which seamen are liable here, and upon the manner in which they are taken care of while sick. These, I have carefully perused, and now return you, with many thanks.

"In answer to your request, to state my opinion regarding a better provision for sick British sailors on this island, I think you will agree with me that there is very great room indeed for improving their condition. I consider that the apartments used as sick quarters at present, are miserable in the extreme, and by no means suitable to the comforts which distressed British subjects or sick seamen ought to have.

"I am fully able to corroborate the description given in Dr. Rooke's remarks, of the building occupied. During his absence lately from the island, I was left in charge of his patients, and had then an opportunity of witnessing the uncomfortable accommodation afforded. No justice, in my opinion, could be given to the treatment of any medical man there, considering the noise, close confinement in the hot and exposure to the damp in the rainy season. Besides, these apartments are in the very hot-bed of almost constant revelry and drunken broils.

"The Sandwich Islands having gained a celebrity in the civilized, and an importance in the commercial world, and as they will most likely be more frequently visited by ships of war, than formerly, (whose sick and wounded are often obliged to be landed after long voyages, for change of scene and repose,) I do most decidedly think, that a more convenient and comfortable abode, in place of that allotted at present to the sick and distressed, should be selected without delay. Such abode ought to be in a situation freely exposed to the cool and salubrious trade wind, which almost constantly blows here, and separated entirely from the rioting, clamor, and dust of the town.

"I consider the offer made by Dr. Rooke, at the conclusion of his remarks, as liberal, fair and just; and I may add, that an hospital nearly on the same footing as he proposes, was established at Valparaiso, four years ago, sanctioned by the commander in chief then on the station, and exists still, under the superintendence of Dr. Houston, R. N.; where the sick from ships of war and merchant ships are comfortably provided for, and treated.

"I am,

"My dear sir,

"Yours, faithfully,

"John Gibson, *Surgeon*

"*Royal Navy.*

"Robert C. Wyllie, Esq., &c. &c."

It will be observed that the average expense of each American seaman for board, lodging and medical attendance is one dollar per day.

In the case of sick British sailors, I understand the average cost for each man is the same or a little more.

British sailors, serving on board American ships, are subjected to this great hardship, here, that if they have to be sent on shore, sick, the American consul refuses to grant them any relief or assistance. It appears the appropriation made by congress, is for the benefit of native-born Americans only, and too limited in amount to allow of a more liberal application.

It is due to Dr. Wood and Dr. Rooke, to state that they are both very humane in attending gratuitously upon all sick sailors, who are in the unfortunate position of not being able to claim upon the consuls of their respective nations.

I cannot help thinking that if the services of a sailor are rendered under any particular flag, in the hard case of sickness, he ought not to be debarred from relief, merely because he was not born under that flag.

19. Labor of natives inadequately paid.—With elements so abundant, and a population inadequate to the cultivation of the soil, one would naturally expect that the labor of the natives would be well rewarded. This, unfortunately is not the case. Except in this and other villages, where foreigners create a demand for domestic service and other particular classes of labor connected with commerce and navigation, the daily wages of the natives does not average more than 12 and a half cents *per diem;* and this wretched pittance is not paid in cash, but in goods, given to the natives at a profit to the employer of perhaps 100 per cent. Thus we have the *truck* system, in its worst form, established in these islands. It could not subsist, under laws allowing foreigners to acquire land, and to employ their capital in its cultivation; for the demand for native labor would thereby be increased, and wages would rise in proportion.

The Sandwich Islands government does not seem to be sufficiently aware of this fact, or of the public wealth and power that can be derived from labor alone. Supposing only 30,000 of the natives employed in constant labor, for only 300 days every year, and at the very moderate rate of 25 cents a day, the collective amount of their wages, at the end of the year, would be $2,250,000. There is no reason why such or higher wages should not be earned by that or a much larger number of laborers, except the laws regulating the tenure of land, which prevent the application of foreign labor and capital to its culture.

20. New laws required.—Under better laws, in that respect, there would soon be a demand for labor beyond what the natives can supply. This very demand would stimulate the natives to take care of their offspring as a source of profit; and any deficiency of labor could be easily supplied from China, whose inhabitants are always ready to emigrate to any country where they can find profitable employment.

21. Savings banks.—The constant employment of the natives, on fair wages, besides favoring their health, would lead to habits of providence, and *savings banks* might be established. The beneficial effects of these institutions have been extensively felt in England, Ireland, France, North America, and other countries. It may be difficult to persuade the king and chiefs of the rapidity with which the avails of labor might be made to accumulate through such institutions. But the results in England and Ireland cannot fail to arrest their attention:

The amt of deposits in 377 savings banks in England, on 10th Nov. 1832, was	£12,916,028
The amt. of ditto in 21 ditto in Wales, on ditto, was	349,794
The amt. of ditto in 70 ditto in Ireland, on ditto, was	1,045,825
Making a total of	£14,311,647
Or at 50d the dollar,	$68,695,825

The owners of that large amount were 429,400 in number; nearly one half of whom were depositors of sums not exceeding £20 each.

Those institutions are of incalculable advantage to the industrious poor. From the high rate of interest obtainable in these islands, on undoubted security they might be conducted here with much success, and to the great benefit of the depositors.

22. Hints for the king's revenue.—Notwithstanding the exemptions from taxes herein-before-mentioned, in favor of parents who have large families, there are well informed persons who still think that the taxes on land operate to the discouragement of population. If on investigation this should be found to be the case, the government have it in their power to abate the taxes on land and increase them proportionally on imports, to an extent not exceeding five per cent. *ad valorem*, without infringing their treaties with any foreign power.

In any alteration of the taxes, I think it would be only fair to the missionaries, in consideration of the great benefits conferred by them on the community, to exempt what supplies are sent them from the United States, by way of donation, or otherwise, from any duty whatever.

The question of a total prohibition, or of a higher duty on ardent spirits, is also one which deserves consideration, both on the grounds of morality and policy. A very able representation on this point, was made on the 14th March, 1843, by one of the most talented and influential of the missionaries, and the captains of whalers have recently threatened to abandon the islands altogether, if spirits continue to be sold on shore.

23. On articles exported.—It will be observed by the table of exports that that of sandal-wood has ceased of late years. It has for some time been, and is now, subject to a royal *taboo* (interdict): but the king has it in his power to take off the "*taboo*," when everybody might cut and export it, on payment of two-thirds. As the price in China, of late years, has been too low to pay even freight and charges, it is not likely that sandal-wood will again become an article of profitable export.

Bullocks' hides, goats' and sheep-skins are likely to become articles of large exportation, as these animals have already multiplied greatly, and the islands are still capable of supporting a much larger number, without any injury to other agricultural interests.

A trial has been made of the native sugar in the Sydney market, where owing to the present extraordinary depreciation of all property, except cash itself, it has not sold favorably. I understand it has only netted about £9 per ton to the importer.

For molasses, of late, there has been an increased demand, from Chili.

Kukui-oil has been tried in the markets of Chili, N. S. Wales and London, but as yet without much success. In London it will leave nett about £20 per imperial ton.

Mustard-seed, I hear, answers well in the United States. It has been sent on trial to England, but the result is not yet known.

Salt can be had in abundance, at about $6 per ton. It can only be exported in ballast, at a very low freight.

Arrow-root I understand can be produced in great plenty, at about 4 cents per pound. An enterprising and ingenious friend of mine, Mr. Alexander Forbes, of Tepic, writes me that it answers well in place of starch, for the cotton cloths manufactured by him and his partners, at *Jauja*, near Tepic; so that if it can be laid down in San Blas, at a price considerably lower than starch can be bought for in Tepic, there is some chance that a market will be opened there for this new article of export from these islands. If so, it will, to that extent, facilitate the establishment of a regular packet to San Blas, an object desired by the government, and of great consequence to the commerce of this place and to the whaling interests.

24. Route to America and Europe.—Were a monthly packet established, the following would be the time and expense required, for passengers to reach New York, and Southampton in England:

	Days.	Dollars
To San Blas, say	30	100
To Guadalaxara, or Horseback,	7	35
To Mexico, by stage,	6	60
To Vera Cruz, ditto,	3	50
For stoppages, allow	3	
For personal expenses for 19 days, allow		38
For weight of luggage above 25 lbs. each person, allow		21
To New Orleans,	8	35
To Mobile,		5
To Montgomery,		10
To Franklin,		2
To Madison,		5
To Augusta,		5 25
To Charleston,		8
To Baltimore,		15
To New York,		7
From N. Orleans to N. York, allow	8	
For expenses during 8 days, allow		20
	65	416 25

A passenger going to England, to reach Vera Cruz

from these islands, will require the same time and expenses as above, namely:

	Days.	Dollars.
	49	304
And from Vera Cruz to Southampton, per steamer, - - -	35	310 (£62)
Totals,	84	614

In crossing Mexico, a passenger requires to carry a bed with him, as far as Guadalaxara.

After reaching that city, he travels by the diligence, and at all the stations will find bedding, provisions and very fair accommodation of every sort, provided by the contractor, *Don Anselmo Zurutuzu*, whose agents all along the road, are Biz-cayans, well-bred and very attentive.

Children at the breast, or conveyed on the knees of the mother, are exempted from any charge by the diligences.

For all luggage, exceeding 25 lbs. allowed to each passenger, *gratis*, a charge is made at the rate of $7 to Mexico for every 25 lbs. additional, and about the same again from Mexico to Vera Cruz; but no account is taken of any small bundle or carpet-bag that each passenger may carry with him in his hand.

The diligences go twice a week, with great punctuality.

I have put down $100 for the passage from the Islands to San Blas, considering it a fair allowance.

25. BELGIAN LAND COMPANY.—It is possible that the agricultural operations undertaken by the company formed in Belgium, on the basis of the contract for unoccupied lands, between his Majesty Kamehameha III. and Mr. Brinsmade for himself and partners, on the 24th November 1841, may both enable these islands to export the above articles at a lower price than that at which they can be at present produced, and also many other articles adapted to the climate and soil. But this result will not follow, to any great extent, unless through the introduction of foreign laborers; and to the manifest advantage of this, the policy of the government does not appear to me to have been as yet directed.

It is said the French government has agreed to admit the produce of the Sandwich islands at a duty of 5 per cent. *ad valorem;* being the *maximum* which this government can charge on French produce, according to treaty. If this be true, it will be of great advantage to the aforesaid company.

26. GOOD DONE BY THE MISSIONARIES.—It is not however to be denied that very great improvements have been made within the last 25 years. As the main cause and spring of all these, we must not overlook the missionaries who have labored in these islands, since March 1820. The preaching of a doctrine which inculcates the duties of *doing unto others what we wish they should do to us—the providing of things honest in the sight of all men—the love and education of children—the reverence and care of parents, and obedience to the ruling powers*, and the diffusion of education which these missionaries have achieved, were the most wholesome and appropriate remedies for the social and moral plagues which afflicted this formerly heathen community. Both spiritually and civilly, the benefits conferred by the missionaries are incalculable. The experience of these benefits has given them an influence, and created a certain bias in favor of the country which sent them and which supports them, not only legitimately acquired, but so far as the missionaries are concerned, not to be relaxed without prejudice to the progress of further native improvement. *Go ye and do likewise*, may be said to all those who envy that influence, cavil at their doings, or malign their motives. Nor has the money yearly expended by these well-deserving men, been without great advantage to the temporal interests of these islands. By an extremely interesting statistical account of the mission, from the pen of Mr. S. N. Castle, and published in the "*Friend*" of the 1st inst., it appears that including $36,400 granted for the present year, it has been supported in these islands, at an expense to the American board for missions, and other religious societies, of $608,865. Of course a large portion of that amount has been expended in the United States, for supplies sent in clothing, stationery, &c. &c.; but the portion sent in cash, has been so much added to the wealth of the country; and the use of the supplies by the missionary families spread throughout the islands, has taught the natives the use of, and created a demand for, similar comforts.

27. ON A PAROCHIAL CLERGY.—But considering the progress already made by these islands, and the elements of wealth at the disposal of the government, it would neither be fair nor decorous for it to continue to be beholden to the charity of christians in the United States for the means of defraying the expense of that religious instruction which every government is bound to provide for its people, as its primary and most sacred duty.

It is with great pleasure I have heard that one or more native congregations have voluntarily undertaken the support of their pastors. In all such matters a beginning is what is wanted, but on that beginning to ground a system, requires the aid of legislative enactment. This is more especially the case in these islands, where the natives cannot as yet command sufficient ready money to pay the stipends of their pastors in cash. But the government possesses a superabundance of vacant or unoccupied lands every where, and the will is only wanting to divide the whole islands into parishes, and in each parish to make a liberal endowment in land, for the pastor of every parish, and for the support of the required number of school-masters within its bounds. The endowments ought to be liberal; for, pastors and teachers to be effective, ought, in what respects the temporal wants of themselves and families, to be placed in independent positions, so as that they may devote their whole time and energies to their respective callings, without fear of destitution. And as regards the parish ministers, particularly if they can be supported, not by money coming direct from the pockets of their hearers, but by sources of revenue held independently in their own right of office, so much more willingly and beneficially will they be listened to by those hearers. If a medical practitioner could be added to each parish, so much the better, for the great object of discovering and counteracting the causes of the depopulation of the Islands. For him also a liberal provision might be made in the manner indicated.

28. Nor ought the king, the chiefs and landlords, to *grudge* these suggested endowments of land to ministers, physicians and teachers; for, in order to live, these possessors of land would be forced to seek persons and means to cultivate and improve their several allotments, which could not be done without creating everywhere a demand for labor, improving the natives in the knowledge of agriculture, adding to the value of land, increasing the exports of the Islands, and augmenting the wealth of king, chiefs, landlords and of all classes. In fact each allotment would become a *model-school* for agriculture, and a gain to the collective wealth of the country, in proportion to its improvement.

In the present situation of the Islands, it would be good policy in the government, to give grants of land gratuitously to all *bona fide* settlers who would engage to bring it under cultivation, until the capabilities of the soil could be ascertained, and thereafter adopt a graduated scale of price, increasing every five years, as the land increased in value through the labors and experiments of these early settlers. If I am right in saying so, the policy of granting land to parish ministers, school-masters and surgeons is still more obvious.

It is needless to point out to merchants how much the system here suggested would tend to increase both the external and internal commerce of these islands.

29. Saving always the will of the Almighty, upon the policy of the government will depend the question whether the islands are to become depopulated, or thickly peopled, rich and powerful. To encourage them in a liberal and philanthropic course, example may have more effect than argument. In this hope, I give the following condensed view of what has been achieved by the republic of the *Ionian Islands*, by the congress of Vienna, placed under the protection of Great Britain, since 1817:

Islands.	*Area in sqr. miles.*	*Males.*	*Females.*	*Aliens.*	*Pop. to sq. mile.*
CORFU,	227	35,221	29,836	9,806	287
CEPHALONIA	348	34,864	28,333	986	182
STA. MAURA,	180	9,097	8,098	190	95
ZANTE,	156	19,675	15,673	1,127	226
CERICO,	116	4,156	4,551	37	75
ITHACA,	44	4,942	4,702	108	219
PAXO,	26	2,561	2,503	223	195
	1,097	110,516	93,696	12,427	1,279

The whole population is 204,212 souls; giving an average of 186 to the square mile.

In 1838 the imports were £342,366; and the exports were £666,583. And in 1837 the revenue was £147,507; equal to 708,033 dollars; or, $3 46 1-2 cents per head. All that revenue accrued from custom-house duties; for there are no direct taxes. At the same rate, the Sandwich Islands ought to support a population of 1,132,740 souls, produce a yearly revenue of nearly 4,000,000 of dollars, and support a commerce of £1,900,646 of imports, and £3,717,220 of exports.

There is therefore a vast difference between the Sandwich Islands as they are, and as they ought to be, and might become; for they enjoy a better climate than the Ionian Islands; they have in proportion more land available for cultivation; and their soil is adapted to many rich products which can never be raised in the Ionian Islands, while their inhabitants, if less civilized, want many of the vices which degraded the Ionian population, at the time they were placed under the protectorate of Great Britain.

30. In what I have here said, my object is not to reproach or blame this government for having done little: they have done more than any visitor 25 years ago would have expected: they have already with missionary aids and influences placed these islands in advance of all others in Polynesia: but what has already been done in the quarter of a century, starting from heathenism and barbarism, only proves how much more *may* and *ought* to be done, in the next 25 years—having a fresh start, with a people coverted to christianity, taught to read, write and count, knowing the value of commerce, and that every article they can produce, will be bought by the foreign merchants, if of a quality and at a price that will enable them to compete with the same description of articles from other countries.

It is the interest, and ought to be the *glory* of the king and chiefs to develope the resources of the islands and to fill them with people. The three powerful and enlightened nations who have agreed to respect the independence of the islands under the dynasty of Kamehameha III. expect that the native government will show itself capable of achieving these results; and the Hawaiian people have a right to seek from their government, every thing that can encourage, guide and protect them in the path leading most directly to their preservation, increase, happiness and wealth.

31. Mr. J. J. Jarves, in a valuable article on these islands, published in Hunt's Merchants' Magazine of July 1843, speaking of the influence of commerce upon their civilization, very justly observes. "Commerce has made them (the S. Islanders) sailors, artizans and traders; it teaches them the value of property, and indirectly the rights of man. It has remodelled their polity, freed their labor, and is rapidly teaching their chiefs that if they would have their own rights respected, they must respect the rights of others; that oppression and enterprize cannot flourish in unison; and that, if they would retain their authority, they must exert themselves to keep pace with the advance of mind and general improvement around them." — "It would have carried them far in advance of their present condition, had they but seconded her efforts by the creation of suitable laws to encourage the settlement of respectable whites, to secure apprentices to trades, and other means by which the interests of all are protected in more advanced countries." But in descanting upon the civilizing effects of commerce, Mr. Jarvis is far from withholding from the missionaries the meed of praise which is so justly due them. Of them, he remarks: "Too little credit has been given them for the attempt to teach the mechanical arts and introduce agricultural improvements. A farmer and his family were among the first body of missionaries that arrived at Hawaii: but owing to the indifference of the chiefs were obliged to suspend their labors and return home. Many of the native mechanics were instructed by the missionaries.

"They have also established manual labor schools, and their precepts and example tend directly to the encouragement of industry and the introduction of the trades, and manufactures of civilized life. In the female seminary at WAILUKU on *Maui*, the girls are taught to sew, spin, braid and knit, and other employments suitable to their sex. In all the other schools these branches are taught as far as practicable."

These remarks of Mr. Jarves, in all of which I concur, are pregnant with matter for the most serious consideration of the king and chiefs. It becomes them to examine and reflect how far they can claim any direct share in effecting the improvements already made; how far their past and present policy have promoted or obstructed those improvements, and whether great modifications are not urgently required for the preservation of their own power, in compatibility with the general interests of the people.

32. Emulation amongst nations is as useful as amongst individuals. I most sincerely hope that between the three great naval and mercantile nations which have recognized the sovereignty of these islands, under the dynasty of Kamehameha III., as regards them, there will only be an emulation to exceed each other in promoting their prosperity. But to deserve this, the native government must show a regard for, and an ability to promote, that prosperity. In every law and public act, they ought to bear in mind that the eye of the whole civilized world is upon them: that their example is to decide the question of their capability for self-improvement and self-government; and that not less the honor than the happiness of their race is interested in making as rapid progress, left to govern themselves,

as the *Marquesans* and *Otaheitians* are likely to make, governed or protected by the French.

In pressing this so earnestly upon the ruling powers of these Islands, I do it as a sincere friend of them and the people. I view their rapid progress to probable extinction, with great pain.—I cannot believe that the Almighty has left them without the powers and energies necessary to self-preservation, if they only exert them; and I am anxious that they should exert those powers and energies in the most effective manner.

I would have them study the means whereby the United States have peopled and rendered productive their deserts, within the short space of 68 years, since their independence; and those whereby the vast colonial empire of Great Britain has increased and prospered. I would have them know that it is by industry and encouraging population that these nations have become great and powerful, with a rapidity that has rendered the progress of the Anglo-Saxon race proverbial, and that every day spreads their language and institutions farther and wider over the globe.

It is by industry that the British people, of the fruits and productions of their labor, export annually upwards of £3, official value, per head, and pay taxes to the amount of £1 18s 2d: it is by the same that the Americans export annually nearly $8, and pay taxes or duties to the amount of about $1 65 cents per head; and it is by the same that France, Russia, Prussia and other powers are every year adding to their population, their power and their wealth.

33. Now that the Sandwich Islanders have been admitted to a place amongst independent and recognized nations, it will be expected that their government should at least make an effort to follow the path that has conducted other nations to prosperity. I am not aware that any nation ever arrived at that end by a policy regulating the tenure of land such as that which is followed here. While the United States sell in perpetuity the vacant rich lands of the West, at 1 1-4 dollars per acre, and while Great Britain sells land in New Brunswick at 2s 6d, Canada at 4, 5, 7s 6d and upwards per acre, and in N. S. Wales, Ceylon and Moulmein at 5s., the absurdity of the Sandwich Island government, in refusing to sell land in perpetuity, at all, and only consenting to lease it for about 25 years, at the yearly rent of nearly a dollar per acre, and at the end of the 25 years to revert to the government, with all the improvements made thereon, must be glaringly apparent.

In England alone, which contains 32,247,680 acres of land, on which, without counting Wales, Scotland and Ireland, are supported 15,000,000 of people, the average yearly rent of land in 40 counties is but 18s 10d per statute acre. How can the government of these islands, with 3,897,600 acres, and a population certainly not exceeding 108,539 souls, for many years to come, expect a rent of $1 per acre, with a reversion to said government of all improvements, buildings, &c., at the end of 25 years?

Nor is this a mere opinion of mine, unsupported by fact; for by a memorandum given in to the British Commission of sums received in the treasury for 9 months ending on 28th February 1843, it appears that only $1,931 25 was charged to the treasury for sums received on account of "*Leases of Land.*" Now supposing the one half of the whole land to be good for nothing, the remaining half, or 1,948,800 acres, if leased even at only ten cents per acre, ought to produce $194,880 yearly. It is quite clear that the lower the king fixes the rent of land, the more money he will receive, so long as the population over which he rules, continues to decrease.

Legal enactments imposing a large rent on land, will only tend to keep the land waste, but they will never enrich the king, the chiefs, or landlords; again, it might be easily demonstrated from the example of other nations, that for every 10,000 souls added to the population of these islands, there would be an increase more than proportionate, in the value of all the land they contain.

It is therefore a great mistake to suppose that the alienation of land to foreigners would injure the property and prosperity of the natives; and those who support such a delusion, however good their intentions may be, are enemies to the king, the chiefs, and the people.

New South Wales.—The working of the system which I have in the above and preceding notes recommended, is well illustrated in the financial history of New South Wales.

In that important colony of Great Britain, from 1831 to 1835, both inclusive, the colonial treasury received for sales of land only £162,692; but for the five following years the receipts were: For 1836, 105,163
For 1837, 120,171
For 1838, 116,324
For 1839, 154,754
For 1840, 313,052
———— £809,464

Since 1840, the foolish competition of joint-stock banks, supplying a capital beyond the wants of the community, and affording credit to those who never ought to have had it, after great expansion, led these institutions suddenly to curtail their issues, to the ruin of their customers, as had previously happened in the United States. This cause has depressed, and will for a time, greatly depress the value of land in New South Wales, as it did in North America; but things in both countries will soon find their level, and in both, the value of land will go on rising, as the population multiplies.

The connection between population, receipts for land and bank issues, in N. South Wales, may be shown thus:

Years.	Population	Receipts for land.	Bank note circulation
1836	77,096	£105,163	£106,127
1837	85,267	120,171	113,330
1838	37,912	116,324	121,602
1839	114,386	154,754	170,205
1840	129,463	313,012	215,729

But the Sandwich Islanders are not to suppose that these results were obtained in the early stages of the colony. At first, land was granted without price, as a reward for public services; and also to settlers, in quantity proportioned to their means of placing that quantity under cultivation. In both instances, it was given *for ever*, unless the *grantee* neglected to cultivate his allotment, in which case, but in that only after a certain number of years, it reverted to the crown.

Under the liberal system pursued by Great Britain, in that colony, the following are the results:

Sheep, from 1825 to 1843, increased from 536,993 to 6,000,009.

Horned-cattle, during the same period, from 263,000 to 800,000. And

Exports, from 1832 to 1842, from £384,344 to £1,067,411; being at the rate of £11 15 for every inhabitant

Let those who administer the affairs of the Sandwich Island government, ask themselves what benefits have as yet arisen from their system, if the principle of leaving nothing *fixed*, but every thing revocable, can be called a system.

Canary Islands.—Nor is the progress of population and improvement confined to the Anglo-Saxon race and their possessions. Of this truth, the Canary Islands, in the North Atlantic, afford an example. In number, position and climate, they bear some analogy to these islands. The following table shows what progress they have made in 83 years:

Islands.	*Area in square miles.*	*Population in 1742.*	*Population in 1835*
Canary,	758 3	33,864	68,040
Gomera,	169 7	6,251	11,742
Hierro,	82 2	3,687	4,444
FuerteVentura,	326 1	7,382	13,885
Lanzarote,	323 5	7,210	17,434
Palma,	718 5	17,580	33,059
Teneriffe,	877 7	60,218	85,011
	3256 0	136,192	233,645

The progression of population and improvement, in those islands, is indeed slow, but it is sure and gradual, while in the Sandwich Islands, what has it been, in the sense commanded by the Creator, in the first chapter of Genesis?

Phillipine Islands.—In this same ocean, exists a group of 10 islands of various sizes and a few small ones, which affords another example full of instruction to the Sandwich Islands. They are the Phillipine Group. They are as follows:

Islands.	*Area in square miles.*	*Population in 1837.*
Luzon,	56,604	2,264,807
Islade Negros,	3,774	35,622
Layte,	4,198	92,165
Masbate,	1,215	2,310
Mindoro,	4,155	29,632
Panay,	4,516	406,030
Samar,	5,470	99,635
Magindanao,	35,637	74,560
Palawan,	7,558	11,097
Zebre,	2,162	250,817
Small Islands,	8,826	15,000
Total,	134,115	3,281,675

In the islands of Palawan and Magindanao, there is a portion of native territory in each, of which the population is not included. And the population of the small islands has never, to my knowledge, been exactly taken. Nevertheless, of late years, great improvements have been made in the agriculture, commerce and shipping of the group, while here, in this group, the population is going backward every day, agriculture and commerce remain almost stationary, and beyond good principles of moral action and the elements of a good and useful education generally diffused through the exertions of the missionaries, there is no manifestation of an improvement, in its *ratio*, commensurate with that evinced in all other countries enjoying the same natural and acquired advantages.

I am aware that, heretofore, the ruling powers have excused themselves, in their indolence, indifference and inaction, on the plea of the interference of foreign powers, cramping their energies, and thwarting their purposes; but this plea, if ever well founded, is valid no longer; for from the date of the Agreement of Great Britain, the United States and France, to respect their independence, they can operate without control in the full plenitude of guaranteed sovereignty; and it becomes them now, by their prompt and wise doings, to convince those nations that their belief of their capability to exercise sovereign power, for the benefit of the inhabitants, and of the Islands, was well-founded.

There never before offered such an opportunity for testing the ability of the copper-colored race of man, to govern themselves, as that which now presents itself to the natives of these islands. And I do most devoutly hope, for the honor of the Sandwich Islanders, and for the glory of the *christianity* to which they owe so much, that they will show themselves equal to the trial. I feel assured that the representatives of the three great powers before named, will not be wanting in a disposition to favor and assist them; the editors of the two periodicals here established, will pour in their lights upon all things, religious, moral, commercial, political and financial; and the ministers of the gospel will add their prayers for the blessing of God upon their endeavors. *But they must not be wanting to themselves in making these endeavors.*

(to be continued.)

THE FRIEND.

Honolulu, July 1, 1844.

"TO TEMPERANCE."

"$5 00 from "Sir John Byng," in testimony of the Baronet's deep sense of the drugged condition of the brandy market at Honolulu."

"*June* 1, 1844."

The reader may ask, who is "Sir John Byng" Sir John Byng of England we suppose to be some honorable nobleman, perhaps descended from or in some way connected with Admiral John Byng, who was executed during the reign of George II. Some say he was justly and others unjustly executed. But who is "Sir John Byng" of Polynesia? He is a brig from Sydney, with a cargo of French brandy—*eaux devies*—[La Place treaty.] This brig arrived in this port a few weeks since having on board 2,800 gallons of brandy, and sailed in a few days, *MINUS only twenty-five gallons.* Just before sailing, the supercargo called and left the sum of $5 00, for temperance, which he desired should be acknowledged with the above card. We congratulate the inhabitants of Sydney, that a portion of that poison has left their shores, which has proved an ingredient so terrible and destructive in the cup of their domestic and commercial ruin. We also very much rejoice to witness at least one symptom of wisdom and good sense among the people of Honolulu, in permitting a rum-selling vessel to come and go without disposing of her cargo. The same was true in the case of the "Heber" only a few months ago. Is it not refreshing to learn from the supercargo of a rum-selling brig that French brandy is a drug in the Honolulu market?

It is not best, however, to be too much elated. We learn from our neighbor the Polynesian, that the Sydney brig Phoebe sold here 20 hhds of brandy and 217 cases of gin. We also learn from the same source that the Sydney sch. Falcon has just arrived, having on

board "4 hhds. ale; 16 cases beer; 8 casks ale; 35 boxes champagne; 14 cases Burgundy; 3 cases Sherry; 10 bbls. gin; 124 cases brandy." Report says that vessels with similar cargoes are to follow the "Phœbe," "Sir John Byng" and "Falcon."

The Litany of the Eng. chh. reads, "From all evil and mischief; from sin; from the crafts and assaults of the devil; from thy wrath; and from eternal damnation, *Good Lord deliver us.*"

We make no pretension to the title of churchman, yet we can most sincerely and devoutly offer that petition, and we call upon all churchmen, high and low, and dissenters of every name and denomination, to unite with us in offering that petition, when it is rumored that a rum-selling craft is steering her course for our peaceful shores. Such a vessel comes freighted with the fruitful source of *evil, mischief* and *sin*. If its poison is bought and drank by the people of this land, it will aid the devil in his *crafts* and *assaults* upon their respectability, sobriety, virtue and good name. It will sooner or later bring down the *wrath* of God. It will tend to the *eternal damnation* of immortal souls. "No drunkard shall inherit the kingdom of Heaven." Hence,

From the visits of all rum-selling vessels, "*good Lord, deliver us.*"

If they come,

From a desire among the people to purchase and drink alcoholic poison, the source of *evil, mischief* and *sin*, the devil's aid, the provocation of God's wrath, the cause of everlasting damnation to immortal souls, "*good Lord, deliver us.*"

UNITED STATES COMMISSIONER BROWN'S TEA-PARTY, GIVEN TO THE AM. MISSIONARIES.

On Tuesday the 18th, all the missionaries with their wives and children, were invited "to take tea" with George Brown, Esq, U. S. Commissioner. Eighty-three were present, including an interesting group of forty children. Capt. Paige, U. S. S. Levant, and several of his officers, joined the company in the evening. A neatly arranged table was spread for the children, under an awning in front of the building, while a spacious yard afforded a fine play-ground for their gambols and sports, under the ample folds of their fathers' national flag.* From a moment's personal inspection, and various reports, we infer that the interview was highly pleasing and satisfactory to all parties. We regret that no reporter has furnished us with the brief remarks of Mr. Brown when he drank the health of the children IN A CUP OF MILK.

*It is a question which we should rejoice to see ably discussed.—How far are the children of missionaries and other foreign citizens, entitled to the rights and priviliges of citizens of the U. S.?

The merchant, physician and philanthrophist, we are confident, will peruse with interest the "notes" of Mr. Wyllie, in this number of the Friend. We have heard him styled by an intelligent reader the M'Culloch of the Sandwich Islands.

GENERAL MEETING.

The general meeting of the Am. missionaries has just closed. This annual gathering of the missionaries is almost the only event which diverts their minds from an uninterrupted series of labors among the native population. At this meeting they spend a few days in reviewing the past and planning for the future. Reports are read and statements made in regard to every department of missionary business and labor. It is customary for most of the missionaries to come accompanied by their wives and children. This affords a good opportunity for the families situated on the different islands to cultivate a more intimate acquaintance, and keep alive those social, kindly and christian feelings which happily exist among them. It was recently our privilege to meet the brethren and sisters of the mission, at the table of our common Lord and Savior. It was a season long to be remembered. The elements were administered by the Rev. Messrs. Bishop, Thurston and Whitney, among the very oldest in the missionary work.

The following are the names of missionaries present:

From Kauai.—Rev. S. Whitney and wife; Dr. J. W. Smith and wife; Rev. G. B. Rowell and wife; Mr. E. Johnson and wife.

From Oahu.—Rev. A. B. Smith and wife; Rev. A. Bishop; Rev. B. W. Parker and wife; Rev. Lowell Smith; Mr. A. S. Cooke and wife; Mr. H. Dimond and wife; Mr. E. H. Rogers and wife; Rev. R. Armstrong and wife; Mr. S. N. Castle and wife; Mr. H. O. Knapp and wife; Mr. E. O. Hall and wife; Mr. Levi Chamberlain and wife; Rev. D. Dole; Miss M. M. Smith.

From Maui.—Rev. Messrs. Baldwin, Alexander, Emerson, Clark, and Conde; Rev. S. Dibble and wife; Mr. E. Bailey and wife; Mr. Rice.

From Molokai.—Miss L. Brown.

From Hawaii.—Rev. T. Coan and wife; Rev. L. Lyons and wife; Rev. A. Thurston and wife; Rev. M. Ives and wife; Rev. J. D. Paris; Rev. D. B. Lyman.

Total—gentlemen, 31; ladies, 23.

The Friend appears a few days previous to the date announced at the head of the sheet, in consequence of the editor's expectation of being absent on the 1st. During his absence, all business relating to the Friend, will be committed to Mr. Gilman, at the store of Messrs. Ladd & Co. Any person wishing to obtain copies, will please call upon him.

NEW WORK.

"*The Sandwich Islands.—Progress of Events since their discovery by Capt. Cook.—Their Occupation by Lord George Paulet.—Their Value and Importance.—By Alexander Simpson, Esq., late acting there as H. M. Consul.—London, 1843.—Price 4 shillings.*"

Having been a reader "from our youth up" of the Missionary Herald, and subsequently having fallen in with works upon the Sandwich Islands, by Cook, Ellis, Stewart, Dibble, Jarves, et ceteros, it was with no ordinary interest and curiosity, that we perused the volume with the above-mentioned title. The author we had seen; many of the events described we had witnessed, and many of the characters alluded to, are our neighbors and acquaintance. Under these circumstances, the book was amusing, instructive and entertaining. The author lets the reader into his views, and those of his party. Hence, it may be considered a work of some importance!

If any person has the desire to observe the different views which will be taken of the same subject, by men of different nations and principles, he may most profitably read this work in connection with other writers upon the Sand. Islands. We hope to see a few copies, erelong, at the Islands *for sale.*

Our columns not allowing long extracts to be made, we shall merely insert the author's postscript entire:

"Since writing the foregoing pages, I have observed it announced in the Times, that 'means have been taken by the British government and adopted by France and the United States, for placing the neutrality and independence of the Sand. Islands beyond the reach of intrigue and violence.'

"Truly! Lord Aberdeen has achieved a triumph in diplomacy! He has induced France and the United States to sanction his giving away an important British possession."

The Friend having an extensive circulation among the whaling fleet, the following "Notice" is taken from the advertisements in the Polynesian for June 15:

"'Vessels approaching Honolulu, and desiring a pilot, will set their national ensign and pilot signal, on which he will go off immediately.'

"The great number of ships coming in from Lahaina, and intending to lie off and on, or to come to anchor without employing a pilot, renders attention to the above requirement of the harbor-laws necessary.

"The undersigned will give prompt attendance on all vessels that require his ser-

he will not go off without being signalized as required in the above quoted law; a compliance with which, will be necessary to justify any future complaint against him for want of attention to duty. JOHN MEEK.

"*Honolulu, June* 15, 1844."

TEMPERANCE.

For the Friend.

IS THE TRAFFIC IN INTOXICATING DRINKS IMMORAL?

BY AMICUS.—*No.* I.

The friends of humanity have much cause for thankfulness, that they are permitted to live and act, at a time when great principles are openly and fairly discussed. The subject of *rights* is becoming better understood than formerly. They are more accurately defined. Rights are not quite so arbitrary as they have sometimes been supposed. It is beginning to be felt that, in no circumstances, are men at liberty to do as they will, even with their own. They may not spend their time, dispose of their property, or employ their influence, as they *will*, irrespective of the will of others; at least, the question whether they *may* or *may* not do so, is now a fair subject of discussion. On most points relating to social intercourse, there is little dispute. In regard to the regulation or disposal of most kinds of property, human laws and public opinion settle the question of *rights*. A man may not change the course of a stream, even on his own premises, to the probable detriment of his neighbor, without being liable to pay damages. He may not build his house of certain materials, or in a particular style, for the simple reason that his right to do so conflicts with the safety of his neighbor. What sane man claims it as his right to sell to a known maniac, a potion of arsenic, or a dagger, or a pistol, because he deals in these articles, and the price was tendered him,—the man appearing at the time self-possessed? But unaccountably strange as the statement may seem, it is abundantly sustained by facts, that the right of a certain class of men to dispose of a particular kind of property in such a way as *may*, and probably will, destroy the health of their neighbor; make him a maniac; break the heart of his wife; beggar and corrupt his children; shoulder upon the community an enormous tax; break up the peace of a neighborhood, and blight the hope of heaven in the bosom of multitudes: I say the *right* to traffic in an article which produces some or all these distressing results, because they have purchased a governmental license for a few paltry dollars, and because they have the means of carrying on this traffic, has, till lately, been regarded as settled, so as scarcely to admit discussion. But that time has, I trust, gone by. The right to discuss every subject which has a bearing upon human happiness, is now generally admitted. I am happy in the belief that free discussion will ever be the order of the day at these islands. Let public sentiment be found by discussion free as the winds which fan and refresh us in this our adopted home, or land of our temporary sojourn.

Is the traffic in intoxicating drinks an unlawful one—an immorality? This is a fair question for discussion, and one on which I propose to offer you a few short articles for the Friend. It will be seen at a glance, that the question is a deeply important one. If it can be shown that the traffic is an unlawful one—an immorality—it must and will, at no distant time, be abandoned. Public sentiment will not sustain it. Besides, as friends of the government of the Islands, we have all something to do in this matter. If it be an unlawful traffic—an immorality—be it ours, as the enlightened friends of humanity, to assist, in all suitable ways, in causing it to be speedily and forever abandoned.

In this discussion, I shall take the affirmative of the question, and labor to show, as I am able, by a reference to reason and facts, that the traffic is an unlawful one, and should be abandoned at once and forever.

A word explanatory of the word *unlawful*, will conclude this number. It will be objected, at the outset, that the traffic cannot be *unlawful*, because it is, at present, approbated, and regulated by law. This I admit, strange and humiliating as is the admission But human law is not the standard of right and wrong on moral subjects. If so, nothing could be more fluctuating and uncertain than this standard. What is right to-day, *may* be wrong to-morrow. Under one government, the keeping of gambling houses and brothels is lawful.—Under another, both are prohibited. So one government licenses the traffic in intoxicating drinks; another, prohibits their sale altogether. Which of these governments is right? Both cannot be. We must therefore seek another standard—must go farther back than to human governments. The question is, "*Is it lawful, morally, to traffic in ardent spirits?* May governments lawfully grant licenses to engage in this business? Or is it unlawful—an immorality?" We shall see.

THE RADIATING TRUTH OF THE TEMPERANCE REFORM.—It is important that the radiating truth from which all action springs, and by which every measure can and ought to be tested, should be defined accurately, and firmly fixed in the mind. This truth we believe to be simply this: NO MAN HAS ANY MORAL RIGHT TO USE, AS A BEVERAGE, THAT WHICH WILL INTOXICATE. Any and every measure, plan, argument or effort, that tallies with this assertion, is right; and every thing that opposes it, or tends to diminish the weight this fact should have upon the public mind, is utterly wrong, and ruinous to the temperance reform.—[Bost. Jour.

BREAD UPON THE WATERS.—It is said that in the hand of one of the mummies found in a pyramid, was discovered a bulbous root, which being placed in the earth, grew and bloomed a beautiful but unknown flower, after two hundred years. So may the good seed of the word of God spring up after many years. We have a case in point.—Some years since, a venerable man, upwards of one hundred years old, was the subject of converting grace, in an eastern State. The immediate cause of his conversion was, hearing a text of Scripture which his pious mother had taught him in England, one hundred years before!

"Though seed lie buried long in dust,
It shan't deceive our hope;
The precious grain shall ne'er be lost,
For grace insures the crop."

A pious mother, about sixty years since, had a prodigal son. He was about to leave her, and go to sea. As a last resource, she placed a Bible in his chest, with a prayer to God, for His blessing upon it. Year after year passed away, and nothing was heard of the wanderer. But the eye of his mother's God was upon him. A long time after, a clergyman was called to visit a dying sailor. He found him penitent and prepared to die. He had in his possession a Bible, which, he said, was given him by a dying shipmate, who, expiring in the hope of the glory of God, gave it to him with his parting blessing. On the blank leaf was found written the name of John Marshall, the above mentioned mother's prodigal son. This man was the brother of Mrs. Isabella Graham.

CRIME IN THE OLDEN TIME.—In the course of some remarks recently made in the British House of Commons, by Mr. Crawford, he stated on the authority of Hume's History of England, that "in the reign of Henry VIII. there were confined, as debtors or criminals, at one time, in the jails, 60,000 persons; that 72,000 criminals were executed for theft and robbery alone, in the reign of Henry VIII.; an average of nearly 2,000 a year: that in 1569, in the county of Somerset, 40 persons are stated to have been executed in one year, for robberies, thefts and other felonies, 35 burnt in the hand and 37 whipped. The rapines committed by idle vagrants were intolerable; at least 3,000 or 4,000 persons in every county were living by rapine, assembling in troops, committing spoil in the daytime, and magistrates intimidated from executing their duty. In 1597, an act was passed taking away the benefit of clergy from persons committing robberies in the daytime.

The cost of keeping a sloop of war in service, in time of peace, is about $31,000; of a frigate, $170,000; of a seventy-four gun ship, $290,000. The Florida war, for removing 11,000 or 15,000 Indians, cost twenty or thirty millions of dollars at least, and many lives.

POETRY.

For the Friend.

LOVE'S TRIBUTE.

TO THE MEMORY OF SAMUEL MILLS, INFANT SON OF REV. SAMUEL C. AND MRS. JULIA M. DAMON, WHO DIED AT HONOLULU, JUNE 2, 1844, AGED 10 MONTHS AND 23 DAYS.

I loved thee *well*, when first I saw
Upon thy mother's breast,
A new born infant pillowed there
In nature's balmy rest.

With tenderness and care I marked
Each budding infant grace;
And joyed to think that thou wouldst live,—
A blessing to thy race.

I loved thee *more*, when months passed on
And brightened, as they flew,
The hopes thy bow of promise gave
In colors fair and true.

With chastened reverence I thought
Upon that sainted band,
Thy pious ancestors—whose lives
Had blessed their favored land:

And not their native land alone;
For, in *one ardent breast
Rose the first beam of light that shone
On heathen wretchedness!

And when I clasped thee to my breast
And kissed thy brow so fair,
I thought perchance *his* spirit bless'd
Rested in embryo there.

I loved thee *most*, when to thy heart
The dreaded shaft had flown;
And tidings came that we must part,
For God had claimed *his own*.

Alas! for all the cherished hopes
That in thy young life lay!
"*Father, if it be possible,*
Let this cup pass away."

It might not be!—For while we pray'd
The fell disease wrought on;—
Till our submissive hearts could say—
Oh! "not our wills be done."

Bright seraphs hovered o'er the place,
Chanting a heavenly lay;
And from thy parents' fond embrace,
Bore their loved babe away.

Faith followed to the spirit's rest—
Thy heavenly home on high;
And saw thee on thy Savior's breast
Folded, *no more to die.*

And now, each smitten heart responds—
"Father, thy will be done."
For tho' from earth a CHILD is gone,
Heaven has a CHERUB won. A. W. S.

Honolulu, June 3, 1844.

*The above is an allusion to the Rev. Samuel J. Mills, great-uncle of the deceased, and generally regarded as the pioneer of foreign missions in the American churches.

CONSCIENCE.—We are apt to connect the voice of conscience with the stillness of midnight. But I think we wrong that innocent hour. It is that terrible "next morning," when reason is wide awake, upon which remorse fastens its fangs. Has a man gambled away his all, or shot his friend in a duel?—has he committed a crime, or incurred a laugh?—it is the *next morning*, when the irretrievable past rises before him like a spectre—then doth the churchyard of memory yield up its ghostly dead—then is the witching hour, when the foul fiend within us can least tempt perhaps, but most torment. At night we have one thing to hope for, one refuge to fly to—oblivion and sleep! But at morning, sleep is over, and we are called upon coldly to review and reject, and live again the waking bitterness of self-reproach.

If I were only this or that, or the other, I should be content, is the universal cry; any thing but what I am. So wags the world, so it has wagged, and so it will wag.

From the Polynesian.

OFFICIAL LETTER FROM PRESIDENT TYLER TO H. H. M. KAMEHAMEHA III.

To his Majesty Kamehameha III., King of the Sandwich Islands.

Great and good friend!—I have received the letter and accompanying documents, which your Majesty addressed to me, on the 31st of July last, announcing that, in consequence of proceedings of Rear Admiral Thomas, commander in chief of her Britannic Majesty's naval force in the Pacific, the flag of your country had been restored to you, with all the honors due to the Sovereign of a free and independent State.

I congratulate your Majesty upon this event, and trust that it may be the occasion of continuing and confirming the independence and prosperity of the Hawaiian Islands, and of contributing to the tranquility of your Majesty's reign.

I pray God to have your Majesty in his holy keeping.

Written at Washington, the 20th day of November, 1843.

Your good friend,
JOHN TYLER.

By the President.
A. P. UPSHUR, *Sec'y of State.*

NEW MAIL PACKETS.—The following official notice of a new mail line of packets, established between Callao and Panama, by M. ——, Charge d'Affaires de France, in Bolivia, in accordance with the instructions of the Department of Foreign Affairs of France, we have been requested to make public, by M. Dudoit, Consul of France for this port.

The fast brig Carolina is the first of the line. T. R. Eldredge, Lima, is agent for the vessels, which it is intended shall sail so as to meet the regular packets which leave Chagres for Jamaica.

Letters from France, Turkey, Egypt, Tuscany, Greece and the Pontifical States, will be received and forwarded, free of charge, from Lima.

Letters from Great Britain and her colonies, and the United States and French West Indies, pay the following rates it Lima:

Less than 1-2 oz.,	3 rials.
Less than 6-4 oz.,	6 rials.
Less than 1 oz.,	$1 0
Less than 1 1-2 oz.,	$1 2 rials.
Not exceeding 2 oz.,	$2 0
Not exceeding 2 1-2 oz.,	$2 4 rials.
Not exceeding 3 oz.,	$3 0
Not exceeding 3 1-2 oz.,	$3 4 rials.
Not exceeding 4 oz.,	$4 0

4 rials for each additional half ounce.

Letters which go through England or France to other parts of Europe, pay rates averaging from two-thirds to double the preceding amounts.

U. S. government mail packets now run regularly between Chagres and Pensacola.—[Polynesian.

The following is a list of the officers of the U. S. S. Levant:

Commander, HUGH N. PAGE.
Lieutenants, ROBERT G. ROBB, ROBERT HANDY, JOS. H. ADAMS, LOUIS M'LANE.
Surgeon, EDWARD GILCRIST.
Purser, I. B. RITTENHOUSE.
Acting Master, J. DORSEY READ.
Midshipmen, D. OCHILTREE, FRANCIS GREGORY, GEORGE P. WELSH, C. H. WELLS, EDWARD GORDON, E. H. SCOVELL, GEO. W. YOUNG, CHARLES WOOLLEY, A. R. AMBERCROMBIE.
Captain's Clerk, W. V. TAYLOR.
Boatswain, JOHN DUNDERDALE,
Sailmaker, WM. BENNETT.
Carpenter, JOHN GREEN.
Gunner, S. M. BECKWITH.

The Levant sailed from Callao April 5, 1844; arrived at Nuahiva Ap. 30; sailed from do. May 6; arrived at Tahiti May 11; sailed from do. May 19; arrived at Oahu June 9.—[Polynesian.

If a person is bent on quarreling with you, leave him to do the whole of it himself, and he will soon become weary of his unencouraged occupation. Even the most malicious ram will soon cease to butt against a disregarding object, and will usually find his own head more injured than the object of his blind animosity.

The malicious censures of our enemies, if we make a right use of them, may prove of greater advantage to us than the flatteries and civilities of our friends.

PORT OF HONOLULU.

ARRIVED.

June 4th, H. H. M. sch. Hooikaika, Hall, 25 days from Mazatlan, with dispatches to the Hawaiian Sec. of State for For. Affairs. The H. was 36 days in reaching Mazatlan.

June 5th, Am. W. bark Levant, E. H. Russell, Wareham, 18 mos., 200 sp.—bound to the N. W.—obliged to put back on account of leaking 2000 strokes per hour; now undergoing repairs at Robinson & Co.'s.

June 5th, Brem. W. ship Bremen, Eiger, 5 mos., 70 sp.

June 8th, Am. brig Hannah, Cheever, Salem; 34 days from Guayaquil.

June 9, U. S. S. Levant, Paige; from Callao and the Marquesas; last from Tahiti, 21 days; left Callao April 5. Left at Tahiti French frigate L'Uranie. The Levant spent a week each at Marquesas and Tahiti.

June 10, Br. sch. Falcon, Chap, of Sydney.

June 12, Br. brig Laura Ann, Thomas, from Valparaiso and the Marquesas; 19 days from the latter place.

June 13, Brem. W. ship Clementine, last from Lahaina; 5 months from Europe.

June 14, Eng. brig Clementine, Molteno; from Tahiti.

SAILED.

June 1st, Br. brig Sir James Byng, Megget; for Sydney.

June 9th, Brem. W. ship Bremen, Eiger; to cruise.

June 11th, H. B. M. S. Modeste, Bailey; for Columbia River and the North West.

June 13th, Brem. W. ship Clementine; to cruise.

PASSENGERS.—On board brig Clementine—H. F. Cortes; J. J. Smith; J. Todd; A. J. Ellis and child; Tuane Reva. On board brig Laura Ann—Mrs. Thomas.

DISASTERS, &c.—Arrived at Lahaina, June 2, Am whaleship Bowditch, of Providence, 12 mos. out, 450 bbls. w., 4000 lbs bone. Capt. Soule, the former commander, with four seamen, Edward Pord of Providence, Sam. M. Tripp, Henry Brown and Emel Albert, were lost on the 9th of May last, while fast to a whale—the boat filling and upsetting. At the request of the crew, the 1st officer, John Fletcher, who assumed the command, put back for Lahaina. While in that port, the crew refused to proceed to sea with their present officers; but finally, with the excepsion of one man, agreed to go for the remainder of the season. She is to leave, as soon as her recruits are completed, for the North West.—*Information furnished by M Calkin Esq., U. S. Consul for Lahaina.*—[Polynesian.

DONATIONS.—From Mr. L. M. Hobbs, purser H. M. S. Modeste, $5, for seamen's chaplaincy; from Wm. A. M'Lane, Maui, a donation of sugar for the temperance cause, $10; also, for the same object, several valuable donations from missionaries of the A. B. C. F. M.; from George Reed and Daniel O'Neil, seamen U. S. S. Levant, each $1; also, from five other seamen, $1 75.

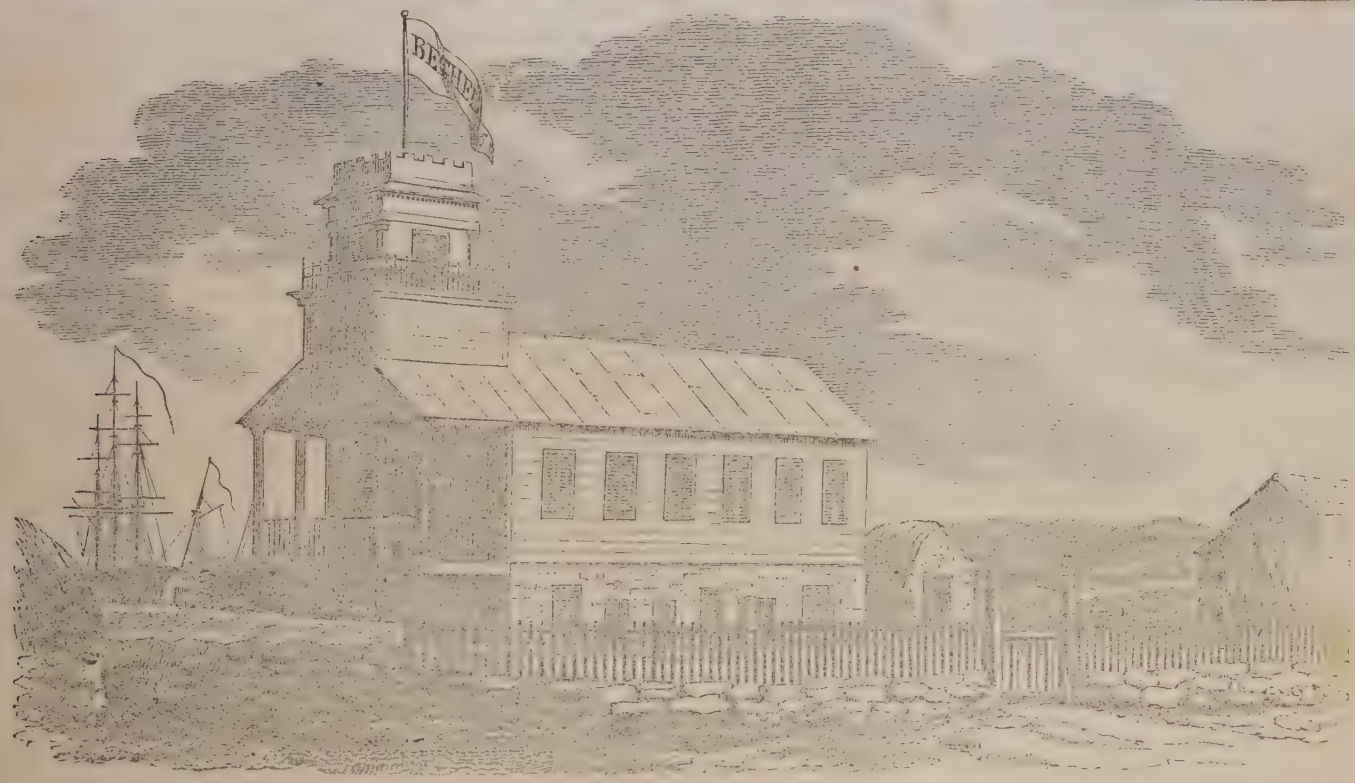
DIED.

In Honolulu, Miss SOPHIA R. MARSHALL, aged 30. The decease took place about half past 11, A. M., June 25th, at the residence of C. Brewer, Esq. She was a native of Boston, Mass., and had been a resident of less than three months upon the Sandwich Islands.

In Honolulu, June 23, Mr. ELIJAH TOLMAN, aged 70 years. He was a native of Brighton or Watertown, Massachusetts. For nearly forty years, he had been a resident upon these islands; and hence, was among the very oldest of the foreign residents. He died leaving a wife and one daughter.

NOTICE.—During the absence of the Seamen's Chaplain, his Desk will be regularly supplied upon the Sabbath, by the American Missionaries resident or visiting in Honolulu.

*** Just as our paper was going to press, letters were received from the U. S. via Mazatlan, under date of April 2d. "Political parties are getting warm on the presidential question. Henry Clay, it is morally certain, will be our next President." . . . "Commercial and financial state of the U. S. is good."..."Temperance is going ahead."..."Mr. Stetson, from your islands, has called." E. R. & J. S.



The Friend of Temperance and Seamen, published monthly, 8 pages, by SAMUEL C. DAMON, Seamen's Chaplain.

TERMS.—$1 50, per annum, One Copy, payable in advance; $3 00, Three Copies; $4 00, Five Copies; $6 00, Ten Copies. Single No. 12 1-2 Cents.

THE FRIEND,

OF TEMPERANCE AND SEAMEN.

VOL. II. HONOLULU, OAHU, SANDWICH ISLANDS, THURSDAY, AUGUST 1, 1844. No. VIII.

For the Friend.

NOTES

On the Shipping, Trade, Agriculture, Climate, Diseases, Religious Institutions, Civil and Social Condition, Mercantile and Financial Policy of the Sandwich or Hawaiian Islands, viewed in relation to other groups of islands, and to the natural and acquired advantages of the Sandwich or Hawaiian Islands. By

ROBERT CRICHTON WYLLIE, Esquire.

(*Continued from No.* VII., *page* 65.)

34. RELIGIOUS INSTRUCTION FOR SEAMEN.—Among other places of the world to which the *American Seaman's Friend Society* have directed their pious benevolence, this greatest sea-port of the Sandwich Islands, has not been overlooked. They have erected here a chapel (*the Bethel*) for seamen, conveniently fitted up to accommodate 200 hearers. The foregoing wood-cut gives a correct representation of the building, and of the flag hoisted on Sundays, that all seamen may concur. It was built at the expense of that society, which during the first ten years, has contributed $20,000 for the expenses of this most useful chaplaincy. In the basement story there is a depository for bibles, in English, German, French, Danish and the chief other European languages, tracts, &c., which are carefully and liberally distributed. The Sandwich Island government, much to their credit, granted eligible sites for the chapel and the chaplain's residence. Public worship is performed every Sunday morning and evening; there is a meeting every Thursday evening for prayer and religious conference, and a seamen's concert for prayer on the evening of every third Monday of each month—both held in the vestry—and the chaplain invites visits from seamen, at his private residence, where he dispenses religious advice, bibles, tracts, &c., to all who attend, with great zeal and assiduity. The present incumbent is the *Rev. Samuel C. Damon*, who has officiated since the death of his predecessor, the *Rev. John Diell*. He belongs to the denomination of Congregationalists or Independents, who abound in New England. His forms of worship are the same; and having heard him every Sunday since my arrival, I am justified in saying that his performance in the pulpit is alike creditable to him as a man of letters and as a clergyman. His selection for this chaplaincy reflects much honor upon the Board who appointed him. His sermons are well composed, and are delivered in a plain, meek and impressive manner, without any of that *ranting* in voice or flourishing in style, which in my opinion are more becoming in the *comedian* than the messenger of the *Lord Most High*. The subject matters are well chosen to arrest the attention of the ardent votaries of wealth, whether they pursue their false and treacherous goddess on the perilous ocean or dry land. His illustrations are often drawn from self-examination, and his precepts have the more force, that their practicability is proved by his own conduct, and that of his amiable and most exemplary lady. He is a strenuous advocate against intemperance and every vicious indulgence. He conducts the periodical in which this appears, on principles becoming his profession; admitting all topics that can promote the spiritual or temporal welfare of mankind, but eschewing every thing conducive to strife between nations or individuals. His chapel is regularly attended by all the respectable foreign residents of Honolulu, excepting those of the Catholic faith belonging to the congregation of the *Rev. the Abbe Maigret*. Among seafaring men who attend Mr Damon's chapel, I have seen besides Americans, English, French, Germans and Danes; its portals are open to all, but I regret to add, that as at home, so here, seamen do not attend as numerously as could be wished. I have never yet heard of a religious seaman who was insubordinate or mutinous, and I think it would be the policy of captains, no less than their duty, to grant every facility and encouragement to their men to attend.

It would be worthy of the piety of the British public to take into consideration the services of Mr. Damon, which are extended to all Protestants without distinction. Only £700 a year are appropriated to his support, by the parent society, in the U. States. Perhaps £300 more are contributed by residents, for incidental expenses; and on these small means, he supports his family in decent respectability, although I do not consider the whole an adequate allowance for the situation, and the arduous labors which Mr. Damon performs. In 1843, 389 seamen called upon him, for advice and instruction.

P. S. After the foregoing was sent to press, Mr Damon strongly objected to its appearance, on personal grounds. His objections were stated in writing, accompanied with an explanatory letter relating to the chapel, and the duties which he performs as its chaplain. With considerable difficulty I succeeded in overcoming his scruples, and obtaining his permission to add the following:

At H. B. M. CONSULATE GENERAL, 12th June, 1844.

My dear sir,—I have received your note of this morning, requesting that what relates to you personally should be omitted in the publication of the statistical remarks lately sent to you. As the omission would break the connection of those remarks, and as I attach great importance to the testimony which, however inadequately, I am enabled most conscientiously to give to the great importance of your services in this place, to all seamen, I take the liberty of asking as a personal favor, that you will waive your objections to the insertion of that testimony.

While I duly appreciate your motives of delicacy in wishing an opposite course, I feel assured that where the honor of your Society is so nearly concerned, and when you reflect upon the benefit arising to the cause itself, from their and your example, you will find that I have good reasons for insisting upon having my own way in this matter.

If you condescend to adopt my suggestion, I hope you will add the additional favor, of publishing in continuation, the explanatory letter which you have had the kindness to address me, giving the details of the system which you pursue.

I am,
My dear sir,
Yours respectfully,
ROBERT C. WYLLIE.

REV. SAMUEL C. DAMON, *Seamen's Chaplain, &c. &c.*

HONOLULU, June 12, 1844.

My dear sir,—Agreeably to your request, allow me to present for your consideration the following statistical minutes, being the result of such facts as I have preserved relating to my intercourse as chaplain among seamen during the year 1843. Your regular attendance upon my public ministrations has doubtless afforded you sufficient opportunity for becoming acquainted with the doctrines and precepts which I aim to enforce from the sacred desk. My duties to seamen I have been led to consider but partially discharged when I left the pulpit. Hundreds of seamen annually visit this port, who do not hear my voice in the chapel. Some do not come, although they enjoy an opportunity; but others do not enjoy liberty on shore during the hours of the holy Sabbath, while many come and leave during the week.

Hence, as you are aware, it is my uniform practice to invite seamen of all nations to call at my study, both upon the Sabbath and week day. This invitation I have endeavored to make in the highest degree general, most fully believing that I should "know nothing of nation or sect in this hallowed cause."

When they called, I have registered their *names*, *nation* and *ship*, and noted down such items as I deemed worthy of record. My register contains remarks upon temperance, religion, education, parentage, books, &c. I have endeavored to learn whether they were supplied with bibles and other useful books. Having learned their situation, my object has been to supply their wants to the best of my knowledge and means.

During the year above mentioned, my study was visited by more than 400 seamen. The names of many I did not register, in consequence of haste or inadvertency. Many of the seamen speaking some other than the English language, I could not satisfactorily obtain their names. I find however the following registered.

American seamen,		272
English do.		67
French do.		27
German do.		9
Swedish do.		4
Danish do.		3
Portuguese do.		7
	Total,	389

During that year I made gratuitous donations of bibles and testaments, as follows:

To English seamen,	9 bibles and	3	testaments,
To American do	7 do	2	do
To French do	9 do	10	do
To German do	5 do	6	do
To Danish do	2 do	0	do
To Portuguese do	1 do	0	do
To Welsh do	1 do	0	do
To Spanish do	7 do	0	do
Total,	41	21	

In addition, I sold several bibles at the Am Bible Society's prices. It is by the liberal appropriations of said society, that I am enabled to make a gratuitous offer of the word of life, to the seamen of different nations, as they visit this port. Quite recently I have been supplied with bibles and testaments in the Swedish and Portuguese languages, which have been frequently called for, but I have been unable to supply the demand.

On the 1st of June, this year, the stock of bibles and testaments in my hands, for sale and gratuitous distribution, belonging to the Am. B. Society, was as follows:

Swedish	bibles,	50;	value,	$2 25;	$112 50
Portuguese	do	50;	do	2 00;	100 00
English	do	300;	do	37 1-2;	112 50
French	do	39;	do	1 50;	58 50
Spanish	do	26;	do	1 50;	39 00
German	do	1;	do	1 50;	1 50
Welsh	do	6;	do	1 50;	9 00
Danish	do	2;	do	2 50;	5 00
Dutch	do	5;	do	2 00;	10 00
Swedish testaments,		50;	do	50;	25 00
Portuguese	do	100;	do	25;	25 00
English	do	218;	do	12 1-2;	27 25
French	do	39;	do	15;	4 05
Spanish	do	75;	do	25;	18 75
German	do	1;	do	25;	25
Total, 479 bibles, 483 testaments; value,					$548 30

I ask you, honored sir, what more noble institution than the Am. Bible Society? I can think of none to equal it in magnitude and importance, unless it be the Eng. & Foreign Bible Society, of which your own beloved land may be justly proud. These two agents of giant strength for good, are now causing the bible to be read in more than 100 languages and dialects. It is most delightful to contemplate these benevolent institutions for scattering the word of life, in connection with such as the following passages taken from that word: "For as the rain cometh down, and the snow, from heaven, and returneth not thither, but watereth the earth, and maketh it bring forth and bud, that it may give seed to the sower, and bread to the eater; so shall my word be that goeth forth out of my mouth: it shall not return unto me void; but it shall accomplish that which I please, and it shall prosper in the thing whereto I sent it." Isaiah 55: 10, 11.

The annual appropriation of the Am Tract Society, renders me very important aid in the prosecution of my duties among seamen. Only a very small portion of this appropriation is in what are technically called *Tracts*. The greater part consists in bound volumes, among which are the following: Bunyan's P. Progress, Baxter's Saints' Rest, Baxter's Call, Doddrige's Rise and Progress, Life of Rev. John Newton, Bogue's Evidences, Wilberforce's Practical View. The above works claim authorship in Old England, besides many others published by the society, while the number of Am. religious authors is becoming quite numerous, whose works are honored with a place among the society's publications. It is no small honor that any author may witness his writings going forth to the world under the seal of that society, inasmuch as every page, paragraph, line and word, must pass the ordeal of a publishing committee, composed of talented men belonging to *four* religious denominations.

The appropriation in bound volumes and tracts, for this year, amounts to $50.

The subject of temperance among seamen, has claimed from me, as I thought, particular attention. Although I do but seldom make it a topic for the pulpit, upon the Sabbath, yet in private conversation I ever aim to impress its importance upon the minds of seafaring men. With scarcely an exception, I have found that persons seriously inclined upon the subject of religion, are also very decided upon this subject. There can be no question but this reform is steadily and triumphantly advancing among seamen. But few crews are to be found in this ocean, in which are not advocates for tee-totalism. Some crews I might mention, almost to a man, as staunch friends to the cause. I am personally acquainted with many common seamen who have visited this port once and again, without yielding to the seductive influence of strong drink and thereby deviating from the path of sobriety, while the number of masters is not small who are willing to be known as the decided adherents to the principle of total abstinence. It is a matter of surprize to me, while landsmen make a great distinction between temperance and total abstinence, that seamen make no half-way work. Among them, no man deserves the name of being styled a temperance man, who does not adopt the principle of *total abstinence from all intoxicating drinks as a beverage*. The monthly sheet which I have published for the last 18 months, has proved a most important auxiliary in this labor of love and work of benevolence. Upon the average, I have distributed gratuitously not less than 500 copies of each monthly number. It is my rule to supply gratuitously all vessels—men of war, merchantmen and whaleships visiting this and other ports upon these islands, trusting to the avails of a subscription list and the liberality of the friends of the cause to supply me with the necessary means for carrying forward my plans; not charging any thing for my editorial and publishing labors. I have hitherto found that funds have not been wanting, although there has been no overplus. My liabilities for the current year, will amount to nearly $400; and I hope not to be disappointed in raising that amount. My subscription list is much larger this year than last. I confidently hope that your valuable contributions to the columns of the Friend, will raise up many friends to the cause of temperance and philanthropy.

I have already very much protracted my remarks, otherwise I should dwell upon other points which have much interested my mind in laboring among seamen. I am satisfied that the christian world has but just begun to feel the importance of elevating their moral and religious condition. According to the most economical principles of financiering, I think it can be shown that merchants whose chief end is to make money, would find it in the end much to their advantage, to do every thing in their power for the moral improvement of seamen. Insurance establishments in America and Great Britain are beginning to make it a subject worthy of consideration, while legislators do not deem it beneath their notice to pass laws calculated to improve the condition of seamen.

Wishing you much success in all your praiseworthy researches relating to the commerce, etc. of these islands, I subscribe myself,

Your ob't serv't and sincere friend,
SAMUEL C. DAMON, Sea. Chap.

Robert C. Wyllie, Esq.

35. NATIVE CHURCHES.—There are two of these in Honolulu; one an immense stone building, where the Rev. Mr. Armstrong officiates, and the other a large adobe house with a thatched roof, where the Rev. Mr. Smith is pastor.

Both are men of learning, zeal and piety. They both preach in native, to crowded congregations, respectable in their attire and deportment. I was particularly struck with the singing of the native vocalists in these churches. It is impossible to hear the native strains of christian music ascending high, shrill and melodious before the throne of *Jehovah*, without a thrill of delight at this triumph of the missionaries, and without reverently enquiring, *can it be that the God of mercies has doomed the race of these new worshippers of his crucified Son to disappear from the soil where his cross has been recently planted?* Both congregations observe the presbyterian forms of worship, as in the New England states.

36. CATHOLIC CATHEDRAL.—This is the most *sightly* looking church in the place. It is under the charge of the Rev. the Abbe Maigret, of the society of Picpus, in Paris. He is a modest, unpretending ecclesiastic, of much zeal in his calling, exemplary in his morals, and who labors hard, visiting the sick of his communion. A vessel sailed from France, about 18 months ago, with a bishop for these islands, seven more priests, and 12 sisters of charity; but she has never been heard of since she left the coast of Brazil, and is supposed to have been lost off or near Cape Horn. I have not been able to ascertain whether the catholics in these islands are gaining upon the protestants, by their conversions, nor the effect upon the morals of the community of the preaching of a diversity of faiths.

The law of these islands tolerates all creeds, and theological controversy is not my province.

37. SCHOOLS AND SEMINARIES.—In the very important point of providing instruction for all classes, as in every other duty connected with their sacred calling, the missionaries stand preeminent. With them, I believe, resides the merit of having excited the chiefs to desire a school for the systematic education of their children of both sexes. With the concurrence of the king and chiefs, in 1839, the American mission selected for that purpose *Mr. & Mrs. Cooke*, who were assistant missionaries. Having lately at the request of Dr. Judd, visited the school daily, to watch the progress of a disease, bearing more resemblance to the "*typhus mitior*" of "*Cullen*," than any other known type of fever, I have been an eye-witness to the anxious and parental-like care of Mr. & Mrs. Cooke, both of the sick and healthy children of the chiefs; and I am prepared to state from observation, that a more proper selection could not have been made.

Reading, spelling, writing, arithmetic (mental and written,) geography (descriptive and topographical,) history, drawing, music (vocal and instrumental,) are the chief branches of education which these young and interesting persons—the future rulers of these islands—receive, at the hands of Mr. & Mrs. Cooke.

The school-room is very commodiously arranged. Strict order and obedience are observed, without any exertion of authority approaching to harshness. Books, maps, stationery, globes (terrestrial and celestial,) are at all times within the accesss of the scholars, and there is an excellent apparatus to illustrate the movements of the planets which compose our solar system.

The following is a list of the young chiefs at present in the school of Mr. and Mrs. Cooke:

NAMES.	WHEN BORN	FATHER.	MOTHER.	ADOPTED BY	RANK, &c.
*Alex. Liholiho,	9 Feb. 1834.	Kekuanaoa.	Kinau.	Kamehameha III.	*Heir apparent to the crown (The *king* having no children.)
†Moses Kekuaiwa,	20 July, 1829	ditto.	ditto.	Kaikeoewa.	
‡Lot Kamehameha,	11 Dec. 1830	ditto.	ditto.	Hoapili.	†Governor presumptive of Kauai.

Nor do Mr. & Mrs Cooke neglect to impress upon their pupils that *the fear of the Lord is the beginning of wisdom*, and religion the basis of all private and public worth. A portion of scripture is read morning and evening, with singing and prayer, in the presbyterian form of family worship.

On Sundays, the pupils regularly attend two services in native, by the Rev. Mr. Armstrong, and one in English, by the Rev. Mr. Damon.

Mr. and Mrs. Cooke, both by precept and the example of their own well regulated family, enforce the utmost propriety of moral deportment, and every punctilio of cleanliness, dress, manner and address, calculated to add the polish of refinement to more solid and useful attainments.

The pupils rise with the sun, breakfast at 7 A. M., dine at 1 o'clock, take tea at 6 P. M., and retire early to rest. At table, Mr. and Mrs Cooke always preside, and there is an abundant supply of good and substantial food

The school hours are from 9 to 12 A. M., and from 2 to 5 P. M.

The medical care of the pupils has devolved upon Dr. G. P. Judd, who notwithstanding his onerous and multifarious duties as secretary of state for foreign affairs, head of the financial department, &c. &c., always finds time to attend, when wanted. I myself have been an eye-witness of the extreme anxiety and tenderness with which he watched the progress of the fever of little William, whose symptoms were, for several weeks, very alarming. And it is but right I should add that his good and exemplary lady was a frequent visitor at the bed-side of the sick child.

It is impossible, in any part of the world, that sick children could have been better looked after, than were William, Lot and Jane, by Dr. Judd, and Mr. and Mrs Cooke, whether as regards the curative or nursing department.

Amongst other things pleasing to observe, was the great concern and affection of the parents, especially in the case of William, who was the only one in real danger.

The pupils are encouraged in those gymnastical exercises which tend to develop the physical powers and fortify the constitution. Among these are playing ball, flying kites, cultivation of flowers, swinging, seesawing, walking, and riding on horseback.

To me it is a most pleasing scene to see them all, boys and girls, well attired and well mounted, merry and good humored, curvetting, galloping and turning round their horses with great dexterity. This pleasure I have, almost every evening during my rides, as I seldom fail to meet and ride on part of my way with them.

When *Admiral Thomas* was here, he was always glad to see them at his house, and to encourage them to go out to tea-parties at the houses of respectable foreign residents here. I have thus met the young chiefs often in society, and I have always found that they support their part in the conversation, in English, with much decorum and propriety. In fact, there is nothing perceptible in their manner or habits that could strike a stranger as differing much from the manners and habits of young English or Americans of the same age.

Each child or pupil has from two to six native attendants, namely: tailors, washers, grooms, &c., according to the age, rank and sex of each; and these are all under the direction of John Ii and his wife, both most respectable natives, who cooperate with Mr. and Mrs. Cooke in excluding these attendants from any intercourse or intimacy with the young chiefs that could communicate to them their own vices, prejudices and superstitions.

Mr. Cooke assures me that in every department of education, they show a readiness and docility quite equal to any other children, of the same ages, and under the same circumstances.

It is evident that under his and Mrs. Cooke's tuition, these young chiefs will go forth into the world and assume their respective stations, having a fund of general knowledge vastly superior to what is sometimes found in the rulers of extensive provinces, and even some republics in Spanish America. It is equally obvious that the administration of these future rulers must be immeasurably more enlightened than any that has ever before existed in these islands; and when they come into power, a new and better order of things may be expected.

This most useful institution, fraught with so many blessings present and prospective, temporal and spiritual, is supported at an expense to the government of about $2000 yearly. This is all that is allowed to Mr. and Mrs. Cooke, for their own salaries, for finding the table, domestics and all incidental expenses. To me it is incomprehensible how they can do so much, with so little.

The clothing is found by the parents or guardians of the pupils. It is supplied in abundance and good taste.

Separate rooms are provided for every two of the pupils; and the apartments are clean, well furnished and well ventilated. There are in all 17 rooms of various dimensions, opening into a court 36 feet square, with windows on the outside, which is 76 feet square. The whole building cost originally little more than $2000, though it is solidly constructed with sun-dried bricks (*adobes*) with a well thatched roof. But the furniture must have cost a great deal, as no comfort, in that respect, that can be imagined, is wanting.

The Rev. Mr. Dibble says that the king, when surveying the happy group, and noticing their improvement, remarked: "*I wish my lot had been like yours; I deeply regret the foolish manner in which I spent the years of my youth;*" and I would venture to add, that the king has more reason to be proud of this chiefs' school than of any thing within his dominion.

38. Oahu charity school.—In the institution of the Oahu charity school also, a missionary influence is to be traced. It took its rise in the voluntary instruction, granted to half-caste children, by Mr. and Mrs. Johnstone, who arrived from the United States, in the spring of 1831, in connection with the missionary establishment. The self-devotion of Mr. and Mrs. Johnstone, towards these poor children, stimulated certain residents here to establish them in a regular school. A school-house was erected, 36 feet by 26, at a cost of about $1800, on ground granted by the king, without any other charge than that of indemnifying its former occupants. In January, 1833, Mr. and Mrs. Johnstone opened the school, with 35 scholars. The number of scholars increased yearly: the schools began to have a foreign reputation, and though intended chiefly for half-caste children, among the scholars were boys from California and the Russian settlements on the N. W. Coast.

The school continued to increase in numbers and usefulness, till Mr. and Mrs. Johnstone found on the part of some of the trustees a growing feeling of dislike and opposition, originating, it is believed, in private animosity; and after much patient endurance, were obliged to surrender their charge on the 22d of Jan. 1844.

It is understood that the trustees have sent to the United States, for other teachers, who, it is to be hoped, will conduct the school with as much benefit to the scholars as Mr. and Mrs. Johnstone did.

While on the subject of this school, I ought not to omit the large benefactions of *Mrs. Saunders*, of Dover street, Southwark London. That lady alone, has remitted for the benefit of this school, since 1835, upwards of $2,500. The method she adopts is to send out by the Hon. Hudson's Bay Co's vessels leaving London, a little invoice of toys, clothes, &c., for children, and other fancy articles, well and tastefully chosen. These she consigns here to her friend Mrs. Taylor (sister-in-law of R. Charlton, Esquire) under whose care they are sold off at auction. I myself lately witnessed the sale of Mrs. Saunders' last consignment, and was surprised to see how spiritedly the *elite* of Honolulu bid against each other for the small articles of Mrs. Saunders assortment. The sale realized, I understand, about $450, which with about $160 more, arising from a former consignment, only recently paid, Mrs. Taylor either has placed or intends placing, in secure hands at interest, for the benefit of the charity, to be forthcoming whenever the school is reorganized under proper teachers, agreeably to the intentions of the donor.

It is to be hoped that a knowledge of this sum so held in deposit and accumulating, will stimulate the trustees to a course of united and harmonious action, tending more to a rivalry in furthering the benificent objects of the charity, than to a rivalry for a power and influence, which unless so directed, will ever be pernicious to those objects

The Rev. Mr. Damon introduced into his sermon last Sunday (26th May) a very appropriate address upon that subject, with a delicacy that could offend no one, while his intimation that in the meanwhile he purposed himself to commence a Sunday school for the benefit of such children, conveyed a practical reproof which ought not to be lost upon those whose special duty it is to promote their education.

39. Mr. & Mrs. Johnstone's select school.—After their separation from the Oahu charity school, Mr. and Mrs. Johnstone bethought themselves of the establishment of another school, known under the above name The school is "*select*" only in the respect of the number of scholars that can be accommodated, and not in that of rank, color or caste. At present the school is composed of five children of white residents; seventeen ditto of white and native; three ditto of pure natives; and seven ditto of natives of California. The terms of admission make the school *select*, to a certain extent. These are, for tuition only:

$25 junior class for one year.
$40 2d class, do. do. do.
$50 3d class, do. do. do.,

besides the necessary expenses for books, stationery, &c.

The children are taught to spell, read and write, arithmetic, geography, English grammar, &c. The regular school hours are from 9 to 12 A. M., and from 3 to 5 P. M.

They admit children to board with them, at the rate of $150 per annum.

Mr. and Mrs. Johnstone have met with so much encouragement in this school, that they are in quest of a site on which to erect a large and commodious house, to enable them to accommodate more scholars.

I have no doubt the government will countenance their establishment, as the existence of a school in the capital, attracting for instruction children from countries older in civilization, reflects honor upon the Sandwich Islands. And besides, the money spent in the islands for their education and board, is of some account in the aggregate of many small advantages concurring for the general good.

40. Native schools.—Of these there exist in Honolulu fourteen, containing about 750 children. At the head of each school is a native teacher, with a native monitor under him. The pay of these teachers varies from six to twenty-five cents per day. Even this small sum is tardily paid, and but a small portion of it in cash.

The usual course of study is reading, writing, arithmetic, geography and moral philosophy, combined with the precepts of christianity.

The native scholars are more docile and manageable than European or American children of the same age; they receive instruction readily, and in mental capacity, I am assured, they are not inferior to white children.

In the science of numbers, and exercises of memory, they generally excel,

41. School for missionary children.—This school has been in operation for about two years. During this period, the average number of scholars has been twenty-five, and of these about two thirds have boarded in the establishment,

It is named the *Punahou* school, and is pleasantly situated on a slight acclivity fronting the sea, about two miles east of Honolulu. The building, though of cheap construction, is large and commodious.

The school has recently sustained a heavy loss by the death of Mrs. Dole. Her husband, the Rev. Mr. Dole, and Miss Smith, (one of the missionary ladies,) conduct the course of education. This differs in no essential respect from the course persued in academies in the United States. It begins with the rudiments of education, and then follow the other branches necessary to fit the boys for college or some mechanic art.

It is supported partly from the funds of the mission, and partly by the contributions of the missionaries themselves.

42. REV. ABBE MAIGRET'S SCHOOL.—This school is kept in several humble apartments adjoining the catholic church, to which I have already referred, and close to the abode of the Rev. Abbe himself. It consists of about 300 scholars of both sexes, who are matriculated as belonging to it, but they do not all attend every day. There are six native teachers, and as many divisions of the school. The Abbe superintends the whole six divisions. The female children are kept by themselves, under native teachers of their own sex, and so it is with the male children; both being divided into classes according to their ages, and the progress they may have made. The government, of late, has made a small allowance for the support of these native teachers. Their pay, I understand, varies from three to eighteen cents per day, according to the qualifications of each. The Abbe himself is wholly supported by the society for the propagation of the catholic faith, or that of *Piepus*, to which he more immediately belongs. All his services, whether in the school, before the altar, or administering the sacraments of his church, or performing the rites of marriage or interment, are rendered without any charge to those who belong to his communion.

The course of education pursued, embraces the elementary part of education, with geography and history. The holy scriptures, according to our protestant translation, are prohibited; but not so the translation authorized by the church of Rome. The principle of that church is one of *unity*—and that holy writ is only the rule of faith according to the sense of its various passages given by the church; and not as every reader may interpret it. I leave to theologians to determine whether the revealed word of God is not complete in itself, as a rule whereby man may square his way onward to salvation; or, complete only, when applied by the authority of the church:—and also whether any such difference exists between our translation and that of the church of Rome, as to justify its objection to our bibles. In what comparisons I have made, I have never found any remarkable difference; and where all christians unite under *one Lord Jesus Christ*, it is to be regretted that minor matters of *form* and *ceremony* should not be left to the conscience of every individual, according to the maxims of *St. Paul*—as I understand them.

Religious instruction forms an important part of the course of education pursued by the Rev. Abbe Maigret. He told me that the four gospels had been translated into the native language, and will be put into the hands of his pupils so soon as they can be printed. The rest of the scriptures are to follow, whenever they can be translated and printed.

If I understood him rightly, there are in all nine catholic priests on the islands, and the baptized members of their communion amount in all to about 12,500, besides those who are under preparatory training.

In the whole islands, they have about 100 schools, with upwards of 3000 scholars. The education in all of these schools is in the native language, except in one, where it is given in French.

The Abbe himself gives lessons in that language, in this village, to those who attend for that purpose, at his residence, although they may not be of his faith.

It appears that the whole sums collected throughout the catholic world for the society of the propagation of the faith, in 1841, amounted to £2,752,214 87
that the balance of 1840 was 633,254 71
Making in all, £3,385,469 58

Of that amount, during 1841, there was appropriated
to missions in Europe, - - - - - 278,174 00
To ditto in Asia, - - - - - 954,153 37
To ditto in Africa, - - - - - 155,813 00
To ditto in America, - - - - - 886,171 51
To ditto in this ocean, - - - - 369,404 74
Sundry payments, &c., - - - - 210,762 92
Balance in treasurer's hands, - - - - 32,184 39
Remaining on hand, - - - - - 559,403 57
£3,385,469 50

The organization of this society is believed to be complete; the zeal and courage of its missionaries have extended to all parts of the world; but the funds at its command, do not appear to be formidable in amount.

43. BURYING GROUNDS.—The protestants and catholics have separate places of interment. They are both sufficiently ample, but as the village increases, I think they will be found too near the population. If sites were chosen to leeward of the town, and at a greater distance, I think it would be better. Among the protestants, interments sometimes take place in garden, field, and other common grounds.

44. PROGRESS OF REFINEMENT AMONG THE YOUNG HALF-CASTES.—A ball takes place once or twice a week, superintended by Mr. Stephen Reynolds, in a commodious room, where these young persons join together in the festivities of the dance. White strangers are not excluded, but they must subject themselves to the strictest rules of propriety and decorum. The young ladies, in point of dress, make a very respectable figure; and they carry themselves well though all the dances usual in modern times. Good music and light cooling drinks are provided. The *mammas* attend in an adjoining room to witness the performances of their daughters. Mr. Reynolds deserves the more credit for the pains he takes in polishing the manners of these interesting young people, that he himself has reached that period of life when it cannot be expected that such exercises *on the light fantastic toe* can afford him much personal enjoyment. These periodical balls, though upon a smaller scale, remind me much of those given in the *Kidderpore school* at Calcutta, out of which so many native-born daughters of British officers have walked out to fulfil the duties of respectable mothers.

45. A SCHOOL OF ARTS, would be a great desideratum in this village, the capital of the Hawaiian Islands. The Rev. Mr. Bishop, and some other of the most intelligent of the early missionaries, have assured me that the new conveniences of life introduced by foreign artisans and merchants aided very materially in impressing on the natives a respect for and an inclination to listen to the doctrines of the new faith, and to uproot the *prestige* of their ancient idolatrous belief. The human mind, whether civilized or savage, naturally disposes itself to receive favorably instruction in spiritual matters, from those whose superiority in temporal things conducive to their worldly prosperity, stands prominent to the senses. This principle is well understood by the Jesuits, and was acted upon in *Paraguay, California* and other places inhabited by wild indians, with a success that alarmed the governments even most devoted to the see of Rome. It is possible to imitate the policy of the Jesuits in that respect, without teaching the religious dogmas, rites and ceremonies which they inculcated; and as our *Saviour* himself recommended his direct message from the Throne of his Father, by miraculous cures and other acts of beneficence to man in his temporal interests, I do not see why protestant missionaries amongst the heathen should not avail themselves of the like aids to the favorable reception of their delegated doctrines.

But as the missionaries in these islands have already extirpated heathenism, and brought the truths of christianity home to the consciences and conviction of, I may say, all the natives, the mechanic arts are no longer useful to enable them to achieve a spiritual conquest already made. They ought however to be encouraged, by all the means possessed by the missionaries; both because the gospel carries with it the promise of this life as well as that which is to come, and because while preaching *seek ye first the Kingdom of Heaven and its righteousness, and all other things shall be added to you*, they are deeply interested in bringing home that important truth to the experience of all who truly follow their advice; and because the bare knowledge of such a result in these islands, would greatly facilitate the introduction of christianity into others.

As a measure of purely political economy, a school of arts ought, *pari passu* with agriculture, to engage the attention of the king and his statesmen. The natives are a docile people, and like all others of oriental origin, gifted, in a high degree, with imitative powers. It is consequently in their genius to acquire readily a knowledge of the mechanic arts, for which every improvement or extension in agriculture will increase the demand.

Nor are they wanting in ingenuity, as shown in their "*kapas*," (cloth of bark,) mats, thatched roofs of houses, &c., which they manufacture. What are particularly wanted, are some light manufactures or handicrafts for the women and children, so as to employ them constantly, and at some benefit. As for the men, the cultivation of the ground, properly encouraged by suitable laws, will afford profitable occupation for all of them who are able to work, even though their numbers were ten times greater.

Under the simultaneous encouragment of agriculture and the arts, a home market will arise, of vast consequence to the commerce and revenue of the islands. The importance of a home market is seen by what takes place in Great Britain, justly considered the greatest manufacturing and exporting country in the world. Many believe that its prosperity depends wholly upon the export trade to foreign countries. The fallacy of this supposition is proved by late parliamentary returns; according to which, of £200,000,000 of goods yearly manufactured, 53,000,000 only are exported, and 147,000,000 remain in the country for its own consumption. Even of these £53,000,000, a great proportion is exported to the British colonies; so that Great Britain is far less dependent upon her exports to foreign countries, properly so called, or on any derangment of trade with one foreign country, than what is generally imagined.

That no parallel lies between the British and the Hawaiian Islands, I readily grant; but the advantage of a home market, and the necessity of encouraging it, in the Sandwich Islands, is great in proportion to their want of foreign markets to consume the produce which they are capable of raising.

45. HOTELS.—Of these there are three in Honolulu; two kept by Americans, and one by a Frenchmen. The charge for boarding is about one dollar a day, or $6 a week, to regular boarders. The *mansion house* is the best building of the three, and appears to be under the best management. They all want good large airy bedrooms, for the accommodation of transient visitors, of whom there are more than could be expected in a part of the world so remote. This is especially the case during the season of spring and fall, when the whalers frequent the port.

46. HOUSE PROPERTY.—I have seen a calculation showing that 113 houses here are worth $370,000. Of these, about 38 are stone houses, 26 of wood, and about 59 built of *adobe* or sun-burnt bricks.

20 of these household properties are valued at 1 to $2,000
15 " " " 2 to $4,000
13 " " " 4 to $6,000
8 " " " 6 to $8,000
5 " " " 8 to 10,000
1 " " " 0 $12,000
1 " " " 0 $15,000
1 " " " 0 $18,000
2 " " " 0 $20,000

I call them *house ownerships*, because one proprietor often holds three or four houses, which are all valued together.

To the $370,000 may be added $20,000 for adobe buildings not enumerated in the above calculation. It does not comprise any estimate of the numerous grass houses which exist, many of them large and commodious.

At a short distance from town, in Nuuanu Valley, there are 10 cottages or summer retreats, which may be worth altogether about $12,000 or £2,400.

47. GENERAL OR COMMISSION MERCHANTS.—Of these, in Honolulu, there are four American houses, namely: Messrs. C. Brewer & Co., E. & H. Grimes, Ladd & Co., and Paty & Co.

There are only two English firms, viz. Messrs. Polly & Allen, agents of the honorable Hudson's Bay Co., and Henry Skinner & Co.

48. STORE-KEEPERS.—There are six American merchants of that class, namely: Stephen Reynolds, with 2 stores: Cummins and Co. 2 do; Hopkins, 2 do; E. C. Webster, 2 do; and G. M. Moore and Robert Davis, who have each one store.

Mr. J. Montgomery is the only English store-keeper.

There are three stores kept by Chinamen, viz. Sanping & Co., Ahung & Co., and Tehoe.

The naval store-keeper of the United States, Mr. Benson, is a government *employee*—and I hear is good as such, though with liberty to trade. His classification will therefore be with that of general merchants.

After this array of numerous firms and individuals who live here by trade, the wonder is how they can all make out a livelihood from the very limited commerce which the port has hitherto enjoyed, and for which I refer to my table, published in the *Friend* of 1st June.

(TO BE CONTINUED.)

The Mussulmen writers speak of an ignorant Arab, who being asked, how he knew any thing of the existence of a God? replied, "just as I know by the tracks in the sand, whether man or beast has passed there, so, when I survey the heavens with its bright stars, and the earth with its productions, so I feel the existence and power of God."

THE FRIEND.

HONOLULU, AUGUST 1, 1844.

THE FOURTH OF JULY.—EDITOR ABROAD.

To every American, how rich in hallowed associations is THIS DAY. At home, the day is ushered in with the firing of cannon, and celebrated by processions, addresses, pic-nic parties, temperance festivals, and the thousand methods of rejoicing, known to them only who take part in the exciting scenes. The DAY is remembered too abroad. Under the ample folds of the "star-spangled banner" the enterprising sons of the great North American Republic, on ship and shore, give full expression to their patriotic love of country. The citizen of the U. S. on the sea, is always proud to show his colors, while the resident among the people of other lands, other languages and national customs, rejoices that he can claim the protection of a flag respected and honored. For an American citizen to appreciate his full privileges, he must visit other climes and nations. In years gone past, it has been our privilege to meet with assembled thousands in celebrating the "day."—On one occasion, to hear a country parson, set forth the glorious priviliges of free-masonry; on another, to witness an imposing military parade of U. S. troops, on the very spot where the immortal Washington won his proudest laurels as an able general—the battle-ground of Trenton; and on still another, the masterly eloquence of Webster made an impression which time does not efface. It was upon the Fourth of July, that John Hawkins, the apostle of the great Washingtonian Temperance Reform, made us to feel that national liberty was a precious blessing, but that freedom from the galling chains of intemperance, was more precious. Although a man might enjoy civil, religious and national liberty, yet if he was addicted to habits of intemperance, he was still in bondage—*a miserable and degraded slave*. Is not the drunkard a slave? Yes; answers the unanimous voice of ransomed thousands. Amid the recollections of past scenes, memory recalls one 4th of July, spent among friends and acquaintance—an agreeable party—in one of those wild, secluded and mountainous regions seldom visited except by the wood-chopper or hunter. The spot was near the heights of Mount Washington. Our table was spread, upon the ground, within a few rods of a monument defining the point where the corners of connecticut and New York meet the southern boundary line of the old Bay State. Years have since passed; other scenes have succeeded. We doubled Cape Horn on one of the last days of June 1842, and the 4th of July was spent off the western coast of Patigonia. We were beating against a northerly wind, dead ahead. A cold and drizzling storm drove all from deck except the weather-beaten sailor. "Salt beef and hard tack" was our principal fare. More than 100 days had passed since we had been cheered by the least glimpse of terra firma. One of Uncle Sam's best 600 ton merchantmen was our temporary home, and we strove to be very patriotic! But why dwell upon the past? Has the present no incentives to excite a patriotic love of country? Here we are in quiet Kealakekua, enjoying with our travelling companions, the kind hospitalities of the American Mission families, Messrs. Forbes and Ives, on the very spot replete with historical associations the most interesting. Here fell Cook. Around us are the temples of idolatrous worship in mouldering ruins, while here stands a neat and spacious house dedicated to the one only living and true God. A reading population dwell here; but it has been trained in schools after an American model. It was from free, happy and enlightened America, that the ministers of religion and the teachers of schools came, to impart the blessings of education, civilization and christianity to this once heathen people. Be assured, our countrymen have not been idle. Has an American visitor to the shores of Hawaii no incentives to patriotic emotions on the 4th of July? Influences emanating from his own land, have conferred blessings inestimable upon this; nor has the current of benevolent action ceased as yet to flow. While, at home we loved our country, we love her more, dwelling upon these far-off shores. We love her institutions—civil, literary and religious—and long may they continue to bless her thriving citizens at home, and diffuse a holy savor through the other nations of the earth.

This morning we rode on horseback from the mission station at Kailua to this place, a distance of 14 miles. The road was good—the best we had seen on the islands, considering the rugged and uneven nature of the country. Such immense tracts of lava piled up in every shape, would have well-nigh bewildered the scheming brain of a rail-road contractor. By mistaking our road, we came upon the *identical* spot where Cook was killed. It is the village of Kaawaloa, on the opposite side of the bay, from Kealakekua. The stump of a cocoa-nut tree has been set up in the fissure of the rocks to mark the spot where he fell, only a few feet from the water's edge. It is five feet high, one foot in diameter at the top, and two at the base. This simple monument bears three inscriptions on copper plate:

No. 1.—"Near this spot, fell Capt. JAMES COOK, R. N.; the renowned circumnavigator who discovered the islands A. D. 1778.

"*His Maj. sty's Ship Imogene, Oct.* 17, 1837."

No. 2.—"This sheet and coppering put on by Sparrow-hawk, September 16, 1839, in order to preserve this monument to the memory of Cook.

"Give this a coat of *tar*."

Underneath the above, there is another inscription on a sheet of copper, quite characteristic of the naval commander who caused it to be there posted. It reads as follows:

No. 3.—"This Bay was visited July 4th, 1843, by H. M. S. Carysfort. The Rt. Hon. Ld. Geo. Paulet, Captain; who was the representative of Her Britannic Majesty Queen Victoria. These islands were ceded February 25, 1843."

Methinks the Rt. Honorable, within less than one month from that visit, regretted having thus *posted* his folly! for within that period, the Carysfort's guns saluted once and again the old Hawaiian flag.

Another monument on the neighboring eminence, marks the spot where were buried the ashes of his body after it was burnt. We have not as yet visited the place. In a house nearest the spot where he was killed, we visited an aged woman, who is totally blind. She remarked that when young, she sung songs for Cook's amusement. She appeared at least 75 or 80 year's old. I learned that she had always resided on or near the place.

Kealakekua Bay, July 4th, 1844.

P. S. The cocoa-tree bearing the above inscriptions, was partially "cut off" by a ball from Cook's ship, at the time he was killed. The top portion was taken to England, by Capt. Bruce, H. M. S. Imogene. So says report at Kealekakua Bay.

July 5th.

SPURIOUS WINE.—A trial has recently taken place in Birmingham, England, which caused great commotion among the wine drinkers. A gentleman having purchased a cask of port wine of a large wine dealer, suspected fraud, and refused to pay; the consequence was a prosecution. The defendant called in the servants of the prosecutor—when it appeared in evidence that the dealer had for years been extensively engaged in the manufacture of spurious wine, and had agents travelling the country, selling it as pure imported: while in fact it did not contain a drop of the juice of the grape, but was entirely made up of distilled liquors and poisonous drugs.—*N. Y. Organ.*

Is it to be supposed that wine-drinkers in this quarter of the world obtain a purer article than their brethren in England and U. States? Of course, reader, they keep the best at home. What precious stuff they must send to these "ends of the earth!" The Sandwich Islands have declared they will purchase no more. Some foreigners continue to quaff the article that goes, in commerce, for wine. But really, if chemists tell the truth, instead of saying, "will you allow me to drink with you a glass of sherry, or port, or Madeira?" we should say, will you allow me to drink with you a mixture of chalk, oil of vitriol, and log-wood; or a compound of sulphuric acid, worm-wood, arsenic, and sugar of lead? Shakspeare once exclaimed, "Oh! thou invisible spirit of wine! if thou hast no other name to be known by, let us call thee DEVIL!" If we may judge from consequences, a single glass of wine contains more than *one devil*—even *a legion*.

For the Friend.

IS THE TRAFFIC IN INTOXICATING DRINKS IMMORAL?

BY AMICUS.—*No.* 2.

The way is prepared, it is believed for the discussion of the question proposed in the introductory article, viz. "Is the traffic in intoxicating drinks an unlawful one—i. e—an immorality?" I affirm that it is so; and that, for the following reasons:

1st, *It conflicts with the revealed will of God.*

It will be taken for granted, that the existence and moral government of God are acknowledged by all who may read these papers. If there is a God, a Moral Governor of the world, then plainly His will is the standard of right and wrong. Whatever in human action is consonant to the will of God, must invariably be right; in the highest sense, *lawful*. Whatever conflicts with His will, must incontestably be wrong; demonstrably *unlawful*. In most cases, this principle is fully admitted. Take larceny, for instance, or perjury; acts concerning which there is a very general agreement. Suppose now that public sentiment should demand the repeal of the law making theft a punishable offence; so that, as in ancient Sparta, youth should be allowed and encouraged to steal, provided they could do so without detection;—would stealing be the less unlawful? Plainly not; and for the obvious reason that the Moral Law—the unrepealable Law of God—peremptorily forbids the act. "Thou shalt not steal." So of perjury and other kindred deeds which comes under the cognizement of this law. No human government can, by enactments, make these acts less than criminal. Nothing is plainer than that the acts of individuals, and of governments, can be lawful only when they are consonant to the will of the great Lawgiver.

Now let us examine the traffic in intoxicating drinks in the light of the law of God, and then determine the question of its lawfulness. For the sake of impression, and from the fact that the *greater* includes the *less*—not because the traffic does not conflict with other parts of the decalogue—take the sixth command: "Thou shalt not kill," is the letter of the law; the penalty, death by the hand of the public executioner. "Whoso sheddeth man's blood, by man shall his blood be shed." No one questions that the act of murder is unlawful—an immorality. But the question is, as to the extent and application of the law. Can the traffic in ardent spirits be regarded as a breach of this law? Where is the proof that it is such a breach? Call it a bad business, if you please; but in what respect is it worse than the casting of cannon, or the manufacturing of swords and firearms for war? It is admitted that there is a woe pronounced against the man that giveth his neighbor drink; that "putteth thy bottle to him and makest him drunken;" but what has this to do in the case of him who keeps for sale that which *may* and if used to excess *will* cause intoxication, and may possibly be followed by sudden death? Or allowing that the woe thus pronounced will ultimately light upon the head of every trafficer in intoxicating drinks, who can tell what will be the penalty of incurring this woe? How can it be shown that this act, the trafficking in intoxicating drinks, either in large or small quantities, belongs to the same category with the breach of the sixth commandment of the decalogue? Let us examine.

A meeting of the Hawaiian Bible Society was convened in the native school-house, at Honolulu, on the evening of Wednesday, June 12th.

The Rev. Richard Armstrong, one of the Vice Presidents, presided; and opened the meeting with prayer.

The Rev. Artemas Bishop, in pursuance of a previous

arrangement, delivered an address; which was followed by the report of the Secretary and Treasurer.

Voted, That the next Annual Meeting be held in the Seamen's Chapel, and that an address be delivered on the occasion.

The following is the list of officers for the ensuing year:

R. W. WOOD, M. D., President.
Rev. R. ARMSTRONG, 1st Vice Prest.
Rev. L. SMITH, 2d do. do.
Mr. LEVI CHAMBERLAIN, Secretary.
Mr. A. S COOKE, Treasurer.
Rev. S. C. DAMON, Mr. E. O. HALL, Mr. A. JOHNSTONE, } Executive Committee.

ADDRESS.

A BRIEF HISTORY OF THE TRANSLATION OF THE HOLY SCRIPTURES INTO THE HAWAIIAN LANGUAGE

Read before the Sandwich Islands Bible Society, June 12th, 1844. By Rev. A. BISHOP.

The celebrated remark of Stillingfleet, forms a suitable motto for this subject: "*The bible, and the bible alone, is the religion of Protestants.*" In all religious discussions, an appeal to the authority of the word of God, forms the *ultima ratio* of protestant argument. Among all the numerous sects of protestantism, there are certain fundamental principles of bible doctrine in common which forms the essence of their religion, and for the support of which, all appeal with one consent to the sacred oracles. This constitutes the oneness of their religion in distinction from popery. As the former appeal to the bible for their authority, so the latter refer to the traditions of the church, and the sanctions of popes and councils, examples of both doctrine and practice. It is this fundamental difference between the papacy and protestantism, which makes the one a distinct religion from the other, and puts each in such marked opposition, that if one of them is christianity, the other is of necessity its antagonist. Not only is the bible the ultimate authority of protestant belief, but the religion of protestants cannot flourish where the scriptures are not dispersed and read in the vulgar tongue. The proof of this principle is at hand, but like an axiom it is also self evident, and need not therefore be dwelt upon in this place. It is one of those principles upon which all denominations of protestants are agreed, and which enters into all the ramifications of their varied plans for the spread of religious truth in the earth. Accordingly, it was among the earliest efforts of this mission to get the scriptures translated and put into the hands of the Hawaiian nation, and to raise up a generation of readers to peruse the contents of the bible, and thus become their own judges of the divine will to men. It is a brief history of our labors in this department, which I here attempt to sketch.

The retrospect of past years reverts back to a season in which much precious time has been consumed, and much mental satisfaction enjoyed. No small part of former years has been occupied in investigating the word of God in the original languages, with a direct reference to a Hawaiian translation. The works of the most learned commentators and lexicographers, and various translations both in Latin and English were consulted. The discoveries which modern scientific investigators have thrown upon the original languages of scripture, were made available. The labors of Rosenmuller, Kenoel, Michaelis, Gesenius, Knapp, Griesback, Bloomfield, Doddrige, Stuart, Robinson, Macknight, Campbell and others, have all contributed to aid us in the investigation. But their aid extended only to the elucidation of the sacred text. A still greater labor existed in bringing the true sense of the original into a language which had never been cultivated, and whose words are limited by the paucity of ideas attained by an untutored people.

While our acquaintance with the Hawaiian language was limited, this constituted a formidable difficulty, and one which for a long time retarded our first efforts at translation. But as our investigations into the structure of the language advanced, we discovered that by the combination of simple and familiar words descriptive of the thing intended to be expressed, whether a noun or verb, we were able to form new words to an indefinite extent, in perfect accordance with the genius of the language, and intelligible to the native reader. The constant use of this power enabled us to meet and overcome nearly every difficulty arising from the paucity of Hawaiian words, besides enriching the language with many hundreds of new terms, which are now in common use throughout the archipelago.

Another method of obtaining words, was to take those in vulgar use. and appropriate them to a religious sense for a definite purpose. In these cases, their new meaning needed to be explained in some instances, and in others not. The word used for repentance is one instance out of many others.

The names of things not originally known at these islands, have been taken as circumstances indicated. Such things as have been introduced here, are named in our translations according to the appellations given them by the natives; most of which, are their foreign names, changed (or as some would say, corrupted) into the orthography adapted to the Hawaiian organs of pronunciation. Those things unknown here, have in some instances been written after their foreign names, subjected to the same alterations as the foregoing; or when it would admit, a name descriptive of the thing has been compounded for the purpose.

The names of persons and places recorded in scripture have retained their identity in the translation, but transmuted into the Hawaiian orthography, which requires every syllable and consequently every word to terminate with a vowel, and allows no two consonants to come together. The principle adopted in the transmutation of words, is either to insert a vowel between two consonants when they come together; or if a double consonant, to drop one of them, and terminate the word by a vowel. The latter is accomplished either by adding a vowel to the final consonant, or when the penultimate letter is a vowel, by sometimes leaving out the final consonant. Thus the name *Petros* in Greek is transmuted to *Petero*, by inserting the *e* between *t* and *r*, and dropping the final *s*. *Jakoba* from *Jakob*, is an instance of the former kind of transmutation.

Our first attempts at translating the scriptures, were about the beginning of the year 1826. Translations of the gospel of Matthew were simultaneously made at Honolulu, Lahaina and Kailua. It may well be supposed that these first efforts were very imperfect, as was the case. There was more of coincidence in them, however. than we had anticipated, before comparing them; and there were also many discrepancies. At the Gen. Meeting of the mission at Kailua in Sept. of that year, assignments for translating the gospels were given out, and the general principles of translating settled. At the close of the meeting, four of the missionaries, to wit: Messrs. Bingham, Thurston, Richards and myself, sat down together, and made a revised copy of the ten first chapters of Matthew, at which we wrought several weeks, so slow were our first beginnings. From these chapters was shortly afterwards printed the "sermon on the mount." This was our first scripture Tract, and was received by the natives with great avidity, and soon committed to memory by multitudes in all our schools. During the ensuing year, the gospels of Matthew and John were prepared at Kailua, the gospel of Mark at Lahaina, and a part of Luke at Honolulu. The manuscripts of Matthew, Mark and John, after having been mutually revised by the committees appointed for that purpose, were copied out and forwarded to the U. States to be printed by Mr. Loomis, at the expense of the Am. Bible Society; which was done at Rochester, in the year 1828, and arrived at the islands in the spring of 1829. The gospel of Luke was in the mean time finished and printed at Honolulu. In 1830, the Acts of the Apostles, Romans, 1st and 2d Corinthians, were finished and printed at the mission press; and during the three following years, the remainder of the N. Testament was completed and published. A revised edition of the N. Testament was completed and published about the year 1835, from which copy several successive editions have been printed. In the preparation of this edition, a new translation of all the gospels, the Acts and Romans, was made, and the manuscript of each portion assigned to the several individuals, was reviewed by the others severally, from which a corrected copy was made out for the press. These last-mentioned portions have had double the labor expended upon them to that of any other similar portion of the scriptures. The necessity of these new translations arose out of the defects of our earlier

efforts, which had become apparent as we advanced in our work.

The first attempts at translation on the Old Testament, were made at Kailua and Lahaina, about the year 1828, in the preparation of a volume of historical extracts from the Pentateuch, which was printed the same year, and completed in the course of the year 1830. The different parts of the Old Testament were afterwards assigned to individuals, and entire translations of each book were rapidly made, revised and put to press. But the whole work was not completed and printed until the beginning of the year 1837, when the entire bible was bound up for the first time into a thick and unshapely duodecimo volume.

In the spring of 1840, a resolution of the mission appointed Mr. Bingham and myself a committee to revise and superintend the publishing a new 8vo edition of the scriptures. The work was commenced, and the first sheet stricken off, about the time of Mr. Bingham's departure for the U. States, and the duties of the committee devolved upon myself These were performed in a more imperfect manner than if he had remained to assist in the labor, for in the latter case there would have been a double revision and proof-reading, according to the plan first laid down. The work of revision and reading proofs occupied most of my spare time for nearly three years.

In comparing the translation with the original text, nearly the whole of the Hebrew and Greek scriptures were read over verse by verse, and about 7000 corrections were made. A majority of these, however, were merely corrections of the Hawaiian idiom, or the change of a less appropriate word or phrase into one more idiomatic. The mistakes arising from misapprehending the true meaning of the original were much fewer than were those arising from the difficulty of finding corresponding words and phrases in the native language to express the ideas of the sacred writers.

During the first years of our labors in this department, the work of translation was slow and difficult, and subject to many revisions and corrections. The labor of obtaining the true interpretation of obscure passages was comparatively easy, to that of finding suitable words and phrases by which to express it in the Hawaiian language. We constantly availed ourselves of the best native aid we could procure, to put each sentence into the true idiom of the language. But as the native monitor often mistook the true idea of the sacred writer, as conveyed to him through the medium of his own language, he was liable to give us a wrong sentence, according to his own conception of the idea. A constant vigilance was therefore necessary on our part, in order to detect his mistakes, and take nothing for granted as correct which the native assistant proposed; and much effort and ingenuity was often required to get him to comprehend the true meaning which we wished him to clothe in suitable phraseology. Many hours have occasionally been thus spent on a single sentence, while we seemed to make little or no progress in the work, through the seeming uncertainty about words suited to the idea. But perseverance usually enabled us to overcome the difficulty, and each conquest of this sort, when once attained, but smoothed the way for our future onward progress, and settled the meaning of terms in the language. In after years our progress had been such in the attainment of language, as to enable us to dispense with constant native aid, and it was sufficient merely to read over with care the manuscript copy to a few judicious natives, and to adopt such of their corrections as appeared proper.

When the translator had finished the book, it was transcribed and sent to the reviewer appointed for the purpose by the mission The reviewer then went through with the same process as if he were the original translator, but with this advantage, that he had the labors of another on the same track before him, by which means the revisal was much less laborious than the original work of translation. The manuscript was afterwards returned to the translator with the corrections, who reviewed the whole anew, and copied it out for the press. Such was the usual process of preparation for every book in their order throughout the bible.

In looking over the Hawaiian bible in the several editions, I am far from pronouncing it a perfect work. An approximation to perfect translation is as much as our most sanguine expectations ever aspired to. To render it as perfect as possible, no pains consistent with our other avocations, have been spared. Still there are errors, which we mark whenever found, in order to have them corrected in future editions, as far as they are capable of emendation. Most of those I have detected in the last edition, are typographical, which from the great number of small particles in the language, render it extremely difficult to detect them all in reading the proofs. In a few instances the mere change of a letter by the composuist, has materially altered the sense. A large number of accurate proof-readers, would be the only remedy for these defects. But they seldom so destroy the sense as to lead the reader into a mistake. Others are oversights in the revision, but most of these would have been avoided in the last edition, had there been a double revision, or had every missionary sent in his list of errors in time for their being corrected.

But the greatest defect is, I conceive, the one which time only can rectify—the want of definite and well-settled terms in the Hawaiian language, to express the sense of the originals, and incapable of an equivocal meaning. As an instance, the word *aloha* is used by the natives, and in our translation, in a variety of senses, as there is no other term to express *salutation*, *love*, compassion, charity, mercy, etc.; and though the connection in which it stands will often modify its meaning, yet it does not in all instances. The want in the language of the substantive verbs *to be* and *to have*, and some others, cannot be fully compensated by any equivalent modes of expression used for that purpose, and neither will the language admit of the introduction of those verbs. These defects have often embarrassed us much in endeavoring to transmit the unequivocal meaning of the original. We have sometimes discovered that a single word of equivocal meaning has given two different senses, and there are some phrases which to this day we have been unable to settle to our full satisfaction—witness Mat. 5: 2. But "humanum est errare"—every thing human is defective; and the same may be said of our excellent English bible, even to that degree that were it not for the mutual jealousy of the different religious sects towards each other, a new translation would long since have been substituted.

But to return. The Hawaiian bible occupied upwards of ten years from the time of its first commencement to its completion in 1837, employing a large share of the time of the translators during that period. Such as it is, it contains the word of God in sufficient purity and clearness to lead its readers to a correct knowledge of the truth. Its doctrines, its precepts, its sanctions and the mysteries of religion are as clearly taught as the capabilities of the language in its present state are adequate to teach; and its truths have been attested by the presence and power of the Holy Spirit, in converting multitudes into the way of salvation. Although more than fifteen years of the solid time of one man has been spent in its gratuitous preparation, and more than 50,000 dollars have been expended by the Am. Bible Society, on the several editions of the Old and New Testaments, yet we feel amply rewarded for the part we have borne in the work, as well as grateful for the munificence by which it has been made available to this once heathen people. Already there is a multitude around the Eternal Throne, who are blessing God for the instrumentality of the Hawaiian bible in the work of their salvation, and a still greater throng now living, who have learned to prize it as the pearl above price, and who make it their pleasing daily study. This is our reward. The outlay does not bring back a pecuniary return, for the books are either bestowed gratuitously, or sold at a large discount, and no charge has ever been made for the labor of translation and superintending the press, in the estimate of their cost. That labor is now ended, and I will venture to predict, that we who have borne its toils, will never find another so full of enjoyment, and so unalloyed with pain and disappointment.

POETRY.

For the Friend.

SHE MAY YET BE MINE.

BY A SAILOR.

'Tis three long years since last I saw
The gentle Clementine;
But Hope forbids me still to doubt
That she may yet be mine.

Old Ocean's waves divide us now
Full many a hundred miles;
But future years I yet may see,
Enlivened by her smiles.

In grief I left the lovely maid—
More lovely for her tears—
Which spoke her soul's sweet tenderness;
Her heart's foreboding fears.

Though circumstances then combined
To drive me from her side,
Some happier day may yet restore
The exile to his bride.

I hear that rivals struggle hard
To rob me of her love—
But all in vain; they cannot change
My faithful turtle-dove.

May Heaven's choicest blessings rest
On gentle Clementine;
For Hope forbids me still to doubt
That she may yet be mine. G. M. R.

Ship Peruvian, of St. John N. B.

A KISS FOR A BLOW.—A visitor once went into a Sabbath school at Boston, where he saw a boy and girl on one seat, who were brother and sister. In a moment of thoughtless passion, the little boy struck his sister. The little girl was provoked and raised her hand to return the blow. Her face showed that rage was working within, and her clenched fist was aimed at her brother, when her teacher caught her eye. "Stop, my dear," said she, "you had much better kiss your brother than to strike him."

The look and the word reached her heart. Her hand dropped. She threw her arms around his neck and kissed him. The boy was moved. He could have stood against a blow; but he could not withstand a sister's kiss. He compared the provocation he had given her with the return she had made, and the tears rolled down his cheeks. This affected the sister, and with her little handkerchief she wiped away his tears. But the sight of her kindness only made him cry the faster; he was completely subdued.

Her teacher then told the children always to return a kiss for a blow: and they would never get any more blows. If men and women, families and communities and nations would act on this principle, this world would almost cease to be a vale of tears. "Nation would not lift up the sword against nation, neither would they learn war any more"—[Youth's Cabinet.

THIS MINUTE.—How much may be, and is being done, this very minute! It is, no doubt, the first and the last with thousands: and while multitudes are rejoicing "because a man is born into the world," many, we suppose, are sobbing farewell, as they take the last look at the face of the dead. Just now, the knot of hymen is tied between some youth and virgin: and now, the pair plighted to each other for life, through weal and woe, are published apart by divorce. Now, the fond parent is doating on the absent son, and silencing the forebodings of suspicious age with the sanguine hope that their boy shall be the stay of their failing nature, and snatch their name and memory from the grave; and now that son, in the full tide of festive feeling, is taking his first glass, ignorant and careless of the disgrace and wretchedness he drinks. Now, too, the reeling sot is blundering into his own door, to frighten the partner of his bosom, and her little ones—the pledges of her love. At this moment, the pert lad who has the indulgence of his parents, lays his finger on the price of his halter! and now, the prisoner falls into his last fitful sleep, to dream of execution, and wake up to the horrid reality, and curse the lottery dealer or the actor, whose temptations lured him from the paths of honesty and industry!

A firm faith is the best divinity; a good life is the best philosophy; a clear conscience the best law; honesty the best policy; and temperance the best physic.

THE FIRST CHAPTER OF ISAIAH.—A youth about seventeen or eighteen years of age waited upon one of the secretaries of the Bethel companies, to purchase a tract. He was asked if he had attended any of the Bethel prayer-meetings on board ship? He said, "Yes, last evening. Yesterday I landed from my voyage; and this afternoon I am bound to Scotland to see my friends. Although that visit to the Bethel meeting was accidental, it has been the means of great consolation to my mind." "I am glad you have found it so," observed the secretary; "were you unhappy?" "I will relate sir," said he, "what took place during my last voyage: I sailed from London in a Scotch vessel, for the West Indies, second mate; the most abandoned wretch that ever sailed on salt water, particularly for profane swearing. Our captain, though a good seaman, and kind to his ship's company, cared neither for his soul, nor those of his ship's crew. We had been at sea about sixteen days. It came on night. It was my watch on deck. I was walking up and down on the leeward side of the ship, when a sudden puff of wind caused the vessel to give a heavy lurch. Not prepared to meet it, I fell against one of the stancheons. Feeling much hurt, I gave vent to my anger by a dreadful oath, cursing the wind, ship and sea, and, (awful to mention,) the Being who made them. Scarce had this horrid oath escaped my lips, when it appeared to roll back on my mind with so frightful an image, that for a moment or two I thought I saw the sea parting, and the vessel going down. I took the helm from the man who was at it, and put the ship's head close to the wind. All that night my awful oath was before my eyes, and its consequence appeared to be my certain damnation. For several days I was miserable. Ashamed to acknowledge the cause, I asked one of the men if he had a book to lend me to read. He offered me a French novel. I asked if he had a bible or a testament. He answered by asking if I was going to die? for his part, he said, he never troubled his head about the bible, or prayer-book; he left all these matters to the priests, to whom he left part of his pay, to pray for him; if I had done so, I should not be so squeamish. The captain, I knew, had a bible, but I was unwilling to ask the loan of it. Several days passed in the greatest torment, this oath always before me. I could not pray; indeed I thought it of no use. On the fifth day I was turning over some things in my chest, when I found some trifles I had purchased for sea stock, wrapped in paper"—putting his hand into his jacket, and from a small red case pulling out the paper, which was a leaf of the bible, containing nearly the whole of the first chapter of Isaiah—"oh how my heart beat when I found it a piece of the bible?" At that moment tears fell from his eyes, and he pressed the leaf to his bosom. "But sir," continued he, "conceive when I read these words: "Though your sins be as scarlet, they shall be as white as wool." Here he paused to wipe the tears away. "Sir," he added, "like a drowning man I clung to this life buoy: on this I laid my soul. I then prayed, and the Lord was graciously pleased to remove in some measure the guilt from my conscience, though I continued mournful and bowed down until last evening, on board the Mayflower, I stowed away with the Bethel company. I felt much comforted in the service. It deeply affected me, and I have now reason to believe the Lord has forgiven my great sin. I am now going to my friends to tell them what great things God has done for me."—[Ch. Reflector.

Officers of the U. S. S. Warren, now lying in this harbor:

Commander, JAS. B. HULL, Esq.
1st Lieut., WM. RODFORD.
2d Lieut., MM W. MAURY.
3d Lieut., WM. B. RENSHAW.
Actg. Lieut., JOHN KUTLEDGE.
Master, WM. H. MONTGOMERY.
Purser, T. R. WARE.
Surgeon, WM. J. POWELL.
Assi. Surgeon, E. HUDSON.
Midshipmen, FRDK. KELLOGG, A. M. JOHNSON, R. D. MINER, A. M. DEBREE, W. O. CRANE, S. GANSEVOORT, J. M'ROBERTS.
Capt. Clerk, H. THROOP.

DIED.

On the 11th inst., S. C SMITH, a colored seaman, recently discharged from bark Pantheon of Fall River. The deceased left his work on the evening of the 10th as well as usual; in the course of the evening was attacked with a violent coughing fit—burst a blood-vessel, and died immediately.

At the U. S. Hospital, July 26, ROBERT SHERMAN, aged 35; a native of Devonshire, England.

From the Sydney Morning Herald.

FOREIGN CAUGHT OIL.—It is of considerable importance that it should be extensively known that the regulations formerly in force, which prevented American, French and other foreign whalers, from selling their oil in Sydney, in sufficient quantities to defray the expenses of their repairs and outfit, have been done away with, as will be seen by the following official communication from the lords of the treasury to the custom's department, which the merchants should circulate as widely as possible by sending copies of it in their whalers, and to ports where whale-ships are in the habit of touching to refresh:

To the commissioners of customs.

TREASURY CHAMBERS, April, 1843.

Gentlemen,—With reference to your report of the 8th ultimo, covering a letter from the colonial department, regarding the question whether American whalers can legally be allowed to sell, for consumption in New South Wales, a sufficiency of their oil to defray the expenses of their outfit,—

I am directed by the lords commissioners of her majesty's treasury to acquaint you, that the lords of the committee for trade, having signified their concurrence in the observations submitted in your said report, my lords are pleased to desire that you will give the requisite authority to the officers of your department in New South Wales, for complying with the proposition of Governor Sir George Gipps, that American, or other foreign whalers frequenting the ports of that colony, may be allowed to sell for consumption in the colony a sufficiency of the oil made on board their ships, to defray any expenses they may incur for repairs, stores, or provisions, subject to payment upon the oil thus sold of such duties as may be legally due on the importation of oil of foreign taking and manufacture, and that they should be permitted, within the harbors of the colony, to transfer their oil to other ships of their respective countries, for transmission to these countries.

I am, gentlemen, your obedient servant,

C. E. TRAVELYAN,
Custom-house, London.

PORT OF HONOLULU.

ARRIVED.

July 5, Swed. brig Bull, Worngrew. The B. touched at Lahaina and landed Dr. Winslow and family. The Bull is the first Swedish vessel that has visited these islands.

July 11, H. M. S. Thalia, (of 42 guns,) from Tahiti.

July 15, Am. brig Globe, Doane, from Boston; last from Tahiti.

July 15, U. S. S. Warren, (20 guns,) from Tahiti.

July 23, Eng. bark Cacique, Eldred, 60 days from China.

July 27, ship Magnolia, Capt. Simmons, New Bedford, 20 months out, 3500 whale and [illegible] sperm; [illegible] season; bound direct home. Capt. Simmons reports hearing the loss of the 3d mate and two men from the ship Frances Henrietta—boat stove by a whale.—Reports ship Mary Mitchell, 25th June, four whales; ship Janus, Turner, 1000 barrels.

July 29, Ship Nimrod, New Bedford, W. Sherman, 20 mos., 2600 whale, 150 sperm; 1300 season.—Bound home.—Reports Fr. ship Eolian, June 30, 5 whales; Am. ship Sharron, June 24, 4 whales; Norship Canada, June 4, 1800 bbls.—Heard from ship Maine: 2 sp. whales.

SAILED.

June 28, Am. brig Ontario, Kelly, for Valparaiso.
July 4, Br. sch. Falcon, Chap, for Sydney.
July 5, U. S. S. Levant, Paige, for California.
July 21, H. B. M. S. Thalia, Hope, for Tahiti.
July 24, W. bark Levant, Russell, for [illegible].

PASSENGERS.—On board brig Globe, Mr. and Mrs. John Ladd and child; Mr. A. O. Cox; Mr. and Mrs. Whittlesey; Mr. and Mrs. Hunt; Miss Whitney; Mr. Andrews; Mr. Pogue. On board Cacique, Mr. H. Skinner. On board brig Ontario, Maj. Perkins; Mr. G. N. Moore. On board H. B. M. S. Thalia, Gen. Miller, H. B. M. Consul General; H. Sea, Esq.; and Miss Miller.

The Friend of Temperance and Seamen, published monthly. 8 pages, by SAMUEL C. DAMON, Seamen's Chaplain.

TERMS.—$1 50, per annum, One Copy, payable in advance; $3 00, Three Copies; $4 00, Five Copies; $6 00, Ten Copies; Single No. 12 1-2 Cents.

THE FRIEND,

OF TEMPERANCE AND SEAMEN.

VOL. II. HONOLULU, OAHU, SANDWICH ISLANDS, WEDNESDAY, SEPTEMBER 4, 1844. No. IX.

For the Friend.

NOTES,

On the Shipping, Trade, Agriculture, Climate, Diseases, Religious Institutions, Civil and Social Condition, Mercantile and Financial Policy of the Sandwich or Hawaiian Islands, viewed in relation to other groups of islands, and to the natural and acquired advantages of the Sandwich or Hawaiian Islands. By

ROBERT CRICHTON WYLLIE, *Esquire.*

(*Continued from No. VIII., page* 72.)

49. FORTIFICATIONS OF HONOLULU.—On Puawana (Punch-bowl) Hill, there are in all eleven guns mounted, pointing different ways, at irregular distances from each other, along the nearly circular edge of the hill. The centre is concave, having been the crater of an extinct volcano; to whose former active operation, in former times, *strata* of vitrified lava descending from the hill on all sides at the depth of from four to six feet from the surface of the soil, bear unquestionable witness. Of these guns, five are long iron 32 pounders, three are long iron 12's, and three are short 9's. The carriages being unserviceable, the government has invited tenders to renew them. It appears to me, the money, small as the expense may be, might be applied to some more useful purpose; for as a means of defense, the guns where they are placed and as they are placed, are useless. The hill itself, though precipitous, is assailable by escalade in several parts; and, *unless made bomb-proof*, by *shells* in all. Though capable of being strongly fortified, to render it tenable it would require a very large garrison, incompatible with the small military force, and the as yet limited means of this government.

Commanding the anchorage, is a fort mounting 70 guns of the following calibre, viz:

1	long	brass	32	pounder,
1		do	12	do
14		iron	18	do
4		do	9	do
41		do	6	do
8		do	4	do

1 4 inch mortar.

The fort itself is nearly a quadrangle, with the guns pointing on all sides; and consequently few in proportion pointing to seaward; so that a very small vessel would silence its fire in a short period.

It covers a space of large extent, in the very best part of the town for government offices and store-houses: it is an eye-sore to the view of every spectator; and as a much greater protection might be given to the harbor, at much less expense of space, men, guns and powder, the sooner it is entirely demolished, the better for this government.

In front of it, extends a reef, quite dry at low water; and there, a small fort of 8 long guns, on a level with the water's edge, might be constructed, affording much better protection to the men than the present fort, and commanding more effectually the anchorage. Another small fort of a few long guns of heavy calibre, if considered necessary, might be constructed on each side of the entrance to the inner anchorage, also close to the water's edge, and so placed as that the shot would cross, and yet the batteries not fire into each other. The fire in front and that on each side, would thus concentrate upon any vessel entering or leaving the harbor, with tremendous effect.

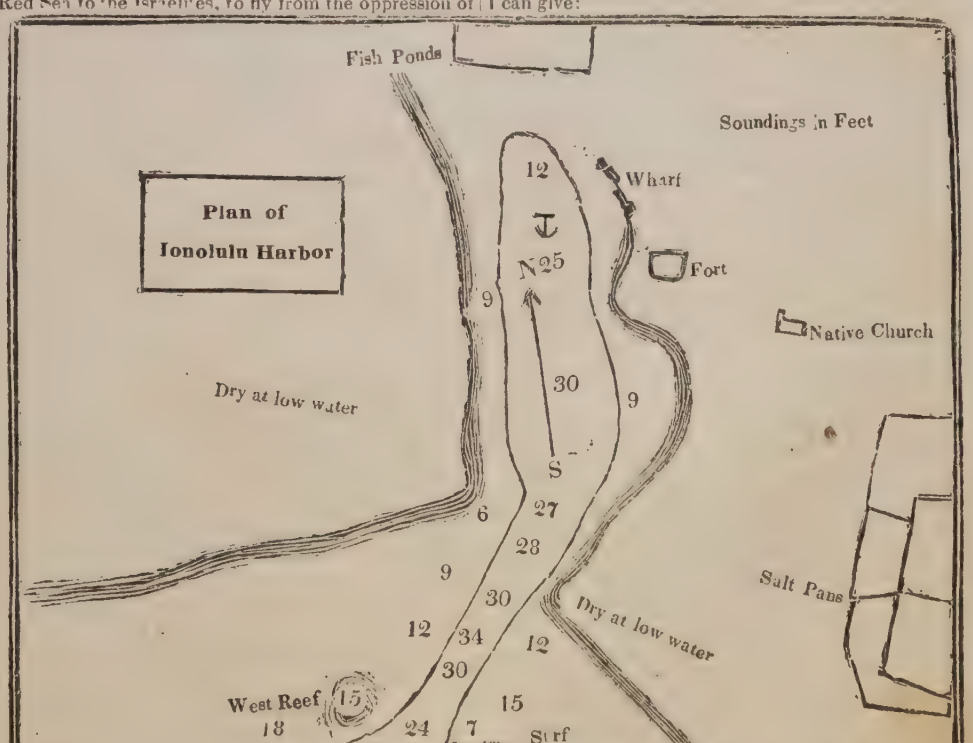
Besides these a couple of well manned and armed gun-boats would be useful, in compelling whalers and other merchant vessels in the outer roads not to leave without satisfying the harbor dues, as has been attempted in one or two instances since I have been here.

As for any attack upon the town, by hostile ships of war, whatever cause there might have been at one time for such an apprehension, I do not see that it can exist now, after the mutual understanding of the three greatest naval powers on earth, that neither of the three, under any pretence whatever, shall take possession of these islands. It is true, that that understanding does not prevent any other nation from any hostile attempt or attack; but the very existence of such an understanding, implies such an interest in these islands as would lead them to remonstrate effectively against any attack upon unjust grounds; and it belongs to the government here, so to conduct its affairs with all foreign nations, as to afford to none just grounds of hostility. It is to the interest above mentioned, and to the belief that the government here will so act, and not to the number and position of their guns, that these islands owe the understanding referred to; and it is to a strict, equal and impartial administration of justice to all nations, and not to any martial array they can muster, whether on land or water, nor to any forts they can establish, that they will owe a long immunity from war with any foreign power.

So far as that danger is concerned, they may smelt down their *big-guns* into poi-pots, if they square their conduct by the golden rule of *doing to others only what they wish others should do to them.*

There is no power on earth that can resist the combined might of Great Britain, France and America; the two first have each in their turn braved the world in arms; the policy of the third is not warlike, but it possesses the elements of gigantic strength, accumulating with a rapidity unequalled in any country. Such are the nations to which *King Kamehameha III.* can look up for protection against foreign outrage; and his safety will depend more upon his retaining the good opinion of these three great powers, than upon any forces that he can organize within his own dominions.

While on this subject, I cannot omit stating my conviction, that the protection of these nations will be endangered by any attempt, under the existing laws, to deprive their subjects or citizens of the full benefit of lands granted long before these laws had any existence; and that they will concur in viewing any attempt at the expiry of 25 years, to dispossess the grantees of land,—those grantees being their subjects or citizens,—without the fullest indemnity for all capital outlaid and improvements made thereon, as one of atrocious injustice and spoliation, impolitic, anti-economical, opposed to the best interests of the country, and not to be tolerated.



There was a time when a Joseph could adopt a system to place the whole land and wealth of Egypt in the hands of a Pharaoh: that was permitted by the same God who miraculously opened a path through the Red Sea to the Israelites, to fly from the oppression of Pharaoh: none of the Pharaohs or of their descendants have ever prospered: the finger of the Almighty has marked all the Egyptians as slaves, and *slaves of slaves*, through all the revolutions of empire. The policy relating to the tenure of land in these islands, is in its spirit and effect something like that of the patriarch Joseph: but there are *no Josephs* now-a-days; and any one who should attempt the same game in the Sandwich Islands, would perhaps give the king some land, but might endanger his crown, and perhaps place himself in the predicament of, or at least deserving the same elevated position with Pharaoh's chief baker.

But, reverting to the subject of fortification, it is possible that the government may be reluctant to demolish what cost them so much money. What all the guns may have cost them, I cannot guess; but I have been told that the long brass 32 pounder cost them 1,000 piculs of sandalwood; which at $10 per picul, the price current at the time, was equal to $10,000!!

I have understood that it is wished to keep up the fort, or rather guns, on Punch-bowl Hill, for the sake of firing salutes on the king's birth-day and other great occasions. I would not be one who would curtail any of the attributes or prerogatives of majesty to which, in becoming moderation, as a recognized sovereign, he is entitled—on the contrary, I would wish to see every compliment paid him that can do him honor in the eyes of his people—but all the salutes necessary could be fired with more imposing effect from the small batteries that I have suggested. And if the king should desire any thing more, he could have a small battery in the square in which it is proposed to erect a new palace for his residence.

On Punch-bowl Hill there ought to be nothing but a look-out house or telegraph station, in my opinion.

50. PORT OF HONOLULU.—The port of Oahu consists of a basin formed by two reefs extending from the shore and converging to sea-ward, so as to leave but a narrow entrance. The following will give the reader a better idea of the entrance than any written description I can give:

The basin or anchorage inside, will contain nearly 100 ships in perfect safety in all weathers. Outside the reefs there is a large space of ground affording good anchorage, but vessels are exposed there during southerly winds.

What the harbor and pilotage dues are, I have already shown in the 8th note to table of shipping, published in the *Friend* of the 1st May

51. MOLE OR WHARVES.—There are two moles or wharves in the harbor. One was erected under an agreement between Wm. French, Esquire, and Richard Charlton, Esquire, the late British consul for these islands. The other, and the best, was constructed by Messrs. Ladd & Co, of whose spirit of enterprise I have already made favorable mention in these notes. Both are very conveniently situated, and exceed any thing I have seen in any sea-port of Spanish America, excepting only *Callao* and *Panama*. Notwithstanding the antiquity of the port of *San Blas*, and the rising importance of that of *Mazatlan*, neither port, in point of these conveniencies, can be compared with that of *Honolulu*. This is highly creditable to a small state so young in civilization.

But there is yet room for great improvement. The reef to the left of the harbor, looking to seaward, might easily be filled up from the shore with a facing of stone towards the sea so as to carry the mole all along. The ground thus gained would be of very considerable extent, and of very great value for stores, warehouses, offices, &c.

There is a young American, a civil engineer, *Mr. Whistler*, now here on a visit, who I have no doubt could easily form a plan, and estimate of the amount required. From what I have seen of Mr. Whistler, I feel persuaded that he would volunteer to do this service, and also to report upon the best means of conveying a more abundant supply of water to the town, and fields adjacent, by pipes, from the streams whose course, at a very short distance from the town, is greatly above the level of the village.

Both these improvements would do more than pay their own costs; and were capital wanting, I think it might be lent with great safety, on the faith of the government, and the security of the improvements themselves.

52. PRISON.—A place for incarcerating malefactors is much wanted in Honolulu. It will be more so, if the fort should be levelled down. Hitherto prisoners have generally been confined there, and fetters have been resorted to, more to prevent escape than inflict punishment,—which in every instance ought to follow and not to precede conviction. Yet it must be confessed that confinement in the fort of the Sandwich Islands, with all its faults, bears a favorable comparison with that witnessed in countries older in civilization. I allude more particularly to the prisons in Spanish America—such as the "*Casas Matas*" of *Lima*, the Dungeons of "*San Juan de Ulua*," and the numerous filthy, confined and ill-ventilated "*Calabozos*" which abound from *Cape Horn* to *Cape Mendocino*. There are contradictions in the character of nations as well as in that of individuals—and the Spaniards afford the remarkable example of a nation of all others the most kind and indulgent to its slaves and domestic servants, and yet the most unfeeling and cruel towards those whom it incarcerates. The horrors of a Spanish prison are proverbial, yet I believe the cause is to be sought for more in the apathy and disinclination to any change requiring some trouble and exertion, than to any innate cruelty which characterizes the nation. Nothing, perhaps, has contributed so much to the opinion generally entertained, (but I believe unjustly,) that the Spaniards are essentially more cruel than any other European people, than the neglect of their public prisons and of the condition of their inmates. Nor would any thing tend more to give foreign nations a favorable idea of this government and people, than the adoption of a jail-system on a par with that of the most civilized nations. No stranger visits the United States, without admiring the system of prisons and of prison-discipline established there, with the sole exception of solitary confinement, the effect of which seems to be to destroy the *intellectual man* entirely. Nor, with that exception, is there any country from which the Sandwich Island government could with more propriety take a lesson, in the art of securing the person of the confined, turning his labor to profitable account, and reclaiming him of his vicious habits.

Whenever a jail is constructed here, provision ought to be made for a complete separation between the foreigners and natives, between the males and females, and between venial and grave offenders; and for the utmost space, cleanliness, ventilation and recreation compatible with the safe custody of the culprits. A few comfortable rooms ought to be provided for those who are merely detained for debt, contempt of court, or some such offence of little moral delinquency, and involving no severe punishment, even if proved.

It is almost superfluous to add that the treatment of foreign seamen detained for those excesses to which they are prone in all countries, should not partake of any unnecessary cruelty; and that whenever a fine is exacted, great care should be taken to ascertain whether the accuser may not have tempted the sailor to commit the offence, with a view of pocketing the fine. If it be found that fines tend to encourage crime, through the interest of those who receive them, then they should be abolished, and some other punishment substituted ins end.

It would be a great convenience to have the council rooms and a guard room adjacent to the prison.

53. MARKET.—There is a small rude market on the beach, for the supply of the shipping; and supplies of every kind can be had in greater abundance, and at cheaper prices, than in most ports of the main. Still a regular, capacious and well constructed market, would be a very great advantage, both to the town and shipping. It ought to be a capacious one, with separate spaces for fish, fresh meat, poultry, vegetables, fruits and grains. The situation should be convenient, both to the shipping and the town, and such as to admit of a constant supply of good fresh water, to wash the market out and keep it clean.

The interest on the money required to erect it and keep it in repair, might be raised by a small rent, in the shape of a license, levied on every one who has a *stall* or place for selling, and by a small custom, *if required*, on things sold.

But great care should be taken to discourage any such rise in prices as would prevent whaleships from coming here for their supplies. *Honolulu* is already said to be dearer than *Lahaina;* and on this account the concourse of whalers is falling off here, and greatly increasing there. This is a fact of the worst possible augury for this port, for the increase of property in it, of its population, and of its trade. It is the concourse of whalers which gives life and activity to every thing; and if it be meant that Honolulu shall continue to be the capital of the islands, every possible effort should be made to secure a continuance of that concourse. If *Honolulu* cannot be made to compete with *Lahaina*, *Hilo*, or other ports, in attractions for shipping, then it must decline, and ought to decline.

The following are about the present prices of provisions, &c., in Honolulu:

Beef, to families,	6 cts. per lb.
do to ships,	6 1-4 per lb.
Mutton,	10 a 12 1-2 lb.
Turkeys, cock,	75 cts each, and $9 per doz.
do hen,	37 1-2 cts each—$4 50 per doz.
Ducks,	50 cts each, and $6 per doz
Fowls,	25 cts each, and $3 per doz.
Wild ducks,	12 1-2 each, and $1 50 per doz.
Plover,	6 1-4 cts each—75 cts per doz
Eggs,	$1 25 to $2 per 100
Pigs, according to size,	50 cents to $2 each.
Goats,	37 1-2 to 50 cts each.
Pumpkins and squashes,	$1 per doz.
Cabbages,	12 1-2 per doz.
Potatoes,	$2 50 to $3 per barrel
Beans,	$4 per bushel.
Sweet potatoes,	$1 25 per bbl.
String beans,	$1 per bushel
Lima do,	$1 per bushel.
Corn or maiz,	$4 per bushel.
Onions,	$1 per bushel.
Peppers,	$1 per bushel.
Tomates,	75 cts per bsh.
Native apples, *ohias*,	50 cts per bsh.
Pine-apples,	50 to 75 cts per doz.
Oranges,	25 to 50 cts per doz.
Water-melons,	37 1-2 to 50 cts per doz.
Musk-melons,	25 cts per doz.
Milk, per bottle,	6 1-4 cts, and $1 for 35 bottles.

These prices I have obtained through the kindness of Mr. F. W. Thompson, late high sheriff of this place.

There are many small articles omitted which might be added, but the above will suffice to give an idea of the market.

Owing, I presume, to ancient custom of selling all surplus produce to ships, the natives seem to prefer selling to them their best produce, and at a somewhat cheaper rate than to the inhabitants of the town. And they are not easily deterred from carrying what they have got to the beach, though offered the same or a higher price by families living up the valley. They seem to prefer carrying their heavy loads the full distance, and taking their chance of the ship-price.

54. PUBLIC WALK.—Honolulu presents great facilities for the selection of an open space of ground for the purpose of recreation. Exercise in the open air, though less agreeable, is even more necessary to health in cold climates. It has long been remarked on the coast of Mexico corresponding to this climate, that the most healthy, robust and longest lived are the muleteers, cowherds, postmen, &c, who pass most of their time in the open air and on horseback. In many parts of the southern states of North America, I have found intelligent planters and some physicians of opinion that the negro race owe their comparative immunity from the fevers and other endemical diseases prevalent amongst the whites in those parts, more to the exercise which they, their fathers and grand-fathers have been habituated to take daily, in the open air, than to any peculiarity of organization, cutaneous or internal, which can be ascribed to the negro. If this be true, the servile labor of the slave has its reward, in the greater health which labor brings, and in the more rapid multiplication of his race—a fact which seems well established in the states to which I refer. The *census* of the United States, taken at different periods, proves it. The results were striking. They may be briefly stated as follows:

Census of	Whole population of the Southern States.	Number of slaves in that population.
1790	1,793,408	633,393
1800	2,250,486	797,015
1810	2,719,147	1,031,570
1820	3,245,081	1,295,833
1830	4,280,681	1,665,700
1840	5,166,032	2,040,129

Thus in these states have the negro slaves in 50 years trebled themselves with a surplus of 159,950 souls, while the whites have only doubled themselves with a surplus of 1,579,216 souls. The difference I believe would have been much greater, had the immigration of whites into these states not increased their numbers, while the exportation of negroes to the new western states, to Texas and to Liberia has diminished theirs.

The Word of Truth assures us that the Israelites multiplied in Egypt the more that Pharaoh made them work. The most of their labors were conducted in the open field. It was so willed by the Almighty who led them forth miraculously from bondage; and I believe the experience of mankind in all countries and in all climates goes to prove that the same Omnipotence has also willed a certain connection between the number and the health of the offspring of man and the regular exercise of his physical powers under the open heavens.

There is therefore comfort in the curse, "*by the sweat of thy brow shalt thou earn bread;*" and I think it would save the life of many a native, and give to the king many young subjects, were the experiment fairly tried in these islands.

But what I more particularly urge upon them here is to take, with regularity, pleasing exercise in the open air, encouraging their children to frolic in all those athletic gambols and sports to which they appear quite as prone as white children. In selecting a locality for a public walk, a situation ought to be chosen combining a good view of the shipping in port with commodious access from the town and the surrounding fields. An extent of ground ought to be allotted corresponding more with what the population may be, a few years hence, than what it is at present. An oval is a good form, if sufficiently extended, as it admits of a road for exercise all round, without any short turnings: it is susceptible of much ornamental planting on the circumference and in the centre; and footpaths may be made to radiate in all directions. If fountains of water could be introduced, they would add much beauty to the scene, and be a great comfort to the thirsty traveller or ardent young in their playful exercises.

55. FLORAL AND NURSERY GARDEN.—The advantages of a large space judiciously chosen and tastefully enclosed for the purpose of encouraging the cultivation of flowers, vegetables, ornamental and useful plants, and trees bearing wholesome fruits, or productions promoting the industry and wealth of the inhabitants, is sufficiently manifest. Anything combining both profit with pleasurable enjoyment, must be eminently worthy of the attention of a benificent government. A *floral and nursery garden* would be exactly an institution of this kind. It would improve the taste and encourage the agricultural of the natives, add luxuries to their own table, tending also to impress upon the natives a love to and veneration for that God whose goodness is proclaimed in every flower, plant and tree—whose glory shines in the firmament of heaven, and whose worship ought to lead us to "*rejoice always*."

For the purpose indicated, eligible situations are not wanting in the vicinity of *Honolulu*, but on account of the extreme violence with which the trade-wind occasionally blows, the locality chosen would require to be one having more shelter than any that can be found on the whole of the village. To find such a locality, would not be difficult, in some one of the romantic valles

opening upon the plain, where the supply of water could be regulated to the precise quantity at all times wanted.

A good carriage road ought to be made to it, for the convenience of the ladies who use the light four-wheeled *hand-vehicles*, which here abound. In such, the garden could be visited, at pleasure, without fatigue; and the distance would not be too much for visitors on horseback or on foot.

If a garden of this kind were established, it could not fail to be a place of favorite resort by all foreigners. Large contributions in seeds, bulbs, roots and plants might be expected from the officers of ships of war touching at these islands, among whom would be found men of botanical knowledge, able and willing to instruct the gardners in the most improved modes of culture. It is impossible to foresee how much good might be done to the islands by such an institution, here, likely to be the parent of many others

While residing in Tepic it was my great pleasure to visit a garden on something like the plan I have suggested, begun by my friend *Mr. Alexander Forbes*, to whom I have already adverted in note 23. That gentleman, besides superintending the details of his extensive manufactory of *Jauja*, conducts, at his own expense, a series of experiments in the cultivation of flowers, vegetables and trees, which may lead to many improvements in the agriculture of that rich but neglected coast. Already families had begun to pay their evening visits to "*Forbes' garden*," and attention will thus be drawn to sources of pleasure and profit either unknown to them before, or passed by with indifference

A similar beginning is what is wanted in Honolulu.

56 BUILDING FOR A CUSTOM-HOUSE.—I have already, in note 49, suggested that the site of land on which the fort now stands, would be an eligible one for public buildings and stores. For a custom-house, the ground granted to Mr. Charlton by *Karaimoku*, would perhaps afford a more convenient site, and it is much to be regretted that a space of ground so ample and conveniently situated should be left vacant owing to the suspense in which the title to it is kept. The vacancy of that central and conveniently situated space, is an injury to every lot adjacent, and a great draw-back to the beauty of the village, whether viewed from the sea or the shore

If the government should build a custom-house, a capacious store should be provided for the safe deposit of goods in bond, which the absurd revenue laws of Mexico are likely to keep well filled. The prosperity of the port of Valparaiso affords a near example of what advantage may be derived from the encouragement of a trade in *transit*. It is but fair to profit by the errors wilfully committed by the Mexicans. In order to do this to the greatest possible extent, the laws affecting goods in bond, and the discharge and reloading of the vessels which conduct them, ought to be the most liberal that can be enacted Indeed, they are already liberal, as will be seen by the 7th note to my table, published in the *Friend*, of 1st May; but perhaps a duty of 1-4th per cent upon the value of goods transhipped or re-exported may be found more advisable than the present duty of one half per cent. It ought to be remembered that every vessel so arriving, leaves so much money in the port, indepedendent of all duties paid

57. NATIVE SHIPPING.—Under this head I include all vessels bearing the Hawaiian flag, though wholly or partially owned by foreign residents. The reduction of port-dues and charges in favor of vessels under that flag, is stated in the 8th note to my table, published in the *Friend* of 1st May.

The following is the amount of native shipping for the last three years:

Years.	*Number ships.*	*Tonnage.*	*Supposed value.*
1842	10	251	$ 22,500
1843	11	463	$ 28,800
1844	14	695	$ 45,500

From this it appears that the native shipping in Honolulu is increasing.

If the islands prosper as they ought to do, the traffic amongst them ought to be very considerable It will increase with the population and agriculture of the islands.

58 IRON STEAM-BOAT.—As soon as the traffic of the islands in goods and passengers can support the expense, an iron steam-boat of say 300 tons, with a light draft of water, would be a great improvement I am not sure that if well and economically managed, it would not pay at the present moment. It would do away with the necessity of two or three small vessels, at present kept for the use of the king and government. The transportation of goods, produce, cattle, and passengers, from remote parts of the islands, and from one island to another, must amount to a very considerable sum in the course of the year. The certainty and quickness of a steamer would increase that transportation. A visit to the great volcano of *Kilauia* in Hawaii, and a tour amongst the islands, would become more fashionable than at present—the prices of provisions and labor would become equalized—the knowledge of every local improvement would be extended, and the efficiency of government would be greatly increased by the more prompt propagation of the laws and transmission of its orders.

Coals could be easily had from New Castle, New South Wales Vessels from thence—of which we have had five, since February—would bring them in ballast and carry away their value in the salt, sugar or molasses produced in the islands.

In cruising among the islands, a steamer would make many trips as a sailing vessel, with the trade wind, which blows here strongly, and the consumption of coal would be further economised by frequent stoppages at the different ports.

A steamer, therefore, would not cost so much by the year, as might at first sight be apprehended; and I believe the earnings would exceed the expectations of those who are unaccustomed to the effect of steamboats and railroads in increasing and even creating traffic.

59 NATIVE SEAMEN.—I have never heard any captain of a vessel who did not speak highly of the native seamen whom he had employed. They are eminently subordinate, docile, good natured and trustworthy; and with proper training they become good efficient seamen Their extraordinary expertness in swimming, renders them of great use where boats are employed in surfs. *Mr. Dundas*, of H. B. M. S. *Modeste*, who took over to San Blas the Hawaiian government schooner *Hooikaika*, with despatches, and brought her back, assured me that but for his native crew, several lives, in Mazatlan, would have been lost from the upsetting of boats in the surf there. And he spoke in very high terms of the general conduct of the men while at sea.

It is very common for the young natives to engage themselves on board of whalers and other ships, for long voyages. They cannot now so embark, without license from the governor of the island to which they belong; and the captain who takes them away is required to sign a bond of $ 200 for their return within three years from date, provided he be then alive.

The number of young men yearly taken off the islands, as sailors, was in former years so great as to be considered, by many, one of the causes of the depopulation of the islands. I do not believe that it deserved to be so considered to any great extent, for though some of the natives remained abroad and were never afterwards heard of, yet many of them returned, and those who did, carried with them a degree of knowledge and civilization, useful to their countrymen, and more than compensating for the loss of those who never came back.

All these travelled *kanakas* are readily distinguishable amongst the population, by their superior cleanliness, dress and assimilation to foreigners in their manners and habits.

I have in vain attempted to obtain authentic information of the number of these *kanaka seamen* who have taken service under foreign flags, during previous years; but from Mr. Wm Paty, the collector of customs since 1st January, 1843, and under Dr. Judd, the originator of a greatly improved order and arrangement in his department, I have procured the following information, extending from 1st January, 1843, to 1st June, 1844, viz:

Natives serving in whalers,		44
do in merchant vessels touching among the islands in the Pacific,		18
do in ditto to California,		45
do in ditto to China,		5
do in ditto to Kamschatka,		4
do in ditto to Valparaiso,		1
do in S. Island government vessels to Valparaiso,		8
do in ditto to Mazatlan,		10
Total from 1st Jan to 31st Dec. 1843,		—135
From 1st January, 1844, to 1st June :		
Natives serving on board whalers,		70
do in merchant vessels to Columbia River,		50
do in ditto to Kamschatka,		2
do in ditto to California,		6
do in French ship Lion to California,		12
		—140
Total from 1st Jan. 1843, to 1st June, 1844,		275

The above number applies to the port of Honolulu alone. At *Maui* and from other parts and ports of the islands, perhaps an equal number have been shipped, during the same period.

The wages paid these men varies from 5 to 12 dollars, except where paid by "*lays*" in whaling vessels; but taking $ 8 as a low average, and on the assumption that 550 is the number of native seamen so employed, their collective earnings will amount to $ 4,400 yearly. There is little doubt that part of that sum, sooner or later finds its way back to these islands, as happens with the migratory laborers of the duchy of Lucca, Ireland and the Highlands of Scotland.

The "*lays*" or shares allowed in whalers vary from an 120th to an 250th, though perhaps three-fourths of the *kanakas* get an 140th or 150th, the same as allowed to European or American seamen

There are from 300 to 400 natives employed, on the Columbia River, in the service and vessels of the *Hon. Hudson's Bay Co.* on that coast. They are generally engaged for a period of three years, and gain $10 per month. They are never sent east of the Rocky mountains

Along the coast of *California*, the natives are preferred to European or American seamen, as they are eminently useful in taking in hides, in high surfs. Some are taken for domestic servants. The wages are from 10 to $12 per month.

60. POST-OFFICE.—Hitherto the receipt of letters from and their transmission to foreign parts, and the circulation of letters within the islands, has been free from any charge. This exemption is commendably liberal, but if regular posts are established, certain rates of postage must be charged to defray the necessary expenses. The regularity of epistolary communication tends greatly to promote the civilization and prosperity of any community. Here-to-fore the want of it has been but little felt, but the number of natives who can correspond by letter is already large; that of foreigners engaged in the trade of the islands is daily augmenting, and in the same proportion increases the necessity for something like a post office establishment.

But in the present state of the islands, I would not recommend one with a view to *revenue*: I would recommend it only as a matter of public convenience, and hence I would impose on each single letter a rate much smaller than any coin here current. A few cents would suffice to begin with. Any postage beyond that would be like the high *Mexican duties*, great on paper, but in reality *uncollectable*. It would either be evaded by the natives, or discourage them from corresponding altogether.

61. CURRENCY.—In the progress of the islands will arrive, and may arrive not long hence, a time when a *national coinage* might be established But as the Spanish, Spanish American, and North American dollars with their subdivisions are regularly introduced and already known to the natives, the expenses of a *mint* are at present wisely dispensed with. But as any coin less than the 1-16th part of a dollar or 6 1-2 cents is seldom met with, I have often thought that a supply of copper cents would be a great advantage to the poor in facilitating their little traffic and exchanges. It would be no difficult matter to have a few thousand dollars in cents, bearing some national *device*, coined at Birmingham and sent out here; but in that case, they could only be current here, while the same value of North American cents, by being receivable there also, would be less liable to a depreciation, which generally attends the introduction of a copper coin.

(TO BE CONTINUED.)

THE LAST OF THE MOHEGANS —The Mohegans were an excellent tribe of Indians, who had lived about Norwich, Ct They had a long line of kings in the family of Uncas. One of the last was Zachary; but he was a great drunkard. But a sense of the dignity of his office came over him, and he resolved he would drink no more. Just before the annual election, he was accustomed to go every year to Lebanon, and dine with his brother governor, the first Gov. Trumbull. One of the governor's boys had heard old Zachary's story, and thought he would try him, and see if he would stick to his cold water. So at table, he said to the old chief, "Zachary, this beer is excellent; will you taste it?"

The old man dropped his knife, leaned forward with stern intensity of expression, his black eye sparkling with indignation was fixed on him; "John," said he, "you do not know what you are doing .You are serving the devil, boy! I tell you that I am an Indian! I tell you that I am; and that if I should but taste your beer, I could not stop until I got to rum, and become again the drunken, contemptible wretch your father ten embers me to have been. John, while you live, never tempt a man to break a good resolution."

For the Friend.

*Such part of the army and navy as were entered on the 6th of June, 1841, within the United Kingdoms, are included in the general census.

Of the colonies, the population is taken according to the latest authorities.

POPULATION AND EXTENT OF THE GLOBE.

	Balbi Geography, 1838. Population.	English square miles.	Population to sq. mile.	*Weimar Almanac*, 1840. Population.	English square miles.	Population to sq mile.
Europe,	227,700,000	3,700,000	61..5	233,240,043	3,807,195	61..2
Asia,	390,000,000	16,045,000	24..3	608,516,019	17,805,146	34. 2
Africa,	60,000,000	11,254,000	5..3	101,498,411	11,647,428	8. 6
America,	39,000,000	14,730,000	2..6	48,007,150	13,542,400	3 5
Oceanica, Australia, Polynesia, & Ind. Archipg.	20,000,000	4,105,000	4..9	1,838,194	2,347,840	2..4
Grand Totals,	737,000,000	49,834,000	14..8	993,099,817	50,150,000	19 .8

The difference between these two estimates is very remarkable. But by the most recent and authentic accounts, the population of the world may be considered about 800,000,000, and the average inhabitants to the square mile about 16. The jurisdiction of Great Britain alone extends over more than 1-6th of the human race, and nearly 1-17th of the whole globe; and in connection with her gigantic *first-born*, the growing and great republic founded by the immortal Washington, it may be added, that more than 1-5th of mankind, and nearly 1-12th of the earth which supports them, acknowledge the influence of the Anglo-Saxon race—its language, religion, laws and civilization.

This stupendous extension of power—the creation chiefly of the last three centuries—is the wonder and amazement of the world: it has been permitted by the Creator, no doubt for ends good and benificent; and through the dominion of the sea committed to the same, I sincerely hope these two powers—one in origin, thought, industry and civilization—are intended to proceed harmoniously together, in planting peace, liberty and religion, from pole to pole, and from the sun's rising to its going down May no petty jealousy ever arise, to incline either out of the path which leads to the glory of universal good; and may their lessons of peace and justice to other states, never receive the contradiction of a contrary example amongst themselves. There certainly exists every natural reason why they should be proud of each other, and I can imagine no good one, why they should not be sincere and lasting friends.

May they both ever remember that the same God who gives much, requires much of them to whom he gives much.

ROBERT C. WYLLIE.

Honolulu, June 7th, 1844.

A correspondent of the Eastern Sentinel boasts thus: "As I have often read in the papers of great men being praised for their great deeds, &c, I think I have a right to tell what I have done. First, I was five years a teamster; three years a constable; nine years justice of the peace; seventeen summers I was lime burner; nineteen winters I taught school; twenty-seven years a commissioned officer, from lieutenant to major; thirteen years I was lock-tender on the Lehigh canal, lock No 46; and I am father of sixteen children, namely—ten sons and six daughters; and the best of my story is, I HAVE QUIT DRINKING LIQUOR. I was born in 1789. My name is HOPE, and I have faith, and show charity.

THE FRIEND.

HONOLULU, SEPTEMBER 4, 1844.

SUBSCRIPTION IN AID OF THE SEAMEN'S CHAPLAINCY.

The seamen's chaplain would most gratefully and respectfully acknowledge the following subscription by foreign residents in Honolulu to aid in defraying the expense of recent repairs upon the chapel and the incidental expenses for the year 1844. The total amount expended for this year will be about $700 00.

In acknowledging the above donations, the seamen's chaplain desires the donors to understand that he fully appreciates the kindness which he has met in presenting a subscription-paper, and the cheerfulness which has apparently accompanied the various donations. Should any individuals interested in the maintenance of the chaplaincy feel a desire to learn the manner in which funds are disposed of by the chaplain, he will at any time exhibit his account books to such persons as may call at his study for that purpose.

Perhaps no more proper occasion than the present will offer for making a few remarks in regard to the chapel. In the Polynesian for July 13th, we observed certain remarks upon the seats in the chapel. We know not their author, but if the writer or any other person entertains the opinion that his presence is not welcome in the chapel on the Sabbath, we wish to assure him to the contrary. The chapel, as is well known, was built by the A. S. F. Society for the benefit of seamen visiting this port. But from the intimate relation subsisting between this and the seafaring community, a cordial invitation has always been held out to foreign residents in Honolulu to meet with seamen for the worship of God. This invitation has always been the more free and cordial from the fact, that no other place was open for public worship in the English language. This invitation has been extended to all foreigners, without the least reference to their nationality. When the present incumbent entered upon his duties as chaplain to seamen in this port, he received the following as a portion of his public instructions from the executive committee of the A. S F. Society: "The particular field of your labors will be the port of Honolulu: and the special object of your solicitude, prayers, and efforts, will be the sons of the ocean. This field, commercially and morally exerts such an influence over the whole islands, as to justify, in this connection, a glance at the whole. . . . Here then, in this commercial and central position between the coasts of Asia and America, you are to stand erect as a minister of Jesus Christ. With the Foreign residents you will be expected to maintain a kind and courteous intercourse: and if they shall be disposed to attend to your ministry, you will watch for their souls as one that must give an account."

In accordance with these instructions it has ever been our aim to act: hence seamen and residents have been invited to meet for public worship in the chapel. Let no one suppose that the chaplain has been indifferent to making every accommodation in his power for hearers. He has from time to time proposed measures for the location of the hearers. Among reasonable and candid persons we honestly think that no misunderstanding should exist. *Let it be fully understood that seats are* FREE *whether cushioned or not; that seamen have the right and privilege to occupy any seat; but to prevent confusion, and disorder, let seamen occupy the left hand side on entering, and residents the right hand side.* When the number of seamen in port is few, then there is no objection to residents being seated on the left hand side. It requires, we are satisfied, but a little of the true spirit of conciliation and the love of accommodation, to seat all such as love the worship of God. We desire seamen to ever bear in mind that the chapel was built for them, and that the chaplain has received a commission to preach to them the gospel of Jesus Christ; and we wish residents fully to understand that they are cordially and freely invited to take seats in that chapel upon the Sabbath, until they are provided with some other more convenient place for public worship. Whenever in the providence of God that time shall arrive, the prayers and the benediction of the seamen's chaplain shall go with them.

SEAMEN'S CHAPLAINCY—Lahaina, Maui.

Most persons, who will read these lines with interest, are acquainted with the fact that the seamen's chapel at Lahaina, Maui, was built almost entirely from funds contributed by the masters and officers of whale ships. The management of the institution has been left to the Rev. Mr. Baldwin. He has received and expended money subscribed during the last eight years. Previous to his undertaking the work, about $100 had been collected by the Rev. Mr Spaulding. The sea-faring and church-going community at Lahaina, are certainly under great obligation to Mr. Baldwin, for the gratuitous labor which he has devoted to this enterprize. In the onward progress of events it has appeared desirable that the seamen's chapel should be supplied by the services of some clergyman who was able to devote more time to the work than the resident missionary was able to do, unless he neglected his duties to the native population: hence the Rev. Lorrin Andrews was requested, in Feb. 1843, by the foreign residents, to statedly preach in the chapel By Mr. A. we have been informed that for his services in chapel during the year 1843, he received about $325 Of this sum, rising of $200 was contributed by the sea-faring community. By a recent arrangement, Mr. Andrews has obligated himself to regard his services as more especially devoted to the religious and spiritual welfare of seamen visiting that port. Hitherto he has statedly preached upon the Sabbath, but seldom performed direct *pastoral* labor among seamen during the week He now expects to take the chaplaincy under his special direction—Mr. Baldwin yielding up a trust which he has so long and so faithfully maintained. Mr. Andrews will be supplied with bibles, and tracts, in various languages, for gratuitous distribution among seamen. He has desired the following notice may be inserted in our columns:

"Please publish in your next, my acknowledgement of the receipt of $240, from shipmasters, previous to June 21, 1844."

We are happy to learn that foreign residents in Lahaina do not forget to remember him who labors among them as their spiritual teacher. May the Lord of the harvest smile upon that portion of his spiritual vineyard. We hope to enjoy the privilege in future of publishing an account of liberal contributions from foreign residents and foreign visitors at Lahaina, for the support of the seamen's chaplain.

"THE ICE IS BROKEN."

For a long period there have been indications that sooner or later public opinion in Honolulu would require an organization to advance the temperance reform. "What! no temperance society in Honolulu!" exclaims the newly arrived stranger. In more respects than *one*, have the people of Honolulu been accustomed to do things different from their fellow men in other parts of the world. The question has often been asked, "Is it not best to have a society?" No one, however, has been able to suggest a plan that would take with the popular mind Notwithstanding there has been no public organization, yet the reform has been going forward. The foreign community here is so isolated and composed of materials so heterogeneous that a stranger would be unable to comprehend those difficulties and obstacles which have hitherto opposed the formation of a society. In these ends of the earth, however, we have found the old dramatist's remark true—"There is a tide in the affairs of men, which taken at the flood leads on to fortune." Almost without being aware of it, (we venture to remark,) numerous persons found themselves members of the total abstinence society; yet every thing has gone forward orderly and harmoniously. At some future time we shall hope to trace the progress of the temperance reform previous to the 17th of August 1844, when the following constitution and pledge were unanimously adopted by a body of teetotallers in Honolulu, styling themselves

"The Hawaiian Total Abstinence Union."

CONSTITUTION.

Art. I. This society shall be called the Hawaiian Total Abstinence Union; its object being to advance the *temperance reform.*

Art. II. The officers of this society shall be a president, vice president, secretary, committee of vigilance, and executive committee.

Art. III. Any person may become a member by signing the pledge of total abstinence from all intoxicating drinks as a beverage, adopted by this society, August 17, 1844.

Art. IV. Any member reported to have been guilty of violating the pledge shall be reported at a regular meeting of the society by the vigilance committee, they having taken the proper measures for ascertaining the truth of the report. It shall be left with the society whether any member shall be expelled for having violated the pledge; and no member shall be expelled unless two thirds of the members present are agreed thereto.

Art. V. It shall be the duty of the executive committee to provide a room for the society's meetings, keep any money that may be placed at the society's disposal; when necessary levy a tax, or in some other way raise money to defray the necessary expenses of the society, and at the end of the year make a full report of the progress and state of the society.

Art. VI. This constitution may be altered or amended at any meeting of the society, a notice of said meeting having been given out, at least one week previously. It shall require a vote of three fourths of the members present to make such alteration or amendations.

Pledge.—*Adopted August* 17, 1844.

We, the undersigned, hereby pledge our sacred honor not to use any spirits, wine, or other intoxicating liquors as a beverage; and we will employ our utmost endeavors to suppress their use throughout the community, and to reform those who may have unfortunately becgme addicted to habits of intemperance.

This is to certify, that —— has subscribed his name, this —— of ——, A. D, 184–, to the pledge adopted by the Hawaiian Total Abstinence Union, August 17, 1844 —— ——, Secretary.

Honolulu, Oahu, Hawaiian Islands.

OFFICERS.

Gerret P. Judd, President.

Richard Ford, }
J. S. Hart, }
Nelson Hall, } Vigilance Committee.
Robert Boyd, }
Samuel C. Damon, }
John G. Munn, } Executive Committee.
James Austin, }

Meetings have hitherto been held every Saturday evening.

By the Chenamus we have received letters from the Oregon, up to July 23d. Among the interesting items of intelligence, we learn that the legislative committee have passed an act very important in its bearings upon the temperance reform. A correspondent writes under date of July 3d, "Our legislative committee have just risen, and have passed some important laws;—one of which I will transcribe—'Any person who shall import, make, sell, or *give away* ardent spirits, in the territory south of the Columbia, shall forfeit and pay $100 for each and every such offence.' You will observe that this committee consisted of nine persons elected by the people, and not any of our mission was in that committee. I mention this to show that there is some correct thinking on the subject of temperance in the Oregon." Since the arrival in the country of the Rev. Mr Gary, the new superintendent of the Methodist mission, important changes have been going forward in regard to the mission. The indian school has been discontinued, and the large building occupied by the school, sold to the Methodist Episcopal Church in the place, for a literary institution. The mills, herds, &c., belonging to the mission, have also been sold. The lay-missionaries will soon be dismissed; but most of them are expected to remain in the country as settlers. The prospects of the country are spoken of as being highly prosperous. Grain of all kinds gives signs of an abundant harvest. From all we can learn the Oregon territory is rapidly filling with an enterprising and thriving population. Report says that from near the heart of good old Massachusetts a company of emigrants are soon expected. Depend upon it, emigrants from that quarter will be of the right stamp to settle a new country Come on, brother Yankees, and make of Oregon another New England!

Just as our paper was going to press, news was received from Valparaiso by Am. brig Delaware, Capt. Carter. The most important item of intelligence is the announcement of the death of Commodore Dallas, the highest American naval officer in the Pacific. The following is an extract of a letter received from Admiral Thomas. He writes from Valparaiso, under date of July 15th: "Commodore Dallas, you will have heard, died at Callao on the 3d ultimo, and was buried with military honors on the 5th. There is no American ship of war here. I am shortly to be relieved by an officer whose flag will fly in a ship of the line."

No doubt many of the readers of the Friend will rejoice to learn that Admiral Thomas is in good health and spirits. While engaged in political and national affairs of great moment, it is interesting to know that the "good old English gentleman" does not forget his young friends at the Sandwich Islands. He writes, "I beg you to remember me to Messrs. Armstrong and Smith: I send by Captain Carter two dozen prints, which I hope they will do me the favor to accept, and hang up in their schools, as a memento of one who wishes them every success. There is another half dozen included, which I would beg Mr. Cooke to receive, for the same purpose"

The Pittsburgh Banner says, that but thirty one grog shops are left out of the hundreds which a year ago were flourishing under the former administration of the common council; and in another twelvemonth, with the persevering and energetic efforts of the Washingtonians, those sinks of iniquity will all be swept from our country.

Lovers of wine have reason to be thankful, that as good Lisbon wine is made in Boston as any where else.

EDITOR'S TABLE.

By late arrivals a variety of temperance periodicals have been placed upon our table. Such is the variety of talent displayed in the choice of titles, mottoes and headings, that we present the following specimens:

FROM THE UNITED STATES.

"JOURNAL OF THE AM TEMP. UNION"—New York—"*Total abstinence from all that intoxicates.*"

PLEDGE OF THE AM. TEMP. UNION.—"We, the undersigned, do agree, that we will not use intoxicating liquors, nor traffic in them as a beverage; that we will not provide them as an article of entertainment, or for persons in our employment; and that, in all suitable ways, we will discountenance their use throughout the community"

"THE FOUNTAIN."—The organ of the Connecticut Washington Total Abstinence Society.

THE PLEDGE OF THE CONNECTICUT W. T. A. SOCIETY.—"We, whose names are annexed, for our mutual benefit, and to guard against a pernicious practice, which is injurious to our health, standing and families, do pledge ourselves that we will not drink, as a beverage, any *spirituous* or *malt liquors, wine* or *cider.*"

"YOUTH'S TEMPERANCE ADVOCATE"—Published by Am. Temp Union, New York "*Harken unto me, O ye children; for blessed are they who keep my ways.*" This paper has an extensive circulation.

"TEMPERANCE JOURNAL"—Boston, Mass—"*Wine is a mocker, strong drink is raging; whosoever is deceived thereby is not wise.*" This is one of the oldest temperance papers published, having reached its 12th volume.

"SALEM WASHINGTONIAN"—Weekly—"*This is not the cause of faction, nor of party, nor of any individual; but the cause of universal mankind.*"

"SHEET ANCHOR."—Boston, Mass—Devoted to the cause of seamen, virtue and temperance.

"THE WHITE MOUNTAIN TORRENT"—Published at Concord, N. H., weekly.—"*No weapon but truth, no law but the law of love.*"

"PORTSMOUTH WASHINGTONIAN."—Published at Portsmouth, N. H., weekly.—"*Uncompromising hostility to king Alcohol.*"

This paper, having attained the end of the 2d vol, appeared anew under the title

"WASHINGTONIAN AND PHILANTHROPIST. *Truth, charity, equality, inflexible justice.*

"ESSEX COUNTY REFORMER."—Salem, Mass.—"*There is a law superior to all earthly enactments. It is the law of love. As Washingtonians, we have sworn it eternal allegiance. By its aid we have effected a great reform. We will effect a greater, by its power.*"

"WORCESTER WATERFALL, AND WASHINGTONIAN MIRROR."—Published weekly, Worcester, Mass. The temperance people in Worcester and vicinity, are so fond of cold water, that not content with a weekly *Waterfall*, they have started another weekly temperance paper, called the "WORCESTER COUNTY CATARACT, AND MASSACHUSETTS WASHINGTONIAN." Jesse W. Goodrich, alias "Peter Parley," editor.

"COLD WATER ARMY, AND YOUTH'S PICNIC"—Boston, Mass.

ENGLAND.

"THE NATIONAL TEMPERANCE CHRONICLE"—Published monthly, London—Motto, "*I is good neither to eat flesh, nor to drink wine, nor any thing whereby thy brother stumbleth, or is offended, or is made weak.*"—Rom. 14: 21.

NEW HOLLAND.

"THE TEETOTALLER, AND GENERAL NEWSPAPER"—Sydney, N. S. W.

Reader, is not the spirit of reform abroad? Where do you stand, in regard to this mighty revolution that is moving all parts of the civilized world? Have you ever taken the total abstinence pledge? If you have, *persevere.* If not—why hesitate? Are you certain of dying a sober man? Are you certain that all your friends and neighbors will die sober men? Certainly not. Do consider this matter!

A GENTLE HINT TO WINE-DRINKERS.—We copy the following extract from the Boston Mercantile Journal for Dec. 19, 1843: "It is ascertained that a large majority of the *best* wines drank in this country are manufactured in New Jersey; the claret particularly, which is made by men who keep dying establishments, and who do not want to waste their indigo." Wine-drinkers in the U S. of course retain the best for their own use, while they send their poorest abroad. We learn that claret is a favorite species of wine with some of the wine-drinking portion of our community! The subject needs no comment! We do however most sincerely hope that if the good people of Honolulu still continue their wine-drinking practices, (which by the way are going out of fashion in all other parts of the world,) they will succeed in obtaining a better article of *claret* than is probably exported from the United States or from England, via Sydney, to these islands.

Reformed men would do well to relate their experiences of a sober life to their brethren often-in-experience meetings.

For the Friend.

IS THE TRAFFIC IN INTOXICATING DRINKS IMMORAL?

BY AMICUS.—*No. 3.*

In the last number I attempted to show that the traffic in intoxicating drinks is immoral, because *it conflicts with the revealed will of God.* The acts of individuals and of governments, it was remarked, can be lawful *only* when they are consonant to the will of God as disclosed in his law. Of course, such acts are, and of necessity must be, unlawful, i. e. *immoral* when they conflict with his will. No legislative enactments can make such acts lawful. Larceny and perjury were taken as illustrations of the correctness of this principle. So of homicide. All admit the immorality of the deed which deprives, knowingly and wilfully, a fellow being of life, because it conflicts with the revealed will of the great Lawgiver: "*Thou shalt not kill.*" Still, as those who traffic in intoxicating drinks indignantly repel the charge of murder, and strenuously labor to throw the entire guilt of drunkenness, when, as often, it results in death, upon the victim himself, while they claim to be honorable men, pursuing a lawful calling—I say while this is a fact, and while public opinion, which has hitherto unaccountably admitted this claim, continues to despise the drunkard, and excuse the man who made him one, it will be necessary to examine what I regard as parallel cases, which come under the cognizance of the great Lawgiver himself. To this examination the careful attention of the reader is respectfully but earnestly solicited.

The will of God in regard to the question under discussion may be ascertained, it is believed, by reference to the protection afforded to life, and the danger of blood-guiltiness under the Jewish dispensation. Take the case specified in Exodus 21: 28, 29.—"If an ox gore a man or a woman that they die, then the ox shall be surely stoned, and his flesh shall not be eaten; but the owner of the ox shall be quit. But if the ox was wont to push with his horn in time past, and it hath been testified to his owner, and he hath not kept him in but that he hath killed a man or a woman, the ox shall be stoned, and the owner also shall be put to death." Here we see that God held men responsible for mischief done by the irrational creation, if on their part, as owners, carelessness or indolence were shown to be the cause of the disaster. So high a value did God put upon human life, that blood should pay the forfeiture of blood shed through neglect to secure a vicious animal. The owner of the animal—of the ox "wont to push in time past"—must keep him in—take due caution for his security—or suffer the penalty of death. The case of a battlement for the roof of a Jewish house is also in point. Deuteronomy 22 8.—"When thou buildest a new house, then thou shalt

make a battlement for the roof, that thou bring not blood upon thy house if any man fall from thence" In building a house after the manner of the orientals, with flat roofs, on which it was customary to walk—see 2 Samuel 11: 2—also to conduct strangers—1 Samuel 9: 25—the expense of building a battlement—three and a half feet high say the Jews—must be incurred, lest the incautious should fall from the roof, and thus the owner, through parsimony or carelessness, should bring the guilt of blood upon his house. The Jewish comment upon this passage is, "that by the equity of this law they are obliged to fence or remove every thing by which life may be endangered; as to cover draw-wells; keep bridges in repair, and the like; lest if any perish through our omission, their blood be required at our hands."

In these enactments of the great Lawgiver, I repeat, we have a plain and affecting exposition of his will in relation to human life. If influenced by the love of gain, or if from his carelessness, the life of an individual was sacrificed, the act, though a negative one, so to speak, conflicted with revealed will of God; and the penalty was the life of the delinquent. And these enactments, be it remembered, respected a man's own property; his own beast—the useful ox; and his own house—an indispensable part of his possessions. And yet the penalty must be exacted.

Is the inquiry made, "what has all this to do with the traffic in intoxicating drinks?" I reply, much—very much, to do with it Says an eloquent writer on Permanent and Universal Laws, "the principle of this law is all that we are concerned with at present And it is a very plain one, and a very broad one—brought out here in a specific case, but extending to ten thousand others. It is this: Every man is responsible to God for the evils which result from his selfishness, or his indifference to the welfare of others. This principle will help to illustrate the law." Says another able writer, the author of the Permanent Temperance Documents, "though men are not required, or permitted now, to execute this law, as they were when God was the Magistrate, yet the reason of the law remains It is founded in justice, and is eternal. The accessory and the principal in the commission of crime, are both guilty. Both by human laws are condemned. The principle applies to the law of God; and not only drunkards, but drunkard-makers; not only murderers, but those who excite them to commit murder, and furnish them with the known cause of their evil deeds, will, if they understand what they do, and continue thus to rebel against God, be shut out of heaven" There was a time when the dangerous and destructive qualities of ardent spirits were not generally known to the owners Though they killed hundreds and thousands, the owners would not, by the above rule, be held responsible. But now they are known. Physicians of the first eminence, and in great numbers, with a unanimity almost unparalleled, have testified that ardent spirit is dangerous and destructive; that men in health cannot use it without injury; that it induces and aggravates disease, impairs reason, and shortens life, and that multitudes are killed by it every year. Jurists, too, of distinguished character, and judges, in great numbers, have testified that this liquor occasions a great majority of all the crimes which are committed. One says that of eleven murders committed, all except one were occasioned by strong drink. Another says of eleven murders committed, all were occasioned by intemperance. Another says: Of twenty murders examined by me, all were occasioned by spirituous liquors And another says: Of more than two hundred murders committed in the United States, in a year, nearly all have their origin in drinking Says Judge Cranch, of the effects of dealing in the traffic, in an address, parts of which may be found in the Permanent Temperance Documents, a volume of great value to all who seek to be enlightened on the subject of temperance, "of thirty three persons found dead in one city, twenty nine were killed by intemperance. Of seventy seven persons found dead in different places, the deaths of sixty seven, according to the coroner's inquests, were occasioned by strong drink. And in another city, of sixty seven adults who died in one year, twenty eight were killed in the same way. Who slew all these? And who will be held responsible at the Divine Tribunal? Those who were knowingly accessory, by furnishing the liquor, and those who were actively instrumental in producing the result, in violation of the command, "*Thou shalt not kill.*" I know that the cup is poisoned —I know that it may cause his death —I know that it may cause more than death—that it may lead him to crime—to sin—to tortures of everlasting remorse. Am I not then a *murderer*—worse than a murderer—as much worse as the soul is better than the body?"

Does not then the traffic in intoxicating drinks conflict with the revealed will of God? Is it not more evidently so than would be the neglect to keep in the ox known "to push in time past," or the neglect to build a battlement to his house, and thereby bringing blood upon it by the death of some one of his neighbors? Is it not more nearly like the act of the man who should keep a partially domesticated *tiger*; should advertise him for exhibition that he might increase his gains; but should fail, through indolence or carelessness, to make his cage secure, and in consequence some of his neighbors should be killed? Or take the man who in building his house should not only neglect to make the battlement as required by law, but should actually conceal a trap door on his roof; should entice men and women to ascend and walk on the top of his house, and see them fall into his snare, bleed and die?

YOUTH'S CORNER.

For the Friend.

Hilo, Aug. 3d, 1844.

My dear sir,—You requested me to write you an account of our Temperance Society. When Dr. Lafon was at this place in 1842, our mothers told us that he was a temperance man So we asked him to form a society for us—to which he readily assented. He then appointed a day, and we met. As we were all little boys, we did not appoint officers, for more than a year. We then appointed a president and secretary. We have had a meeting every month—one of our mothers always attending with us. Our meetings open with prayer: the president then asks for the records—then the speeches. If others are present, they are invited to address the meeting. Dr. Lafon, Dr. Andrews and Mr. Paris have met with us, when here. At our last meeting Miss Goodale was present, and addressed us. Sometimes we have our meeting under the shade of a large tree Once we had our meeting by the side of a cold spring, under the shade of a lime tree—and a temperance dinner. We generally have a temperance supper together. Sometimes we make a tent and call it a temperance tent; and we have a wreath of flowers around the pitcher of COLD WATER.

Yours, respectfully.

HENRY M. LYMAN.

Rev. Samuel C. Damon.

NOT GUILTY —The publisher of the Philadelphia Temperance Advocate had been charged with inconsistency in owning or leasing an establishment for the sale of intoxicating drinks, and the enemies of the cause were making it about as a means of lessening the influence of one of the best temperance papers in the country. He was at length called upon by the president of a distant temperance society to plead guilty or not guilty to the charge. We wish that every professed friend of the cause in the country could adopt the language of Mr. Atkinson, in relation to the same subject. Hear! hear!—[Temp. Jour.

"This deponent having been duly affirmed, doth depose and say, that he is not "owner or part owner," lessor, renter, occupier, or in any wise interested in any hotel, tavern, store, refectory, oystery, groggery, brewery, distillery, druggery, or manufactory; or in any ship, vessel, place or thing, great or small, wherein beer, ale, porter, cider, wine, brandy, gin, spirits, punch, grog, sling, mint julep, cobbler, cocktail, fiscal agent, lumber doodle, Tom and Jerry, Tip and Ty, antifogmatic, or other vinous, malt, spirituous or alcoholic drink is made, concocted, bought, sold or given, imported, received, drank, tasted or smelled, either by himself or others, in any shape or way that can be devised, thought, suggested or conceived of. Being, therefore, free from the accursed thing, he doth vote, expunge repudiate, exorcise, and excommunicate all such inventions of the father of lies or his adherents."

SLANDERS —"My dear friend, that woman has been talking about you so again! She has been telling the awfullest lies you ever heard! why, she railed away about you for a whole hour!"

"And you heard it all, did you?"

"Yes."

"Well; after this, just bear in mind, that it takes two to make a slander; one to tell it, and one to listen to it."

LINES.

The following was read recently at a Washingtonian temperance meeting held in Wheeling, Va. It was received with great enthusiasm:

Farewell, landlords, farewell Jerry;
Farewell, brandy, wine, and Sherry;
Farewell, horrors and blue devils;
Farewell, dens of midnight revels;
Farewell, shoes that have no soles on;
Farewell, fires that have no coals on;
Farewell, sots and all sot feeders;
Farewell, rogues and all thief breeders;
Farewell, cupboards that have no meat in;
Farewell, chairs that have no seat in;
Farewell, children with wry faces;
Farewell, to those pop-shop races;
Farewell, landlords and your spouses;
Farewell, spiders and your houses;
Farewell, to your foolish gabble;
Farewell, to your noise and rabble;
Farewell, swash and all swash venders;
Farewell, bums and all bum senders;
Farewell, pockets that are empty;
Farewell, landlords you have plenty.

FATHER TAYLOR.

In late Boston papers we have noticed allusions to the visit of "Father Taylor," "the Sailor Preacher," to the Mediterranean, for his health. The following we copy from the Evening Transcript for Nov 27:

"He arrived at Genoa from this port, after a pleasant passage, and remained there long enough to recover from the fatigues of the sea, and examine all that was worthy of notice. Finding himself somewhat renovated, he commenced travelling in earnest. From Genoa he proceeded to Leghorn, thence to Messina, Palermo, and Syracuse. He took shipping from the last for Malta. Thence he proceeded up the Archipelago and visited several ports in Greece. He next arrived at Smyrna, where he remained some time to recruit. He next visited Constantinople. Thence he proceeded, to the Holy Land, and, among many other places in that ancient land of signs and wonders, visited Jerusalem, Bethlehem, Jaffa, Gaza, the Dead Sea, Jericho, &c. &c. He returned to Smyrna, where he took passage on board the bark Susan Jane, Capt. Fletcher, on the 5th ult. for Boston, where he arrived last Saturday forenoon. Mr. Taylor's health is considerably improved, and he looks strong enough to wage a vigorous war against the enemy of souls. When it was known that he had arrived, his house was literally besieged by hosts of seamen and others. *To his long-coated friends he gave his hand in welcome, but the sailors he pressed to his bosom.* On Sunday afternoon the Bethel was crowded to excess, and Mr. Taylor preached from the words, "Is it well with thee?" as eloquently as ever."

Much beloved father, we rejoice that it is so *well with thee.* Long may thy valuable services be continued to labor among seamen Not many months since a sailor visited the seamen's chaplain in Honolulu, who remarked that a short time before leaving Boston, Father Taylor accosted him in the street, "Shipmate, are you dry?" "Aye." "Then come with me." They entered a milk shop, drank a cup of milk together; "and," remarked the sailor, "I have drank no rum since; although previously it was far otherwise!"

Two sea captains, the one a cold water man, and the other a moderate drinker, were conversing about temperance efforts among seamen, &c.

"I tell you," said one, "it hurts our interest; we might better let temperance work its way among sailors as it best can, without saying so much about it. It's hurtful, I tell you."

"How so—how so? pray inform me," said his friend.

"Why, for instance, on my last voyage, when we got into port, none of my crew wanted any money—they were all cold water fellows. I tried to persuade them to take some; but no—they wanted none. And now, since I came in, I had to pay them off in New York money. It would have made a difference of sixty or seventy dollars in my favor, if they had taken each their proportion while in ———, while as it was, I had to pay it to the brokers. So you see it's going to hurt ship owners."

"Well, well," said the cold water man, "I rejoice if this is the way the system works; and I'll now go and tell the sailors at the Marine Temperance Meeting what a hurtful thing it is."—[Organ.

It is never too late to learn wisdom.

He who thinks no man above him but for his virtue, none below him but for his vice, can never be obsequious or assuming in a wrong place; but will frequently emulate men in station below him, and pity those nominally over his head.

DISTILLERY BURNED.—One of these stew pans of the devil, was burned down in Montreal on the 27th. Individual loss some $500. Public gain as many thousands.—[Roch. Dem.

Pythagoras gave this excellent precept: choose always the way that seems best, how rough soever it may be: custom will render it easy and agreeable.

TO WHOM IT MAY CONCERN.—The seamen's chaplain has received letters, overland, for the following persons, viz: Capt. C. S. Holt, Am. W. S General Williams; Capt. G. Benjamin, Am. W. S. Lowell; Capt. P. H Smith, Nantasket; Capt. C. Pendleton, Benj. Morgan. If Mr. Herman Melville, formerly officer on board Am. W. S. Acushnet, is in this part of the world, and will call upon the seamen's chaplain, he may find several letters directed to his address. Frederick Buel, on board the Am. W. S. Braganza, will find a letter.

DONATIONS.—For the chaplaincy, $16 (a doubloon) from Mr. Talbot, Mazatlan; Capt. Nash, W S Vermont, $5; Capt. Hope, H. M. S. Thalia, $7. For temperance, Mr. Dawson, Hilo, $1; two sailors, $3; sailmaker U. S. S. Warren, $4; J. Snook, H. M. S. Carysfort, $4; ———, $2.

NOTICE.—The Hawaiian Total Abstinence Union will hold a meeting for the transaction of important business, next Saturday evening, half past seven o'clock, at the Chapel Vestry Room. It is hoped every member will be *punctually* present. All persons are invited who wish to sign the pledge.

DIED.

May 16, at Valparaiso, Chili, Mr. F. E. BAKER, master of U. S. S. Cyane. He had been left on shore sick. At the time of his burial, no Am vessel of war was in the port. Writes Mr. Bensted, H. M. S. Dublin, to a lady in Honolulu, "The officers, as many as could be spared from our squadron, attended his funeral. The marines of this ship fired three rounds over his body." Many of the residents in Honolulu will remember Mr. Baker with much interest. While here, we recollect, he was on one occasion brought by sickness very near the grave. He was a native of Virginia.

In Honolulu, Aug 23, JOSEPH BEDFORD, a colored man. He had resided about 18 years on the Sand. Is.—Left a wife.

PORT OF LAHAINA.

ARRIVED.

July 17, Am. W. S. Cambria, Harding, N. B., 1050.
July 23, Brem. W. S. Mozart, Fischer, 20 mos., 120 s., 4000 w.
Aug. 9, Am. W. S. Black Warrior, Sisson, N. L., 20 mos, 340 s., 1250 w.; 10,000 lbs. bone.
Aug. 11, Am. W. S. Archer, Ricketson, N. B., 36 mos., 1400 s., 1000 w.; 10,000 lbs bone
Aug. 13, Am. W. S. Thos. Williams, Manwarring, Stonington,
Aug 17, Am. W. S. John Jay, Sag Harbor, 19 mos., 500 s, 4500 w.; bound home.
Aug. 20, (Am.) Copia, Taber, N. B., 22 mos., 200 s., 3200 w., 16000 bone.
Aug. 22, (Am.) Pleiades, Russel, Sag Harbor, 20 mos., 200 s., 1900 w., 12000 bone.
Aug. 22, (Am.) Friends, Jeffrey, N. L., 15 mos., 200 s., 2350 w., 22000 bone.
Aug. 23, (Am.) George, Williams, Stonington, 14 mos., 200 s., 2000 w., 17000 bone.
Aug. 26, (Am.) Cabinet, Noyes, Stonington, 16 mos., 23 s., 2550 w., 23000 bone.
Aug. 27, (Am.) Tuscany, Goobie, Sag Harbor, 22 mos., 3000 w.

Aug. 29, (Am.) St. George, Thomas, N. B., 13 mos., 50 s., 3250 w., 33000 bone.
Aug. 30, (Am.) Columbus, Fish, F. Haven, 9 mos., 150 s., 1000 w., 12000 bone.
Aug. 30, (Am.) Columbus, N. L., 10 mos., 700 w., 4000 bone.
Aug 31, (Am.) Isaac Howland, Fisher, N. B., 14 mos., 100 s., 3400 w., 32000 bone.

PORT OF HONOLULU.

ARRIVED.

Aug. 10, Am. W. S. Vermont, Nash, Mystic, 8 1-2 mos., 850 w.
Aug. 11, Eng. brig Nimrod, Mayhew, 20 days from Tahiti.
Aug. 16, H. B. M. S. Carysfort, Rt. Hon. Lord George Paulet; last from Society Is.
Aug. 16, Eng. sch. Mary, Shannon, acting Capt., from Canton, via Lahaina. Capt Neolbye died a few days before the sch. arrived at the islands.
Aug 26, Am. W. S. Corvo, Pendleton, Stonington, 26 mos., 3200 w.; bound home.
Aug. 27, Am. W. S Flora, Allan, New London, 15 mos., 2500 w.
Aug. 28, Am. W. S. Friends, Jaffrey, New London, 15 mos., 2400 w.; 1600 season.
Aug 18, Eng. bark Brothers, Flere, from Col. Riv. via St. Francisco.
Aug 20, Am. W. S France, Edwards, Sag Harbor, 13 mos., 2500. This season, 1500. Took two sperm whales off Molokai, the day before the anchored, making 40 bbls. The France has shipped on board the Am. brig Globe, for U. S, 400 bbls oil and 11,432 lbs. bone.
Sept. 1, Am. brig Delaware, Carter, 42 days from Valparaiso. Cargo naval stores for H. B. M. S. Thalia. Capt. C. reports seeing a large vessel entering Hilo bay; supposed to be U S. S. Savanah.
Sept. 2, Sardinian brig of war L'Eridaus, Count de Persano, commander. Last from Tahiti.

SAILED.

Aug. 5, Eng. bark Cacique, Eldred, for China.
Aug. 8, U. S. S. Warren, Hull, for Mazatlan, via California
Aug. 8, Am W. S. Magnolia, Simmons, full, for N. Bedf.
Aug. 10, Swedish brig Bull, Warngren, for China
Aug. 12, Am. W. S. Nimrod, Sherman, for N. Bedford.
Aug. 15, Am. W. S. Vermont, Nash, to cruise.

DISASTERS, &C.—On the 10th of July the Am. W S. Vermont left the "ground" in consequence of severe injuries received by the 2d officer Mr. James Cole, and William Crawford, seaman. Mr. C. belongs to Preston, Ct. He received an injury in his breast, three ribs being broken, and is now at the Am. hospital, Honolulu. Crawford had his right leg broken above the knee and his left above the ancle; the latter has been amputated just below the knee, by Dr Wood, and is now doing well. His right arm was also broken above the elbow. He belongs to Newbugh, New York.

On the 24th of April, Stedman B. Stowell of Mansfield, Ct., and a Society Islander, belonging to the Am. W. S. Nimrod, were drowned—the boat being stove.

"The Maria Theresa, at Maui, reports that ship Henry Lee, of Sag Harbor, shipped a heavy sea in a gale on the 15th April; carried away stanncheons and bulwarks on starboard side, from main rigging to tafferel; tore up cabin gangway; stove or destroyed all her boats, and swept her decks. The shock was so great as to break the deck lights She had obtained boats, and repaired damages, so as to stay the season out. About the 15th of May, while cutting in a whale, the cutting pendant parted, and killed one of the boat steerers—name not mentioned. 12 h June, had 2100 bbls. The Maria Theresa also reports that ship Com. Preble, of Lynn, had two boats stove to pieces, and two men seriously injured—several ribs broken. 14th June, had taken two whales. Ship Ansel Gibbs, of Fair Haven, had 1700 bbls on 15th June; was among whales, doing well. Ship Copia, of New Bedford, had 3000 bbls. on 15th June; among whales. Ship Ann Mary Ann, of Sag Harbor, 1650 bbls. on 17th June. Ship Fanny, of Sag Harbor, had taken four whales, 17th June. Ship Alert, of New London, two whales this season.—*Information furnished by M. Calkin, Esq., U. S. Com. Agent, Lahaina.*"—[Polynesian.

FOR SALE,—At the study of the seamen's chaplain, vol. I. Temp. Ad. & Seamen's Friend Price $1 25, bound.

NOTES, on the shipping, trade, &c., of the Sandwich Islands, by Robt. C. Wyllie. These "Notes" are now in a course of publication. At present they are contained in the Nos. of the Friend from May to Sept. Price 50 cents.

N. B.—The Seamen's Chaplain has for sale and gratuitous distribution, Bibles and Testaments, in the English, French, Swedish, Portuguese, Spanish and Danish languages.

The Friend of Temperance and Seamen, published monthly, 8 pages, by SAMUEL C. DAMON, Seamen's Chaplain.

TERMS.—$1 50 per annum, in advance. Single No. 12 1-2 cents.

THE FRIEND,

OF TEMPERANCE AND SEAMEN.

VOL. II. HONOLULU, OAHU, SANDWICH ISLANDS, WEDNESDAY, OCTOBER 9, 1844. No. X

For the Friend.

NOTES

On the Shipping, Trade, Agriculture, Climate, Diseases, Religious Institutions, Civil and Social Condition, Mercantile and Financial Policy of the Sandwich or Hawaiian Islands, viewed in relation to other groups of islands, and to the natural and acquired advantages of the Sandwich or Hawaiian Islands. By ROBERT CRICHTON WYLLIE, Esquire.

(*Continued from No. IX., page 72.*)

A GENERAL REGISTER OFFICE.—An institution of this kind is much wanted for the preservation of all title-deed and other records affecting the possession of lands, houses, &c. During the brief existence of the *British Commission*, an order was issued for the presentation of all titles and claims; disputes about which, are a fertile source of complaint against this government.

Nothing will tend more to the general improvement and enrichment of the country, than laws and regulations establishing such a certainty and *fixity* of tenure, as will give the occupants confidence in their possessions. The system of short leases in all agricultural countries is found to be injurious both to the tenant and the landlord. The superiority of Scotch farming is chiefly to be attributed to the greater length of leases granted there than in the sister kingdoms. In Ireland, the baneful effects of the "*tenant-at-will*" system have been generally felt. With the view of introducing there a better order of things, a society has been formed in England, under the name of the "Irish Waste Land Improvement Society." In the report for 1843, the chairman, Colonel Robinson, made the following remarks: "I feel assured that if the landlords will let fair reclaimable waste lands, on moderate terms, and be content to receive an increase of rent at fixed periods, in proportion to the society's progress, the capital required to be invested by the society would be small, with respect to the number of acres to be reclaimed; and tenants being admitted at very low rates for the first few years, to rise progressively afterwards, would find it to their advantage to hold farms under the society, and by the rapid increase in the extent and value of their improvements and property, in combination with the more general improvements of the society, become gradually and certainly in a condition to pay with ease to themselves, such rents for their lands as would insure a good return for the society's investment, and a desirable augmentation of income to the head landlord."

In illustration of the effect of such principles in improving the value of land, and increasing the property of its cultivators, the chairman gave the example of the three following estates, viz:

NAME OF ESTATE.	Year.	Improvements by landlords	Improvements by tenants.	Tenants' property.	Rent.
		£	£	£	£
Ballanakel, taken in - - - -	1838	200	13	19	0
ditto, improved in - - - -	1843	1367	334	394	137
Glencaske, taken in - - - -	1838	1274	139	197	41
ditto, improved in - - - -	1843	2227	538	1267	448
Kilkerrin, taken in - - - -	1841	157	2400	2200	500
ditto, improved in - - - -	1843	1440	2904	3160	678

Notwithstanding the extreme density of the population, there is a vast quantity of waste land, both in Ireland and Scotland, susceptible of improvement; and Lord Worseley lately declared in the British parliament, that by the returns of the tithe-commissioners, embracing only the lands where the tithes had been commuted, the waste lands in England amounted to 6,718,523 acres; and in Wales to 501,815 acres.

Such, in the words of the report, were the results of the principles of reciprocal co-operation and mutual benefit between landlord and tenant, upon which the reclamation and improvement of waste lands is conducted by the society.

But it may be said, Ireland is an old and densely populated country, and the same principles that work so beneficially there, would not be applicable to the Sandwich islands, the circumstances of whose population are so different.

To meet this objection, I give the following table, published by the *Canada Company of London*, in 1842:

ABSTRACT FROM THE STATISTICAL RETURNS OF THE COUNTY OF HURON, OCTOBER 31, 1840.

The settlement of which was commenced by the Canada Company in 1828.

Goderich, Upper Canada, 18th Dec., 1840. THOMAS MERCER JONES.

Now what is the plan at present adopted by that wisely directed company, to increase their own wealth, in compatibility with the greatest possible degree of encouragement to immigrants? It is the following; and well deserves the serious consideration of the rulers of these islands:

"*To old settlers, emigrants and others, desirous of purchasing lands in Canada West.*—The Canada Company request particular attention to the various publications relative to their lands and settlements in that portion of Canada, formerly called Upper Canada, in which they possess nearly *two millions* of acres, in the most advantageous situations, consisting of Scattered Crown Reserves, in lots of from 100 to 200 acres each. Of blocks, varying from 1,000 to 12,000 acres, and of an extensive territory called the Huron Tract, containing upwards of 1,000,000 of acres in one block. The Crown Reserves are most advantageously situated, being distributed throughout nearly every township in the province, most of them surrounded by old settlements and adjoining farms, long under cultivation; and are particularly suitable to those individuals who may have friends in any particular township whom they may wish to settle near. Of those lots, lists will be found posted up in various taverns, stores, and post-offices in the neighborhood, and may be had gratis on application to the Canada Company's office in Toronto. The blocks of land are peculiarly suitable to communities who may be desirous of settling near each other, as they can have land to any extent, undivided by strangers; and they are situated in the richest and most fertile portions of the province, being in the London and Western districts. Of those blocks, the particular attention of emigrants is directed to the Huron District, as it possesses advantages which render it particularly eligible to them; and in the compass of which a bad farm could scarcely be found. The inhabitants, amounting to about 7,000, are, with trifling exceptions, all from Great Britain and Ireland; so that they would find themselves surrounded by people of habits and feelings similar to their own, who would welcome them as countrymen. It has the advantage of excellent roads, and facilities of travelling to and from the older settlements of the province, rarely to be met with. It is bounded for 60 miles by lake Huron; and at the confluence of the river Maitland with the lake, is situated the principal or district town of Goderich, where there is an excellent harbor. The population of this town is about 800, but as the district jail and court house are now completed, and the county declared a separate district, a rapid increase in wealth and prosperity may be reasonably looked forward to. It now contains

several good stores or shops, mechanics, houses of religious worship, resident clergymen and good schools, where the higher branches of the classics are taught, as well as the ordinary branches of education. From Goderich, good roads traverse the country southerly and easterly; the former to London, distance 59 miles; the latter towards the head of lake Ontario at Hamilton, distance 100 miles, on which are stage wagons twice a week to Preston, connected with daily lines running to Hamilton. The Canada Company are now opening extensive lines of road through the finest portion of the Huron tract, eligibly situated in regard to the older settlements, and communicating with the planked roads now under construction by the government, to Port Burwell and London. The prices of the Company's lands vary from 8s. to 15s. per acre. Some from particular local advantages, are charged from 16s. 3d. to 20s.; but the average may be taken at 12s. 6d. per acre; payable by one-fifth cash, the balance in five annual instalments, with interest at 6 per cent. The Canada Company are anxious to assist such respectable settlers who may be desirous of proceeding with their families to the Huron district, but who may not have the means of paying the usual cash and subsequent heavy instalments; the Company will in consequence grant *leases for twelve years* for their lands, upon the lowest rate of rent possible, (to relieve the settler from any immediate cash demands upon him, which he may not like to pay,) at the expiration of which lease, and the punctual payment of the very small annual rent, commencing one year from date of lease, the settler will *receive a deed* for the freehold of the land he occupies, without further charge. Under these leases no money is required down. The rents payable annually upon one hundred acres are these:

At the end of the 1st year from signing lease,			£2	0	0
At the end of the 2d year	ditto	ditto - -	3	0	0
At the end of the 3d year	ditto	ditto - -	4	0	0
At the end of the 4th year	ditto	ditto - -	6	0	0
At the end of the 5th year	ditto	ditto - -	8	5	0
At the end of the 6th year	ditto	ditto - -	9	5	0
At the end of the 7th year	ditto	ditto - -	10	5	0
At the end of the 8th year	ditto	ditto - -	11	0	0
At the end of the 9th year	ditto	ditto - -	12	0	0
At the end of the 10th year	ditto	ditto - -	13	10	0
At the end of the 11th year	ditto	ditto - -	14	10	0
At the end of the 12th year	ditto	ditto - -	16	10	0
For one hundred acres, or about 22s. per acre, upon a credit of 12 years, free of all interest,			£110	5	0

The settler leasing the lands may have a deed of freehold of the same, at any period by paying the rents in advance, upon which he will be allowed a liberal discount. One great inducement which the Huron district holds out to settlers, is the manufacture of potash; and for this purpose no land in the province is better if so well adapted, as it is entirely timbered with the best kinds of hard wood. A considerable pot and pearl ashery has just been established at Goderich, and new settlers may, therefore, have facilities for obtaining cash or store goods for black salts or potash. This advantage will be appreciated by all old settlers, who understand the manufacture of those articles, and who have felt the inconvenience of being compelled to wait for a crop, before they could obtain money or goods for their labor. The Huron district has been settled about twelve years, and during which period, although failures of crops have occurred in most other parts of the province, scarcely even a partial failure has taken place in the Huron. The climate of the Huron is remarkably healthy—fever and ague being almost unknown, which is attributed to the numerous and excellent living springs abounding throughout the district; it is the best watered portion of Western Canada. The centre of the Huron district is ninety miles south from the new government settlement in Owen's Bay."

Under such a system it is not surprising that there had been an influx of 7000 settlers from the United States. Frederick Widder, Esquire, the agent of the company, so informed me, by letter, dated Toronto, 5 September, 1842.

But from that fact, it is not to be supposed that the United States are to be reproached with a backwardness to encourage immigration. The very reverse has been the policy of the wise statesmen who have governed that great and growing republic, ever since its independence; and generally speaking, the tide of emigration has been from Canada to the United States, and not from the United States to Canada. Under ordinary circumstances, settlers do quite as well in the United States as they can do in Canada or any where else; but a temporary exception arose, under the derangement of the currency, and depreciation of all property, created by the policy of General Jackson, and it was mainly to that cause that Mr. Widder attributed the great emigration to Upper Canada.

While in Illinois and Missouri, in 1842, I found many of the farmers, who had beautiful and well cultivated farms, complaining that they could find no adequate price for their produce, and that even the inadequate price obtained, was paid in bank paper, of a mere nominal value, and that if such a state of things continued they would move off to Upper Canada.

I have reason to believe that that state of things no longer exists in the Western States, or that it exists only in a very mitigated degree.

It is only by the adoption of a liberal policy, more or less resembling the above, that all the British colonies have prospered so remarkably. I have already attempted to show this in my 33d note, published in the Friend of the 1st July; but as I consider it of the utmost importance to this young nation, that the government should adopt the only policy calculated to improve its agriculture and increase its population. I here add the following authentic tables relative to grants of land by the British crown, in North America, Africa, and Australasia.

NORTH AMERICA.

COLONIES.	Approximated statement of lands alienated previous to 1831.	Quantity of land sold from 1831 to 1838 inclusive.	Total amount of purchase money.	Number of acres granted without sale.	Total quantity of wild lands remaining ungranted.
	Acres	Acres.			Acres.
Lower Canada, - -	12,000,000	371,015	£67,233*	422,184	4,031,143
Upper Canada, - -	11,000,000	95,775	32,976†	1,932,419	1,486,235
Nova Scotia, - -	5,000,030	116,824	no returns ‡	51,690	(actual survey'd)
Cape Breton, - -		37,903	no returns. §	166,765	6,510,159
New Brunswick, -	3,500,000	694,180	140,035‖	133,343	13,982,250
Prince Edward's Island, - - - -	1,457,200 (75 gr'ts in 1 day.)	166	731	13,633	2,000
Newfoundland, - -	not ascertained.	1,633	no returns.	8,474	not ascertained.
Total, - - -	32,957,200	1,317,496	£240,975	2,728,512	26,011,786

* 2s. 10 1-2d. to 6s. 3 1-4d. an acre.
† 6s. 1d. to 9s. 11 3-4d. an acre.
‡ 1s. 5d. to 1s. 7 1-2d. an acre.
§ 1s. 11 3-4d. to 2s. 9 3-4d. an acre.
‖ 1s. 7d. to 4s. an acre.

CAPE OF GOOD HOPE.

	Lands alienated prior to 1831.	Lands sold from 1831 to 1838 inclusive.	Total amount of purchase money.	Number of acres granted without sale.	
1831		The quantity of land is seldom stated; it consists mostly of old farms or plots of ground for building in or near old settlements.	£928	2,484,311	
1832			706	2,003,702	Total quantity of wild land remaining ungranted, estimated about 34,000,000 acres.†
1833			1,307	725,323	
1834			1,477	69,245	
1835			1,443	1,075,133	
1836			2,772	2,173,505	
1837			7,851	8,084,295	
1838			6,107	6,473,066	
			£22,591	23,088,583*	
Received on account of sales of land prior to 1831, - - - - -			2,890		
			Total, - - - £25,481		

* "The grants made during the year 1831 to 1838 inclusive, have been of lands long previously surveyed for the parties; but the titles to which, from various causes, could not be completed before."

† "Of the lands remaining at the disposal of the crown, much has been applied for by private individuals, and the grants are in progress of completion; but a great proportion is too rocky, mountainous and sterile to be fit for use; and how much of it could be made available for agricultural or grazing purposes, can only be ascertained by general inspection. The want of water, in most parts of the colony, renders it extremely probable that very little, not already applied for, is worth the expenses of measurement."

AUSTRALIAN COLONIES.

COLONIES.		Lands alienated prior to 1831.	Lands sold from 1831 to 1838 inclusive.	Total amount of purchase-money.	Numner of acres granted without sale.	Acres of wild land remaining ungranted.
New South Wales,	1831	3,800,000	no return	£2,597	258,841	18,000,000
	1832		20,860	12,509	15,843	within the boundaries marked out for settlement.
	1833		39,025	24,956	14,683	
	1834		91,399	41,844	27,861

Western Australia,		none	22,327	2,194	723,692	not ascertained
South Australia, -		none	151,611	259,197	none	do
Total,		5,300,000	1,802,458	£893,851	1,486,473	30,090,476

* The 18,000,000 acres are refuse lands not worth anything scarcely.

West India Colonies.—No returns for these have been yet published.
Sierra Leone.—Amount of purchase-money for lands sold, £585.
Mauritius.—Purchase-money received, £13,617. Waste lands, not alienated, about 100,000 acres.
Ceylon.—Lands sold from 1831 to 1838, 20,159 acres. Money received, blended in the general accounts.—Acres granted, without sale, 13,671.

I have touched several times, in the course of my notes, upon the subject; because, I am deeply convinced that nothing will contribute so much to the greatness of the king, and the happiness of his subjects, as

the establishment of wise laws relating to grants and leases of land.

I give the king and his government full credit for the 5th, 6, 7 and 4th sections of the law or statute of the 9th November 1840; and the sincerity of their good intentions for the welfare of the Hawaiian people, I am far from doubting; but I do think that the subject of the price and rent of lands as it bears upon the industry, population, wealth and commerce of the country, deserves more consideration than appears hitherto to have been bestowed upon it.

In pressing this consideration so earnestly and so frequently, I have no other object than the honor and welfare of his majesty, of his government and people; and if all nations allow that the British system of colonization is the best and most successful that has ever been tried, (and no better proof can be given than the stupendous growth of the United States on that foundation,) I may be permitted to think that a careful consideration of that system, in comparison with that heretofore or now existing in these islands, is pre-eminently worthy of the attention of the Hawaiian legislature, at its first session.

63. Commission for the examination and registration of titles.—I believe I may state with confidence, that the government has determined, soon after the arrival of their envoys from Europe, to name *commissioners* to examine and determine upon all questions of title, upon certain precise, definite and uniform rules, applicable to all claimants. This measure will do much credit to the government; it will set for ever at rest many complaints arising from a misconception of the nature and permanency of land-donations made by the chiefs, as a mark of personal esteem, or in payment of presents made or services rendered to them; it will fix property on a secure basis, facilitate advances of money to proprietors, encourage population and the improvement of land, and prevent future disputes about titles and their limits.

64. Revision of the laws affecting the tenure of lands, &c.—This I understand is also to come before the next legislature; and I hope the law adviser of the crown, in his laudable endeavors to establish all the courts which the kingdom ought to possess for the regularity of its relations with foreign nations, will find time to apply his mind to the improvement of those laws and courts which more immediately affect the vital interests of the king's subjects, in their relations to his majesty, to the chiefs and landlords, and to one another.

It appears to me that the poll-tax, the land-tax and the labor-tax, require to be modified and rendered more plain and intelligible to the natives, and that still greater exceptions should be made in favor of those who rear large families, or introduce any new kind of industry or cultivation, adopted to the soil of these islands.

It has been the policy of all wise governments, to promote the industry, invention and commerce of their subjects, by bounties, patent-laws, or other priviliges. The benefit of these has been extended to foreign inventors. This government as yet does not possess pecuniary resources sufficient to give large *premia* in money, but the crown owns waste lands out of which to reward those foreigners who may apply their skill and capital to the introduction of new productions enriching the country generally and affording increased employment to its natives. It is not easy to conceive what practical objections would arise to grants of land carefully and judiciously made, for that laudable object. On the contrary, the great advantages of increased capital and labor must strike every one who compares the very limited population of these islands with the vast quantities of land susceptible of cultivation, now lying waste.

It cannot be (or if it be, it ought not to be) the policy of this government to discourage the introduction of foreign capital and foreign labor. Nothing is so much wanted in the islands, and if properly supplied, nothing will so much promote their prosperity. But, considering their remote geographical situation, great inducements are required to attract capital and labor hither, from those countries of more easy access, to which they have hitherto flown.

65. Oath of allegiance.—Of late a strong wish has been manifested to induce foreign residents to take the oath of allegiance to this government; and a series of articles have appeared in the Polynesian subscribed by "Ligamen" apparently intended to remove the scruples which many foreigners have to take that oath. As all foreigners owe subjection to the government while they reside within its jurisdiction, I do not see that the oath is objectionable upon that ground, nor would I find fault with those who please to take it; but I question whether as yet it would be wise in this government to make the tenure of office or place dependent upon the taking of such an oath.

It would be tantamount to an exclusion of British subjects from all appointments of honor, trust or profit under the crown—for notwithstanding the arguments and illustrations of Ligamen, the most of them are of opinion that they cannot legally abjure their allegiance to their own sovereign. That the allegiance of the subject is perpetual and indissoluble, according to the English law, seems to have been admitted by the honorable Daniel Webster in his letter to Lord Ashburton of the 8th of August 1842. And, if not admitted by him, there can be no doubt of lord Ashburton's belief that such is the law, of great Britain; for in his reply he remarks: "I am well aware that the laws of our two countries maintain opposite principles respecting allegiance to the sovereign. America receiving every year by thousands the emigrants of Europe, maintains the doctrine, suitable to her condition, of the right of transferring allegiance at will. The laws of Great Britain have maintained from all time the opposite doctrine. The duties of allegiance are held to be indefeasible; and it is believed that this doctrine, under various modifications, prevails in most if not all the civilized states of Europe."

Nor is it for a moment to be supposed that a British subject, under that honest conviction, refusing to take the oath of allegiance to *king Kamehameha III*, would be less likely to serve his majesty faithfully, than any American, Frenchman, or other foreigner taking the oath, without the same prohibition by the laws of his own country. There could be no objection to an oath to servo his majesty faithfully in the trust confided to him, but to couple that oath with an abjuration of his native allegiance, for the reasons aforesaid, would place a British subject in a worse position than other foreigners, who by the laws of their own countries are permitted to make that abjuration.

In time of peace, the abjuration of foreign allegiance could be of no consequence to this government; and if a war should unfortunately arise between this kingdom and any foreign nation, this government could always suspend the subjects of that nation from the employments they might hold.

Lord Cochrane, while admiral and commander in chief of the naval forces of Chili, in the war of independence, and while holding the same command under the emperor of Brazil, and in Greece, without abjuring his allegiance to Great Britain in either case, could and did make prizes of British ships subjecting themselves to seizure according to the decrees issued by the governments whose commission he bore at the time.

Many other examples might be given of officers serving with distinction in foreign countries, and with great benefit to those countries.

65. Foreign consuls.—Hitherto Great Britain, France, the United States, and Peru, are the only nations that have accredited such agents to this government

It is believed that Belgium will soon make a similar appointment; and it can hardly be doubted that Russia, Chili, and Mexico, will see the necessity of following the same example.

Besides a commercial agent here, and another in Lahaina, each exercising consular functions, the United States have a Commissioner residing at this court.

Among foreign residents, subjects of different nations, some little jealousy exists about the degree of favor enjoyed under this government. On examination, it will be found that the British complain that the Americans have more favor than the British—that the Americans make the same complaint of the greater privileges enjoyed by the British—and that the French think they are worse off than either Americans or British; and the only legitimate conclusion to be drawn is, that this government endeavor to deal with all equally and impartially. Were foreigners to be emulous who should deserve most the good opinion and countenance of the government, by obedience to the laws, and by living quietly, orderly and peaceably amongst themselves, it would be more to their credit than to bring groundless charges of partiality against a young government struggling to do justice to all.

66. Society in Honolulu.—In speaking of society, I must be understood as referring only to the social intercourse of foreign residents. All ships of war visiting this port will bear witness to the general hospitality that prevails, so far as the means of the inhabitants will allow, and even farther. This virtue extends to the missionary families, to whose quiet, orderly teaparties, all strangers are welcome who show any desire to cultivate their acquaintance. There are from twenty to thirty American and English ladies in the place, many of them highly accomplished, and of whom a greater proportion possess personal charms than is usually found in so limited a number in other places. As in most small places, some little party feeling exists, but it is daily diminishing, and it is to be hoped that it will soon disappear entirely, before the good sense and general good feeling of the community.

There are few towns of the same extent where a deep religious feeling more prevails, and certainly none where more decency and order are observed on the Sabbath. Yet all this exists without any of that gloom and ascetic severity which existed in the early days of presbyterianism in Scotland and of puritanism in England and Connecticut.

There are indeed a few of the old settlers habituated to the license and misrule of heathenism, who are never seen at church, who scoff at the missionaries and disregard the pure doctrines they teach and the morality they practice; but this little leaven of unrighteousness is too insignificant to corrupt the general mass.

Another virtue eminently pervades the society of Honolulu, and that is *temperance*. During eight months that I have been here, I have not seen one native intoxicated; and what will excite surprise in Europe and America, I have not seen one *beggar!*

Nor ought I to omit here a tribute of praise to the honesty of the natives. It is very seldom indeed, that a case of theft is heard of, and then it is only of a very petty description. As for robbery, assault or any other acts of violence, unprovoked by the aggression of whites, I believe they are almost unknown in any of the islands.

(to be continued.)

EDITOR'S CORRESPONDENCE.

VISIT OF THE U. S. S. SAVANNAH AT HILO.

Mr. Editor,—Permit me, through the medium of your paper, to acknowledge the receipt of fifty dollars, as a donation from several gentlemen of the U. S. frigate Savannah, to be appropriated to objects of benevolence at Hilo.

Your subscriber would be happy to give the names of the worthy and respected donors, and he withholds them only in compliance with the wishes of the gentlemen whose kindness has called forth this card.

The Savannah arrived at Hilo on the 31st of August, and it gives us great pleasure to say, that during the seventeen days of her stay in our port, we have experienced an uninterrupted flow of kindness and courtesy from the worthy commander and all the officers whose acquaintance we have had the pleasure to make.

On the 12th inst. the commander gave a concert of music from his full "band," for the entertainment of foreigners and natives. The large native church at Hilo was filled with eager and admiring crowds, and every thing was conducted with propriety and decorum. The concert was opened with prayer, and a hymn from the native choir; after which the band performed several pieces of church music, a number of marches, etc.

Written addresses were presented by two of the officers of the Savannah, and read and translated for the native congregation. These addresses did honor to the gentlemen who produced them, and were listened to with much interest and satisfaction by the natives, to whom they were addressed.

Capt. A. and a large number of his officers were present on the occasion, and exhibited a lively interest in all that tends to elevate and bless the Hawaiian race.

Would all commanders, officers, and seamen, of foreign ships visiting our ports, conduct with as much dignity, propriety and kindness as those just alluded to, they would ever be welcome to our shores; and their influence on the natives, instead of counteracting the efforts of those who are laboring for their good, would tend to invigorate them; and instead of saddening the hearts of philanthropists and christians, would animate and cheer them.

Most truly yours, T. Coan.

Hilo, Hawaii, Sept. 16, 1844.

P. S. The subscriber would gratefully acknowledge the receipt of two dollars from Mr. J. Snook, of H. B. M. ship Carysfort. Also, the sum of ten dollars from "a friend" on board the U. S. frigate Savannah, for the purpose of promoting the cause of christianity and civilization among the Hawaiians.

Yours truly, T. Coan.

Sept. 20.

From an humble and contented temper will spring a cheerful one. This, if not in itself a virtue, is at least the garb in which virtue should be always arrayed. Piety and goodness ought never to be marked with that dejection which sometimes takes rise from superstition, and is often the proper portion of guilt.

THE FRIEND.

HONOLULU, OCTOBER 9, 1844.

HAWAIIAN TOTAL ABSTINENCE UNION.

We are most happy in the belief that the cause of total abstinence is steadily advancing in Honolulu. The stated meetings of the society have always been well attended. Since the first meeting that was called in July last, meetings have been held regularly every Saturday evening. On the evening of the 24th of August, the meeting was addressed by Richard Ford, M. D., upon the "physical effects of alcoholic liquors." A copy of his address was requested by the society, to be published in our columns. It does not appear, because a copy has not been forwarded.

On the evening of August 31st, the society was addressed by the seamen's chaplain. Subject,—*The pledge—its history—its nature—and the duty of different classes throughout the community to sign the pledge.* The society passed a resolution requesting that our remarks might be published in the Friend. For the want of room, as well as other consideration, we refrain from publishing, at present, our remarks upon the *history* and *nature* of *the pledge.*

"III. *The duty of different classes throughout the community to sign the pledge.*

"1. All strictly sober men ought to sign the pledge.—Because their influence and example are needed to advance the temperance reform. They should gather around the fallen victims of intemperance and whisper tenderly in their ears, "come, go with us and we will do you good." Allow me to quote a few remarks which have just come to hand, upon the power of example. They are taken from a address of Governor Briggs, now at the head of the executive of the state of Massachusetts, and were addressed to the members of the state legislature in Jannary, 1844: "Almost every one," remarked his Excellency, "underrated the influence which he is capable of exerting, and thus we had the excuses of many good men, when asked to sign the pledge. They were temperate in practice, and yet they considered their influence of no importance; but the force of example was beyond all calculation. There was no greater mistake than that of supposing but little influence was exerted by an individual. An example, like a candle sent forth its rays to the most obscure parts. Those rays could not be hidden. The same example that carried forth a good influence, might also send forth a bad influence: the breeze which bore to a distance the fragrance of the rose, likewise conveyed the blast of the miasma. How important that our influence be good! The man who signs the pledge gives notice to all around him that his influence is for temperance. How noble, to see a man come forward to the work, and say, "if my example is good for any thing, I'll give it to you." What an influence a young man might exert by such a course." . . . "We shall not do so much by legislating, as by contributing our influence to the temperance cause. If we should all lend our influence, we might soon say 'there is no drunkard in Massachusetts; there is no wretched family in our state.'" Such language is noble, coming from the highest official dignitary in old Massachusetts—worthy of the land of the Puritans. It is the force of such reasoning which has induced thousands in different parts of the world to sign their names to the pledge, and give their influence to promote the temperance reform. Such reasoning, I believe to be good and sound. It is such reasoning as should come home to the minds of all classes, but particularly the *sober* class in this community.

"2. *All temperate drinkers should sign the pledge.*—Because no class of men in the community exert a more deadly influence to the cause of temperance. "The great discovery," remarks a European writer, "has at length come forth like the light of a new day, that the temperate members of the society are the chief agents in promoting and perpetuating drunkenness. On whose mind this great truth first rose, is not known. Whoever he was, whether humble or great, peace be to his memory. He has done more for the world than he who enriched it with the knowledge of a new continent: and posterity to the remotest generation, shall walk in the light which he has thrown around them." All drunkards were once temperate drinkers. This class of men appear to be walking along the edge of a most fearful precipice. Only a few comparatively escape, without a fatal fall. The majority falls to rise no more. While the temperate man there walks, he is saying, by example, to his fellow men, "come and see how near this precipice you can walk?" Hearer, did you ever approach sufficiently near to cast a glance downward!—There lie men of wealth and poverty; there have fallen men of brilliant talents, as well the ignorant rabble; youth has there fallen; beauty has there become deformity; the honored, dishonored; the strong, weak; the brave, fearful; not a few have disappeared, *but not forgotten*, who were once ornaments in the visible church. Ought not temperate drinkers to sign the pledge?

"3. Those should sign the pledge who are standing in that perilous situation, midway between the temperate drinker and the confirmed drunkard. Such are the fashionable wine and brandy drinkers of the age, who, perhaps, are not drunk more than once in a month or a twelve-month. They are not unfrequently met, after a public dinner, talking quite loud, and you need not be surprised if obscene and profane language escape their lips. They generally boast their ability to drink a great number of glasses of wine or brandy. Such persons are often flattered by the ladies. Ladies, even, have been known to pride themselves upon similar feats of bacchanalian prowess. By all persons of this class, a drunkard is despised; yet they are occasionally drunk themselves. The principle of self-preservation should urge them without delay to sign the total abstinence pledge.

"4. Men of confirmed intemperate habits should sign the pledge. Every motive calculated to move the mind of a rational being, should be brought to bear upon their minds to induce them to sign the pledge. A consideration of the past, present, and future, should urge to immediate action,—to form the deliberate and determined resolution, to touch not, taste not, handle not, the fatal beverage. How much they should be encouraged to do it, when contemplationg the wonderful work now advancing in England, America, and other parts of the world:—yes; I would add with joy, in Honolulu! Wind, tide, and current, are now favorable for such persons to shove off from the dangerous rocks of intemperance, and make a fair run into the harbor of sobriety.

"To aid this work, so beneficial to the community, and so eminently calculated to promote individual happiness, all classes in society ought to give their names and influence. The clergyman should give his name and influence, because professedly the guide of souls to Heaven. The physician, because he is supposed to understand better than other persons the evils of intemperance upon the human constitution. The lawyer, because he witnesses the criminal's drunken visage, when standing before the tribunals of the land, charged with crime committed under the influence of intoxication. The merchant, because, morally speaking, he has no right whatever to traffic in an article scattering "arrows, firebrands and death" throughout the community. Public and official men, because their names and examples should be the very last to be adduced to encourage their fellow men to continue their habits of intemperance. The mechanic should affix his name to the pledge with no faltering hand, because his success in life almost certainly depends upon his firmly adhering to the principle of total abstinence. The master and officers of a ship should sign, because their example is most powerful upon their men. All seamen should sign, because their safety and the success of their voyages very materially depend upon the sobriety of "all hands" on board.

"But are no others called upon to sign the pledge? Yes. Ladies, one and all, old and young, should sign the total abstinence pledge; because, remarks an eloquent writer,—

"'Intemperance afflicts man; but it blasts woman. It lays the withering stroke on her heart, and her beauty consumes like a moth, while her joy goes down to the tomb. Man survives the loss of happiness; woman, never. Man has a thousand chances to secure it; woman has but one. The evils which intemperance lays upon a man, come often one at a time; on woman, they light altogether. We ask her to throw her benevolence into the scale, to secure protection for her own fire-side, and her own heart. For aught you can tell, the fate of yonder widow, friendless and forlorn, may soon be yours; the Destroyer, who wrote the mother childless, to-morrow may lay destruction at your door, and break your heart. Whatever may be your power to attract, pursuade, to command, hesitate not to throw that power into this cause, and then, no matter what may be the result, you shall know that you are guiltless.

"'In the domestic circle is cast the character of man; it gives expression to nations. If purity and peace are not found there, society will be filled with discontent and contention. As sure as intemperance crosses the threshold of domestic life, every pure and high influence will depart

"'Let those who preside over the sanctities of domestic life, and administer its sacred rights, guard the entrance against the first approach of this monster. If the household gods are not kept in purity, there is not a deity that is safe from pollution.'

"This is no fancy sketch. Has the wife no fears for her husband, who sips statedly or occasionally from the intoxicating cup? Has the mother no fears, no well-founded anxieties, for her sons and daughters? Is she not bound to throw good influences around their opening and expanding minds? Unless her influence is decidedly in favor of temperance principles, has she no reason to fear that her influence may give a bias to the minds of her children that will end in their ruin? Ah, who can estimate the mother's influence over her tender offspring? Men may fancy their reasons are sufficient to excuse them from signing the pledge, but what seemingly good reason has the lady, the wife, or the mother?" * * * *

The Hawaiian T. A. Union held its 12th stated weekly meeting Saturday evening, Oct. 5th. TOPIC for discussion and for conversation—*The benefits resulting from the practice of total abstinence principles.* Several members spoke with interest upon the proposed subject. The exercises were enlivened by the reading of the specimen No. of a weekly journal, called—

HAWAIIAN CASCADE & MISCELLANY; Vol. 1, No. 1.—Honolulu, S. I., Oct. 5. Timothy Teetotaller, publisher. Isaac Coldwaterman, editor.

The publisher states in his prospectus that the object he has in view is to promote the cause of total abstinence among the Honoluluans. He does not propose to print, but merely to publish his paper by reading it at the meetings of the Union. His columns he hopes to fill with well-chosen selections setting forth the blessings and benefits of temperance, and such communications as the members of the Union or others may forward to be read.

Terms—good attention or listening ears from the members, with an occasional note of approbation if any thing truly humorous appears—(not otherwise.)

We hope to enrich the columns of the Friend with extracts from those of the Cascade. Unless we are sadly mistaken, that weekly sheet will prove a valuable coadjutor in the temperance reform. We sincerely wish it abundant success. We have been requested to state that all communications for the columns of the "Hawaiian Cascade and Miscellany" should be forwarded to Mr. Hall, printer in the office of the Polynesian. We have also been requested to notify the

public that the H. T. A. Union will hold regular weekly meetings Saturday evenings at the vestry room of the Chapel until notice is given to the contrary. The public are respectfully invited to attend. It is hoped that no member of the Union resident in Honolulu will absent himself from the regular meetings unless absolutely required so to do in consequence of sickness or pressing business. We are honestly of the opinion that the temperance reform is steadily and triumphantly advancing in Honolulu. *See how the wind blows!* Last week some brandy was offered for sale at public austion, and not a single bid was made. The auctioneer cried in vain. A publican standing by remarked, "I sell but do not drink." He surely is half way a wise man. Report says, the owner of the brandy was advised to give it to the h-o-g-s. But who ever heard of one of those animals drinking brandy, unless it was found saturating cherries. Brutes absolutely refuse a poison by which rational beings, created in the image of God, make brutes of themselves. Is not this truly disgusting and humiliating!

WRECK OF THE SHIP HOLDER BORDEN.

In an interview, last evening, with Capt. Pell, we learned the following particulars concerning the wreck of the beautiful ship which he commanded:

She sailed from this port April 5th, to cruise on the North West, and on the following 12th, at one o'clock in the morning, she struck a reef of rocks within four miles of a small sandy and treeless island, about three miles in circumference, and lying in west long. 174° 51' and north lat. 26° 1'. He did not find the island laid down upon his charts. The first shock was scarcely perceptible, but the ship was soon fast. Every effort was immediately made to get her off, but in vain. The morning light disclosed a bare ledge of rocks only 100 feet distant. The masts were cut away, and measures taken for discharging the cargo, and saving every thing that was valuable and moveable. They succeeded in safely landing 1400 bbls. of oil, anchors, cables, sails, provisions, clothing, &c. &c. Six days after landing, they commenced building a small schooner, which was completed in four months and twenty two days. She was launched the 10th of Sept. and sailed for this port the 14th, commanded by Capt. Pell, who arrived safely after a passage of twenty three days, accompanied by twenty four of the crew, eleven having been left upon the island. Forty barrels of oil and one cable were brought in the schooner.

It is thought property to the amount of $30,000 has been saved. The noble ship originally sailed for about $65,000. This was her first voyage. She belonged to Fall River, Mass. We are most happy in stating that no lives were lost in the unfortunate occurrence. At a future time we shall publish additional particulars respecting the loss of probably one of the most splendid whaleships in the Pacific.

SCHOONER SHAW WRECKED.—Some months since a report reached the islands that the Shaw had been wrecked. If we have been correctly informed, that report was far from being definite. On board the Am. whaleship Oregon, now lying in this harbor, is a sailor who sailed from this port on board the Shaw, and was on board at the time of her loss. He reports as follows:

The schr. Shaw left Honolulu Jan. 17, 1843; touched at Kauai, and there she lost her boat. After leaving the island of Kauai, she sailed for Ascension, where she remained three weeks and four days. There being no prospect of trade for shell, the captain decided to visit a small island about midway between Ascension and Guam. In attempting to find a suitable place to anchor, the schooner was wrecked. She struck a coral reef about one hour before sun-set. All efforts unavailing to get her off, the crew left the following morning. By the aid of two canoes obtained at Ascension, they were able to save some of the lighter part of the cargo, chronometer, &c. No lives were lost. Five days after landing, died Kenikili, a native of the Sand. Is. Four and a half months were spent by the crew on this island, about two or three miles in circumference. They subsisted upon cocoa-nuts, fish and brackish water. Having constructed a boat they all embarked, and with much difficulty, after eleven days' sail reached Guam, and from thence they separated.

NEW WORK.

Notices of the life, character and labors of the late BARTIMEUS L. PUAAIKI, *of Wailuku, Maui, Sand. Is. By Rev.* J. S. GREENE, *Lahainaluna. Mission press*, 1844: *pp.* 50.

The readers of our columns may recollect an obituary notice of "Bartimeus, the blind preacher of Maui," which was published in the February No. of the Friend. Much did we rejoice to see a more extended account of the life, character and labors of this truly extraordinary man. Long before we took up our abode upon these islands, the name of Bartimeus was familiar to us. Being among the earliest converts to christianity, and taking so prominent a stand for truth and righteousness, have tended to place his character in the most interesting light, not only to his own countrymen, but also before the christian world. We most sincerely hope the sale of the present edition will encourage the author to publish a more full and extended memoir. At some future time we shall publish copious extracts, if not the entire work, in successive numbers of the Friend. It is the publication of such memorials which will tend, most powerfully, to strengthen the confidence of the christian world in the practicability of the missionary enterprize. Want of room will not allow more protracted remarks. In a few days we hope to be supplied, with a quantity of the above work, for sale. Price 12 and a half cents.

By the last Polynesian we rejoice to learn that the Governor has set his face like a flint against licentious practices; and the public are given to understand that the guilty must expect to be dealt with according to the full rigor of the law. We hope the next step of the Hon. Magistrate will be to clear the streets of those "whose ways are the ways of death."

THE SEA.—"Thou hast never been on the sea," said the lady to her waiting-maid, "and knowest nothing of that dread loneliness which settles on the spirit, when the last headlands have disappeared, and one wide waste of tumultuous waters are heaving around, bounded only by the dull and evening sky. Thou hast not felt that mighty dread, which overwhelms the timid wayfarer on the ocean, who watches the little ship stagger from wave to wave, or heard the shrill wind singing through her cordage, until the masts bend like a reed in the storm. Thou hast not looked on the pathless waters, where nothing moved but the black hull on which we stood, and the rolling mountains of waves, the smallest of which might close over the bark for ever, and leave not a vestige to tell that ought living ever glided above those depths."

Rev. S. C. DAMON:

Dear sir,—Herewith I hand you for publication in your paper, an article prepared for the Polynesian and sent to that office, but which was returned with the accompanying courteous note from the editor, which in justice to him I beg you will also publish with the article.

I beg leave also to state that I most fully appreciate and reciprocate his views respecting the propriety of such a discussion in a common weekly newspaper, and its general unprofitableness; and which I have no intention of protracting beyond the present article. But as his remarks left me in the position of having predicated my observations upon an untenable system, already exploded in the minds of intelligent chronologists, I felt bound, in justice to myself, to present reasons for the system which I preferred. The editor has doubtless adopted his system because in his view its claims had superior weight, and he probably has access to a greater number of authorities than I have. Yet many others besides myself, and whose means of information are much superior to mine, have rejected the claims of any new system which has been presented, as inferior to the old, whilst others have adopted them; neither, as we may suppose, acting without examination. In searching for truth, we should be ready to renounce error, when it is shown to be such, however long and dearly it may have been cherished.

Respectfully, yours,
S. N. CASTLE.

Wednesday morning, Sept. 18, 1844.

P. S. Since writing the article for the Polynesian of the 17th ult., I have seen in one of the periodicals of the U. S., the notice of a recent work on Prophecy, by the Rev. Samuel F. Jarvis, D. D., L.L. D., of the Protestant Episcopal Church of the U. S., which the editor pronounces an able work. He says, "Dr. Jarvis, it is well known, has devoted several years to the preparation of a work on ecclesiastical history, which has rendered him familiar with the subject of chronology. He has here thoroughly and satisfactorily investigated it, arriving substantially at the conclusions which Scott and others of the best commentators have adopted." "The author has elaborated a system of chronology with great care, and apparent accuracy, from sources which are generally inaccessible, and which forms, perhaps, the most concise and complete treatise on this subject that can be found." As Dr. Scott's chronological calculations are based upon the commonly received system, I infer that Dr. Jarvis' researches have conducted him to similar conclusions. The work itself I have not seen, and my inference may be incorrect. S. N. C.

Oct. 7.

Sept. 18.

Dear sir,—I have read your communication with much pleasure, and am happy to learn that no sarcasm was intended to be conveyed. It was so worded, however, that I could draw no other reference. But the extent of your answer renders it impracticable for me to give it insertion. Quite as much has been said already on the topic as will be of any interest to my readers; and a little reflection will, I think, convince you that so abstract a dissertation is not suitable for the columns of the Polynesian, and that it leads only to unprofitable discussion. I can bring hosts of authorities to sustain my opinions, if I considered it necessary. But I do not. You have already plainly stated the system to which you gave the preference; I have also stated mine. I have no disposition to change your opinion, and I do not expect mine to be altered. If yours is admitted, an answer quite as long must be prepared, and of course articles of real interest excluded; therefore I must decline any

further discussion of the subject in the Polynesian. Very respectfully,

Your obt. servt., JAMES J. JARVES.

Mr. S. N. Castle.

HONOLULU, Sept. 17, 1844.

MR. EDITOR,—In your comments upon my article of last week, you have been pleased to regard the last clause as a sarcasm, and make a personal application of it to yourself. In penning it, I must be allowed to disclaim any *intention* of uttering a sarcasm, though the remark may have appeared such, and especially of impeaching your faith in Divine Revelation. *I thought* that your statement concerning Egyptian Antiquity was erroneous; and if in an attempt to point it out I failed in courtesy, it was not by design. The cause of truth is not generally advanced by asperity and personality, and in ordinary cases their use should be deprecated as tending to engender bad feeling without any profitable result.

From my remark in the article alluded to, respecting the confidence to be reposed in Bible Chronology, it may be inferred that I regard it as of equal authority with the Bible itself. Such however is not the fact. I was aware that its accuracy was contested, and I here admit that my expression of "safety and confidence" in its authority was too strong. But I am still of opinion that it is equally if not more safe than any other system which has been settled upon.

The fact also that large numbers of Bibles are yearly issued from the presses of Great Britain and the United States, containing the Usherian Chronology, would seem to imply that the majority of Biblical students in those countries had settled upon no other system which they considered as equally entitled to their confidence. The Septuagent makes an interval of only 955 years between the birth of Methusaleh and the flood, whilst his years are reckoned at 969, which would have made him overlive the deluge 14 years: but as Noah and his family only were saved this must be an error.

The Hebrew reckons the age of Methusaleh at 969, the same as the Seventy; the interval also between his birth and the deluge at 969.

Michaelis says that "the Seventy, in the case of Adam, Seth, Enos, Cainan, Mahaleel and Enoch add 100 years to the age of each before the birth of a son, and subtract as many years from the remainder of their lives, according to an hypothesis that no man begat children before he was an hundred and fifty years old. On the other hand, the Samaritan took it for granted that no one except Noah had children after he was an hundred and fifty years old; and accordingly from the 162, 187 and 182 years of Jared, Methusaleh and Lamech, it subtracts 100 years each." Nor does it afterwards add them again, so as to make the same number of years in the whole, but in accordance with still another hypothesis it makes the life of man gradually to decrease, not only in this genealogy but in the other which reaches from Noah to Abraham.

"The Seventy assume that no one could beget children before his 150th year. And they are supposed to have taken this position from the consideration of the ratio which the age of puberty bears to the period of human life in modern times. But these long lived men might have come to maturity as early as we; just as those who now surpass the common age, and reach the 100 or even 140 years, are not on that account any longer in coming to maturity than others who in the common course of nature die of old age when not more than 70 or 80. The Samaritan on the other hand takes it for granted that no children could be born to any one after his 150th year; but this hypothesis is overthrown by the case of Noah, who begat sons and daughters after his 500th year; a fact which the Samaritan copyist has left unaltered."—[Michaelis.

He quotes "Ernest" to prove that Josephus had been corrupted to correspond with the Greek. This would seem to be confirmed in book 8, chapter iii., where Josephus says that the temple was built 592 years after the Exodus, 1020 years after Abraham's coming out of Mesopotamia, 1440 years after the deluge, and 3102 years after the creation. If the hundreds are subtracted from Josephus, in accordance with the above hypothesis of the Seventy, we have the Antedeluvian Chronology of the English Bible; the tens and units being the same, the hundreds only differing. If we take the above as in book 8, we find a difference of only six years. Josephus also states, book 1, chap. vi., that Abraham was born 292 years after the deluge; which exactly accords with the English Bible computation. But Josephus in stating particulars, makes 700 more; being probably interpolated to agree with the Greek of the Seventy. Michaelis says, "But in book 8, chap. iii., which transcribers seem to have left unaltered, in dating the building of the temple 3102 years from the creation, and 1440 from the flood, he evidently supposes from the creation to the deluge an interval of 1662 years; six more than the Masoretic Copies give."

The Hebrew is sustained by the Chaldee of Jerusalem, and Pseudo-Jonathan, the Arabic of the Polyglott and of Erpenius by Onkelos, the Syriac and Jerome.

This author remarks, "I prefer and adopt the Hebrew reading, because in the first place in no instance of the addition or subtraction of a century does the Hebrew text stand alone, but is supported either by the Samaritan against the Greek or the Greek against the Samaritan. Surely in a disagreement of three witnesses two must be credited against one, and most of all must *he* be believed who takes such independent course that he is supported now by one and now by the other. Now in this systematic disagreement the Greek and the Samaritan differ throughout, so as to contradict each other in regard to the age of each of the first nine patriarchs, while the Hebrew, without following either, takes such a middle course as to have the concurrence of the Samaritan in the age of Adam, Seth, Enos, Cainan, Mahaleel and Enoch, and of the Greek respecting Jared, Methusaleh and Lamech. On this ground more credit seems due to the Hebrew than the others."

If the Masorite Hebrew has been corrupted by the Jews, why did they not corrupt the Greek also? To me it appears that the evidence preponderates in favor of the Hebrew version of the Scriptures.

The system of chronology cannot be considered as accurately settled; but that of the English Bible has, as I conceive, strong claims to our confidence, and should not be abandoned without a more unquestionably accurate one to supply its place.

In reply to your quotation of Hales versus Usher, I would say that the American Encyclopedia pronounces his "annals of the Old and New Testament a treatise of the highest authority in chronology and Sacred History."

I here leave the subject of chronology in general, except as it may be blended with some extracts which I purpose to make from a Review of Giddon's Egypt, hereafter.

Waiving Usher's claims to confidence, we will test the antiquity of Egypt by others.

Dr. Hales fixes the establishment of the kingdom of Egypt by Menes B. C. 2412, and makes the first dynasty ending with Timaus extend 253 years, to 2159 B. C., when the Shepherd Kings took possession, and held the reins till 1899 B. C. Joseph was appointed governor of Egypt 1872 B. C., 27 years after the expulsion of the Shepherds and the accession of the new dynasty, and died B. C. 1792. The Exodus took place 1648 B. C.

Wilkinson gives the year about B. C. 2320 as the commencement of Menes' reign; arrival of Joseph, 1706 B. C; death of Joseph, 1635; Exodus, 1491. Wilkinson is of opinion that the conquest by and expulsion of the Shepherd Kings, took place previous to the sixteenth dynasty of Manetho, which he makes to commence B. C. 1740. But Eusebius, Josephus, and Africanus, make the Shepherd Dynasty the seventeenth of Manetho, although they differ greatly as to its length. As these authors do not appear to furnish authority for so great an antiquity as your remarks suppose, and as you have quoted Gliddon in a commendatory manner, I am led to suppose that you may have relied upon his authority. He places the accession of Menes, 2750 B. C.; but on p. 57, deems even this time too short. In his chronology he nearly follows Rosellini. He is undoubtedly to be commended for his diligent and persevering researches and investigations, but when this is awarded, it is proper to canvass his claims to our confidence before adopting his theory. And I here beg leave to insert some extracts from the review of his work, to which allusion has already been made. After some preliminary remarks the reviewer says:—

"We wish we could stop here, that our language

could be altogether free from censure. But this may not be. The tone of the book, in regard to many other subjects, and especially in regard to the antiquity of Egyptian history, and the faults of the Hebrew chronology, call for a passing notice. And because our author is so confident, and speaks so dogmatically, we are required to examine his arguments more closely, and criticise his conclusions more minutely. It also requires us to perform the more unpleasant part, of inquiring into the manner in which he has executed his task, that we may judge more accurately of his competence to discuss the subjects under consideration. And these are questions, touching, not as our author seems to fancy, the soundness of his orthodoxy, but the accuracy of his scholarship."

He then proceeds to point out many mistakes and inconsistencies of the author with himself, and to examine in detail the monumental, astronomical, and historical evidence upon which he rests his claims for extreme Egyptian Antiquity, and in conclusion, as the result of his investigation, proceeds to say:—

"We see, therefore, that as yet, no monumental evidence has been produced, even including the pyramids, that dates back before about B. C. 2000; also, that there is no astronomical evidence which can date with certainty before B. C. 1650, and no historical evidence that unquestionably reaches back even as far as this. Thus far, then, there is nothing that requires us to give up the shorter period of the chronology. Consequently, it it not important, so far as this point is concerned, which has the greatest claims to accuracy, the Hebrew or the Septuagint. A few remarks, however, upon this point, may not be inappropriate.

"That the Hebrew has much higher claims upon our credence, on mere philological and grammatical grounds, will hardly be questioned by any thorough *scholar*. That it is more consistent with itself than the Septuagint, all who have *examined both*, will allow. That the differences between the Hebrew and the Septuagint are such, that *additions* could be made to the latter, easier than *subtractions* from the former, must be evident to all who compare the two. But our author tells us, that it is indisputable that the Jews *corrupted* the dates of the Hebrew, (p. 35,) and that all the fathers except "Origen and Jerome who acted under Judiac influence, denounced the interpolations." It is not a little singular, however, that these two were the only fathers of that early period whose works have been preserved, that were familiar with the Hebrew; and consequently, that they were the only competent judges, as to the comparative, claims of the two chronologies,—the only ones competent to compare the then ancient and modern manuscripts, and see whether the Jews had made the alterations charged upon them.

"Here we might properly leave the subject, but there are a few brief considerations which deserve to be mentioned, tending to throw light upon the subject of the early Egyptian chronology. The "Old Chronicle," as we have already seen, gave to the gods 984 or 5 years—to the demi-gods, 217 years, and began the reigns of the mortals with the commencement of a Cynic cycle. We have, then—

Gods, - - - - - - - -	*985 years.
Demi-gods, - - - - - - -	217 years.
Mortal kings, whose reign commenced with the Cynic cycle, B. C. - -	2,782 years.
Giving a total of B. C. -	3,984 years,

which falls *sixteen years* short of the Usherian epoch of the creation. There can be scarce any doubt, therefore that the author of the Old Chronicle intended to fill up all the time, from the creation; and if so, it supports the Hebrew chronology throughout."

The reviewer appears an Egyptian scholar, and is evidently well acquainted with his subject. In my judgment, his conclusions are sustained by his facts and argument; and I should be glad to see the review, (about 25 12mo. pages,) published in your columns, could the space be afforded.

We will now refer to some of the remarks in your editorial which we have not noticed.

The first remark is,—that it is admitted that Rollin, although "distinguished by purity and elegance of style, is in his historical works deficient in critical sagacity." He was however in possession of all the ancient authorities which are now relied upon; but considering that in the early age of which he wrote, fact and fiction were almost inseparably blended, and the greater credulity of his own age than the present, he has doubtless retained more of fable than a discriminating historian of the present day would be likely to do. Notwithstanding which, he will probably be found about as accurate as any other historian of the early period of which he wrote. But if otherwise, this does not invalidate the chronology which he has adopted.

2d remark,—It is said "the monumental dates cannot be wrong." As to the evidence gathered from "monumental dates" or inscriptions, it should be borne in mind that they form no infallible criterian of correct dates. The meaning of the hieroglyphics has been lost for thousands of years until recently. "Dr. Young shares with Champolion the honor of having first indicated the right method of deciphering the hierogliphical language;" and Felix, Prudhoe, Wilkinson, Rosellini, and Dr. Lepsias, also share largely in the honors of investigating these interesting but obscure records of by-gone ages. That proper names may be deciphered with a good degree of accuracy, and inscriptions with much probability, there is no doubt. But Kircher, Dr. Young, Champolion, Hermapion, and others, all differ from each other in their interpretation of the last character but one in the Cartouch of Rameses III., which is of itself sufficient to shake our faith in the accuracy of the interpretations, when not confirmed by collateral authority.

3d remark,—again, "there are 19 dates for Solomon's temple; the longest, B. C. 741, the shortest, 479 years." Usher makes it B. C. 1000; Hales, 1020; Josephus, about 1100; Septugint, 1057. These will probably be allowed to be *as good* authorities as others; and all make the period to exceed 741 years.

4th remark,—I have no doubt that such a monarch as Rameses III. once filled the Egyptian throne, and that his busts and portrait may still be in existence; but I suppose that his reign commenced about 1372 B. C., and terminated about 1306 B. C. There is historical, astronomical, and monumental evidence to fix it about this period. If so, he could not have been the Pharaoh of Exodus. Whether that one perished in the Red Sea we know not, and to us it is not very important; but the natural inference from the narrative is, that he did.

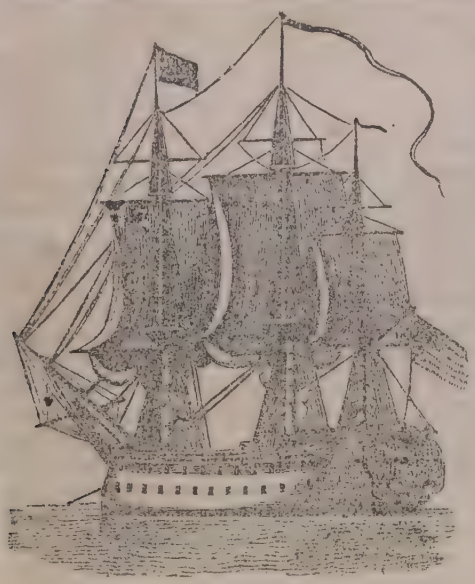
5th remark,—I am asked "to account for the great population of Egypt" at that early period. That mankind were very prolific in those early ages, we may gather from the rapid increase of Jacob's family during a space of a little more than 200 years. That some portions of the earth were populous is undoubted; but how extensive those regions were, cannot now be determined, as we are destitute of any authentic records upon this point. Kingdoms, (with few exceptions,) were doubtless very limited, both as to extent of territory and population, compared with those of the present day.

The reviewer says that the earliest date of the monuments is B. C. 1850, or 496 years after the Usherian epoch for the deluge; time quite sufficient for the accumulation of a dense population in those central parts

6th remark,—That Abraham was born before the death of Noah, and was outlived by Shem, is granted. But we see nothing either in this fact or the silence of the Bible in its genealogical and chronological account respecting any intercourse between Noah and Shem with Abraham, which goes to invalidate the chronological claims of the Hebrew to accuracy. We have no account of any intercourse between Adam and his posterity, although they must have lived together for several centuries.

7th remark,—I see no greater difficulty in Terah's becoming an idolator at the distance of two centuries from the deluge, than in the fact that the Israelites should have become so within forty days after receiving the law from amidst the thunders and lightnings of Sinai.

8th remark,—That Methusaleh lived till the year of the flood, according to the Usherian chronology, I admit. Whether he died a natural death or was swept away by the deluge, we are not informed. The Bible has left us in the dark respecting his character; but we are no more bound to believe him a good man, *because* he is placed in the genealogical line, (doubtless as the first-born,) than that every first-born of any illustrious line of modern times is good in consequence of being the first-born. "He died," the Bible tells us. If a good man, he probably died a natural death; and I should infer this from the expression, "he died;" but that he did not survive the deluge fourteen years, as the Septuagint makes him, is quite clear from the Scriptures.



I would remark that the claims of the Septuagint to accuracy, are I think generally regarded as inferior to those of the Hebrew.

It was not my purpose to enter into any chronological or antiquarian discussion when I hastily penned the article of last week. It is foreign to my province, and I am conscious that I have not the requisite ability, or time and means to devote to it if I had. I shall be happy to have my errors pointed out and corrected, and be enlightened from whatever quarter.

This communication. like the other has been hastily penned, but I was desirous that it should go into the Polynesian of this week.

Very respectfully, S. N. C.

* Whole reign of the gods is reckoned in the "Old Chronicle" at 36,984 years; but it has "been shown by Des Vignolles, and Dr. Nolon, that the 33,000 belonged to a pre-existent state."

List of officers on board the U. S. ship Savannah:

Captain, JAMES ARMSTRONG, commanding Pacific equadron.
Lieutenants, ROBERT B. HITCHCOCK; GEORGE MINOR; ROBERT F. PINKNEY; R. S. TRAPIER; U. A. WAYNE.
Fleet Surgeon, W. M. WOOD.
Purser, D. FAUNTLEROY.
Master, WILLIAM F. DE JONGH.
Lieut. Marines, H. W. QUEEN.
Secretary, THOMAS MILLER.
Prof. Mathematics, JOHN CLAR.
Asst. Surgeon, JOSEPH WILSON.
Midshipmen, GEORGE E. MORGAN; A. C. JACKSON; ROBERT R. CARTER; SAMUEL P. GRIFFIN; E. C. GENET; D. PHOENIX; U. M. GAMBLE; E. T. CARMICHAEL; THOMAS I. MILLER; ROBERT C. DUVALL; WM. P. TOLER; JOHN F. TILLOTSON.
Captain's Clerk, WM. GAMBLE.
Purser's Clerk, H. HOUCH.
Boatswain, GEO. WILMOUTH.
Gunner, JOSEPH M. COOPER.
Carpenter, F. CECIL.
Sailmaker, WM. RYAN.
The Savannah is a new frigate, mounting 62 guns; among which are four 68 pounders—Paixhan guns. She is on her first cruise, and is said to be a very strong, staunch vessel, and a good sailer. Her appearance on the water is remarkably fine.—[Polynesian.

Under the authority of Mr. Dudoit, French Consul, 1200 bbls. of whale oil were sold last Monday, for the benefit of the owners of the Fr. whaleship Ocean, Nantes. 500 bbls. brought 22 cts. per gallon, and 700 bbls. 22 1-4 cts. The vessel has been condemned.

Capt. Dominis, from N. W., reports that the Danish W. S. Neptune, Capt. Sodering, had been on shore, but had been got off by the assistance of the Russians.

There is a current report among whalemen that the Am. W. S. Wm. Hamilton went ashore in the fog on the N. W. Coast.

Ship Maine, Fairhaven, 1600 w., and 400 sp., put in to Norfolk Sound in Aug. in consequence of scurvy.

DIED.

At Lahaina, Sept. 13, JOHN A. BISBET, steward Am. W. S. Kutusoff, aged 43. He belonged to Providence, R. I.

On board Am W S Oregon, January 23, 1844 RHEUBEN S. HOWLAND, Dartmouth, aged 23 years; he was the cooper.

On board the same ship Sept. 26, 1844, THOS. W. MALVILL, belonging to Boston, Mass. His remains were brought to Lahaina, and interred on shore, Sept. 28th.

Drowned, July 15, 1844, Mr. TIMOTHY ADDINGTON, of Edgartown, Mass., aged 22. He was 4th officer on board W. S. Splendid, Edgartown.

Aug. 13, CHAS. P. COOPER, seaman, on board the same ship, was drowned. He belonged to New York state. At the same time, Mr. James Brice, chief mate, was much injured. He is now under the care of Dr. Wood, in Honolulu.

On board Am. W. S. Canada, JOHN THOMPSON, cabin boy, Jan. 6, 1844. He was a native of St. Helena.

In the boat, pulling for whales, EDWARD RICE, seaman, belonging on board the Am. W S. Maine. He belonged to Jersey City, New Jersey.

On board Am. W. S Canton, at sea, Sept. 4, Capt. DAVID N. RIPLEY, of Edgartown. On board the same ship, the same day, WM. COLE, Brooklyn, New York. Both were taken away by the same disease—constipation of the bowels.

DONATIONS.

For chaplaincy.—The seamen's chaplain takes pleasure in acknowledging the valuable donation of $95 from U. S. S. Savannah, by R. B. Hitchcock, 1st lieut., in behalf of the ship's company. Also, $5 from ——, by captain's clerk. Total— $100 00

For temperance.—From Capt. Ludlow, Am. W. S. Com. Preble— $2 00
Capt. Bennett, Am. W. S. Henry Lee— $5 00

For temperance—(printing the Friend)—from Capt Tobey, W S Edward Carey, (sovereign) $4 50
From Mr John B Dagget, 1st officer of W S Oregon— $3 00

For Bibles.—From a German sailor, for an English Bible— 50 c.

Life membership of Am. S. Friend Society.—Lieut. R. S. Trapier, U. S. navy, has constituted himself life-member Am. Sea. F. Society, by donation of $20 00
Mr. Wm. F. De Jongh, U. S. navy, do. do. $20 00

44 ships in port, containing—

Sperm oil,	17,310 bbls.,	at $20 per bbl.;	$346,200
Whale oil,	51,270 bbls.,	at $8 per bbl.;	410,160
Whalebone,	477,700 lbs.,	at 20 c. per lb.;	95,540
			$851,900

All American property, at home prices, by last dates, would amount to 1,200,100 dollars, now afloat in this port. M. CALKIN.

FOR SALE.—At the study of the seamen's chaplain, vol. I., Temp. Ad. & Seamen's Friend. Price $1 25, bound.

N. B.—The Seamen's Chaplain has for sale and gratuitous distribution, Bibles and Testaments, in the English, French, Swedish, Portuguese, Spanish and Danish languages.

The Friend of Temperance and Seamen, published monthly, 8 pages, by SAMUEL C. DAMON, Seamen's Chaplain.

TERMS.—$1 50, per annum, One Copy, payable in advance; $3 00, Three Copies; $4 00, Five Copies; $6 00, Ten Copies. Single No. 12 1-2 Cents.

THE FRIEND. (Extra.)

HONOLULU, OAHU, SANDWICH ISLANDS, DEC 18. 1844.

For the Friend.

NOTES

On the Shipping, Trade, Agriculture, Climate, Diseases, Religious Institutions, Civil and Social Condition, Mercantile and Financial Policy of the Sandwich or Hawaiian Islands, viewed in relation to other groups of islands, and to the natural and acquired advantages of the Sandwich or Hawaiian Islands. By

ROBERT CRICHTON WYLLIE, Esquire.

(*Concluded from No. XII., page* 116.)

92. PRESENTS TO THE MISSIONARIES.—There are those who affect to believe that the Missionaries receive much in presents from the natives, in the profit arising from their lands and flocks. To such, it may be answered, that the minutes before me abundantly prove that beyond small presents *in token of personal regard*, every Missionary has to account minutely for all these gifts, benefactions and profits, not as benefits accruing to him personally, but as charges against his own annual allowance, in strict accordance with the following resolution of the Missionaries themselves.

"Resolved, That whatever amount of property, or whatever advantages for worldly gain may be placed at our disposal, we shall not feel at liberty to accumulate wealth for ourselves, but shall strictly adhere to the sentiment that those who accumulate wealth for themselves, and do not honor the Lord with their substance, live in violation of the commands of Christ, expose their own souls to death, and deprive the dying heathen of the bread of life."

There is no instance that the Missionaries have ever in any one case, deviated from that Evangelical regulation, or that they have ever applied to the King, chiefs or people, for any thing but help to build churches meeting and school houses, and for pastors and teachers to enable them to preach and diffuse the blessings of the gospel, and of a christian education

It can hardly be called an exception, to confess that in consideration of all these advantages, freely bestowed on their part, they did resolve "that the Government should free them from all taxation," when coupled with the following resolution,—"notwithstanding that should the Government persist after a full explanation of our views upon this subject, to lay taxes on this Mission, rather than offend or rebel against the rulers, we will, like Christ, pay the taxes imposed upon us, while we remain in the land."

With this resolution the Missionaries have continued most quietly to comply, while I must not omit here to state that all lands held by them, whether by gift or lease, are considered to be the property of the Mission and not of individuals, and so in like manner with the avails of herds, hire of oxen, &c, while to increase these beyond a limited number is particularly forbidden.

93. But there are others, who unable to deny all this, go round on the opposite tack, and blame the Missionaries *for a too great spirituality in the abstraction of themselves and of the natives from all worldly pursuits and improvements.*

Here also the tongue of detraction will be found at war with the facts as they stand recorded in the minutes

On the 31st of July 1835, the Missionaries opened an establishment at Wailuku, on the north side of Maui, for the education of native girls, and their training in spinning, knitting and weaving. Washing, braiding, ironing, sewing, feeding the silk worms, &c., were afterwards attempted. In 1836, the 2d class of six, had manufactured 160 yards of cloth; two pieces of more than 20 yards each had been made under Miss Brown's inspection, in families, and another piece was ready for the loom. In 1838, the number that had been instructed under Miss Brown, was 24, all of whom had acquired a tolerable knowledge of spinning and knitting, and 5 were tolerable weavers, and in March a new class of 20 was admitted. In 1839, the pupils had increased to 52, who had made considerable improvement in their studies, and also in the arts above mentioned. Of the pupils, 18 were members of the church.

From the commencement, about 600 yards of cloth had been made, and every thing was going on most prosperously, when to the great misfortune of the establishment, on account of ill health, it became necessary to remove Miss Brown to Kaluaaha.

Miss Ogden was appointed to assist in the female seminary at Wailuku, and her labors have been directed with success to the training of the pupils to habits of order, industry and cleanliness; also to the improvement of their minds in knowledge, by which they have been elevated in character, and many of them fitted for stations of usefulness.

94. AT WAIALUA, on the N. W. side of Oahu, the Missionaries established a school, wherein natural theology, civil and sacred geography, mental and written arithmetic were taught, in combination with the improvement of the natives in manual labor, habits of industry, regularity, economy and cleanliness. The Government favored the institution by a valuable grant of land. About 5 hours daily, were devoted to labor. In 1842 and 1843, the avails of that labor supported the school, and there was every prospect of its succes, till the death of its teacher, Mr. Locke, since which it has been discontinued.

95. AT WAIOLI, on Kauai, Mr. Johnson has a select school, with about 60 boys receiving education in combination with exercises in manual labor.

96. AT KAILUA, Island of Hawaii, Governor Adams in 1839, seeing these successful operations, attempted to introduce manufactures amongst the natives in that district. Several females had become proficients in spinning, 4 young men had become good weavers, and 12 pieces, 400 yards of plain and twilled cotton had been manufactured.

97. At the Mission Seminary, endeavors were made to establish a class to instruct the natives in the principles of correct living and of medical science, and Dr Judd was requested to deliver an annual course of lectures on anatomy and other branches of the medical profession.

98. At the last general meeting or council, I find that the Missionaries concurred in the following resolution, "that we deem it important that Government be urged to establish and support a National Institution, whose main object it shall be to teach agriculture in connection with the sciences."

99. It has also been charged against the American Missionaries here, *that they have insidiously wormed themselves into the confidence of the King and chiefs, in order to exercise an influence favorable only to themselves and to the U. States.*

Here also, I find only bold and unscrupulous assertion, without even a shadow of truth.

What is the character of this supposed pernicious and selfish intervention that these Missionaries have attempted to exercise! Let the impartial world judge from the following resolutions recorded at page 24 and 28 of the minutes for so far back as 1838.

"1st. Resolved, That though the system of government in the Sandwich Islands has, since the commencement of the reign of Rihoriho, been greatly improved through the influence of Christianity and the introduction of written and printed laws, and the salutary agency of Christian chiefs has proved a great blessing to the people, still, the system is so very imperfect for the management of the affairs of a civilized and virtuous nation, as to render it of great importance, that correct views of the rights and duties of rulers and subjects and of the principles of jurisprudence and political economy, should be held up before the king and the members of the national council.

2nd. Resolved, That it is the duty of Missionaries to teach the doctrine that rulers should be just, ruling in the fear of God, seeking the best good of their nation, demanding no more of subjects as such, than the various ends of the goverment may justly require; and if church members among them violate the commands of God, they should be admonished with the same faithfulness and tenderness as their dependants.

3rd. Resolved, That rulers in power are so by the providence of God, and in an important sense by the will or consent of the people, and ought not to resign or shrink from the cares and responsibilities of their offices therefore teachers of religion ought carefully to guard the subjects against contempt for the authority of their rulers, or any evasion or resistance of government orders, unless they plainly set at defiance the commands of God.

4th. Resolved, That the resources of the nation are at its own disposal for its defence, improvement and perfection. and subjects ought to be taught to feel that a portion of their time and services, their property and earnings may rightfully be required by the sovereign or national council, for the support of government, in all its branches and departments, and that it is a Christian duty to render honor, obedience, fear, custom and tribute to whom they are due, as taught in the 13th of Romans, and that the sin of disloyalty which tends to confusion, anarchy and ruin, deserves reproof as really and as promptly as that of injustice on the part of rulers or any other violation of the commands of God.

5th, Resolved, That while rulers should be allowed to do what they will with their own, or with what they have a right to demand, we ought to encourage the security of the right of subjects also to do what they will with their own, provided they render to Cesar his due.

6th. Resolved, That rulers ought to be prompted to direct their efforts to the promotion of general *intelligence* and *virtue* as a grand means of removing the existing evils of the system, gradually defining and limiting by equitable laws the rights and duties of all classes, that thus by improving rather than revolutionizing the government, its administration may become more abundantly salutary, and the hereditary rulers receive no detriment but corresponding advantage.

7th. Resolved, That to remove the improvidence and imbecility of the people, and promote the industry, wealth and happiness of the nation, it is the duty of the mission to urge mainly the motives to loyalty, patriotism, social kindness and general benevolence; but while on the one hand he should not condemn their artificial wants, ancient or modern, because they depend on fancy, or a taste not refined; he should on the other endeavor to encourage and multiply such as will enlist their energies, call forth ingenuity, enterprise and patient industry, and give scope for enlarged plans of profitable exertion, which, if well directed, would clothe the population in beautiful cottons, fine linen and silk, and their arable fields with rich and various productions suited to the climate; would adorn the land with numerous comfortable, substantial habitations, made pleasant by elegant furniture, cabinets and libraries; with permanent and well endowed school houses and seminaries; large, commodious and durable churches, and their seas and harbors with ships owned by natives, sufficient to export to other countries annually the surplus products of their soil, which may at no very distant period amount to millions.*

Resolved, That we we deem it proper for members of this mission, to devote a portion of their time to instructing the natives into the best method of cultivating their lands, and of raising flocks and herds, and of turning the various products of the country to the best advantage, for the maintenance of their families, the support of government and of schools, and the institutions of the gospel, and its ministers, at home and abroad."

Is there any thing selfish or exclusively *American* in these resolutions—any thing anti monarchial, anti social or anti commercial—any thing opposed to the freedom and beneficence of the gospel, or that a good christian, philanthropist or political economist could condemn, as applied to a people in the circumstances in which the Hawaiians then were and still are?

Verily, in my opinion, these resolutions ought to be printed in letters of gold and hung up in the *house of Nobles* as a beacon to guide their legislation for the welfare of the natives and of all the inhabitants of these Islands.

100. The appointment of the *Rev. Mr. William Richards*, in 1838, for the purpose of acting as a teacher to the chiefs, has also been put forward as a proof that the Missionaries wished to control the Government for their own ends.

---

* Suppose 100,000 acres in the Sandwich Islands, or 25,000 on each of the four principal Islands, would, if well cultivated to cane, produce 3,000 lbs. a year per acre, this porduct alone at 5 cents per lb. would be $15,000,000.

ALBROOK LIBRARY PACIFIC SCHOOL OF RELIGION

Nothing is easier than to make that assertion, but it is one which would only be made by those who arrogate to themselves a credibility beyond the fact and beyond the question of mankind.

That the appointment of Mr. Richards had no other object than the benefit of the chiefs and people, through the enlightenment of a christian education, will be best seen by the following extracts respecting it, found at page 28 and 29 of the minutes for 1838.

"Resolved, That whereas a letter has been received from the King and Chiefs of the Sandwich Islands, requesting Mr. Richards to become their teacher, we approve the choice made by the King and Chiefs, and leave it entirely with Mr. Richards to accept or reject the appointment, as may seem to him to be duty.

Resolved, That in case Mr. Richards accepts the above appointment, Mr. Tinker be requested to supply his place, and act as Seamen's Preacher."

"Mr. Richards reported the result of an interview with the chiefs on the subject of a teacher, in which they confirmed their choice of him to act towards them in that capacity; and he signified his acceptance of their choice, to act for one year, with the express understanding that he be at liberty to decline acting on public occasions, and going to Oahu to act as interpreter in national affairs, except as any other missionary might be called upon to act in the case."

101. The appointment by the Mission, at the request of the chiefs, of Mr. and Mrs. Cook, to educate and rear up the young chiefs, has also been represented as a measure having no higher object than the selfish policy of *priestcraft*. If after the notice I have taken of their school in my note 37, published in the Friend of 1st August, any thing further be wanted in proof of the excellent objects which they had in view, and of the admirable manner in which they pursue those objects, let sceptics visit their institution.

To give the last blow to old Pagan superstitions, place Christianity on a footing of permanent predominence, and give a powerful impulse to general knowledge, improvement and civilization, the Missionaries could not have devised a more effectual remedy than the education and moral training of the present and future rulers of the natives.

102. Another appointment has been matter of great, and I fear, wilful misrepresenration; I mean that of *Dr. Gerrit P. Judd*. This gentleman was originally attached to the Missionary body in a professional capacity. From the minutes it appears that he took a very active interest in the management of all their concerns, and regularly attended as a member of the general councils, till that of 1843. In 1842, the Dr. was prevailed upon to accept an appointment under the government, and give up his connection with the Mission. It is therefore not true that the Missionaries put him forward as an agent, of their own, to help *Mr. Richards* in domineering over the King and people, for the benefit of the Missionaries themselves, and of the American residents. It was natural to expect that the chiefs, as their education advanced under the care of Mr. Richards, would see the necessity of improving their administration, especially in what concerned foreign residents, and that they would seek for some one who could interpret for them and preserve a record of their transactions and decisions. Dr. Judd had frequently before made himself useful as a voluntary assistant; they knew him to be well acquainted with the native language and character, and to be diligent in business, his reputation was high with those who knew him best, and it was very natural that their choice should fall upon him.

I find the following resolution of the Missionaries respecting his resignation, at page 32 of the minutes of 1842.

"That as Dr Judd has resigned his connection with the Mission, we therefore express to him our high estimation of his past services, and affectionately request him to cooperate with us in furthering all the grand objects of the Mission, so far as he can consistently with his new engagements."

That resolution goes far to prove that the King made a judicious selection at the time; in his new functions the Dr. seems to have given great satisfaction, for during the British commission the King appointed him to represent his person at the board, and has subsequently elevated him to the high and confidential office of his Secretary of State for Foreign Affairs.

There therefore never was any thing in the appointment of Dr. Judd nor can I learn that there ever was any thing in his conduct that could justify the report that he was the mere tool of the Missionaries, put forward for his notorious anti English feeling, *to keep down* British interests.

In the whole minutes of the Missionaries before me, namely, those for the last eight years, there is not one sentence that breathes a want of charity, or an antipatay to any part of the family of Adam; to suppose that the Missionaries cherished an anti British feeling, is to calumniate them greatly; and I think I may say the same of Dr. Judd himself, for unless I have been greatly misled, he it was whose advice, under the demands made upon the King previous to the provisional cession, decided His Majesty to throw himself and his sovereignty upon the justice and generosity of the Queen of Great Britain.

The view of Dr. Judd, I believe, was supported by some of the leading American Missionaries, and as it is well known that a very numerous party wished the King to declare himself under the joint protection of America and France, it is not to be believed that either the Missionaries or Dr. Judd entertained the hostility to England of which they have been accused.

The result has proved that Dr. Judd on that great occasion, gave sound advice to the King, founded on a just appreciation of the policy of the British Government.

Under a justifiable fear for the safety of the Protestant faith planted in these Islands, it was natural for the Missionaries to prefer a *Protestant* to a *Catholic* domination.

103. Having thus replied to the most serious charges that have been preferred against the Missionaries, I cannot conclude without a few remarks upon the success of their spiritual labors.

This will be best shewn by the following abstract of native Protestants which I have carefully prepared from the minutes of the last eight years.

ABSTRACT OF NATIVE PROTESTANTS, BELONGING TO THE CHURCHES PLANTED BY THE AMERICAN MISSIONARIES.

Years.	Total number from the beginning, admitted to church on examination	Total number of these from the beginning, deceased.	Total number of deaths during last year.	Total number of children from the beginning baptised.	Total number of baptisms during the last year	Total number of church members, or communicts. in regular standing.	Total marriages during the last year	Average congregation on the sabbath.
1837	1,259					1,049	1,082	
1838	2,825		33	721	239	3,341	1,259	7,700
1839	16,587	181			2,622	15,915	1,143	21,450

The difference between the total number of admissions, and that of regular church members is because of those admitted, some are suspended, some excommunicated, and some die, all of whom are deducted from the number registered as of regular standing in the churches.

The following Table of schools for the last four years is also worthy of attention, although it will be seen by the notes that it is not perfect.

ABSTRACT OF NATIVE SCHOOLS ESTABLISHED BY THE AMERICAN MISSIONARIES.

	Schools.	Teachers.	Scholars.	Readers.	Writers.	Arithmetic.	Geography.
1841	357	505	18,034	5,514	961	3,546	789
1842	305	438	15,228	5,526	2,254	5,448	1,489
1843	202	2	8,827	3,926	1,339	3,560	1,195
1844	346	294	12,678	6,569	2,290	6,014	1,936

No return from Kailua, Kealakekua, Kau, and other Schools. Many returns appear wanting from Maui, Oahu, and Kauai.

According to the last report, there was in Hawaii, 165 schools; in Maui, 81; in Oahu, 62; and in Kaui, 38.

At the Missionary Seminary at Lahainaluna, and at Hilo, natives are educated with a view to act as teachers, and at Wailuka, in March last, 100 teachers met in convention to discuss matters connected with school interests and memorialize the Government. The want of a proper provision for native teachers, greatly retards the progress of education.

From the above table it is clear that neither the spiritual nor secular instruction of the natives has been neglected by the Missionaries. The proportion of natives that they have brought within the pale of christianity, induced to attend church, and instructed in a knowledge of reading, writing and arithmetic, is stupendous, when compared with the ignorance in which they found them, and the apathy and prejudices which they had to overcome.

May I ask in what part of the world can Protestantism point to so proud and complete a triumph?

104 But the Missionaries have not only conferred upon the natives a knowledge of letters, but provided them with useful books on which to exercise that knowledge, with profit to themselves. It would greatly exceed my limits to enumerate all the useful works that have emanated from their well conducted and constantly employed printing department, but I will quote a few to show the general scope of their pious endeavors. The holy scriptures in the old and new testaments, have been translated into the native tongue and extensively distributed. Hymns with and without notes, and a scripture catechism have been prepared.

And amongst the works to be found in the Hawaiian tongue, are the following; Worcester's Sacred Geography, Universal Geography, Geographical Questions, Scripture Chronology and History, Annals of the Earth, with a chart, History of Beasts, Hawaiian History, Church History, Mathematics, embracing Geometry, Trigonometry, Mensuration, Surveying and Navigation; Colburn's Algebra, Anatomy, Wayland's Moral Philosophy, Colburn's Intellectual Arithmetic, Tract on Astronomy, Maps of Universal Geography, Maps of Sacred Geography, Keith's Study of the Globes, Linear Drawing, Tract on Marriage, do on the Sabbath, do on Lying, do on Intemperance, do on Popery, Galaudet's Natural Theology, Sandwich Island Laws, Several books Sermons, Daily Food, with notes, Hawaiian Almanac, to which may be added the fol-

lowing Newspapers published in native, on subjects connected with the temporal and spiritual condition of the natives,—*Nonanona, Lama Hawaii, Kuma Hawaii, Kuma Kumalii*

Besides these, the Missionaries have prepared a great many elementary books for children, an English and Hawaiian Grammar, and a Vocabulary.

105. Nor in their efforts to benefit the natives have the Missionaries neglected their own improvement on those points on which the natives most require instruction. With the members of the association before referred to, it has been customary to allot essays, upon important subjects, to be proposed by those supposed to be best qualified to write on those subjects, and to read and discuss them at their meetings. These essays being intended for self improvement, are not published. The following are a few of those that have been prepared.

Practical evils in the Sandwich Island churches.

What are the grand obstacles to the success of the gospel in these Islands?

What traits of character are most important in a Missionary to the heathen?

On Infanticide in the Sandwich Islands.

Colonization and Abolition compared.

Causes of decrease in native population.

Remedy for the evils of an unruly tongue.

Essays on the ancient government, religion, manners and customs, arts and medical practice of the natives.

Domestic Economy.

Best method of dealing with offending members in christian churches.

How to remedy the peculiar evils that threaten the Hawaiian people.

Influence of Slavery on piety.

Marriage of believers with unbelievers.

Abridgement of Keith on the Prophecies, *in native.*

Evidence of Christianity, *native.*

Maternal Duties, do.

Are married Missionaries the more useful?

Influence of heathenish habits on the character of Hawaiian christians.

How should the popular feelings of a particular community modify the practice of christians in regard to social intercourse—for example, may a christian attend balls in Paris, who would not in boston?

106. SMALL POX.—The diseases to which the natives are subject, and the best means of their prevention and cure have not escaped the care of the Missionaries. Eight very sensible resolutions upon these subjects, are found in the minutes of 1839. During that year, they resolved "to forestall the ravages of the *Small Pox*, by encouraging vaccination throughout the Islands.."

107. *Vacination* is a matter of the highest public importance, worthy of the philanthropy of the Missionaries and of the immediate attention of Government. Small Pox is a disease peculiarly fatal to the Indian race in all countries, and if introduced here, there is no saying how fearfully it would reduce the population in a few months. Latterly the epidemic has been prevailing in San Blas, Mazatlan, and other parts of the coast of Mexico, and as the present quarantine laws are nearly impracticable in these Islands, it is the duty of the Government to place their subjects as soon as possible in a position not to fear the contagion of a disease so much to be dreaded.

An office for *vaccination* ought to be opened, with the least possible delay in all the sea ports of the Islands, and at all the Missionary stations, and some means should be devised to oblige the natives to have themselves and their children vaccinated. Perhaps a small fine on all parents who cannot produce a certificate of vaccination, would answer the purpose.

108. In 1836, the Missionaries out of their own funds, appropriated $2800 for school houses, and $1500 for teachers. In 1837, their grants for schools were $1930, and for teachers $1165, with $100 more for a school house at Kapaa, on Kauai, and $20 for a teacher. But as the support of churches, schools, and teachers, on a scale embracing the whole Islands, was altogether beyond their own very limited means, during the same year they resolved,—"That no civil enactments should be requested to secure a support for the Missionary, except for the purposes of protection, but that the King and Chiefs, head men and *Hakuainas* be encouraged to aid in constructing public buildings, and sustaining charitable or evangelical institutions or schools among the people, both by grants and donations from their own property, by direct labors or appropriations from what they would have a right to demand for private and public use, were no such objects before them, and by affording facilities and encouragements to the people to build schools, pay their teachers and contribute something, annually at least for the support of their pastor."

In 1838, they passed the following resolution—"That chiefs, headmen, parents and others be encouraged to contribute the means of supporting their teachers, directly independently of the funds of the Mission." It was also resolved that the natives should be encouraged to contribute to the purchase of the medicines required by them. During the same year, they passed a resolution, to attempt to supply the funds wanting by the diminution of their own personal expenses, so as to be able to relieve the wants of the board in the support of the various public departments of their beneficent system. It appears that in the same year, they had an interview with the *King*, *Kinau*, *Auhea*, *Hoapili* and other chiefs, to induce them to exert their power in assisting to "build up the Redeemer's kingdom," but without much success beyond professions of willingness to contribute if they had the means.

109. The christian world will be curious to know what success attended these Missionary appeals, aided by the influence of the King and Chiefs. It will be seen by the examination of the subjoined table.

It does not appear from the Minutes, that any contributions were made during 1838.

Excluding 1838, during which no contributions appear to have been made, the aggregate contributions of seven years amount only to $19,987. It is to be remarked that I have omitted *cents*, and that in some instances although the value is put down in dollars, it was a mere estimate of value received in labor, goods or produce, while in others, besides the value actually contributed in cash, contributions were made in labor, materials, kapa, (native cloth) produce, &c. of the value of which in cash, no computation was made.

* The above $212 was only the amount of ordinary contributions made at Kealakekua, during the year. Besides these there was completed a stone church which cost about $5000, and three grass meeting houses, which cost $100.

Before dismissing the subject of contributions, I ought also to state that the large native stone church of Honolulu, since the first stone was laid, on the 18th September 1838, up to 1843, had cost about $30,000, all of which had been paid except $120.

Upon the whole it may be stated that the natives have made a fair beginning in contributing towards the expenses of their own religious instruction; but hitherto, it has only been a beginning, and much greater and more systematic efforts are wanting before the Missionaries can exist on these Islands without the benefactions of their fellow citizens in the U. S.

110. By the minutes of the last general meeting, which raised its sittings on the 15th June, it appears that the support "of *Pastors by the people*," formed the subject of four resolutions, ending in a recommendation "that the Pastor together with such two members of the mission, and perhaps such influential native christians as he may call to his aid, be a committee to present the subject before the people, and in concert with them to devise such practical and efficient measures as will secure the object."

The interest of many intelligent natives has been awakened to this subject, and I hope some plan may be digested, and submitted to the legislature at its first session. If the burden can be imposed in such a way as with its imposition to bring increased means of bearing it, in place of being grievous, it will be a blessing to the community. I persist in thinking that the plan of fixing pastors in parishes allotted to their charge, on endowments of land as suggested in my 27 and 28 notes published in the Friend of 1st July, would eventually carry with it that great advantage, through the introduction of an improved agriculture generally. If the government chose to confer upon the parochial clergy, *thus nationalized*, powers of justices of the peace, or registrars of sales, leases, lands, payments of rents taxes, &c. with the obligation of rendering annual reports to the home minister they would become the immediate protectors of the humble classes of natives, the defenders of their rights, and the correctors of many abuses that still prevail in spite of laws forbidding them. Until the natives can look upon their patches of land as secure against violence, oppression, and extortion of any kind, they will consider their possession rather as a burden than an advantage, a state of things which must be brought to an end, before a race of Hawaiian farmers can be created. To create such a race, I hold to be the first *worldly* interest of the King and his government.

111. Upon the present state of religion in the Islands I find the following in the minutes of the general meeting held during part of May and June last.

"The changes which have occurred in the political affairs of the nation, during the past year, have seriously affected the state of religion at nearly all the stations. Some of the churches have suffered more than others, especially those which are nearest the centre of operations. Those more remote have suffered in consequence of the defection of members, the removal of many to the metropolis, and a spirit of worldliness which has pervaded the churches generally.

There have been no seasons of special interest in the churches. There have however been indications of the influences of the spirit at some of the stations.

As a general thing, no advance has been made by the Catholics the past year, in respect to numbers. Waimea, Kohola, Kealakekua on Hawaii, and Koloa on Kauai, are the only stations where the Papists are reported as having been particularly active, and as making any advances."

It will not create surprise that the political changes of 1843 should have affected generally the religious feelings and practices of the natives. Political movements strongly agitating the public mind, whether arising from internal convulsions, or invasion from without, affect religion, to a great extent, in all nations. It was so in France during the revolution; it is so now in Spain and Portugal; it is so in Tahiti, and it could not fail to be so here, although in a less degree, from the absence of all violence and blood-shed, in the great changes to which the Missionaries refer.

112. BRITISH COMMISSION.—Th cession of these Islands by His Majesty Kamehameha III, and the Premier Kekauluohi, on the 25th February 1843, to the *Right Hon. Lord George Paulet*, on the part of Her Britannic Majesty, Victoria, Queen of Great Britain and Ireland,—the restoration of the Islands to their native sovereign, on the 31st of July, 1843, by *Rear Admiral Thomas*, and the declaration of Great Britain and France, dated 28th Nov. 1843, acknowledging these Islands as an *independent state*, and mutually engaging never to take possession, neither directly or under the title of protectorate, or under any other form of any part of the territory of which they are composed, are three events all happening within the space of 276 days, which will form in all time coming, three of the most remarkable and important epochs in the history of these Islands.

Considering the nature and character of the charges against the government, which led to the cession of the Islands, it was but natural that a certain degree of odium should attach to the chief actor, the Right Honorable Lord George Paulet, at the time, and for some months afterwards. This to the honor of the government and people, appears to have almost wholly subsided. A proper distinction is now drawn between the acts of an executive officer, and the representations which are supposed to have influenced those acts.

During the 156 days that he formed part of the government of these Islands, I have never heard that any one preferred a charge against his Lordship of partiality, peculation, or extortion; on the contrary, I have heard many speak in terms laudatory of his obvious anxiety to act impartially and justly upon all occasions.

Up to the 11th may, Mr. Judd represented the person of the King at the board, sometimes assenting and sometimes dissenting from the measures of the commissioners. On that day, he withdrew under the *protests* which were published in the Friend of 31st July, 1843.

The chief points on which Mr. Judd appears to have disagreed with the commissioners were those affecting the cases of *Dockam of the British whale ship* "*James Stewart*," of *Greenway's estate*, and the *circular to governor's* of the 27th April 1843, forbidding them, thereafter to imprison any male or female for the crime of fornication, unless committed in the open streets or public thoroughfares, contrary to an existing law of the Islands, and the issue of licenses to auctioners in Honolulu, contrary to the law of the King and chiefs enacted at Lahaina, on the 8th April 1843, which allowed only two licensed auctioneers for Honolulu, under a tax of $500 each, per annum.

Mr. Judd seems to have taken up the ground that such acts of the commissioners were contrary to the 3d article of the provisional cession, which was as follows:—"that the laws at present existing or which may be made at the ensuing council of the King and chiefs, (after being communicated to the commission) should be in full force so far as natives are concerned, and shall form the basis of the administration of justice by the commission, in matters between foreigners resident on these Islands."

I will not enter upon an examination of the question whether Mr. Judd was right or wrong, but in justice to a *noble* countryman, perhaps never to be seen again on these Islands, I will offer some remarks upon the circular interfering with the existing law against fornication.

That circular was published in the Friend of 31st July 1843, and was as follows:-

Office of the British Commission for the Government of the Sand. Islands, April 27, 1843.

SIR,—In consequence of its having reached the ears of the British Commissioners, from undoubted authority that women confined in the Fort for fornication have been let out, at night in the streets, and on board whale ships in harbor, for the purpose of raising the amounts of their fines by farther fornication, I am directed to inform you that by order of the Commissioners no male or female is to be imprisoned for the above crime unless committed in the open streets or public thoroughfares; but all cases of rape and adultery are to be punished as hitherto when complained of by the parties concerned.

I am, Sir, Your Obt. Servant,
H. SEA, *Secretary.*
KANOA, Acting Governor, Honolulu.

If the existing law was so abused, as represented in the above circular, I apprehend no objection can be raised to the alteration ordered on the score of morality. Nothing could exceed the immorality and wickedness of making the penalty of the law against fornication subservient to the obtaining of women to commit the very crime with a profit to those who imprisoned them. But I have not been able to ascertain that the abuses complained of, had any systematic existence at the Fort, either tolerated or made a profit of by the government authorities. On the other hand, all the respectable residents with whom I have talked upon the subject, concur in stating that the effects of the relaxation of the law were in truth most pernicious to public morals, and continued to be so till after the 31st of July, when the law recovered its former force.

That Lord George Paulet conscientiously believed in the abuses as stated in the circular, I have not the least doubt, and it is by the sincerity of that belief and not by the effects of the remedial measures that he adopted, that we are to judge of his Lordship's *moral intention*. Because open and shameless prostitution followed the knowledge of his circular, it is not to be inferred that his Lordship foresaw or intended that result. The *Bishop of Exeter* himself might have fallen into the same mistake, for in his speech in the House of Lords on the 15th of June last, on the second reading of a bill for the suppression of *brothels*, he remarked "that he did not consider prostitution as a matter for legislative punishment. The punishment of prostitution he held to be a thing impossible; and why was it impossible? He had no notion that the wisdom of man could devise a punishment that should inflict so much of suffering and of degradation as prostitution itself. He held prostitution itself to be a punishment, an awful punishment which the God of mercy had devised in order to terrify innocent females from falling into those tremendous evils which he had appointed as the punishment of the violation of chastity. To attempt to punish prostitution, would, in his mind, be as wild a scheme as if the guilty city of the plague had issued a law against the violent storm of brimstone and hail that destroyed it, or as if the Israelites in the wilderness had prepared to pass a law against the destroying angel."

From these sentiments, it is evident that if the *Right Rev. Prelate* had been one of the British Commissioners of the Sandwich Islands, he would have fallen into the same mistake with Lord George Paulet, and both from the same cause, viz—*ignorance of the peculiar habits and ideas of a people with whom prostitution may bring disease, but scarcely any other suffering or degradation.*

One other remark, I will venture to make upon the administration of *Lord George* It has been said that he was lavish in the expenditure of the public money. In considering this charge, it is necessary to bear in mind that the then recent acts of the naval forces of a great Catholic power, were understood as emanating from the orders of their government, and likely to be followed up by others, extending perhaps to these Islands, and uprooting the Christian faith as it had been planted here by Protestant Missionaries. It could not be expected that Lord George could certainly know whether these acts of aggression were authorized or not authorized by that great Catholic power and he may have thought it necessary as holder of these Islands ceded to him, by Kamehameha III, for the Queen of Great Britan, not to invite aggression by weakness, but place himself in a position to ward off any interference with his duty to and the trust he held for both sovereigns. If he took that view of his position, the expenses of raising a small military force in the Islands, are not so reprehensible as to some they may appear.

113. In connection with the above subject, those who interest themselves in the history of the Sandwich Islands, will be curious to know what military organization the Right Honorable Lord George Paulet and his colleagues of the Commission thought necessary under the circumstances before mentioned. In talking upon this and other subjects relating to the Islands, on the 21st August last, his Lordship handed me the following memorandum.

MEMORANDUM OF MONEY REQUIRED FOR THE ARMY, POLICE CORP, &c. AT HONOLUU, FOR ONE YEAR.

Police Corp	107	50	1290	00	23	5	10	279	10	0
Sum Total	728	50	8742	00	157	16	10	1894	22	0

The whole amount for the year is - - - - - - - - - - $8,742,00 or £1,894,2,0.

The above amount of $8742, or £1894,2,0 was certainly large compared with the previous expenditure of the King's Government, for similar purposes, but it was very small, compared with the numerical force calculated upon, and the contingencies to be guarded against until the government of Great Britain had decided what should be the future destiny of these Islands.

114 That decision was anticipated by Rear Admiral Thomas, and the King was restored to his rights on the 31st July, in a way the most proper that good feelings and good taste could suggest, for the preservation of the respect due to royalty, for the gratification of native loyalty, and the restoration of harmony amongst all the foreign residents. It would not be easy to exaggerate the esteem and respect which all parties still cherish and will long cherish for the memory of *Rear Admiral Thomas*. And it would be impossible to surpass the happy manner in which he combined the dignity of the Admiral, with the affability and kindness of the man and the goodness of the christian, in his walk and conversation during seven months residence in these Islands.

115. The ways of Providence are no less wonderful in the fate of nations than in that of individuals. It could scarcely have been foreseen that King Kamehameha III, driven to cede provisionally his sovereignty, under charges which he professed himself unable to meet, on the 25th February 1843, should be restored to his power on the 31st July succeeding, and that his dominions should be placed in the rank of Independent nations, under, amongst nations, an unusual engagement for the respecting of that independence, on the 28th November immediately following; and this too, at the instance of that very power to which the most serious complaints had been made against his government.

It is to be hoped that the future march of His government will not disappoint the favorable opinion of the governments of Great Britain and France, and that *peace, plenty, truth, justice, sound morality, and a pure religious faith will abide and prevail within his dominions.*

Honolulu, Dec. 10, 1844.

MY REV AND ESTEEMED FRIEND,

I at length conclude the *notes* which I commenced soon after my arrival in these Islands, in the company of Her B. Majesty's Consul General. They have been extended to a much greater length, and have embraced a much wider range of topics than I at first intended, from my unexpected detention on the Islands, and the many new subjects which that longer residence and a better acquaintance with the natives suggested to my mind, while the longer I stayed the more intense became my interest for the welfare of this singularly situated and peculiarly circumstanced people.

The *notes* are the fruits of leisure hours, in the evenings, snatched from my other occupations, and of much serious reflection on the moral and social condition of these people. They emanate from a sincere desire to better their condition, and beyond that, I have sought no reward whatever.

It is likely that I will soon withdraw myself entirely from Polynesia, but throughout life I will watch with interest, the progress of civilization and christianity, amongst a people whom I regard, so far as civilization is concerned, as essentially *neophytes* of the Protestant faith.

That they are so, is very clearly shewn, from the paper written by the Rev. Richard Armstrong, so far back as 1838, which I send you herewith. Mr. Armstrong sent it to me on the 25th ult, with liberty to extract from it if I chose, in illustration of what the Missionaries have done for the spiritual and temporal welfare of the natives. On carefully perusing its contents, I was forcibly struck with the coincidence between many of his views, in 1838, and many to which reflection had led me, in 1841. But I considered the paper too valuable as a whole, and too honorable to the Missionaries, for me to mutilate it. I offer it, with permission, to you *entire*, in the belief that as your space permits, you may be induced to give it to the public, as it came from the pen of the Rev. and talented writer.

I observe that you intend publishing separately, those Nos. of the Friend that contain my *notes*. I sincerely hope that you will at least find such a sale for them, as to reimburse you for the extra expense, for printing that they have occasioned, so as not to encroach upon those means, which compared with the wide field of your useful labors, are very small indeed.

Under feelings of the sincerest respect and esteem, I remain, Rev. Sir, and friend,

Yours faithfully,

ROBERT CRICHTON WYLLIE.

To the Rev. SAMUEL C. DAMON, *Seamen's Chaplain and Editor of the Friend.*

To His Majesty,

KAMEHAMEHA III,

KING of the Sandwich Islands.

SIRE—

I have the honor to dedicate to *your Majesty* the *Notes*, on these Islands, their population, religion, agriculture, and commerce, written by me, which have been printed in successive numbers of the *Friend*, beginning on the first of May last.

It is possible that I may have been misinformed on some matters of fact, and that I may have erred in many of my views. All men are liable to mistakes, and to be led away by their own theories or fancies; I may have been so misled, to a degree unknown to myself; if so, others will point out my errors, and truths useful to *your Majesty*, your dominions, and your people, may be elicted by their refutation.

One only credit I claim, and that is, for the sincerity of my desire to aid in promoting the prosperity of these Islands, and the happiness of their *native inhabitants.*

That it may please the ALMIGHTY to permit you long to reign over a religious, sober, virtuous, contented and happy people, is the earnest prayer of,

Sire,

Your Majesty's most

Obedient humble servant,

ROBERT CRICHTON WYLLIE.

Honolulu, Dec. 16, 1844.

THE FRIEND.

HONOLULU, DECEMBER 18, 1844.

This Extra number concludes Vol. II. During the past year 12 monthly nos. have appeared, together with 6 Extras. The actual cost of printing and paper has exceeded, a few dollars, the total amount of subscription-money and donations. The publisher hopes to realize sufficient from reserved copies to ballance the accounts.

A WORD TO SUBSCRIBERS.—We hope you settle all your bills as readily and promptly as those which have been presented to you by the publisher of the Friend. We have none of those complaints to make respecting delinquent subscribers, which so frequently are arrayed before the public by periodical publishers in other parts of the world. We hope that you have received the worth of your money in useful and entertaining reading. *Please give early information if you wish to be considered subscribers for the coming year.*

A WORD TO DONORS.—Your aid has been most timely, and if you have not received the value of your charities, others have, for more than 500 copies have been monthly distributed gratuitously, among seamen and landsmen.

Donations are respectfully solicited for the coming year.

No. I, Vol. III, will be issued on the first day of January, year of our Lord, 1845 The character of the Friend will remain the same, *devoted* to temperance, seamen, marine and general intelligence. The great aim of the publisher will be to make the paper useful among seamen, and if it shall at the same time, in any respect, meet the wants of the reading community on land, a double object will be attained. The thousands of seamen of various nations annually visiting the shores of this archipelago, claim, and shall have the first place in all our plans for doing good.

Such has been the favor which our monthly sheet has met with during the two years of its existence, that we now make public the plan, long since decided upon, viz. to publish the Friend semi-monthly, 8 pages, making a volumn at the end of the year of 192 pages.

TERMS.

One copy per annum,	$2,50
Two " "	4,00
Three " "	5,00
Five " "	7,00
Ten " "	10,00

Subscriptions and donations for the Friend received at the study of the Seamen's Chaplain, or by the following agents,—Mr. E. H. Boardman, Honolulu; Rev. L. Andrews, Seamen's Chaplain, Lahaina; Mr. Burnham, Koloa, Kanai, and the American Missionaries throughout the Islands.

Old subscribers and others are requested to make known as soon as convenient their wishes in regard to subscriptions for the coming year.

☞ Honolulu subscribers, unless they order otherwise, will be forwarded the same number of copies as during the past year.

FOR SALE.—On the 10th of January, at the study of the Seamen's Chaplain, and at Mr. Boardman's shop, bound volumns of the Friend.

Vol. II, neatly bound, $2,00

Also a few copies of Vol. I and II, (in one vol.) $3,00

Notes on the Commerce, Missions, &c. of the Sandwich Islands, bound in a pamphlet form. These notes by R. C. Wyllie, Esq. H. B. M's. pro Consul, were commenced in the May number of the Friend, and have been continued in seven succeeding numbers, and are now concluded in this Extra for December. They embody an invaluable amount of statistical information relating to these Islands.

Price—Single copy,	$1,00
Three "	2,00
Twelve "	7,00

OVER LAND MAIL.

Received by U. S. Brig Perry, which arrived December 10, letters and papers for July and August, with a New Orleans Bulletin, for Sept. 14, and New Orleans Picayune for Sept. 30.

The Perry conveyed the Hon. C. Cushing from China to Mexico, who is hastening to the U. S. to lay befor Congress the new treaty between China and the United States. It is reported to be quite favorable to the commercial interests of the U. States. Duty on lead is lowered; vessels after paying port charges in one port can go for trade to other parts of the Empire. The U. S. vessels of war Brandywine and St. Louis, may be expected here in the month of February.

The French had taken Tangiers, and planted the tri-colored flag. The English Consul had protested.

On the morning of the 29th of July, it was officially made known in England what had been the course pursued by the French at Tahiti, and within one hour a ship of the line, the Collingwood, was ordered to be ready for sea, and to sail forthwith for Tahiti. The same afternnoon a special messenger left London for Paris, with full instructions to Lord Cowly to demand the requisite reparation from the French Minister direct.

Joseph Bounaparte died at Florence, July 28. He was once King of Naples, subsequently of Spain. His brothers Louis and Jerome were present.

A General Naval Court Martial has been ordered at Washington, as is supposed for trial of Capt. Newton, on account of the burning of the Missouri.

Mr. Pierce, (formerly merchant in Honolulu) under date of Aug. 2, writes that he had just returned from London and Paris, and that Messrs. Richards and Haalilio, would sail in a few weeks to meet on this side the Isthmus of Panama, a brig from Belgium, bound for these Islands.

It is reported that Rev. Mr. Bingham would sail during the past autumn for the S. Islands.

A New York correspondent, under date of Aug. 19, writes that the Messrs. Bensons expected to despatch another store ship for the Pacific, in about one month.

The death of Dr. F. A. Olmstead, of N. Haven, occurred about the 1st of June. He will be remembered by many among the foreign community at these Islands. He sailed for the U. S. in the Flora, in the summer of 1840.

New Orleans Price Current for September 14, quotes sperm oil at 95 cts; fall 90; whale refined, 50. New York Price Current for July 28, quotes whale oil 37 1-2; and crude sperm 90. Whale bone, large sales N. W. for exportation 45 cts, and S. sea 47. Aug. 10, crude sperm 96, whale refined 46 1-2. Bone 47.

About Aug. 1, the following whale ships sailed from New London, Louvre, Green

Armata, Hull; Neptue, Oat; Tenedos, Comstock.

From Wilmer and Smith's European Times, for Sept. 19, we glean the following items of news:

The British House of Lords have revoked the judgment of the Irish Court of the Queen's Bench relating to the sentence of O'Connell, who is now liberated. Throughout Ireland there was of course great rejoicing. [Who can imagine the scenes that would have followed had not the Irish become a nation of Tetotallers? Ed. of Friend] O'Connel is now in his 70th year, and exhibits all the energy and buoyancy of youth.

The Tahiti question is settled. Mr. Pritchard is to receive from the French an indemnity of 25,000franks. M D'Aubigny has been moved from Tahiti, and his conduct has been made the subject of apology, although he is not dismissed from the French service.

On the 6th of Sept. the second son, and fourt child of Queen Victoria, was christened "Alfred Ernest Albert." The services commenced with Palestrine's "O be joyful."

The King of the French was about to visit England.

The following particulars may throw some light upon the previously unheard of wreck of the U. S. Schooner Grampus. She sailed from Norfolk, for the West Indies, in January 1843.

"Capt. Taber of the whale ship Montpelier, arrived at New Bedford, informs the editor of the Bulletin, that on the 26t of June, the Bermudas Islands bearing W. N. W. distant five leagues, he fell in with a vessel bottom up, or nearly so, having the appearance of a 20 gun schooner, foremast gone, mainmast and bowsprit remaining, apparently nearly new. Her copper appeared good, part of the false keel and port shutters gone, and had apparently been in that situation five or six months. The wreck was doubtless that of the U. S. Schooner Grampus, which was last heard of, we believe, off the Burmudas."—*Sailors Magazine.*

Naval.—The U. S. store ship Erie' Lieut. Com'g Duke, from Valparaiso, via Rio de Janeiro and Pernambuco, arrived at Norfo k on the 17th inst. The Erie sailed from Pernambuco on the 12th of August Augst 1st, lat 22° 19′ S., long 40° 15′ W., spoke U. S. ship Constitution, bound to Rio, officers and crew all well.

The Erie experienced the late gale, during which she lost some sails. She has on board about 250 men, which have been sent home from the different stations.—*Picayune.*

An engraver at Boston has just finished an elegant seal of state for the King of the Sandwich Islands. It is said to be the handsomest work of the kind in existence.—*Picayune Sept.* 30.

We copy the following from the Friend of China and Hong Kong Gazette, August 17th.

"Fast Sailing.—The beautiful American ship Montauk, Commanded by Capt. William Mac Michael, arrived from New York, on the evening of the 8th instant, having made the unprecedentedly short passage of 87 days.

This is the shortest run on record to China, from England or America, and taking into consideration the comparative distance from those countries, the Montauk has surpassed, by about seven days, the passage of H. M. S. Vindictive, whose arrival in 89 sailing days from England, was, at the time, thought to be without parallel.

The average run of the Montauk has been a fraction over 177 miles per day, since leaving the U. States.

We learn that she has not had a fair everage chance for a passage, particularly in the trade winds of the Atlantic and Pacific Oceans, and that she also met with light and unfavorage winds in the China Sea."

Capt. Payne, of the U. S. Brig of war Perry, now in this port, was a passenger on board the Montauk. The Perry arrived on the 10th inst. from Mazatlan. It appears therefore that Capt. Payne has been less than seven months from the U. States to these Islands, by the way of China and Mexico. He remained in China 21 days, and on the coast of Mexico 15 days. Making only 176 days that he has been at sea on the passage from New York to China, from China to Mazatlan and from Mazatlan to the Sandwich Islands. Distances logged, 26,934 miles, averaging 153 1-4 miles per day.

List of Officers attached to the U. States Brig Perry.

Commander, John S. Paine, Esq.
1st. Lieut. H. N. Harrison.
2d. Lieut. P. M. Crossan.
3d Lieut. J. C. Howell.
Sailing Master, J. H. Brown.
Purser, James Tilton.
Surgeon, J. D. Miller.
Midshipmen, E. D. Denny, W.W. Queen, E. E. Stone.
Capt's Clerk, H. R. Wrightman.
Boatswain, Wm. Bergen.
Gunner, W. Collins.
Carpenter, James Storer.
Master's Mate, James Sown.

From the Cascade and Miscellany.

Mr. Coldwaterman:—One of the constant listeners to your valuable paper has been much gratified with the numerous and unanswerable arguments you are able to bring forward in favor of Total Abstinence principles. It is a subject which enlarges the more it is thought upon. Arguments for temperance and dissuasions from intemperance, multiply in a ten fold ratio the longer one practices the one and avoids the other. The reform has advanced so far, that not a single writer of any respectability dare come out and oppose the temperance reform. Writers, so far as they employ their pens, are all engaged upon the side of Total Abstinence principles. How changed are the views of the public in Honolulu, in regard to the degrading vice of drunkennesss. A few years since it was so common for drunkards to be seen in the streets, that the disgusting sight occasioned no surprise. It is not so now. Lately we heard it reported that the Master of a whale ship was seen drunk in the streets. "Is it possible," says one. "Who can it have been," says another. Sailors too, are not so frequently seen reeling through our streets. Says one, "I saw a sailor drunk to-day, for the first time during this shipping season." Says another, "How regular that fellow ——— has been since he signed the pledge." The mechanics and laboring class in Honolulu, have risen more than 100 per cent. during the last 18 months. They may have been slow in coming to the conclusion that *alcohol is not necessary to laboring men*, but now they are nobly practicing the principle. It does one's soul good to meet these men hale and healthy, cheerful and happy, as they are engaged in their various trades and professions. If a man wants a piece of work done, he is not put off a week or fortnight, until the person he would employ gets sober. It is a long time since we have heard the complaint that "I cannot get such a piece of work done because ——— is on a spree."

At this stage of the reformation it becomes an interesting question for reflection and consideration, who have been instrumental in bringing about this happy result? Not those who put the bottle to their neighbor's mouth, and live upon the hard earned wages of the sailor or mechanic. To them, may the pointed language of scripture be addressed, "Woe unto him that giveth his neighbor drink, that putteth the bottle to him, and maketh him drunk." Not those who have been eager to import every hogshead, barrel and gallon of brandy and gin, that they hoped to be able to sell to to the retailers;—neither those who have drank their brandy at 11 in the morning, sipped their wine at the dinner table, and retired at night amid the fumes of the intoxicating glass. No, nor those who have professed great interest in the temperance reform, said

that temperance was a good thing, but begged to be excused from signing the pledge, and joining the Union. Most certainly not one of the above mentioned classes will presume to assert that he has aided the cause in the least. On the other hand, the practical influence of one and all, has been to perpetuate the reign of drunkenness in Honolulu, and fasten upon the community the evils which for years has made the word OAHU a synonyme for *drunkardness* and *dissipation*. Many are found opposed in practice to the reform, from whom better things ought to be expected. What does it signify that a man assert that he wishes the cause to be successful, and yet his whole example is directly opposed thereto.

After candidly looking at the subject, and watching the movements in society, for one, I am led to adopt this conclusion—that the progress of the reform in Honolulu is owing to the following causes:

1st. A general influence from abroad.

2d. The efforts of Total Abstinence men in Honolulu.

3d. The happy and beneficial influence of the HAWAIIAN TOTAL ABSTINENCE UNION.

In conclusion, Mr. Editor, I wish you and every member of the Union, the most abundant success in your noble and philanthropic efforts to redeem the inhabitants of Honolulu from the degrading practice of drinking strong drinks.

"Give us water ever,
Mixed with *spirit* never,
While our life shall last:
We the Pledge have taken,
Our faith shall be unshaken,
To handle not or taste."

Yours truly,
A LOVER OF COLD WATER.
Honolulu, Dec. 5, 1844.

A TOUCHING INCIDENT.—We recently alluded to the establishment of the Howard House, in Southwark, for the cause of inebriates. We learn that recently a man who was known as an unfortunate victim of intemperance, observing the happy effects of a pledge upon a cousin, determined at the instance of the better angel within him, to visit Howard Hall and make a praiseworthy effort for his own reformation. He called at the house, signed the pledge, and returning home, exhibited the certificate to his wife. The poor woman threw her arms around his neck in an ecstacy of joy; and two little daughters, who, on their way from school had heard that their father had taken the pledge, ran in with a look of delight, exclaiming as if some new joy had burst upon their little hearts—"Father has signed the pledge! Father has signed the pledge! and now we will all be so happy."—*Philadelphia Inq.*

The following editorial remarks we copy from the Hawaiian Cascade and Miscellany, for December. They breath a noble spirit, and most cordially do we sympathise with all who rejoice to behold the banner of temperance "lifted high" among the foreign population of the Sandwich Islands.

We cannot but think that the day of redemption from the chains of intemperance has at last dawned upon the foreign residents at this group of Islands. Long and bitter has been the bondage, and all the efforts of good men to brake the bands which bound us, have hitherto been futile. But the energies of the truly philanthropic are untiring, and they have at last succeeded in awakening a portion to reflect upon the danger of their situation; have opened their eyes to see the gulf which has long yawned at their feet.

Within the few months which have elapsed since the first energetic public demonstration of an intention to do something towards keeping pace with the rest of the world in moral improvement, nearly one hundred persons from among our limited foreign population, have become members of the Hawaiian Total Abstinence Union. Among this number are those of various em ployments, different religious opinions, and different nations, but they all agree upon one point, and are willing to stand shoulder to shoulder, in the ranks of the cold water army, in the crusade against the common enemy of mankind. They have, most of them, experienced the grinding despotism of King Alcohol, and are still smarting under the blows which they received, as their only reward, while in his service. We trust they will yet succeed in thrusting him out of his empire over this fair portion of the globe, in spite of his standing army, and all the "means and 'pliances to boot," which he is able to bring against them.

Thus far, the list of deserters from our ranks has been remarkably small, considering the numerous drawbacks which exist, and considering the efforts that have been made by the anti temperate to resist the progress of reform. Some five or six names are all which have been reported for violating the pledge, although lynx eyes have been watching the incomings and outgoings of every tetotaler. This is encouraging and should nerve us to further exertion.

These Islands have hitherto been a byeword of sin even with the people of intemperate America. While they admitted that God had displayed his benevolence in the moral and religious reuovation of the native part of the population, the foreign residents here for pecuniary views, have been considered as sunk in debauchery almost beyond the hope of redemption. Parents have looked with evil forboding upon the embarkation of their sons for these shores. The very atmosphere of Oahu has been thought to be tainted with moral corruption. Perhaps some of the Deacon Gileses, while shipping their liquid damnation to these parts, have laid "the flattering unction to their souls," that they could not make us *worse* than we had already become. But we believe they already find a diminished demand for their article, and we hope to see the time when it will be greatly less than it is.

We do not wish to exaggerate the good that has been effected by our Union; we are well aware that the *novelty* of tetotalism has been an agent in our success; we believe, too, that some have signed the pledge on the impulse of the moment, without due reflection upon the importance of the obligation they were taking upon them, and we look for occasional secessions from our ranks, while rum is allowed to be sold at the Hawaiian Islands. Still, we will not be discouraged by a result which has been experienced in every place where the cause has flourished, but will gird up our loins and address ourselves anew to the conflict, conscious that we are doing battle for the right, and having the promise of God that he will support those who are in the right.

"Thrice is he armed who hath his quarrel just, and he but naked, though locked up in steel, whose conscience with unjustice is corrupted."

NOTICE.—The meetings of the Union are held weekly, on Tuesday evening, at the vestry room of the Seamen's Chapel. For eign residents and seamen are respectfully invited to attend.

At the meeting held Nov. 26, on motion of Capt. Hart, voted, That another number of the Cascade be published.

TERMS.—75 copies $1; 20 copies 50 cents; 8 copies 25 cents.

The Hon. J. S. Pendleton, late Charge d'Affairs to Chili, came passenger in the U. S. ship Erie, at Norfolk.

POLICE REPORT.—Edward Dennis, an Englishman, licensed retailer of spirituous liquors, was fined $50 for selling a bottle of spirits to a native, contrary to law, December 2d.—*Polynesian.*

Said the grog-shop keeper to a toper, "I say, customer, where would you be now, if the devil had his due?" "At home with my family, a happy and sober man," was the laconic reply. We presume the grocer was led to see where the devil's strongest claim lay.

Shipping news, deaths, donations, &c. we are obliged to omit for want of time, several gentlemen being anxious to forward this number by Her M. S Modeste, which is expected to sail this day for Valparaiso, via Tahiti.

THE FRIEND,

OF TEMPERANCE AND SEAMEN.

VOL. II. HONOLULU, OAHU, SANDWICH ISLANDS, FRIDAY, NOVEMBER 1, 1844. No. XI.

For the Friend.

NOTES

On the Shipping, Trade, Agriculture, Climate, Diseases, Religious Institutions, Civil and Social Condition, Mercantile and Financial Policy of the Sandwich or Hawaiian Islands, viewed in relation to other groups of islands, and to the natural and acquired advantages of the sandwich or Hawaiian Islands. By ROBERT CRICHTON WYLLIE, Esquire.

(*Continued from No. IX., page* 72.)

68. KING AND COURT.—The king and his small court, have for several years resided chiefly at Lahaina, in the island of Maui; but since the end of June, they have been living here; and I understand, this capital is to be their permanent residence. It is desirable that his majesty should not be too far removed from the seat of his government, as his absence subjects his ministers to misrepresentation, and creates delay from the necessity of consulting him on all important measures of administration. I understand that during the recent troubles of his kingdom, and till the "*fiat*" of her Britannic majesty's government, upon the questions referred to them, were known, it was his majesty's wish to keep himself out of the way of unnecessary intrusion, whereby the *prestige* of his prerogatives might be impaired. There never was, nor could be any wish on the part of his ministers to throw his majesty into the shade by studiously keeping him in retirement. In the existing state of things, it became their duty, in concurrence with the royal wish, to shield their master's prerogatives from any encroachment that could prejudice them in the eyes of his subjects. Now, his majesty appears on the *arena* as a member of the family of recognized independent sovereigns, and the ministers are attempting to place his court, and organize his tribunals, upon a footing suited to his altered situation. In all this they only do what is their duty to the king, and what foreign governments will expect them to do. Where every thing was to be created *de novo*, errors are but to be expected; and fault has been found with the code of court etiquette decreed, and with the etiquette observed on the late festival of the 31st of July. After the explanation rendered, I believe by authority, in the Polynesian of the 31st of July, an intention to avoid any offensive preference becomes manifest; and with a government so young and surrounded by so many embarrassments, in my opinion offence ought not to be felt, where no intention to give it can be suspected. On proper application being made previously, the representatives of foreign powers are at all times admitted to a personal interview with the king, for the purpose of submitting to his majesty any case of well founded grievance which any of their countrymen may have against the government or authorities of the country.

In speaking of the court, I cannot well omit making some allusion to the *king* himself. In all countries the character of the sovereign is to be approached with respect, and in this particular instance I do so in strict accordance with the feeling which I entertain towards the king of these islands. It is not a little remarkable that in a society where there are some few individuals disposed to blame, censure and find fault with every thing and every body, I have never heard a single remark unfavorable to his majesty Kamehameha III. All admit the goodness of his disposition; none profess to doubt the soundness of his intentions; none accuse him of cruelty, tyranny or oppression; and those who have familiar access to him, all concur in ascribing to his majesty much natural talent, and a good deal of acquired information. Amongst those, I am happy to quote my friend *Major Low*, of the Bengal army, who lately made a tour in these islands, and after presenting to the king an introductory note from H. B. M.'s consul general, experienced from his majesty the utmost kindness, rendered in the most frank, generous and gentlemanly spirit. The *Major* retired from these islands with the most favorable opinion of his majesty's character and talent. He expressed himself particularly struck with the king's remarks upon the native states of India and Persia, the policy of the British government of India, and the organization of the native army.

His majesty of late years has become both the patron and the example of temperance among his subjects; and no one can be more regular in his attendance at church, or more zealous in discouraging the pagan rites, ceremonies and superstitions that formerly prevailed amongst the natives.

Kamehameha III. is now about thirty two years of age, and though less robust than some of the chiefs, enjoys good health. On the 29 February 1837, he was married to *Kalama*, now aged twenty seven years, but by whom he has no offspring. In the event of his having no succession, the crown will devolve upon *Alexander Liholiho*, whom his majesty has adopted for that purpose. He is a sprightly promising youth, now in his eleventh year.

A singular feature in this monarchy is the custom of appointing a female to be *premier* of the kingdom. This custom seems to have originated in the will of Kamehameha I., which declared the kingdom to belong to his son Liholiho, but that Kaahumanu, (one of his queens,) should be his minister.

The present premier is Kekauluohi, aged forty eight, and apparently much respected by all classes. Her attributes under the constitution are to carry into execution all business which the king wishes to transact—to be his majesty's special counsellor in the great business of the kingdom—to receive reports of all government property and make it over to the king, and to concur with and approve of all important business which the king may transact in person. Whatever business in the kingdom she does, is to be considered as executed by the king's authority—but the king has a *veto* on her acts, while his own are not binding unless approved of by her.

The premier has one son, William Charles Lunalilo, an interesting youth, now in his tenth year, but I presume his sex disqualifies him from being her successor, as *Victoria Kamamalu*, now in her sixth year, is the reputed heir to the *premiership*.

I may add here that no pains are spared by Mr. and Mrs. Cook, through proper education and training, to fit these young persons, *Alexander* and *Victoria*, for the high functions which they are to be called upon to perform.

They are the children of his excellency Kekuanaoa, governor of Oahu, by Kinau or Kaahumanu the *second premier*.

69. NATIVE HABITATIONS.—In point of neatness, cleanliness and workmanship, the huts of the natives exceed those of the lower order of the Mexicans, in many parts of the republic that are reputed the most civilized. Still they are very defective in the essential points of elevation in the floor, in the roof, division of compartments, and ventilation. I do not see that, where the materials for construction are so abundant, and where the spare labor can so easily be afforded, a law requiring the natives to improve the construction of their huts, in these respects, could be considered oppressive. In most of the native huts, there is only one door, and no window. In such there can be no ventilation, and it must be extremely prejudicial to the health of the inmates, especially the children, to sleep six or eight hours in an atmosphere so heated, impure and confined. I am convinced that many diseases result from that cause alone.

70. MOLES OR WHARVES.—From what a "*Resident*" writes to the editor of the Polynesian, it appears that he finds fault with my omission of the wharf, in this port, which forms the frontage of the ship-building and repairing yard of Messrs. James Robinson & Co.

I do not suppose that any of the partners of that industrious, quiet and highly respectable firm, is the *Resident* who so complains; nor did I think that any other notice of their establishment was required, standing separate and immured as it does from the chief warehouses to which goods after being landed are conducted, than what appeared in the Friend of 1st May.

On inquiry, however, I find that they do allow vessels to land their cargoes on their wharf, on payment of one dollar per day for every schooner that lays along-side—of two dollars for every brig, and of three for every ship.

I find also, that within their capacious premises, they have stores, where they allow goods to be deposited on very reasonable terms, which though far from the most of the merchants, from their proximity to the anchorage of ships of war, are more eligible to receive their stores, than any other in Honolulu, and also to receive goods landed here in bond, for reshipment.

As to the small wharf belonging to Mr. Reynolds, it is separated from his shop and dwelling house by a public street, and being continuous with that of Messrs. Ladd & Co., I naturally supposed that they were the proprietors of the whole.

Messrs. Ladd & Co charge 16 cents on every ton of goods landed on or shipped from their wharf, but make no charge for a vessel lying alongside, unless for repairs, or exceeding the reasonable time for discharging and embarking cargo.

71. COURTS OF LAW.—The government has recently established a court of chancery and a court of admiralty, assisted by the law adviser of the *crown*, John Ricord, Esquire. Where private parties cannot agree among themselves, it is for their advantage that courts should exist, where their differences can be heard, fairly tried and justly decided. This is more particularly the case with foreigners whose governments cannot adjudicate upon cases within the jurisdiction of this kingdom.

72. COMMUNICATION BY THE ISTHMUS OF PANAMA.—If a ship-canal, or rail-road, or tram-road, or even a good common road, were made across the isthmus of Panama, connected with the Sandwich Islands by a line of steamers, doubtless it would greatly promote the prosperity of the Sandwich Islands.

But whence is the traffic to come to pay for the line of steamers? It has erroneously been supposed, both in Europe and America, that by a canal across the isthmus, we would have China, the Phillipines and India, comparatively speaking, at our door. No greater fallacy ever prevailed; and the wonder is, how it came ever to be entertained.

If sailing vessels were employed, the voyage from England to Chagres would not be less, on an average, than - 50 days;
even were a ship canal cut, we could not allow less time for a ship to cross from *Chagres* into the bay of Panama than - - - - - - - - - - - - 2 days.
The average passage of three vessels from Panama to this port has been - - - - - - - - - 55 days;
and the passage from this port to Macao or Hong Kong, will very seldom be done in less than 30 days.

Making in all, - - - - - - - - - - - - - - - - - - 137 days,
or eighty five from Panama only.

But suppose steamers were employed from England to Chagres, considering the number of places where they call for coal, and to land mails and passengers, they would have to run about 5270 miles, and at the very least, would require an average of 30 days, to which adding 87 days to *Macao* or *Hong-Kong*, the voyage from England would still be 117 days.

Again, for the sake of argument, let us suppose steamers established all the way. The time required may be calculated as follows.

From England to Chagres, - - - - - - - - - - 30 days.
Steaming through canal, and taking in coal, say - 3 days.
Steaming from *Panama* to this port, a distance of 4505 miles, at an average of eight miles per hour, say - - - - - - - - - - - - - - - - - - - 23 days.
Stoppage at this port, taking in coals, &c., say 3 days.
Steaming from this port to *Macao* or *Hong-Kong*, a distance of 5397 miles, at an average of eight miles per hour, say - - - - - - - - - - 28 days.
Making in all, - - - - - - - - - - - - - - - - - 87 days,
at the very shortest calculation. There are instances of fast sailing vessels doubling the cape of Good Hope having made the voyage in less time.

The overland mail from London to Hong-Kong, via Suez, and conveyed from Bombay, by sailing vessels, has departed and arrived as mentioned below:

Left London.	*Arrived at Hong-Kong.*	*Number of days.*
Nov. 4, 1842	Feb. 7, 1843	95
Feb. 6, 1843	May 4, "	87
April 6, "	June 19, "	74
June 6, "	Aug. 25, "	80
July 6, "	Sept. 7, "	63
Aug. 6, "	Nov. 7, "	93
Sept. 6, "	Dec. 21, "	106
Oct. 6, "	Jan. 20, 1844	106

Average of eight arrivals, - - - - - - - - - - 88 ds.,
even at the present time, before the line of steam-

navigation has been completed from Suez to China.

But it is believed that when the line is completed, the mail and passengers from London to Hong-Kong, will be conveyed in 59 days only.

On the 30th of September, 1843, a friend of mine, *Mr. Henry Wise. of London*, published the following calculation showing how that may be done; and it will be observed he calculates only upon seven miles per hour as the average rate of steaming, while I have calculated upon eight:

Suggestions for accelerating the communication between GREAT BRITAIN *and* CHINA.

Proposed route from Hong-Kong to London, and from London to Hong-Kong.	Course.	Distance in miles.	Average rate per hour.	Interval under weigh. Days.	Interval under weigh. Hours.	Interval at anchor. Days.	Interval at anchor. Hours.	Total interval. Days.	Total interval. Hours.
Hong-Kong to Labuan,	S. 2° 18' E.	1009	7	6		1	12*	7	12
Pulo-Labuan to Singapore,	S. 69 23 W.	707	"	4	6		12†	4	18
Singapore to Malacca, -	S. 64 48 W., 19 / N. 51 41 W., 103	122	"		18		6‡	1

* To receive coal.
† To receive coal, land and receive mails.
‡ To land and receive mails.
§ To receive coal, land and receive mails.
‖ To receive coal, land and receive mails.

Total interval from Hong-Kong to London, and *vice versa*, by route proposed, - - - - - - - - - - 59 days; while the average interval of transmission of China correspondence, via Calcutta and Bombay, during the last twenty overland mails, from 10th October 1841, to 6th May 1842, has been - - - - - - - - - - - 89 days; making a difference of time, in favor of the proposed route, of - 30 days.

The present average of 89 days, exceeds the period occasionally occupied by fast sailing ships, in accomplishing the voyage, via the cape of Good Hope.

London, September 30th, 1843. (Signed,) HENRY WISE.

Had I taken the average rate of steaming at seven miles in place of eight, it would have made about fifty-nine days from Panama to Hong-Kong, in place of fifty-one; or, in all ninety-five days from England.

In further elucidation of my position, that a ship canal across the isthmus would have no effect in accelerating communication with India, China, the Philipine Islands and Australia, &c., I beg reference to the following calculation of distances, for which I am indebted to *captain Charles Hope, of H. B. M.'s S. Thalia:*

From.	*To.*	*Miles.*
Panama	Nukahiwa, Marquesas,	3,759
do	Honolulu, Oahu,	4,505
do	Papeite, Tahiti,	4,458
do	Port Nicholson, N. Zeal.,	6,788
do	Sydney, N. S. Wales,	7,815

do	Jeddo, Japan,	3,368
Falmouth, Eng.	Macao, via Suez,	9,636
do do	Manila, do do,	9,011
do do	Sydney, N. S. Wales,	11,276
do do	Port Nicholson, N. Zeal.,	12,346
do do	Hobert Town,	10,810

From the above, it is evident that the advantages of a steam communication across the isthmus of Panama, would in a great measure be confined to the ports on the west coast of America.

The coast of Peru as far as Callao, of the republic of the Equator, of New Grenada, every part of the isthmus, the coast of Central America, and of Mexico, would derive great benefit from such a communication, but it could only be kept up with regularity at very great expense, and it is questionable whether the traffic in goods and passengers would afford a revenue to defray that expense.

A canal across the isthmus, for sailing vessels, afterwards to proceed to those coasts, would yield scarcely any advantage whatever, unless to whalers destined for the N. West Coast, or bound home, for after getting into the bay of Panama, it is extremely difficult to get out of it, and whether going southward or northward, a ship has to proceed in the face of a constant trade wind.

When the settlements on Columbia River become of importance, a steamer, at the rate of seven miles per hour, would reach them in about twenty one days—or say fifty three days from England.

What I have said above, relating to steam communication across the isthmus with England, applies also to North America, but not to the same extent, owing to the greater proximity of the southern ports of the United States to *Chagres*. But the time is yet far distant, when the traffic between the U.States and China would support a line of steamers stretching across the broad Pacific.

From the whole, it is obvious that the Sandwich Islands are not likely to become a grand depot for a trans-Pacific line of steamers. But they may become so for the British and other war-steamers visiting the coast of Mexico, or other groups of islands interspersed in this ocean. Coal of good quality for steamers is to be found at Vancouver's Island, and also, it is said, in other parts of the coast of the territory along the N. West, known under the name of *Oregon*. By having depots at San Francisco, Honolulu, and Mazatlan or San Blas, steamers of war would be as efficient in the northern Pacific as in the southern.

It is not to be supposed that Upper California, with its vast agricultural resources, will remain for ever neglected. The port of Monterey could be reached in seventeen and a half days steaming from Panama, at the rate of seven miles per hour, or say fifty days from England, and from the United States in a much shorter period.

Since writing the foregoing, through the kindness of the Rev. Samuel C. Damon, I have been favored with the following extract of a letter from Panama, written in April, this year.

"The Government of *New Granada* have declared the privilege of making a canal across the Isthmus of Panama, granted to Messrs, Salomon, extinct. The French charge in *Bagota* reclaims it, as being still in force. The natives are jealous of the French, and suspect from the sudden interest shewn about the Isthmus that France has designs upon it."

From this I presume that all that has appeared about Messrs Baring Brothers & Co, of London having taken up the contract, was without foundation.

R. C. W.

73. Under the want of any communication with Mexico, often for four or six months, it is sometimes advantageous to the merchants of Honolulu, to avail themselves of ships proceeding to China, for the conveyance of their letters to Europe and America. For their information, I here add the post-office regulations of her Britannic majesty's colony of Hong-Kong:

"*Post-office regulations*—To take effect on and after the 19th day of April inst. The regular mail between the United Kingdom and Hongkong consists of two portions, the general mail by Marseilles, and the supplementary mail by Southampton. All letters to go by the latter route must be addressed "via Southampton." Postages on letters via Marseilles, to or from the United Kingdom, cannot be paid here Postages on letters hence "via Southampton" to the United Kingdom, &c, prepayment optional. Postages on letters and newspapers hence for foreign countries (France and Holland excepted) must be prepaid. No postages upon stamped British newspapers from Great Britain "via Southampton," nor upon Hongkong newspapers hence "via Southampton" to the United Kingdom; but if "via Marseilles" subject in the United Kingdom to a charge of 3d. Rates upon ship letters and newspapers properly forwarded to and from the United Kingdom not collected here. From Canada, Nova Scotia, New Brunswick, Newfoundland, Bermuda, Jamaica, Barbadoes, Dominica, Antigua, Nevis, St. Kitts, Tortola, St. Lucia, St. Vincent, Tobago, Grenada, Trinidad, Berbice, Demarara, Bahamas, Carriacoa, Montserrat, Malta, Gibraltar, and New Zealand, not collected here. Rates upon ship letters properly forwarded from British colonies and not under the control of the post master general, subject to 4d. per half ounce, &c, and to gratuities. Rates upon ship letters hence to British colonies and foreign countries, not through the United Kingdom, subject to 4d. per half ounce, &c.

All Newspapers to pass under these Regulations must be sent without a cover, or in a cover free and open at the sides.—No sign of communication to be written or printed upon the paper subsequent to publication nor upon the cover beyond the necessary ad-

dress of the person to whom sent; nor to contain any inclosure

The attention of the public and particularly of Merchants, Masters of and Passengers in vessels is directed to the provisions of the Acts 1 Vic. C. 36 and 3 and 4 Vic. C. 96 prohibiting the delivery and sending of letters by vessels excepting through the Post Office under heavy penalties—making it incumbent upon all masters of vessels to deliver all letters to the Post Office and prohibiting vessels from being reported and from having bulk broken till a declaration by the Master of the faithful delivery of letters has been made and signed before the Post Master. The provisions of these acts extend to passengers in vessels delivering or having in their possession letters that ought to have been delivered to the Post Office.

It is particularly requested that all letters may be fully and legibly addressed and route marked thereon.

All letters and newspapers will be delivered on application at the Post Office window.

The Post Office will be open from 10 A. M. to 4 P. M.; but when a vessel is about to leave with letter bags the time will be extended and duly notified by notice at the Post Office.

Letters can on no account be received after the appointed time for closing the office."

T. J. SCALES,
Deputy Post Master.

Victoria, Hongkong, 5th April, 1844."

When opportunities occur of vessels going to Mazatlan or San Blas, the shortest and most certain route for letters, (as seen by my note 24 in the Friend of 1st July) is certainly by way of Mexico, but it must be remembered that the postage of each single letter, in that Republic alone, costs about 50 cents.

73. *Salt Pits or Pans*—By referring to the Friend of 1st May, it will be seen that *Salt* ranks as one of the exports from this port.

The Salt Pits or Pans to the South End of the Town, and the Salt Lake about two miles to the Westward afford ready means for manufacturing this commodity to a great extent, and during this year, there has been a considerable demand for it for export, to *New South Wales*, and other places.

Through Mr. Wm. Paty, I learn that some intelligent natives estimate the amount manufactured yearly, or rather some years as high as 10,000 barrels. This probably is overrated, but no one can doubt that a much larger quantity might be made if the natives could be induced to apply themselves, diligently to the manufacture.

Since the 29th August, the Treasury Board have been advertising for laborers to gather Salt from the Lake of *Moanalua*, and I am assured they now employ about 25 natives to whom they pay 2 dollars per week, in cash, and that these 25 men collected 500 barrels in four days after they commenced.

After allowing for the wages of the laborers, at that rate, I am told that the Treasury Board could afford to sell the Salt at 25 cent per barrel, of about 250 pounds or upwards, placed on the beach of *Moanalua*.

If foreign vessels could calculate always upon obtaining cargoes at that price, I have no doubt that the demand would be greatly increased, and that the trade would become a source of considerable wealth to these Islands. Vessels of light draft of water, have no difficulty in embarking it from the beach of the Lake, while to bring it in small country vessels to this port would cost only about 25 cents per barrel.

At 50 or even 60 cents, it is presumed it would answer in the markets of New South Wales, California, and the N. W. Coast.

As a branch of trade, this would be highly beneficial to these Islands, although the profit on it should be small, from the number of hands that it would employ.

The greatest good of the greatest number, is the primary principle of every good government, and if the administration of His H. Majesty can foster into existence branches of industry, holding out a sure though low reward to the natives, I do not see that a certain degree of compulsion would not be excusable, with the view of training them to habits of regular industry, beneficial to themselves. A certain degree of sloth or disinclination to labor, pervades all classes of the copper colored race; if they can earn, during one day, enough to live upon for three, they cannot comprehend why they should work during these three; to accumulate wealth or provide for the future, seems no part of their care, and hence indigence, disease, immorality, premature decay, and depopulation.

It is a remarkable fact that the only countries where the copper colored race have multiplied on a par, or nearly so, with the whites, are those colonized by Spain. It is true that under the system of "*mitas*, *repartimientas*," and "*ecomiendas*," thousands were exterminated by hard labor, but under that system, they were initiated into habits of regular industry, and since the independence, many of them have risen to wealth and distinction.

Far be it from me to recommend a system of compulsion so atrocious as that introduced by the successors of *Cortes* and *Pizarro*, but if under the operations of the so long expected Belgian Company, or other adventurers who may be induced to embark their capital in rendering productive the soil of these Islands, it should be found that unemployed natives will not agree to work for reasonable wages, I think the common good of the King and his subjects and that of these natives themselves, would justify an enactment devoting those idlers to compulsory labor on the public roads, or otherwise on Government account. It would not be difficult to register all natives industriously employed; the natives themselves would seek the certificate of their employer for protection, contracts between master and servant would be readily enforced, and the last *bar* to the social improvement of the native race generally would be removed.

(TO BE CONTINUED.)

EDITOR'S CORRESPONDENCE.

An article in the Polynesian of Sept. 14th, on the subject of Egyptian Chronology, to which a reply was published in the last number of the Friend, contains the idea that Pharaoh, the monarch of Egypt at the time of the exodus, probably escaped the destruction which befel his army. The reply above stated, referring to that idea, has this remark, "whether that one perished in the Red Sea we know not, and to us it is not important; but the natural inference from the narrative is that he did."

I am not willing to admit that any room for doubt on the subject, exists; for to me it appears evident, that the monarch in question perished in the Red Sea.

It is said in Exodus XIII: 8, "And the Lord hardened the heart of Pharaoh king of Egypt, and he pursued after the children of Israel." In verse 17. God speaks, "And I, behold, I will harden the hearts of the Egyptians and they shall follow them: and I will get me honor upon Pharaoh, and upon all his host, upon his chariots and upon his horsemen;" and, 23 v. "And the Egyptians pursued and went in after them, to the midst of the sea, even all Pharaoh's horses, his chariots and his horsemen."—At the word of the Lord—v. 27, 28;—"Moses stretched forth his hand over the sea, and the sea returned to his strength when the morning appeared, and the Egyptians fled against it: and the Lord overthrew the Egyptians in the midst of the sea. And the waters returned and covered the chariots and the horsemen and all the host of Pharaoh, that came into the sea after them; there remained not so much as one of them." V. 30: "And Israel saw the Egyptians dead upon the sea shore."

Now if Pharaoh was among the company that entered into the sea, he was destroyed; for there remained not so much as *one*. That he was, is inferred from the fact that he pursued the fugitives to the Red Sea; and, that he was destroyed, from the declaration of Jehovah that he would get him *honor* upon *Pharaoh*. Moreover in the song of Moses and the children of Israel, it is said—"the horse of Pharaoh went in with his chariots and with his horsemen into the sea." But we are not left in any doubt as to his fate, if we are to understand, according to its obvious meaning, the declaration in Psalm 126: v. 15; "But overthrew Pharaoh and his host in the Red Sea."

In view of these declarations of the Bible what room do we find for conjecture on the subject of Pharaoh's destruction; for, if the host was destroyed, so was Pharaoh.

Others may see in the portrait of Rameses III. the likeness of the returning monarch seated in his chariot, safe from the destruction which overwhelmed his army, and dying quietly in possession of his throne: but I am constrained to regard the scripture account, as above quoted, conclusive as to his disasterous end.

A READER.

DRUNKARDS BEGIN THEIR COURSE WHEN THEY ARE BOYS.—At a late temperance meeting in Boston, several reformed inebriates told the story of their lives—the lives of drunkards—that they might do something to warn those present to avoid the misery they had endured. Said one, and he the youngest, "I began to drink rum at twelve years of age. A rich man now in this city, (I do not name him,) sold me rum when I was not tall enough to reach the top of the counter." After much more, he gave the following: "I had elevated companions—all healthy young men—all doing well in our business. We used to meet to drink and to gamble; we continued our course for some time; and what is the history of us twelve? Six have died drunkards—two have enlisted in stateships—two are in the house of correction—one is a drunkard still—I alone, have escaped to tell you. Who were they," exclaimed this young man, "who have for these many years sold us this rum? Of them, in the sight of God, I demand those who have gone down to the drunkard's grave, or are living the drunkard's life—where, where are my companions!" Here his voice failed, and convulsive sobbing took its place. The effect was intense. Men, hard-fisted men, with child-like hearts, were seen with floods of tears washing their weather-beaten faces—the mourning, fit mourning, over such remembered dead.

A GOOD SPIRIT.—"Father," said a little soldier, who was travelling, and had become very thirsty, "will you get me some water?" "Yes, my son, we will stop at the hotel yonder." "But do they sell *rum* there, father?" "I suppose they do, Henry." "Well, father, I had rather go without the water than to get it there."—[Youth's Pic Nic.

TO-MORROW!—Away with anxiety. Let us lean on Providence. There is a being to whom all the distinctions of time are the same, and who is able to dispose every thing for our wise improvement.

THE FRIEND.

HONOLULU, NOVEMBER 1, 1844.

AM. WHALE SHIP HOLDER BORDEN WRECKED

Agreeably to an intimation in our last Number, we now present the readers of the Friend with a more extended account of the Holder Borden and her loss. The reader may rely upon the accuracy of this account as it has been submitted to the examination of Captain Pell, who communicated the particulars to the Editor.

The Holder Borden 442 tons, was about three years old, and had made one voyage as a merchant ship to England, before sailing as a whale-ship. When leaving England, she went ashore, in the English Channel and knocked off her false keel. She was built and named in honor of Mr. Holder Borden, an extensive manufacturer in Fall River, Mass., who left his property mostly to three sisters, whose husbands were the builders and principal owners of this ship. She sailed on her first and only whaling voyage Nov. 10th., 1842, touched at Valparaiso in March following. At the time of sailing ship and cargo were valued at $65,000, and it was reported that they were insured for $60,000.

She arrived at this Port, March 15th., 16 mos. out, having taken 800 brls. sperm, and 700 black-fish oil, the latter was taken to the N. of Panama Bay. When she sailed from this Port on the 5th. of last April, her ship's company consisted of the following person——viz.

†Jabes J. Pell, Master, Fall River, Mass.
†B. F. Manchester, 1st. Off., Bristol, R. I.

5 Natives of the Sandwich Islands.
Total number, "all told" 37.

The Holder Borden's crew formed no exception to the remark, that seamen of "all nations" are found on board whale-ships—seven nations being represented.

After the ship left this Port nothing of importance occurred until she was lost. The following extracts are copied from the Ship's Log-Book. "Thursday, April 11th., commencing with strong trades—steering W. by N.—middle part took in top-gallant sails and flying gib, steering W. by S. Latter part fresh gales, reefed top-sails and took in main sail, steering N. W. by W. N. Lat. 24° 57′ W. Long. by Chro. 174° 09′" Friday, April 12th. Commencing with fresh gales from N. by E., steering N. W. by W., under a single reefed main, and double reefed fore and mizzen top-sails. Middle part more moderate. At 1 A. M. the ship struck on a shoal and *stuck*, hauled all the sails aback and used every exertion to get her off. In about 10 m. after she backed off. We immediately tried to get her round, but in a few seconds she struck again, being about 100 feet from a rock that lay above the water's surface, (the surf slightly breaking over it.) We tried every means that lay within our power to get her afloat, but found it impossible, as she was aground afore and aft, with 4 feet water in her hold. The night being very dark and we not knowing our situation commenced getting water up and getting the boats ready. At day-light we found that we were about 4 or 5 miles from a small sand island, bearing W. N. W. from the ship, and on the weather-side of a large field of scattering rocks and shoals. Finding it impossible to get her off, we commenced getting provisions, and other things that would be useful to us. At 7 A. M. cut the masts away to keep her from falling over."

Early in the morning some of the hands went on shore, and the day was spent in landing provisions &c. At 6 P. M. all hands went on shore. At sun-down the ship fell over on her star board side, in about 12 feet of water, the lower hold being full of water, and in this position she has remained, excepting that she has gradually sunk into the sand. Six days after landing they commenced building a small schooner, which was completed in four months and twenty-two days. All hands were busily employed, from day to-day, (Sabbath excepted) in discharging the ship's cargo, stripping off the rigging and taking on shore every thing that was valuable and moveable. They were so far successful as that only 80 bls. of oil were lost by the casks being stove, 40 bls. in large casks now remain in the forward part of the hold, together with 15 bls. of salt provisions. It is estimated that property to the amount of $30,000 has been saved. The island was not found upon the Ship's Charts, and there is a dispute whether it has ever previously been surveyed, its position discovered and laid down upon any chart. By repeated observations Captain Pell ascertained its position in W. Long. 174° 51′ and 26° 01′ N. Lat. It is triangular in form, and elevated about 40 feet above the sea. It is about 3 miles in circumference, being the most elevated in the N. W. part. The schooner was built at the S. W. point and their encampment made on the S. E. part. In digging about 5 feet, tolerably good water was found. The well was dug near the centre of the island, where there was formerly a lagoon. No trees were found upon the island, neither was there any trace of human foot-steps, which would induce the belief that it had ever been visited. The trunk of a north-west pine 50 feet long and 2½ in diameter had drifted to its shores. The island was covered with a species of coarse sea-grass, a few flowering vines, and inhabited by numerous species of sea-fowls, hair-seals, and green turtle. The ducks seemed peculiarly inclined to renounce their wild and roving propensities and adopt the domestic habits of civilized life! A flock of 40 had attached themselves to the settlement. The heat was often intense. At one time the mercury were to 106° F. but usually ranged from 92° to 98°. The mornings and evenings were cool.

* Remained on the island. † Returned in the Dela.

We take another extract from the log-book. "August 2d., Capt. and 1st. Officer went off in two boats to survey the shoals. We found the S. point bearing from E. by S. to E. by N., a good channel having from 4 to 7½ fathoms of water, and rocky bottom. Between the outer and inner reefs, good anchorage, the outer reef being two miles from the island. One mile out-side of the outer reef good anchorage, with from 4 to 12 fathoms of water. The shoal extends as far as the eye can reach from S. W. to S. as far round as S. E."

"Aug. 25. Saw from the schooner's mast-head what we supposed to be a small low island, in the S. E. direction. Sent off two boats to survey, and found a large field of rocks, from 20 to 25 miles distant, bearing E. S. E. to S. E. by S., from the island, with heavy breakers, and found it difficult to land."

The schooner built from the wreck of the Holder Borden, and named "Hope," was launched on the 10th. of September, and sailed for this Port on the following 14th., commanded by Capt. Pell. He arrived safely after a passage of twenty-three days, accompanied by twenty-five of his crew, eleven having remained upon the island. Those names marked with a star, remained on the island. Forty barrels of oil and a cable were brought in the schooner. On the 15th ultimo, the schooner was sold at public auction for $1,400, and other property to the amount of $1,500, for the benefit of the underwriters and owners. From the price which the schooner brought may be inferred that she was a craft, that speaks a good word for the ship-carpenter and others engaged in her construction. She is well built and copper fastened. Her masts are thought to be too short, but her model is pronounced good. May the "Hope" never disappoint her owners or those taking passage in her!

Capt. Pell left this Port, October 19, commanding the Am. Brig Delaware, which vessel he had purchased to remove the oil and whatever is valuable and moveable, to the United States. The Delaware was bought for $6,500. Unless something diastrious attends the shipping of the oil &c. from the island, Capt. Pell expects to return in six weeks to this Port or his way to the United States.

In reviewing the disaster which befell this noble ship, it is a source of much joy that no lives were lost. During all the time that Capt. Pell remained upon the island, "all hands" enjoyed good health. Shipwrecks and other disasters of the sea do befall seamen in this ocean, but they usually are not attended with that immense sacrifice of life which attends the loss of vessels in the Atlantic Ocean. Upon the shoals of the Pacific, the hulk of many a staunch-built vessel lies washed by the waves, but her inmates have returned to their homes or are encountering the perils of the sea in other climes; but rarely does the mariner escape with his life, when dashed upon the rocky shores that bound the Atlantic waters. Never were waters more rightly named than when this ocean was called Pacific.

The following extract is taken from the Captain's Journal "Saturday, Sept. 14th., commences with fine trades and pleasant. At 6 A. M. got under way with a fresh breeze from the N., steered to the southward and westward. At 10 A. M. run off the shoal lying off the S. W. part of the island. I judge the shoal runs off about 7 leagues from the island. At noon steered E. by S. bound for the Sandwich Islands. Lat. by observation 25° 47′ N."

P. S. The statement in the Polynesian of Oct. 20th., that "Pell's Island" is the same as Sand Island, is calculated to give a irroneous impression, because the location of Sand Island as placed on the charts differs nearly a degree in Long. from the position of Pell's Island. The position of the latter Island as defined by Capt. Pell, is undoubtedly correct, as the mean of all his Lunar observations agreed with his Chronometer, which on his return to Oahu proved to have varied but a triffle from its given rate.

We make these remarks upon the authority of a Nautical gentlemen, who has examined the charts and otherwise acquainted himself with the facts relating to the subject.

OVER LAND MAIL.

English Items. Thos. Campbell, the Poet, died 15th June, at Balogne.

The accouchment of Queen Victoria was expected to take place in August.

The Emperor of Russia had visited Queen Victoria, and the King of the French was expected in England in August.

Gen. Tom Thumb, the American Dwarf, had the honor of appearing before the Emperor of Russia.

The Steamer Caledonia had arrived in Liverpool, from Boston, making her passage in ten days.

O'Connel had been sentenced to £2000 fine and one years imprisonment for conspiracy.

The King of Hanover is dead.

Items extracted from Newspapers and Letters received by the Corvette Warren. Messrs. Richards and Haalilio, arrived in Boston just in time to be too late to take passage in the Inez, which sailed onthe 12 ht of May, for these Islands, via Tahiti.

They had not succeeded in getting back the $20,000 from France, or an indemnity from Great Britain.

P. A. Brimsmade, Esq. has been successful in making his arrangements with the Belgian Company.

The Whigs had nominated Henry Clay for President, and Theo. Frelinghusen for Vice President, and the Democrats, J. K. Polk, of Ten. for President, and G. M. Dallas of Penn. as Vice President. The former would probably be elected by a large majority.

Connecticut and Virginia had gone for the Whigs.

Congress adjourned June 17th.

Joe Smith the Mormon prophet and leader had been assassinated.

On the 7th 8th and 9th May there were several riots in Kensington, (Philadelphia) between the Irish and native Americans, in which a number of lives were lost, and the Catholic Church of St. Augustine and St. Michael were burnt to the ground, and also other buildings destroyed.

The House of Representatives in committee of the whole by a vote of 75 yeas to 49 nays, abolished the Spirit ration in the Navy, also by a vote of 67 to 63 abolished flogging in the Navy.

Commodore Shubrick is dead.

Mr. Spencer, Secretary of Treasury has resigned and Bibb of Kentucky was appointed in his place.

A Store Ship left New York for this place about the 1st of July, name Mariposa.

Commodore Jones had arrived home, and was to have the first vacant command on shore.

Two Arabian horses had arrived as a present from the Imaum of Muscat, to the President of the United States.

Fwo heavy shocks of earthquakes in the Island of Porto Rico, and other W. I. Islands.

Rev. Mr. Crocker, of the Am. Baptist Mission, died at Monrovia, Feb. 26.

The receipt of the A. B. F. Missions in June, were $20,467,43, and for the preceding year, $163,689,00.

Price of Sperm Oil on July 20th, 90 and 92 cents; Whale, 35 and 36 cents; Bone 40 and 42 cents.

New York Express, June 28.

Washington, June 8—9 P. M. Texas Treaty rejected! For it 16!—Against it 35!

The Texas treaty has just been rejected in a full Senate, by a vote of 35 to 16. Instead of a two-thirds vote for the treaty as the Texan Government were assured there would be, there are more than two-thirds against the treaty. Fifty-two Senators were present, and fifty-one voted. Mr. Hannegan of Ia. declining to vote.

The following are the yeas and nays. It will be seen that Mr. Henderson of Miss, (who probably felt himself instructed) was the only Whig who voted for the treaty. Benton and Wright, the strong men of the other side voted against it, carrying Allen, Atherton, Niles, Fairfield and Tappan, and throwing Hannegan, of Ia., off the track. Delaware, Maryland, Virginia, Louisiana, Kentucky, among the Slave States, were unanimously against the treaty, and North Carolina, Georgia and Missouri, had a divided vote. A majority of the Senators representing the Slave States were therefore opposed to the treaty.

For the Treaty.—Alabama, 2. South Carolina, 2. Mississippi, 2. Pennsylvania, 2. New Hampshire, 1. North Carolina, 1. Illinois, 2. Arkansas, 2. Georgia, 1. Missouri, 1.—16.

Against the Treaty.—Maine, 2. New Hampshire, 1. Massachusetts, 2. Vermont, 2. Connecticut, 2. Rhode Island, 2. New York, 2. New Jersey, 2. Delaware, 2. Maryland, 2. Virginia, 2. North Carolina, 1. Georgia, 1. Louisiana, 2. Tennessee, 2. Kentuckey, 2. Michigan, 2. Ohio, 2. Missouri, 1. Indiana, 1.—35.

From the New York Express, June 7th.

Oregon.. The Western (Mo.) Expositor of the 18th inst. says the Oregon company which rendezvoused in the vicinity of Independence, has started on its journey; and promises an account of its numbers, &c., hereafter. The same paper contains a letter to Col. Ford from Col. Gilliman, who commands another company of emigrantr, dated Oregon Camps, May 15, which says:

"Our company, when joined with yours, will be very large—much the largest that has ever crossed the Rocky Mountains. There are, in the Independent Oregon Colony, at this date—1 minister, 1 lawyer, 1 millwright, 3 millers, 1 tailor, 1 ship-carpenter, 2 blacksmiths, 1 cooper. 1 tailoress, 2 cabinet-makers, 5 carpenters, 4 wheelwright, 2 shoemakers, 1 weaver, 1 gunsmith, 1 wagonmaker, 1 merchant, and the rest farmers. There are 43 families, 108 men, (60 of whom are young men,) 323 persons, 4.0 oxen, 160 cows, (16 of which are term cows,) 143 young cattle, 54 horses, 41 mules, and 72 wagons. The number of horned cattle is 713 head. Many men from the adjoining counties are on their way to join us.

From the New York Express, June 28.

Difference of Longitude Determined by Morses Telegraph. Among the many wonderful developements of the new Telegraph, one has just come to light which will be regarded in the world of science as deeply interesting. Professor Morse suggested to the distinguished Abago, in 1839, that the Electro-Magnectic Telegraph would be the means of determining the difference of longitude between places with an accuracy hitherto unattained. By the following letter in the National Intelligencer, from Captain Charles Wilkes to Professor Morse, it will be perceived that the first experiment of the kind of which we have any knowledge, has resulted in the fulfilment of the Professors prediction:

Washington, June 13, 1844.

My Dear Sir:—The interesting experiments for obtaining the difference of longitude through your Magnetic Telegraph, were finished yesterday, and have proved very satisfactory. They resulted in placing the Battle Monument Square, Baltimore, 1m. 34s. 868 east of the Capitol.

The time of the two places was carefully obtained by transit observations. Lieutenat Carr and Eld assisted me in these observations. The latter was engaged in those at Baltimore. The comparisons were made through chronometers, and without any difficulty. They were had in three days, and their accuracy proved in the intervals marked and recorded at both places. I have adopted the results of the last days ob-

servations and comparisons, from the elapsed time having been less.

The difference from former results found in the American Almanac is 732 of a second After these experiments I am well satisfied that your Telegraph offers the means of determining *meridian distances* more accurately than was before within the power of instruments and observers.

Accept my thanks and those of Lieut. ELD for yourself and Mr. VAIL, for your kindness and attentions in affording us the facilities to obtain these results.

With great respect and esteem, your friend,
CHARLES WILKES.

Prof. S. F. B. MORSE,
Capitol, Washington.

TEMPERANCE.

For the Friend.

IS THE TRAFFIC IN INTOXICATING DRINKS IMMORAL?

BY AMICUS.—*No.* 4.

The affirmative of this question, I have attempted to support—with what success the reader will judge—from the fact, that *it conflicts with the revealed will of God.* If this has been satisfactorily shown, additional arguments, it may be said, are superfluous; for what can be more plainly *immoral* than *known* and *deliberate* and *persevering* opposition to the will of the moral Governor of the Universe? And what argument will be likely to influence the man who disregards the law of his Maker? The subject, however, is of too great importance to rest it on this single argument, though confessedly one of more weight than any other that can be produced. But lower considerations—those which appeal more directly to human affairs, to temporal interests, may possibly affect some minds more forcibly than the high one which has been presented in these papers. I therefore proceed to argue that the traffic in intoxicating drinks is immoral because, 2dly, *it conflicts with the law of love to our neighbor.*

"Thou shalt love thy neighbor as thyself," is classed, by the Great Lawgiver, with the first and the great command. In another connexion, the obligation of love to our neighbor, is stated and urged with extraordinary explicitness and force. "All things whatsoever ye would that men should do to you, do ye even so to them: for this is the law and the prophets." This has been called the "golden rule," and is justly admired by all good men, and praised not unfrequently by many who have little regard to the first and great command, which enjoins supreme affection to the blessed God. Let us then carefully examine this rule, and inquire what bearing the traffic in question has upon it.

The law of love to his neighbor, implied in the above rule, obviously requires every man to pursue a business which shall not only *not* injure, but which shall benefit his fellow men; a business which shall not only *not* diminish, but shall actually increase the amount of good in the community with which he is connected. He may not be a drone. He may not be industrious in a business which will yield no profit to his neighbor, though it might enrich himself—as the making, or bartering of things of no value in exchange for money or other valuable property. This law also requires that every man scrupuously avoid whatever would destroy the good name of his neighbor; impair his influence in his own family or his neighborhood; or contract his sphere of usefulness as a member of civil community. In accordance with the spirit of this law, every man must do all in his power, both by his example, and by his efforts, actually to increase the amount of good, of general good. His daily business must be such that every member of the community, other things being equal—might engage in it, not only lawfully, but profitably, in a manner subservient of the public weal. Such is the business of the farmer, the mechanic, the merchant, the seaman, and the professional man. Each of these, if he be an honest man, is serving his generation according to the will of God. His business is honorable. His example salutary. He adds to the amount of good in the community. He fulfills the law of love.

But how is it with the man who traffics in intoxicating drinks? He admires, it may be the "Golden Rule," does he fulfil the law of love? Look at him and his customers, and judge. He is no drone, not he. No man more industrious, enterprising than he is. He rises up early and sits up late. No pains, no expense does he spare in fitting up his establishment that it may be convenient, and attractive. He meets his customers with a smile—is affable and accommodating; eager to supply the demands of the miserable beings who crowd about him clamorous for the privilege of slaking their raging thirst at the fountain which he has opened. But to what end is all this industry, this affability, this promptitude in answering the calls of customers? Can he who traffics in intoxicating drinks say honestly, that his business is in accordance with the "Golden Rule," with the law of love? That it does not only *not* injure, but does actually benefit his fellow men? that it does not only *not* diminish, but does really increase the amount of good to the community? Can he say, believing his own declaration, that for the property which he obtains by the sale of his commodities, he renders a valuable equivalent? That he contributes to the reputation and domestic happiness of his neighbors? to their physical and mental energies, to their peace of mind; and especially to their preparation for the hour of death, and the scenes of the Judgment? It seems well nigh a mockery to propose these questions even to the trafficer in this article. He does not even flatter himself that his business has any such tendency. Nor dare he flatter himself, that like some kinds of business, his has a negative character—that like some branches of commerce it may be valuable or otherwise according to the disposition of those who are engaged in prosecuting them. He knows, or might know, that his traffic is *an evil, and only evil, and that continually;* that in its influence on individuals and on the community, it is withering, deadly; hence that it *conflicts with the law of love to our neighbor.*

To substantiate the above assertions—should any one question their correctness—I beg leave to call the attention of the reader to the Permanent Temperance Documents, from which I have already made extracts. Speaking of the traffic in intoxicating drinks, the Executive Committee of the American Temperance Society, men carefully selected from three or four different professions—say—"It is the selling of that, without the use of which nearly all the business of this world was conducted till within less than three hundred years; and which of course is not needful."

2. It is the selling of that, which was not generally used by the people of this country, for more than a hundred years after the country was settled; and which, by hundreds of thousands, and some in all kinds of lawful business, is not used now.

3. It is the selling of that which is a real, a subtil, and very destructive *poison.*

4. It is the selling of that, which tends to form an unnatural and a very dangerous and destructive appetite.

5. It is the selling of that, which causes a great portion of all the pauperism in our land.

6. It is the selling of that, which excites to a great portion of all the crimes that are committed.

7. It is the selling of that which makes wives widows, and children orphans; which leads husbands often to murder their wives, and wives to murder their husbands; parents to murder their children, and children to murder their parents; and which prepares multitudes for the prison, for the gallows, and for hell.

Can any man, I seriously ask, can any man doubt, for a moment, that the traffic in intoxicating drinks *conflicts with the law of love to our neighbor*—that it is unlawful in the highest sense of the word, hence that it is *immoral?*

AMICUS.

ORIGIN OF INVENTION.—Electricity was discovered by a person observing that a piece of rubbed glass, or some similar substance, attracted small bits of paper, &c. Galvanism, again, owes its origin to Madame Galvani's noticing the contraction of the muscles of a skinned frog, which was accidentally touched by a person at the moment of the professor, her husband, taking an electric spark from the machine. He followed the hint by experiments. Pendulum clocks were invented from Galileo's observing the lamp in the church swing to and fro. The telescope we owe to some children of a spectacle maker placing two or more pairs of spectacles before each other, and looking through them at different objects. The barometer originated in the circumstance of a pump, which had been fixed higher than usual above the surface of the well, being found not to draw water. A sagacious observer hence deducted the pressure of the atmosphere, and tried quicksilver. The Argand lamp was invented by one of the brothers of that name having remarked that a tube held by chance over a candle caused it to burn up with a bright flame—an effect before unattainable, though earnestly sought after. Without the Argand lamp, the light houses (to pass over minor objects) could not be made sufficient; and on the importance of these it is needless to dwell.

CURIOUS FACT.—The hexagonal cells of bees have angles of 70 degrees 34 minutes. This enables them to enclose a given space with the least possible quantity of material.

THE LOVE OF THE JEWS FOR THEIR NATIVE COUNTRY.—Independently of that natural love of country which exhibits among this people, two objects bring the Jew to Jerusalem; to study the Scriptures and the Talmud—and then to die, and have his bones laid with his forefathers in the valley of Jehoshaphat, even as the bones of the patriarchs were carried up out of Egypt. No matter what the station or the rank; no matter what, or how far distant the country where the Jew resides, he still lives upon the hope that he will one day journey Zion-ward. No clime can change, no season quench, that patriotic ardor with which the Jew beholds Jerusalem, even through the vista of a long futurity. On his first approach to the city, while yet within a day's journey, he puts on his best apparel; and when the first view of it bursts upon his sight, he rends his garments, falls down to weep and pray over the long-sought object of his pilgrimage; and with dust sprinkled on his head, he enters the city of his forefathers. No child ever returned home after long absence, with more yearnings of affection; no proud baron ever beheld his ancestral towers and lordly halls, when they had become another's, with greater sorrow than the poor Jew when he first beholds Jerusalem. This, at least, is patriotism. It is curious to read the indications of fond attachment to its very air and soil, scattered about in the Jewish writings: still, it is said, that man is esteemed more blessed, who, even after his death shall reach the land of Palestine, and be buried there, or even shall have his ashes sprinkled by a handful of its sacred dust. "The air of the land of Israel," says one, "makes a man wise;" another writes, "he who walks four cubits in the land of Israel is sure of being a son of the life to come." "The great wise men are wont to kiss the borders of the Holy Land, to embrace its ruins, and roll themselves in its dust." "The sins of all those are forgiven who inhabit the land of Israel. He who is buried there is reconciled with God, as though he were buried under the altar. The dead buried in the land of Canaan first come to life in the days of the Messiah." It is worthy of remark, as stated by Sandys, that so strong is the desire this singular people have always manifested for being buried within these sacred limits, that in the seventeenth century large quantities of their bones were yearly sent thither from all parts of the world for the purpose of being interred in the valley of Jehoshaphat; for the Turkish rulers at that time permitted but a very small number of Jews even to enter Palestine. Sandys saw shiploads of this melancholy freight at Joppa; and the valley of Jehoshaphat is literally paved with Jewish tomb-stones —[Wilde's Narrative.

A LITERARY TASTE FAVORABLE TO VIRTUE.—An attachment to literary pursuits—a desire for the acquisition of knowledge in general, will, for the most part, be found to co-exist with a virtuous turn of mind. Every species of literary, as distinguished from scientific composition, is directly or indirectly didactic: for though vice may be propagated by books as well as virtue, there is no branch of literature of which this is the nature, though it may be the perversion; and he who has a relish for immoral productions, has not a taste for literature, (any more than a merchant, in calculating his profits, has a turn for mathematics,) but merely for literature so far as it is a means of pampering his debased propensities. A taste for literature, then, is in general a taste for the lessons of virtue."

EXTRACT.—"I know of but one thing safe in the universe, and that is truth. And I know of but one way to truth for an individual mind, and that is, unfettered thought. And I know but one path for the multitude to truth, and that is, thought freely expressed. Make of truth itself an altar of slavery, and guard it about with a mysterious shrine; bind thought as a victim upon it; and let the passions of the prejudiced multitude minister fuel; and you sacrifice upon the accursed altar, the hopes of the world!"

MEANS AND ENDS.—"As in the steam-engine the most wondrous and valuable parts of the machinery are those which escape the notice of the casual visiter, so, in the administration of public affairs, the greatest merits of the statesman are those which escape the cognizance of the generality of mankind. Men are so dazzled by the mightiness of the powers evoked, that they pay little regard to their adaptation to the end desired; at any time, a great war producing small results is more likely to be popular, than a small war producing great results. An express revelation was necessary to teach the prophet that God was neither in the wind, nor in the earthquake, nor in the fire, but in the still small voice."

YOURSELF.—You cannot find a more companionable person than yourself, if proper attention be paid to the individual. Yourself will go with you wherever you like, and come away when you please.—approve your jokes, assent to your propositions, and in short, be in every way agreeable, if you only learn and practice the true art of being really "on good terms with yourself." This, however, is not so easy as many imagine, who do not often try the experiment. Yourself, when it catches you in company with no other person, is apt to be a severe critic on your faults and foibles; and when you are censured by yourself, it is generally the severest and most intolerable species of reproof. It is on this account that you are often afraid of yourself, and seek any associates, no matter how inferior, whose bold chat may keep yourself from playing the censor. Yourself is likewise a jealous friend: if neglected and slighted, it becomes a "bore," and to be left for even a short time "by yourself" is then regarded as actually a cruel penance, as many find when youth, health, or wealth, have departed. How important is it then to know thyself, to cultivate thyself, to respect thyself, to love thyself warmly but rationally.

It is a most excellent rule to avoid gross familiarity, even where a connexion is most intimate. The human heart is so constituted as to love respect. It would indeed be unnatural in very intimate friends to behave to each other with stiffness; but there is a delicacy of manner, and a flattering deference, which tends to preserve that degree of esteem which is necessary to support affection, and which is lost in contempt when a too great familiarity is allowed. An habitual politeness of manners will prevent even indifference from degenerating into hatred. It will refine, exalt, and perpetuate affection.

Integrity is a great and commendable virtue—a man of integrity is a true man, a bold man and a steady man. He is to be trusted and relied upon. No bribes can corrupt him, no fear daunt him. His word is slow in coming, but sure. He shines brightest in the fire, and his friend hears of him most when he most needs him. His courage grows with danger, and conquers opposition by constancy. As he cannot be flattered or frightened into that he dislikes, so he hates flattery and temporising in others. He runs with truth and not with the times—with right and not with might; his rule is straight—soon seen, but seldom followed.

Moderate desires, says the late President Dwight, constitute a character fitted to acquire all the good which this world can yield. He who is prepared, in whatever situation he is, therewith to be content, has learned effectually the science of being happy; and possesses the alchymic stone which will change every metal into gold: such a man will smile upon a stool, while Alexander, at his side, sits weeping on the throne of the world.

CONSUMPTION.—There is a dread disease which so prepares its victim as it were for death, which so refines it of its grosser aspect and throws around familiar looks, unearthly indications of the coming change—a dread disease, in which the struggle between soul and body is so gradual, quiet and solemn, and the result so sure, that day by day, and grain by grain, the part wastes and withers away, so that the spirit grows light and sanguine with its lightening load, and feeling immortality at hand, deems it but a new term of mortal life—a disease in which death and life are so strangely blended, that death takes the glow and hue of life, and life the gaunt and grisly form of death—a disease which medicine never cured, wealth warded off, or poverty could boast exemption from—which sometimes moves in giant strides, and sometimes at a tardy sluggish pace; but, slow or quick, is ever sure and certain.

EXTRACT.—"I first look up to heaven, and remember that my principal business here is to get there; I then look down upon the earth, and call to mind how small a space I shall occupy in it when I come to be interred; I then look around in the world and observe what multitudes there are in all respects more unhappy than myself. Thus I learn where true happiness is placed, where all our cares must end, and what little reason I have to repine or complain."

If a friend ask a favor, you should grant it if it is reasonable; if it is not, tell him plainly why you cannot. You will wrong yourself, and wrong him, by equivocations of any kind. Never do a wrong thing to make a friend, or to keep one: the man that requires you to do so, is dearly purchased at such a sacrifice. Deal kindly but firmly with all men: you will find it the policy which wears best. Above all, do not appear to others what you are not.

A GOOD CREATURE OF GOD.—The Rev. Thomas P. Hunt, the drunkard's friend, used to tell a good story of a young bragging opponent of the temperance cause, who thought he could put it all down by quoting scripture. One very cold night he staid at the house of a good lady, who was a warm friend of the temperance cause; but, amid a circle of young friends he bore triumphantly the palm as an anti temperance hero, by showing from scripture that every creature of God was good, and to be received with thanksgiving. When the hour of retirement came, the good lady introduced him into a very cold chamber, where stood a bed covered with large cakes of ice. "O!" he exclaimed, "you are not going to put me under blankets of ice!" "Ice, sir," said she—"why ice is a creature of God, and you said every creature of God is good and to be received with thanksgiving. I hope you will be very thankful for it for a covering, for I am sure it is as good for that as firewater is to drink; so, good night, sir."

READING.—Give a man this taste, and the means of gratifying it, and you can hardly fail of making him a happy man. You place him in contact with the best society in every period of history. You make him a denizen of all nations—a contemporary of all ages.—[Sir J. Herschell.

BE SOMETHING.—One principle of the mussulmen creed is, that every person shall have a trade. Thus should it be the world over. See the young man, no matter what are his circumstances or his prospects, if he has no plan he never will accomplish much. If he relies upon his present possessions, or upon the anticipated favors of fortune, ten to one if his fine hopes are not blighted, and he find, too late, that the only path to true greatness is by application.

Education is a companion which no misfortune can depress; no crime destroy; no economy alienate; no despotism enslave. At home a friend; abroad an introduction; in solitude a solace; in society an ornament. It chastens vice; it guides virtue; gives at once grace and government to genius.—Without it what is man? A splendid slave; a reasoning savage; vascillating between the dignity of an intelligence derived from God, and the degradation of passions participated with brutes.

ITEMS RESPECTING WHALE SHIPS.

NICHOLAS GORDON, a blacksmith, who left the Ann Mary Ann, a few months since in this Port, has opened a shop near the store of Tyhoun, the Chinaman, and he desires to share with others the patronage of the public.

We regret to learn that Capt. Brown, of the Hannibal, of New London, has been obliged to leave his ship at Lahaina, and take passage home on board the Daniel Webster. From the same cause Capt. B. was unable to go to the N. W. the last season. During the absence of his ship he was a member of our family, and we are most happy in bearing testimony to his excellency and worth as a man and christian.

Capt. Lawrence, California, reports B. Brothers, 28 July, 400 s. the season. Columbia, 28 June, 60 s. the season. Adaline, Gibbs, 20 Sept., 800 s. the season.

The Bremen ship Alexander Barckley, took 2,400 w. oil this season, on the coast of Kamschatka, near St. Peter's and St. Paul's. The ship was one month within sight of land.

The Bk. Pantheon, fortunately shipped 1,000 bbls of oil to the U. S. one year since, by the Wm. and Eliza, which will probably add one fourth to the profit of her voyage, as the vessel does not carry over 2,600 bbls, and as she has been successful this season. She took her oil N. L. 50° and 55°, W. L. 150° and 155°, whales plenty.

The whale ship Warren, of Warren, R. I., is now having a new fore mast made at this Port, by Messrs. Drew and Shelton.

Important to Mariners in the Pacific.

Having obtained accurate information of three dangerous rocks in a juxtaposition with the Curtis Islands, in the S. Pacific Ocean, I deem it my duty to publish in as concise and succinct a form as may be, conveniently, for the benefit of mariners. The positions of these dangers lie directly in the track of ships cruising for sperm whales—in the parallels of latitude 31° 14′ S., and the longitude of 178° 8′ W., bearing E. N. E. by compass from the French Rock, about 45 miles distant; said to be 12 feet of water on it; but no breakers were discerned.

"The second rock was discovered in the latitude of 31° 17′ S., and in the longitude of 179° W., bearing W N W. from the French Rock, 10 miles distant; just a wash with the surface of the sea; and breaks high in boisterous weather.

"The third danger was observed in the latitude of 31° 28′ S., and in the longitude of 178° —′ E., bearing W. by the French Rock, about 133 miles distant; and heavy breakers were discerned when the surface is roughened by the wind." N. Bedford Mercury.

June 14, oil is quoted as follows:—New Yook market.—N. W. oil for export, 34 1-2 cents cash. June 28, N. W. oil firm and quick at 35 cents. Whale bone 37 cents. June 7th, crude sperm, 92 1-2 cents.—Sperm oil on July 20th, 90 and 92 cts. whale 35 and 36 cents, bone 40 and 42 cents.

THE JUG OF RUM.

From the Western Star, (published in Mass., 1792.)

Within these earthen walls confin'd
The ruin lurks of human kind;
More mischiefs here united, dwell,
And more diseases haunt this cell,
Than ever plagued the Egyptian flocks
Or ever curs'd Pandora's box.

Within these prison walls repose
The seeds of many a bloody nose,
The chattering tongue, the horrid oath,
The fist for fighting nothing loth,
The nose with diamonds glowing red,
The bloated eye, the broken head!

Forever fasten'd be this door—
Confined within a thousand more;
Destructive fiends of hateful shape
E'en now are planning an escape:

Here, only by a cork controled,
And slender walls of earthen mould,
In all their pomp of death, reside
REVENGE, that ne'er was satisfied,
The TREE that bears the deadly fruit
Of maiming, murder, and dispute,
ASSAULT, that innocence assails,
The images of gloomy jails,
The *giddy thought*, on mischief bent,
The *evening hour* in folly spent,—
All these within this jug appear,
And—Jack, the hangman, in the rear!

Thrice happy he, who early taught
By nature—ne'er this poison sought;
He with the pearling stream content,
Th' beverage quaffs that nature meant;
In reason's scale his actions weigh'd,
His spirits want no foreign aid;
Long life is his—his vigor pass'd
Existence welcome to the last;—
A spring that never yet grew stale;
Such virtue lies in ADAM'S ALE.

The Chaplain has recived letters overland for the following persons, Masters of whale ships:—Captains Albert McLean, Palladium; N. S. Middleton, Alert; Parker H. Smith, Nantasket.

PORT OF HONOLULU.

VESSELS IN PORT, OCT. 31.

Vessels of War:—U. S. S. Warren. Her M. Ketch Basilisk.

Merchantmen:—Am. Ship Congaree, Brig Globe, Eng. Brq. Honolulu, Brigs Clemantine and Euphemia.

Whalers:—Am. (inside) ships California, Hope, Warren, Orozimbo, Damon, Nassau, Phillip Tabb, Janus, Peruvian, Splendid, Massachusetts, Navy, Eng. Indian, (outside) "17th of May," (Norwegian) Fr. Ville de Reine, Am. Minerva Smith, Wm. Hamilton, Hannibal, Milo, Neptune, Samuel Robertson.

ARRIVED.

Oct. 12, Ship Wm. Penn, Lincoln, Falmouth, 35 mos, 1300 sperm, 100 whale Ship Stonington, Hamby, New London, 12 months, 50 sperm. 2050 whale, off and on. Ship Benj, Tucker, Sands, New Bedford, 9 months, 70 sperm, 3200 whale, off and on.

Oct. 17, Ship Warren, Gardner, Warren, R. I. 14 mhs, 1300 whale. Ship Phillip Tabb. Webb, Warren, 14 months, 2800 whale. Ship Janus, Turner, New Bedford, 24 months, 200 sperm 3000 whale.

Oct. 18, Ship Ann Mary Ann, Winters, Sag Habor, 23 months 2300 whale. Brq. Pantheon, Borden, Fall River, 23 months, 75 sperm, 3250 whale, (part of the cargo shipped home).

Oct. 20, Ship Ealcon, Richmond, New Bedford, 14 ms, 180 sperm, 1300 whale.

Oct. 21, Ship Massachusetts, Nickerson, Nantucket, 1330 sperm, 1370 whale. Ship Navy, Smith, New Bedferd, 13 months, 230 sperm, 2520 whale.

Oct. 23, Ship Orozimbo, Bartlett, New Bedford, 15 ms, 2800 whale.

Oct. 24, Ship California, Lawrence, New Bedford, 29 months, 2400 sperm.

Oct. 25, Ship Benjamin Rush, Gifford, Warren, 38 ms, 1000 sperm, 650 whale.

Oct. 26, Ship Maine, Smith, 300 sperm, 1400 whale.

Oct. 27. Ship Nassau, Weeks, New Bedford, 39 months, 1100 sperm, 1800 whale. Ship Gustave, Norton, Bremen, 1700 whale, Ship Ville de Reine, —— Havre, 25 months, 2400. U. S. S. Warren, Hull, brings mail from Mazatlan. Brq. "17th of May," Holmer, Norway, 10 months, 50 sperm, 800 whale. The first Norwegian vessel in this port.

Oct. 28, Ship Milo, Gardner, New Bedford, 16 months, 100 sperm, 2400 whale. Mrs. Gardner accompanies the Captain. Brq. Noble, Sweeny, New Suffolk, 14 months, 120 sperm, 1080 whale.

Oct. 30, William Hamilton, Cole, New Bedford, full.

DEPARTURES DURING THE MONTH OF OCTOBER.

Oct. 2, Fr. whale ship Ganges. Am. Brq. Cossack. Fr. Brq. Faune,

Oct. 3, Fr. Brq. Eliza. Am. whale ship Frances, home.

Oct. 7, Am. whale ship Ed. Cary, cruise.

Oct. 8, Am. whale ship Oregon, home.

Oct. 15, Am. wh. Brq Superior, home.

Oct. 19, Am. whale ship, Ann Mary Ann, cruise.

Oct. 19, Brig Delaware, Pell.

Oct. 21, Am. whale ship Falcon, cruise.

Oct. 25, Am whale ship Ann Alexander, cruise. Benj. Rush, cruise.

Oct. 26, Am. whale ship Levi Starbuck, home. Wm. Thompson, Canada, James Stewart.

Oct. 27, Brq. Pantheon, home.

Oct. 31, whale ships Wm. Penn, and Augusta.

PORT OF LAHAINA.

ARRIVED.

Oct. 7, Am. whale-ship Clematis, Bailey, New London, 17 months, 2600 whale, 26,000 lbs. bone. Minerva Smith, Fisher, New Bedford, 9 months, 165 sperm, 1500 whale, 20,000 lbs. bone. Ann Mary Ann, Winter, Sag Harbor, 23 months, 2300 whale, 18,000 lbs. bone. Barque Harvest, Taber, Fairhaven, 12 months, 1200 whale, 10,000 lbs. bone. Ship Illinois, Jaggar, Sag Harbor, 11 months, 2970 whale, 30 sperm, 24,000 lbs. bone.

Oct. 8, Am. whale-ship Statira, Adams, New Bedford, 13 months, 2250 whale, 115 sperm, 24,000 lbs. bone.

Oct. 9, Am. Brq. Connecticut, Hempstead, New London, 13 months, 1820 whale, 80 sperm, 18,000 lbs. bone. Ship Champion, Pease, Edgartown, 37 months, 1400 whale, 1300 sperm, 15,000 lbs. bone.

Oct. 10, Am. brq. Persia, Whippey, New Bedford, 14 months, 700 whale, 60 sperm, 7,000 lbs. bone.

Oct. 11, Am. brq. Clement, Fuller, New London, 13 months, 1,100 whale, 12,000 lbs. bone. Ship Warren, Gardner, Warren, 14 months, 1700 whale, 18,000 lbs bone.

Oct. 12, Am. whale-ship Gratitude, Stetson, New Bedford, 42 months, 1000 sperm, 300 whale, 9,000 lbs bone. Navy, Smith, New Bedford, 13 months, 2520 whale, 230 sperm, 25000 lbs. bone. Susan, Russell, Nantucket, 34 months, 500 sperm, 500 whale, 5,000 lbs. bone.—*Polynesian.*

Oct. 14, Am. whale-ship Orozimbo, Bartlett, New Bedford, 15 months, 38000 whale, 40,000 lbs.bone. Brq. Gem, Worth, Sag Harbor, 12 months, 2600 whale, 30,000 lbs. bone. Ship Fanny, Edwards, Sag Harbor, 9 months, 40 sperm, 2050 whale, 15,000 lbs. bone.

Oct. 15, Brq. Noble, Sweany, New Suffolk, 14 months, 120 sperm, 1080 whale, 8000 lbs bone.

Oct. 16, Ship Young Hero, Brock, Nantucket, 29 months, 1050 sperm. Ship Milo, F. M. Gardner, New Bedford, 16 months, 100 sperm, 2400 whale, 24,000 lbs bone. Ship Samuel Robertson, Warner, N. Bedford, 35 months, 1200 sperm.

Oct. 17, Ship Richmond, Ludlow, Cold Spring, 10 ms, 2400 whale, 25,000 lbs bone. Ship William Hamilton, Cole, New Bedford, 26 months, 300 sperm, 4,000 whale, 40,000 lbs bone.

Oct. 18, Ship Franklin, Chadwick, New Bedford, 18 months, 1150 whale, 1,000 lbs bone. Ship Leonedas, Waldron, Bristol, 16 months, 60 sperm, 1340 whale, 12,000 lbs bone. Ship Euphrates, Post, New Bedford, 15 months, 500 sperm, 300 whale.

Oct. 19, Ship Washington, Sandford, Sag Harbor, 16 months, 25 sperm, 2700 whale, 24,000 lbs bone. Ship Daniel Webster, Carry, Sag Harbor, 14 months, 25 sperm 3225 whale 35,000 lbs bone. Ship Gen. Williams, Holt, New London, 15 months, 4500 whale, 50,000 lbs bone.

Oct. 21, Ship Java, Shockley, New Bedford, 16 months, 60 sperm, 2300 whale, 25,000 lbs bone. Brq. Bayard, Fordham, Greenport, 12 months, 40 sperm, 2000 wh, 20,000 lbs bone. Ship Swift, Fisher, New Bedford, 34 months, 800 sperm, 1500 whale, 15,000 lbs bone.

Oct. 23, Ship Herald, Morgan, Stonington, 16 months, 170 sperm, 1230 whale, 10,000 lbs bone

Oct. 24, Ship Chili, Dexter, New Bedford, 15 months, 2100 whale, 25,000 lbs bone. Ship Hydaspe, Post, New Bedford, 42 months, 850 sperm, 850 whale, 8,000 lbs bone. Crescent, Miller, Sag Harbor, 12 months. 1000 whale, 6000 lbs bene. Ship Ann, Leek, Sag Harbor, 15 months, 1200 whale, 12,000 lbs bone.

Oct. 25, Richard Mitchell, Long, Nantucket, 12 mhs, 550 sperm, Ship Huron, Green, Sag Harbor, 13 ms, 2400 whale, 22,000 lbs bone. Ship Hamilton, Peck, Bridgeport, 12 months, 135 sperm, 1570 whale, 15,000 lbs bone.

For Shipping news we are under great obligations to Mr. G. D. Gilman.

DONATIONS.

For general expenses of the Chaplaincy.—Captain Doane, Am. Brig Globe— $15,00
Capt. Pell, former master Holder Borden— 4,00
Physician Fr. whale ship Ocean— 1,00
E. F. Nye, seaman of ship Janus— 50

For Temperance, (or printing the Friend),—Capt. Delano, Brq. Cossack— $4,00
Capt. Cole, Wm. Hamilton— 10,00
Capt. Bishon, Brq. Superior— 5,00
Dr. Baker, Eng whale ship James Stewart— 3,00
George W. Dow, seaman Benj Tucker— 1,00
Seth Wyatt, seaman Hope— 50
Otis Stowell, seaman Ann Alexander— 63
Ebenezer Nickerson, seaman Levi Starbuck— 50
E. F. Nye, seaman Janus— 1,00
Friend— 50

For Bibles—Portuguese seaman— $1,50
American seaman— 52
For books sold to seamen— 3,00

MARRIED.

His Excellency, JOHN TYLER, President of the U. States, to Miss Julia Gardner, eldest daughter of the late Hon. David Gardner, of Long Island, New York, one of the unfortunate persons killed on board the steam vessel Princeton. The ceremony took place June 26th, at the church of the Ascension, New York City. The Rt. Rev. Bishop Onderdonk officiating.

In Honolulu, Oct. 24, Mr. H. Wood, (col.) naturalized Hawaiian subject, to Nika, a native Hawaiian. The ceremony was performed by Rev. Samuel C. Damon, Seamen's Chaplain.

DIED.

At the American Hospital, in Honolulu, Oct. 17th, Mr. John Massey, 2d officer of Am. whale ship Chelsea, N. London, Ct. Report says that he belonged to Boston, Mass. Among his papers was found a letter addressed to him, by a near friend, dated "Watertown Arsenal, Mass. Aug. 9th, 1843.—George Hill."

At the American Hospital in Lahaina, Oct. 3d, Jeremiah Hatch, seaman on board Brq. George. He belonged to some part of Long Island, N. Y.

On board Benj. Rush, Oct. 9, 1842, George Williams, colored man, steward, 25 years old. He belonged to N. York City.

Ship Hydaspe, Capt. Post, of N. Bedford, lost by scurvy, James Francis, of Martha's Vinyard; Geo. Shaw, Salem; Jacob Handy, New York; Abraham Thompson, Albany; Joseph Francis, ——; Wm. H. Wheat, ——. The rest of the crew down with the scurvy—only Capt., Mate, and one man to work ship.

FOR SALE.—At the study of the seamen's chaplain, vol. I., Temp. Ad. & Seamen's Friend. Price $1 25, bound.

N. B.—The Seamen's Chaplain has for sale and gratuitous distribution, Bibles and Testaments, in the English, French, Swedish, Portuguese, Spanish and Danish languages.

The Friend of Temperance and Seamen, published monthly, 8 pages, by SAMUEL C. DAMON, Seamen's Chaplain.

TERMS.—$1 50, per annum, One Copy, payable in advance; $3 00, Three Copies; $4 00, Five Copies; $6 00, Ten Copies. Single No. 12 1-2 Cents.

THE FRIEND,

OF TEMPERANCE AND SEAMEN.

VOL. II. HONOLULU, OAHU, SANDWICH ISLANDS, MONDAY, DECEMBER 2, 1844. No. XII.

For the Friend.

NOTES

On the Shipping, Trade, Agriculture, Climate, Diseases, Religious Institutions, Civil and Social Condition, Mercantile and Financial Policy of the Sandwich or Hawaiian Islands, viewed in relation to other groups of islands, and to the natural and acquired advantages of the Sandwich or Hawaiian Islands. By ROBERT CRICHTON WYLLIE, Esquire.

(*Continued from No. XI, page 99.*)

74. SALTING PROVISIONS. This business has already been tried, and the Beef and Pork are found to take the salt well. A new mode of salting on the principle of placing the meat in a *vacuum*, and letting in the brine or pickle, has been patented in London, under the auspices of my friend *Dr. Elmore.* The apparatus is simple and cheap, and the process more certain and quick in its operation than the old mode, commonly known.

The annual concourse of vessels at these Islands, ought to afford a demand for salted provisions, if they can be produced at a cheap price, and of good quality. As cattle are already abundant, and fast multplying, while salt and casks can be procured in any desired quantity, I see no reason why such provisions should not be well and cheaply prepared here.

75. TANNERY AND CURRIERY. The abundance of hides, sheep skins, goat skins, calf skins, &c. affords facilities for the establishment of such useful trades in these Islands. In the Island of Hawaii, I am informed, bark is found, which has been applied, with great success to the purpose of tanning. It is probable that the same or other barks may be found, in the other Islands, were a demand for them to arise.

76. WEAVING AND SPINNING. In all communities, there are women, children of a certain age, old people, and infirm, not able to work in the fields, but of sufficient strength to engage in weaving, spinning, or other light in-door occupations.

Where cotton and wool are articles of natural growth, and materials for dying can be found, it could be matter of no great difficulty to teach the natives to prepare the wool, dye it, spin it, and weave it up into coarse shirts, blankets, caps, stockings, cloaks, girths, suspenders, mantles, and other little articles that might be useful to the natives, and even bought to some extent, by the crews of whalers.

A Fancy Fair for the sale of these articles might be held twice a year when the whale ships crowd the Port. On such occasions, mats, baskets, and other curiosities, made or collected by the natives, might be offered for sale.

It is impossible to overrate the importance to the Sandwich Islands of a system of general industry to its inhabitants of all classes. It would lead not only to the benefit of the whole, but of every individual; it would beget feelings of self-respect and independence, establish order and morality, promote health and vigour, unite the members of families, villages and districts together, engender patriotism, and powerfully counteract the progress of depopulation.

77. PORT OF LAHAINA, ISLAND OF MAUI. I now proceed, Rev. Sir, as I promised to you, on the 15th March last, to hand you a table of the whalers that have touched at the Port of Lahaina, since 1836, adding some remarks relating to whalers generally and particularly to that Port.

Yearly arrivals of whale ships, for seven years, from 1837 to 1843, inclusive, at the Port of Lahaina, Maui, Sandwich Islands, according to accounts kindly furnished by Messrs. Peck & Co, and Rev. Dr. Baldwin.

VESSELS.	1837	1838	1839	1840	1841	1842	1843
American whalers.	55	66	50	39	70	84	232
British "	7	5	1		2	8	4
French "		1	1		1	5	2
St. Johns, N. Bruns						1	3
Bremen "							5
Sydney "							1

The increased afflux of vessels in 1843, is very remarkable; and I am not sure that there may not have been more arrivals during that year, for the data before me, commence only on the 16th February, and extend no farther than the 7th November.

The present year, (1844) is not yet completed, but it is far enough advanced to prove that the number of ships at *Lahaina*, will greatly exceed even that of 1843. From the 7th January to the 14th May, 126 ships had arrived, and 115 from the 1st July to the 8th of October; in all, 251. Excepting 8 Bremen vessels, 10 French and 1 Danish, all were Americans.

In this Port of *Honolulu*, in 1843, there were only 135 arrivals of whale ships, and so far as this year has yet run, I fear there will be fewer in 1844, thus justifying the remarks previously made in my note 53, published in the Friend of 4th September. If the inhabitants of Honolulu wish to preserve the trade, and see their property, whether in land or houses, increase yearly in value, it becomes them seriously to consider why the whalers prefer *Lahaina* to this Port, and to remove any disadvantages they may here labor under, that can be removed.

In my notes number 9 and 10, in the Friend of 1st July, I have already shewn the vast importance of the concourse of whalers that yearly frequent these Islands, and that the annual expenditure of each has been calculated at from 800 to 1300 dollars But supposing that each vessel on an average, should only spend 400 dollars during each visit, that amount on 251 vessels, would leave for Lahaina $100,400 annually.

78. MONTEREY, UPPER CALIFORNIA. The importance of holding out every possible inducement to whalers to continue the preference they have hitherto given to these Islands is so much the greater, that Mexico—the last nation to adopt any thing wise or liberal concerning trade or shipping—has at last opened its eyes to the policy of attracting them to the Ports of California. It appears that in the Port of *Monterey*, the authorities have reduced the Port charges on whalers to but 4 dollars, and the *farmers* are making great efforts to supply every thing they want, at cheap rates. As the Ports of California are so conveniently situated for the whalers that fish on the North West coast, which of late, are by far the greatest number, their competition with these Islands, is so much the more to be dreaded.

Latterly the attention of the American whalers has been directed to the *sperm fishery*, less than in former years, and the success of those who do fish for *sperm* has not been what it was, seven and ten years ago.

This result appears from the following figures, which I take from Messrs. Peck & Co.'s statements.

YEARS.	Number of ships.	Average take of sp oil.
1833	24	524 barrels.
1834	45	504 "
1835	38	555 "
1836	44	561 1-3 "
1837	44	438 "
1838	51	388 1-4 "
1839	32	409 "
1840	29	285 "
1841	34	444 1-2 "
1842	36	406 "

During the latter year, there were 16 of the arrivals from the North West coast, where the average take of black oil was 1750 barrels.

During the present year the success of whalers in that quarter has been great and general beyond any former example. It has also been great on the coast of Japan, with those who fish for sperm.

The question whether, with all the fishing during the last 164 years, the number of whales, throughout the ocean, has become diminished, or only so, in particular seas, or quarters of those seas, is one upon which the most experienced whaling Captains give very contradictory opinions. Some light upon this important point will be thrown by the following tables relating to the Greenland whale fishery, and the whale fishery in general, as it has been conducted, and is still pursued by British vessels.

GREENLAND WHALE FISHERY.

RETURN OF SIX YEARS, shewing the three largest and the three smallest Importations of Thirty years, in the early period of the Fishery.

YEAR.	Number of Ships Employed	Average Quantity of Oil imported for each Ship.
		Tuns.
1680	148	117
1688	214	19
1696	100	48
1701	207	130
1705	157	137
1710	137	6

RETURN OF EIGHT YEARS, shewing the four largest and the four smallest Importations of the last Twenty Years.

YEAR.	Number of Ships Employed	Average Quantity of Oil Imported for each Ship.
		Tuns.
1822	121	71
1823	117	146
1828	95	150
1830	91	24
1832	81	155
1836	59	13
1838	39	103
1840	31	15

The erroneous impression that the falling off of the Fishery of late years is attributable to the scarcity of Whales, is manifested by the foregoing Table, whereby it is shown, that, in the *earlier* periods of the fishery, the produce of Oil varied more than in later years.

SHIPS AND SEAMEN EMPLOYED in the respective Years 1821 and 1841.

FISHERIES.	1821 No. of Ships.	1821 No. of Men.	FISHERIES	1841 No. of Ships.	1841 No. of Men
Northern or Greenland	158	7900	Northern or Greenland	16	800
Spermaceti Whale	95	3040	Spermaceti Whale	68	2176
Common Oil (Whale and Sea Elephant)	33	1056	Common Oil (Whale and Sea Elephant	1	32
Fur, Seal Skin	36	792	Fur, Seal Skin	nil	nil
	322	12,788		85	3008

The foregoing Table shews a falling off in 20 years of 237 Ships, and 9,780 Men, employed in the British Fisheries, being equal to 73-100, which is attributable to the withdrawal of Bounties from *British* Fisheries, and the abatement of Duties on Vegetable Oils, the produce of *Foreign* Countries, the increased Importation of the latter being shewn in the following Table.

VEGETABLE OILS IMPORTED in the respective Years 1821 and 1841.

1821 Description of Oil.	Quantity Imported.	Duty per tun.	1841 Description of Oil.	Quantity Imported	Duty per Tun.
	Tuns.	£. s. d.		Tuns.	£. s. d.
Olive Oil	1900	15 13 0	Olive Oil	5315	4 4 0
Cocoa Nut	nil	2 10 0	Cocoa Nut	1264	1 5 0
Palm Oil	3200	2 10 0	Palm Oil	14,215	1 5 0
Rape Seed Oil	800	12 0 0	Rape Seed	6610	0 12 0
Linseed Oil	10,500	17 0 0	Linseed Oil	20,325	0 17 0
	16,400			47,729	

Increase, 31,329 Tuns.

TABLE of the respective Importations of BRITISH SOUTH SEA and GREENLAND OIL, as compared with the Importations of BRITISH COLONIAL OIL, in the Years 1821 and 1841.

South Sea and Greenland.	1821.	1841.	Colonial.	1821.	1841.
	Tuns.	Tuns.		Tuns.	Tuns.
Greenland Oil	16,500	500	Cod and Seal Oil	7500	10,000
Spermaceti Oil	3606	3310	Spermaceti Oil	nil	1964
Common Oil	4750	101	Common Oil	nil	5433
	24,676	3911		7500	17,397
Decrease	--	20,765	Increase	--	9,896

By the above Table it will be seen that while the produce of the South Sea and Greenland Whale Fisheries has, between 1821 and 1841, fallen off 20,765 Tons, the increase of the British Colonial Fisheris has been only 9897 Tons; and these Fisheries seem, by the Importation of 1838, as compared by 1841, (see the following Table) to be on the decline.

BRITISH COLONIAL OILS, IMPORTED 1838.

Cod and Seal Oils	98,00
Spermaceti Whale	2,434
Common Oil	7,904
	20,138

LONDON PRICES OF SPERMACŒTI AND COMMON OILS, from 1800 to 1842.

Year	Spermaceti per Tun.	Common Oil per Tun.	Year.	Spermaceti per Tun.	Common Oil per Tun.
1800	£84	£36	1822	£65	£26
1801	101	48	1823	54	25
1802	96	35	1824	48	26
1803	96	42	1825	57	26

Average Price of Spermaceti . . . . £84. | Average Price of Common . . . . £35.

Average Duration of Voyages in the Spermaceti Whale Fishery.

	Yrs. M.		Yrs M.
From 1800 to 1810	2 3	From 1825 to 1835	3 0
" 1810 to 1820	2 6	" 1835 to 1842	3 3
" 1820 to 1825	2 9		

Upon one point, I have heard the most experienced of American Captains generally agree, and it is this, that the British vessels do not make such good voyages as the Americans do, chiefly from the use of ardent spirits allowed in the former. If this be the case, it behoves the owners of British Whalers to lose not a day in excluding ardent spirits for ever from all their ships, except for medical purposes.

Intoxication on board ships, where human life and property are constantly exposed to all the dangers by earth, water, fire and air, is something like going into a powder magazine with a lighted candle. Underwriters, life insurers, ship owners, ship masters and philanthropists of all classes ought to unite to prevent the possibility of such an evil

79. REGULATIONS OF THE PORT OF LAHAINA. 1st, Every vessel on arrival, has to be visited by the harbor master.

2nd. Every Captain requiring refreshments, has to pay $10 for the harbor dues, for which he is allowed five barrels of potatoes and the privilege of purchasing supplies for his ship. He is also entitled to the protection of the laws, while he and his crew obey those laws.

3. No Captain is to allow any of his men to spend the night on shore, without the leave of the Governor, without which any sailor found on shore one hour after sunset, is liable to be confined, and can be liberated only on payment of a fine of $2.

4 In cases of sickness, or other good reasons, a captain can obtain permission for his men to remain on shore, by applying to the Governor, but they must reside within the limits assigned by him.

5. Every ship on arriving and making purchases, has to pay one dollar for the support of two lights kept burning to mark the place where boats can land.

6. Every vessel before leaving must take out a certificate from the harbor master, that the Port regulations have been complied with, under the penalty of $100. For such certificate, the harbor master charges a fee of one dollar.

7. Every vessel, engaged in the whale fishery, in order to pay for the refreshments she may require, is allowed to barter or sell goods to the amount of $200, as per original invoice, but if she sell goods beyond that amount, on the value of the excess, she has to pay the customary duty.

This duty is at present, 3 per cent, *ad valorem*, but the Government have given notice that they intend to raise the duty to 5 per cent upon all goods of licit introduction.

80. INFORMATION RESPECTING THE ISLANDS OF HAWAII, KAUAI, and MAUI, chiefly from data collected by Major Low, of the Army of British India.

It afforded me much pleasure in these remote Islands, to make the personal acquaintance of *Major Low*, a constituent of my, in years go e by, respected partners, Messrs. Lyall, Brothers & Co. (formerly Lyall, Wyllie & Co.) of London, and Messrs. Lyall, Matheson & Co. of Calcutta. A common acquaintance with the same friends, is a strong bond of attraction to those who meet far from home, To this recommendation the Major added manners easy and gentlemanly, with remarkable powers of conversation and a certain congeniality with me in interest in the aboriginal races of the human family, that recommended him in a special manner to my esteem. I may add that he left the same favorable impression upon all who knew him here, nor could it be otherwise, from his enlarged and liberal views of men and things, and his happy talent in adapting himself to all people, and all circumstances. In this respect, he reminded me much of my late lamented friend, SIR ALEXANDER BURNES, of *Bokhara* celebrity.

During the Major's short sojourn in these Islands, he found time to make the tour of this Island, and to visit the Islands of *Hawaii*, *Maui* and *Kauai*. I regret that he left before he had leisure to arrange and copy out all his notes and to amplify them with his own remarks.

81. ISLAND OF HAWAII.—*District of Hilo and Puna*. In this District, the Major was hospitably entertained by the Rev. Mr Coan and his lady, of whose kindness he speaks in terms of warm praise. He considers that the whole district contains about 11,000 souls, and the Port of Hilo, or Byron's Bay itself, about 1000, living in a scattered village.

Altogether, the Major considers *Hilo* the best situation that could have been chosen for the capital of these Islands, both on account of the excellence of its Port, the facility of watering and obtaining supplies, its situation to windward and in the largest Island of the group, its susceptibility of improvement, and other advantages. In this view Capt. Tucker of H. B. M. Frigate Dublin, and Capt. Armstrong of the U. S. Frigate Savannah, fully concur.

The climate is mild and salubrious, though rather damp from frequent rains. There is perhaps a greater extent of available land, in its neighborhood, than anywhere else, in that or any of the other Islands, and from the frequent rains, it is of surpassing fetility.

There are three resident Missionaries with their families, one Boarding school for boys, with 65 scholars, one for girls with 26, and 54 native schools, with about 2500 scholars.

The current wages are from 12 1-2 to 37 1-2 cents per day, or 2 to 5 dollars per month.

The arrivals of vessels at this Port have been as follows, viz:

Year.	Ships of war.	Merchant vessels	Whalers.
1841		1	7
1842		1	2
1843	6	1	14
1844 from January to March		1	8

Besides, the Port is visited by native vessels form ten to twenty times annually.

The export of Arrow Root for the last four years has been 55,375 pounds.

The exports of Sugar was increasing.

In 1840 it was		15,000 pounds.
1841	"	23,000
1842	"	30,000
1843	"	24,000
1844	"	83,000 pounds

were expected to be exported.

In 1843, 1600 gallons of Molasses were exported.

Of Coffee, 2000 pounds were exported in 1843, and in all 1844, they expected to export 6000 pounds.

The average export of *shingles* for 4 years, had been 100,000 feet; in 1843, 20,000 feet of boards, plank and scantling were exported, while *Koa* and *Ohia* with numerous other varieties of woods fit for ship building abound.

In the vicinity there is a large extent of land peculiarly well adapted for grazing. Yet cattle, particularly tame, do not abound.

Beef sells from 6 to 7 cents per lb.
Pork " at 6 " "
Hogs on the hoof at $3 each.
Cock Turkies $1 "
Hen do 50 cents.
Fowls 25 "
Sweet potatoes at $1,50 cts per barrel.

Onions, Coco nuts, Breadfruit, Melons and oranges abound, but vegetables are scarce and of little variety.

The whole metallic circulation was calculated at only a few hundred dollars, yet the trade of the place is thought to amount to little less than $12,000 a year, chiefly, of course by barter.

The harbor dues for whale ships are $6 for anchorage, and $6 for Pilotage.

Hamakua, Waimea and Kawaihai. The population of this District is about 5500 souls, and their yearly decrease is calculated at 200, at which rate, in less than 24 years the natives will be extinct.

It contains one resident Missionary family, and 20 native schools.

The population of Kohala is about 6,500 souls.

83. Kailua. The population of the northern District is about 4,500 souls. It is usual for the inhabitants to migrate to the leeward Islands, and hence their numbers do not increase, though it is believed the births exceed the deaths.

About 2000 or 3000 lbs of *coffee* were gathered during the preceding twelve months, and the soil is well adapted for *cotton*.

The chief town is *Kailua*, where His Excellency the Governor, John Adams, or Kuakini, resides. It contains about 500 inhabitants.

Kaelehuluhulu may contain 400 and *Keauha* about 350 inhabitants.

There are two Missionary families, and 16 schools, with about 850 schollars at *Kailua*. It is here, where the Rev. Mr. Thurston labors so usefully.

84. Kealakekua. The Major estimates the population from the South point of Hawaii to this place, at about 4,400 souls, The annual decrease for many years has been found to be 2 and 3 per cent of their numbers.

The chief towns, or villages, are Kealakekua and Kawaloa, of which the former affords the only harbor frequented by ships.

In 1843, 22 ships, mostly whalers, touched at this Port, and during last spring 21.

The dues are $6 for anchorage and $6 for pilotage.

There are two Missionaries and 23 schools in the District.

The current wages for laborers are from 12 1-2 to 25 cents per day. Carpenters earn from $1, 25 to $1,50 per day, and Blacksmiths $2.

The circulation is not over $1000 in coin, but the yearly consumption of goods is supposed to amount to about $4000.

Amongst the products are the following, viz:

Sugar Cane, which grows luxuriantly, though from the scarcity of water, no sugar is made.

Arrow Root abounds though little is prepared for markets.

Kukui Oil, none made, though there are large groves of the tree which yields it.

Castor Oil; the shrub, or plant abounds, but no oil is made.

The *Mustard* plant grows wild.

Coffee, produced in small quantities, but likely to increase, as several plantations have been commenced.

On a mountain road between *Kealakekua* and *Kailua*, Mr. Hall, an American, has a plantation of 800 coffee trees, producing about 1000 lbs of coffee. Next year he expects to have 2000 trees in bearing, and to gather 6500 lbs.

His Excellency, Governor Adams cultivates coffee to about the same extent.

Laborers who dig up the soil (ploughs are scarcely known) are paid about $4 per month, they finding themselves.

Cotton might be cultivated to a considerable extent, though only a small quantity is raised. It sells at 12-1-2 cents cash, or 20 cents per lb, in trade.

Cabbages, Pine Apples, Pumpkins, Melons, Oranges, Figs and Grapes, also Onions abound.

Maiz, or Indian corn, is produced in small quantities. Sweet potatoes are sold at $1 per barrel; Irish, $3; Yams at $1,50; Taro $1,50 per barrel and fire wood at $10 per cubic fathom.

About 100,000 feet of boards, and 400,000 shingles are produced for exportation.

Hogs alive, fetch 3 cents per lb; beef sells at 6 cents per lb; goats sell at $1 each; turkeys sell at 50 to 75 cents each; fowls sell at 12 1-2 to 25 cents each; horses from $40 to $100; mules and asses sell at $30 each; oxen sell at $20 to $25 each.

The above prices are mostly those given in trade or barter; for cash they are much lower.

The climate is the most mild and equable in the Island. The Thermometer along the shore ranges from 75 to 85 degs. There is a sea breeze by day and land breeze by night. It rains during eight months in the year. During the remaining four months, it is too dry to plant.

The Major obtained these particulars chiefly through the kindness of the Rev. Mr. Forbes, who is stationed at Kealakekua.

That gentleman informs me that since the visit of Major Low, he had employed a native to go through the District, from the South point of the Island to the village of Hokukano, three miles north of the Bay of Kealakekua, and found only 1649 children to 2930 adults, the whole population being 4579. The comparative scarcity of children is a striking and alarming fact, in these Islands. R. C. W.

85. Kau. The population of this District amounts nearly to 5000 souls, of whom about one third are catholics.

There are two Missionary families, twenty schools, and twenty teachers

The climate is cold, salubrious, and invigorating. The Themometer ranges from 47 to 75 in the shade.

The great Volcano of Kilauea, is in the neighborhood whose crater is 9 miles in circumference, and in constant activity.

The soil is good for vegetables and fruits of all kinds.

Oranges, Figs, Grapes, Mangoes, Custard Apples, &c. are now being extensively cultivated, but the chief products are Taro and sweet potatoes.

There are few cattle—only about 80 or 100, and 30 to 40 horses, but there are plenty of goats and pigs; and turkeys and common poultry abound.

The common wages for laborers are 12 1-2 cents per day.

The natives manufacture a kind of cloth called *kapa* or *mamaki kapa* as an article of trade.

Sugar, Coffee, and Castor and Kukui oils might be raised to a great extent.

The chief, or I may say, only available Ports of Hawaii, (anglice) Owhyhee, are Kealakekua, Kailua, Kawaihai and Hilo, or Byron's Bay; and the Port charges, in all, I understand are six dollars for anchorage and six for pilotage, where a pilot is used.

As a specimen of the Missionary schools generally, the Major quotes the 25 schools of Kealakekua, under the same number of teachers. These were attended by 467 boys and 450 girls, making 1917 enrolled scholars, of whom the average attendance was 463.

Of the scholars, 410 were readers—119 writers—159 were studying geography—297 mental arithmetic, and 32 written ditto.

This was the state of these schools in January and February 1844.

86. Island of Maui. Major Low estimates the population of *Maui*, and the adjacent Island of *Lanai*, taken together, at from 24000 to 25000 souls. For Lanai, he allowes 600.

The climate along the Southern and Western shores is hot and sultry, but tempered with land and sea breezes. Along the Northern and Eastern shores the trade winds prevail and there is more rain. Rain is at all times frequent on the mountains at the height of 3000 feet and upwards.

The prevailing diseases are those arising from disorder of the alimentary canal, created by excess or improper feed.

Coughs and Rheumatic pains are common, from exposure to the night air. The gonorhœa, and ulcers of a foul character are often met with but syphilitic cases are greatly diminished.

Amongst infantile complaints, those of dentition and *croup* are the most fatal.

The common wages throughout the country is 12 1-2 cents per day, but in *Lahaina* 25 cents are paid, and 50 if the laborer works on board ship.

The Largest town and most frequented Port is *Lahaina*. It contains about 2800 souls, and promises rapidly to increase with the increased afflux of whalers.

Of these, the Major says 250 touched for refreshments in 1843, besides numerous arrivals and departures of native vessels.

Irish potatoes, yams, sweet potatoes, pumpkins, bananas, melons, cucumbers, Indian corn and taro are amongst the vegetables easily procured.

The prices of the Lahaina market are given as follows; beef 6 cents per lb; hogs from $2 to $10 each; turkies 50 cents each, 10 for 30 yards of coarse cotton; ducks 50 cents each; fowls 12 1-2 to 25 cents; goats $1 each, or 7 for 30 yards of coarse cotton; Irish potatoes $2 to $3 per barrel, or 14 yards cotton; yams 7 barrels for 30 yards do; sweet potatoes do do, or $1 per barrel; Onions, a barrel for 15 yards do; pumpkins 100 for 30 yards do; bananas 30 bunches for 30 yards do; melons 6 to 12 1-2 cents each; cucumbers 50 cents per bushel; beans $3 per barrel, or 15 yards cotton; Indian corn do do.

There are two considerable establishments for making sugar and molasses, and several small ones.

Of *Cotton* little is raised, though it might be extensively cultivated.

The same remark applies to coffee, of which the Major says, there is only one plantation, with about 1000 trees.

Tobacco is only grown for domestic use, though it also might be easily and successfully cultivated.

A small quantity of Rice is grown at *Wailuku*.

The Indigo plant grows wild in many places, but no Indigo is made.

Arrow Root abounds and is prepared in considerable quantity.

The musterd plant grows wild, but ships afford the only demand.

Large quantities of Castor and Kukui oil might be prepared were attention given to these articles.

In East *Maui*, good wheat is raised and might be extensively cultivated in elevated situations.

No proper estimate can be formed of the yearly consumption of goods, or of the amount of coin in circulation. Both depend materially upon the crews of ships which visit *Lahaina* for supplies.

There are nine Missionaries on Maui, and 2 on Molokai.

On Maui there are 110 common schools, and 4 on Lanai.

At Lahaina luna there is a seminary for boys, with 3 teachers, and 134 pupils; and at Wailuku, one for girls under one teacher and one assistant.

87. Island of Kauai. Major Low, with regard to Kauai, concurs in the opinion expressed by all who have made the tour of the Islands, that it is by far the most beautiful and valuable of the group, relatively, to its size. But his time was so short there, that his notes upon it are but few and meagre.

From all he could learn, it appears that the Island furnishes annually about 200 tons of sugar, and 20,000 gallons of molasses. Almost the whole, if not entirely so, of that produce is from the establishment of the enterprising firm of *Messrs. Ladd & Co* herein before often alluded to, in these notes.

About 24 ships touch annually for refreshments, and the coasting trade is considerable.

There is a good port at Hanalai, on the north side of the Island, near which *Mr. Bernard* has an extensive coffee plantation.

The climate is delightful and diseases almost unknown.

There are about 1200 head of oxen on the Island, worth there about $10 per head.

Four Missionaries reside on the Island with their families.

The consumption of goods amounts to about $20,000 yearly, and it is calculated that the monetary circulation is about $5,000.

Beef sells at 6 cents per lb.—pork at 4—sweet potatoes at about $1,50 cents per barrel, and yams at $2.

The current wages for laborers are 12 1-2 cents per day, they being found in provisions, but the amount is generally paid in goods on which the master has a large profit.

88. Major Low also rode round the Island of Oahu, but in haste and without time to make any particular remarks.

In allowing me to make use of his *memoranda*, the Major requested me particularly not to withhold his testimony in favor of the Missionaries whom he so frequently met in the course of his route. That testimony has the greater weight that it comes from a British officer, of no common powers of observation, who went among them with the sympathies peculiar to his profession and to his own church, and under the full knowledge of all the gross misrepresentations that had been made to their prejudice. He was fully cognizant that they had been represented as political emissaries of the United States, under the garb of religious professors, seeking only their own temporal interests and instilling into the native mind, a love for their own country and a dislike to all others. So far from this being the case, the Major gave it as his decided opinion that no men could be more diligent, disinterested, zealous and sincere in their sacred calling, or more estranged from all political influences, unconnected with the safety and well being of their church and disciples, than the American Missionaries resident in these Islands. Nor was this opinion hastily formed or founded on the reports given by the Missionaries of one another. In the course of his travels, the Major often found foreigners who had resided long on the Islands, amongst whom many were of habits any thing but clerical, yet he was particularly struck with the fact that not one of them, in answer to his enquiries, accused the Missionaries of devoting themselves to worldly pursuits, of exerting any undue or improper influence over the chiefs, of betraying any feeling hostile to the natives of countries not their own, or of immoral practices.

The Major was most favorably impressed with the simple yet extremely kind, frank and unostentatious hospitality that he experienced at all the stations. To use his own words, the Missionaries every where received him as one of their own countrymen, and of their own body, and in fact, of their own families. It would be invidious to single out names where all received and entertained "*the stranger within their gates*," in a manner and with a cordiality proving that the obligation of the moral law came home to willing hearts.

89. POLICY AND CHARACTER OF THE PROTESTANT MISSIONARIES, as shewn by the minutes of their yearly general meetings.

Long after writing my notes No's. 26, 27 and 28, published in the Friend of 1st July, and after receiving the observations made by *Major Low*, through the kindness of Mr. Levi Chamberlain, I was permitted to have access to the minutes of the general meetings of the Missionaries from 1837 to 1844, both inclusive. Their general meetings, or councils of the Missionaries are generally held in Honolulu annually, after the same manner and for like purposes as the general assembly of the church of Scotland convened in Edinburgh.

The yearly council, or general meeting, is composed of all the Missionaries from the different Islands, both lay and clerical; a moderator and scribe are annually chosen, and the business conducted according to the usual forms in religious assemblies, in other countries; all the members present being equally entitled to speak or vote on such subjects as come before the meeting. A record of proceedings is carefully kept, from which extracts are published for the private use of the members of the board.

Another body, and one distinct from the above is an association of ministers of the gospel only, called the HAWAIIAN ASSOCIATION. This embraces all the clergymen from the different Islands, meets annually and has for its object the mutual improvement of its members, by freely dicussing, both by speaking and writing, such subjects as are most interesting and important to ministers of the gospel in this part of the world.

The Presbyterian form of government was resolved upon at different times, but for want of unanimity was never carried out, and the several churches are now governed according to the Presbyterian or Congregational form as suits the predilections of the pastor and his people.

The following is an abstract of the attendance and duration of the general councils during the years undermentioned

Years.	Number who attended.	First day of session.	Last day of session.
1837	25	May 3d.	June 5th.
1838	*	*	*
1839	36	May 13th.	June 13th.
1840	27	" 18th.	" 2d.
1841	31	" 12th.	" 8th.
1842	21	" 13th.	" 2d.
1843	30	" 11th.	" 3d.
1844	31	" 31st.	" 15th

* In 1838 there was no general meeting, but meetings of the Missionaries on their respective Islands took place, and a committee of seven delegates was appointed to arrange, complete, and carry into effect the business transacted by these insular meetings.

Although it has been usual of late years to print the minutes of proceedings at the general meetings, they are considered printed documents, to be used merely for the information of the Missionaries themselves and of the board to whom they belong.

90 Under these circumstances while it behoves me gratefully to acknowledge an unusual confidence in my favor personally, I cannot help stating my regret that the practice has not been to make these minutes public, for the information of the religious world, and in vindication of the many calumnies which have been propagated against the labors of the American Missionaries in these Islands. I have found nothing in them that does not redound to the honor of the Missionaries and convict their columniators of misrepresentation.

Except as a christian and a philanthropist, I have nothing to do with the American Missionaries, but if it be true—and I have yet to learn that it is not—that in the uprooting of heathenism, establishment of christianity, introduction of education, and abolition of immoral practices, their success in these Islands has been greater and more universal than that of any other body of Protestant Missionaries in any other field, a correct view of their proceedings becomes a matter of great interest to all Protestants to whatever nation they may belong.

In these Islands the honor of the Missionaries may be safely left to the fair application of the sacred maxim—"by their fruits ye shall know them," but as the tongue of evil report has been heard against them in foreign parts, where their fruits cannot be thoroughly known and appreciated, I shall take occasion to notice a few of the misrepresentations that have gone abroad.

91. It has been reresented that the Missionaries have attended more to their secular interests than to the spiritual welfare of their flocks. If so, they have been singularly unsuccessful in what has been supposed to be their main pursuit, for I know not one of them that has attained unto worldly wealth. But what do the minutes say upon this point?

It appears that since 1839, the Missionaries have been allowed only a bare support to themselves and families at the following rates;

For a Missionary and his wife	$450
" single lady	175
For every child under 5 years	20
" " " from 5 to 10	40
" " " over 15	80

The highest appropriation that I have found was for one gentleman with a wife and 5 children, in 1843—$690, while during the same year, 28 of the brethren received only $450 each, and the ladies received only $175 each.

No one acquainted with the expense of living in the Sandwich Islands will say that it would be possible for the Missionaries to support and clothe themselves and families, and educate the latter at these rates, were it not for their secular agents, through whom they receive a great part of their supplies, at the cost prices of the United States, including the actual charges.

But is the above small, and I would say *inadequate* pittance wrung from the hard labor of the Hawaiian people? By no means. It is derived from the voluntary charity of the pious contributors to the American Board of Foreign Missions. I find that the total appropriation has been as follows, viz.

1838 total yearly appropriation	$30,000
1839 " " "	35,000
1840 " " "	35,000
1841 " " "	36,725
1842 " " "	33,500
1843 " " "	34,400
1844 " " "	36,047

including $1,697 part of contingent fund for 1843.

Considering the wide spread distress that has prevailed in the United States since 1837, it is not a little honorable to the charity of the American public that they supplied the above board with the means of making such large annual appropriations. Besides their Mission in these Islands, they have others in Africa, Greece, Turkey, Syria, Persia, India, Ceylon, Siam, China, Singapore, and Borneo, and also domestic Missions among the Cherokees, Choctaws, Paunees, Sioux, Ojibaws and Indians of the Oregon Territory, in support of all which, in 1843, they expended $256,687,85 cents.

But returning to their extremely useful Mission here, Protestants in other countries will be curious to know in what manner the gross amounts appropriated in the United States are applied here. In illustration I give the particulars of the last two years.

	1843.	1844.
Family support	21,330	22,716 04
Departments and institutions	8,628	9,400 00
Permanent buildings	2,500	
Special grants	1,942	3,931 00
	34,400	36,047 04

The application for family support, is upon the low scale I have already mentioned.

That for departments and institutions, will be best understood by giving the examples of the same two years.

	1843	1844
Mission Seminary	2500	2500
Female "	1,000	800
Boarding School, *Hilo*	700	800
Punahou School	500	500
Printing Department	2,000	2,000
Medical "	800	1,000
General Meeting	500	500
Depository	300	300
Contingent Fund	328	1,000
	8,628	9,400

Under the title of permanent buildings were included churches, meeting houses, school houses, temporary residences, &c. the full benefit of which descends to the Hawaiian people, as they cannot be taken out of the country.

By special grants are meant extra allowances made to Missionaries beyond their allotted salaries, for house repairs and additions, travelling expenses and of all which the parties necessarily have to render a particular report to the secular agents

Foreign Protestants will also be anxious to know how a Missionary and his wife dispose of their $450 annually. It is alone, on an average, in the following manner;

For their clothing,	$110
" domestics,	90
" flour 25—fuel 30	55
" milk and butter,	35
" meat, vegetables, rice and poi,	60
" sugar, molasses, tea, &c,	25
" wear of bedding, and crockery,	30
" horse and incidental expenses,	45
	$450

The above estimate was found too low, insomuch that in 1840, it was recommended that $100 more should be added to each married missionary, for soap, oil, Kitchen and household furniture, beds, stationary, hospitality, church, &c. &c.; but the Mission never has been in funds to make that additional appropriation. To the Missionary families residing in Honolulu, $50 *extra* are allowed annually, on account of the great expense of living in the capital.

TO BE CONTINUED.

AMERICAN WHALE SHIP'S CABIN ORNAMENT.

PLEDGE.

We the undersigned, Mariners of Ship Navy, believing that intemperance is the greatest bane to human happiness and usefulness, and that temperance eminently fits us for all the duties and enjoyments of life, do solemnly pledge one to the other, that we will in future abstain from all intoxicating drinks, except strictly for Medical use.

Francis C. Smith, Master.
John W. Norton, 1st Officer.
Rufus N. Smith, 2d "

SONG.

THE TEMPERANCE SHIP.

Speed, speed the temperance ship!
Ye winds fill every sail,
Behold her on the deep,
Outriding every gale,
The tempest's fury she outbraves,
And hosts of deathless drunkards saves.

Speed, speed the Temperance Ship!
Who joins us in the cry?
Mothers and children cease to weep.
Our ship is passing by,
We wish to take you all on board—
A freight of mercy to the Lord.

Speed, speed the Temperance Ship!
For her we'll ever pray,
'Tis Israel's God alone can keep
In safety, night and day;
On him we'll evermore depend
Who is the contrite drunkard's friend.

Speed, speed the Temperance Ship!
Ye young and aged shout,
Behold her sailing o'er the deep!
With all her streamers out,
Bound for the true te-total shore—
Where streams of death are drank no more.

THE FRIEND.

Honolulu, December 2, 1844.

TEMPERANCE AMONG WHALEMEN.

It is with pleasure that we are able to report that the Temperance Reform is triumphantly advancing among whalemen in the Pacific Ocean. A few weeks since while distributing Temperance publications in the harbor of Honolulu, we were invited into the cabin of the American whale Ship Navy, and most happily surprised when the 1st officer, Mr. Norton, pointed to what we are pleased to style "American whale Ship's Cabin Ornament."

We immediately asked the privilege of copying the same, and are most happy in presenting it to the numerous readers of the Friend—particularly among whalemen and seamen generally. The pledge was neatly framed and protected in front by a glass.—Reader, you will see the names of "all hands" thereto affixed, except the 3d officer and cooper. We were rejoiced to learn that they were far removed from the vortex of intemperance. The Navy had been out but 13 months, and had taken 240 barrels of sperm oil, 2500 barrels of whale, and 25000 lbs. of bone. No accidents had happened, and not a man had run away. About that time we desired to engage the services of a good journeyman printer, and it was among the ship's company of the Navy, that we found our man. He is now, reader, at work for you.

The Navy is by no means the only ship that *practically* as well as *theoretically* sails upon Temperance principles. Every ship has more or less te-totallers among its crew. We cannot now call to mind a single exception, in that portion of the whaling fleet that has visited Honolulu, during the past season. We mention the following ships as ranking high upon the Te-total scale.—Ship Benjamin Rush, "Friend Gifford," Master, carries the Temperance pennant at her mast-head when in port. The ship Hope, of Providence, carries a goodly number of Washingtonians of the "first water." While this ship was lying in port, 10 of the crew enrolled their names on the pledge kept at the Chaplain's study. Some of them had been mighty champions in the ranks of King Alcohol. The ship California, with her $70,000 worth of Sperm oil, carries an interesting ship's company of young men; while engaged in penning these remarks, we were interrupted by several of the crew who came to place their names to the pledge. The ships Phillip Tabb, Milo, Janus, Wm. Penn, and many others are not backward in the good cause, which now is acting as a mighty lever to raise seamen as a class. His heart must be colder than ice which will not be moved while listening to the sad tale which some of the "sons of the ocean" can relate of their struggles with the mighty destroyer. Let old King Alcohol look out for his crown or seamen will tear it off! They are getting wide awake, said one at a Temperance meeting recently in Honolulu—"Shipmates, look-out for the Devil, for he does not take a *watch below*, but is all the time on deck at work." Yes, seamen of every class and rank, merchantmen, whalemen, man-of-war's-men, one and all, look out for the evil spirit that lurks in intoxicating drinks—touch not, taste not, handle not the poison, *but pledge perpetual hate to all that can intoxicate.*

Ye advocates of the old rum drinking system on ship board—your ranks are thinning. Unless you want to become the scorn and by-word of the world, you must give way. Like the old Dutch Admiral,

who lashed a broom to his mast-head and swore that he would sweep the seas, so the genius of Temperance, has a broad pennat flying at the main, and is shipping able-bodied te-total seamen, in every port in the world, and so sure as truth eventually triumphs, will the TEMPERANCE SHIP become MISTRESS OF THE SEAS.

WHERE IS THE SAILOR'S HOME?—Poets tell us that the sailor's *home* is "on the deep," "on the sea," or "on the mountain wave;" others may say, "the sailor has no home, he is a universal wanderer, visiting all countries, climes, oceans and seas, in fact, the sailor is a citizen of the world." Ask however, the sailor himself, if he has a home, and you will not hear the reply that his home is every where and no where, but where his father and mother live or lived, where his kindred dwell or dwelt. The sailor thinks, loves, and talks of home as much, peahaps more, than any one else. He may seldom visit home, but he is always going there when his present voyage is up! So we have found it; only listen to whalemen with a "full ship." There is something in that phrase "full ship," that makes whalemen, after a three or four years' voyage, put on a cheerful countenance. No more "mast heads," it is "watch and watch," a "quick passage home,"—such are the topics of conversation. Thus, doubtless thinks the writer of the following lines, furnished for our columns, by a sailor on board the English whale ship Peruvian, of St. Johns, New Brunswick.

For the Friend.

HOMEWARD BOUND.

The long sought time at length has come,
And now we steer our course for home,
Blow thou good breeze and speed us on
The way that leads to sweet Saint Johns.

Our ship seems conscious of the hour
That proves her strength and sailing power;
She swiftly ploughs the parting tide,
Her Captain's and her seamen's pride.

Our anxious friends methinks I hear
Repeat the day, the month, the year,
Which tore us from their arms of love,
O'er ocean's wide expanse to rove.

With watchful eyes the spot they scan
Where stands the ready signal man,
Who telegraphs each coming sail,
Borne onward by the favoring gale.

Our hearts so long oppressed with care,
Haste on before to meet them there,
While nightly in our dreams we trace,
Each well known scene—each loved one's face.

We know that many a fervent prayer,
They raise to ask "Our Father's" care—
Dash on "Peruvian," through the foam,
And bear their sons and brothers home.

Nov. 1844. G. M. R.

WHAT A BILL-FISH CAN DO.—Under what genus and species the ichthyologist will class the specimen of the finny tribe called *bill-fish*, we know not, but according to Capt. Lincoln, William Penn, this fish possesses great physical power, sufficient to thrust its bill through the solid oak sides of a ship. Shortly after the William Penn sailed from the Sandwich Islands in the spring of 1842, she was obliged to put in at the Society Islands on account of a leak. On heaving out, about 6 feet from the keel was found the *bill* of the above mentioned fish. It had been thrust several inches through the following materials.

1st. Copper,
2d. Sheathing, 1 inch pine.
3d. Plank, 3 inch oak.
4th. Timber, 4 " "
5th. Ceiling, 2 1-2 inch oak.

9 1-2 inches solid oak, and 1 inch pine, total 10 1-2 inches. Capt. L. has preserved the identical *bill* being about 1 1-4 inches in diameter, so that he is able to convince the incredulous by ocular demonstration. We recollect some years since to have seen the *blade* of a sword-fish thrust through a piece of solid oak timber; it was cut from the side of a whale ship, and is now preserved as a curiosity in the Marine Museum, Nantucket, Mass.

TEMPERANCE.

For the Friend.

IS THE TRAFFIC IN INTOXICATING DRINKS IMMORAL?

BY AMICUS.—*No.* 5.

In discussing this question, I have attempted to show the immorality of the traffic from the fact, that it *conflicts with the revealed will of God*, the moral governor of the universe, from whose decisions there can be no appeal. I labored also to prove that the traffic *conflicts with the law of love to our neighbor;* that in relation to health, reputation, and property, the traffic does to others what no sane man would be willing that others should do to him; that he inflicts upon individuals and upon the community, *deep*, often *fatal* injury. Here the case might be rested. No fair minded men, it is believed, could fail to return a true verdict to condemn the traffic as immoral in a high degree. There is, however, another consideration, which, though of less intrinsical weight than those which have been urged, may not be overlooked, may be necessary indeed to the completion of the argument. It is this:—the traffic in intoxicating drinks *conflicts with the law of self love*, therefore, is unmoral.

It is sometimes said of an individual by way of apology, "he is an enemy to no one but himself." But this is never said in sober earnestness by any reflecting man. "Do thyself no harm," is written on the page of the same statute book with the prohibition, "Thou shalt not kill." The law of love to our neighbor requires that we love him only as ourself, showing by implication that a regard to our own interests according to their relative importance, is a solemn, an imperious duty.

In a world so steeped with selfishness as this, the idea of any man's pursuing a course which collets with the law of self love may seem preposterous, "for no man," to employ the language of the bible, "ever yet hated his own flesh." All seek happiness, and aim to secure what they regard as, on the whole, the highest good. And yet nothing is more demonstrably true, than that multitudes do pursue a course hurtful in a high degree—of course their movements conflicts with the law of self love. This may be accounted for by supposing that men are blind to their own best interests—that they are ignorant of what constitutes the law of self love. Let us then look at this law, a moment, it may be apparent that certain acts come directly in collission with it. *Self love requires a course of action on which the blessing of God may be sought; which shall be attended with peace of conscience, and with a feeling of self respect; the pursuit of business which shall ordinarily secure a competency of this world's goods, together with the respectability and happiness of friends and connexions; in short, a course of action is demanded by this law, which shall render the man a blessing to the community, and secure for him the favor of God.*

Look now at the ordinary occupations of men, and see how intimately our gracious Creator has connected our duty and happiness. He has made it our duty to labor; but in all lawful employments, men can fulfil the law of self love. The farmer, the mechanic, the seaman, the merchant, the professional man, and each and every one of them pray for a blessing on the work of their hands. Each pursues a business which he knows to be lawful. Conscience approves of it, or at least, does not reproach him. The man feels self respect—is not ashamed of the product of his industry. Each ordinarily obtams a good living, and often lays up a competence for old age, or for his children. His example, so far as business is concerned—and of this alone we are speaking—is salutary, and he can see his children engaged in it without forboding their ruin. "The blessing of God which maketh rich and addeth no sorrow," is his. He is a prosperous and happy man.

But is this true of him who traffics in intoxicating drinks? However it might once have been, in times of comparative ignorance, can the man who in this age of light, deals in these drinks, either in wholesale or retail, pray for a blessing on his business? The idea is prepos erous. As well might the assassin beseech God to nerve his arm, and steel his heart for the blow he contemplates giving his victim. And does the man who traffics in these drinks enjoy peace of conscience? Does this inward monitor give an approving voice to cheer him in his toil by day and by night, in dealing out the drunkards drink? Does he feel *self respect* in his business, and honest pride in being seen replenishing the empty jug or cask of his neighbor, or filling his glass, something as the farmer feels in being seen swinging his sythe, or thrusting in his sickle? Is he proud of the *fruits* of his labor, of the raged bloated, noisy, profane, fighting, dirty creatures whom he turns out of his shop late at night, to stagger and bawl through the streets, or to lie at some corner in their own vomit? Alas, alas, the conscience of the dealer in intoxicating drinks too often becomes callous, and ceases to do her office. It is true that she sometimes troubles the man, as in the case of Mr. R. the merchant of New York, who after the death of the 13th drunkard, who all died in one summer of drinking of his rum, "was often afraid to be alone," and frequently urged * Docill to sleep with him "to keep the devil off." Still, the men who traffic in these drinks do often contrive to stifle the voice of conscience till near the close of life—sometimes probably till they awake in eternity, where she becomes the undying worm! So of respectability. The traffic makes men sordid. It blunts all their finer feelings. They often lose the sense of shame. The pest of gain crushes out their humanity, and sense of honor, so that they glory in their business—glory in their shame! And does not this *conflict with self love?*

* See the Temperance Lectures by Samuel Chipman.

For the Friend.

A TABLE SHOWING THE VALUE OF PROPERTY AFLOAT IN HONOLULU HARBOR, OCT. 24, 1844.

BY MR. G. D. GILMAN.

Name of Ship.	Value as she now floats.	Bbls of whale oil.	Value.	Bbls of Sperm oil.	Value.	Bone.	Value.	Total Value.
Wm. Thompson,	$22,000	2050	16,400	700	$14000	bn.shp.		$52,400
Chelsea,	14,000	1700	13,600			17000	$3740	31,340
Sophia,	8,000	1500	12,000			15000	3300	23,300
Canada,	20,000	3000	24,000			35000	7700	51,700
Splendid,	18,000	1600	12,800			bn.shp.		30,800
Indian,	24,000			300	6000			30,000
Hope,	20,000	3600	28,800			35000	7700	56,500
Peruvian,	18,000	3200	25,600			32000	7040	50,640
George and Martha,	8 000	2000	16,000	150	3000	20000	4400	31,400
Augusta,	16,000			1200	24000			40,000
James Stewart,	20,000	2700	21,600			27000	5940	47,540
Levi Starbuck,	10,000	800	6,400	800	1600	10000	2200	34,600
Ann Alexander,	13,000			1500	30000			43,000
Alexander Barclay,	20,000	4400	35,200			44000	9680	74,880
Damon,	18,000	clean.		shp soil				18,000
Wm. Penn,	10,000	100	800	1300	26000	1000	220	37,020
Warren,	15,000	1700	13,600			bn.shp.		28,600
Phillip Tabb,	10,000	2700	21,600			2700	5940	37,540
Janus,	17,000	3000	24,000			32000	7040	48,040
Massachusetts,	22,000	1370	19,960	1330	26600	14000	3080	62,640
Navy,	15,000	2750	22,000			25000	5500	42,500
Orozimbo,	16,000	3800	30,400	230	4600	40000	8800	59,800
California,	30,000			2400	48000			78,000

Total $1,010,240.

MERCHANT VESSELS.

Congaree,	$20,000	2000	16,000			244000	$31680	$47,680
Brig Globe.	13,000	387	3,096	642	12840	79248	17434	46,370
Brig Euphemia,	5,000							5.000
Brig Lafayette,	5,000		8,000					13,000
Schr. Mary,							6800	
Brk. Honolulu,								6,800
Schr. Hawaii,	3,000							3,000
Schr. Hakaleleponi,	2,500							2,500
2 hulks,	1,975							1,975

Total $1,136,565

Prices—Sperm Oil $20 per barrel;—Whale Oil $8 per barrel;—Bone 22 cts. per lb.

NATIONAL VESSELS.

Her B. M. Ketch Basilisk,
His H. M. Schr. Hooikaika,
" " " " Piia.

VALUE OF WHALING PROPERTY AT SANDWICH ISLANDS, FROM JAN. 1, TO OCT. 10, 1844.

Total amount of whaling property of all nations touching at the several ports of the Hawaiian Islands, from Jan. 1 to Oct. 10, 1844:—$18,225,910. 373 ships. 10,800 men.

As a large proportion of these vessels touched twice within the year, or proceeded from one port to another, and have been computed in the estimates of each, it will be necessary to deduct, say one third from the above amount, to approximate to a correct estimate, which will make the several amounts as follows:

Cargoes and ships.

$12,183,940. 249 vessels. 7,200 men.

The great preponderance of American property engaged in this business will strike every one. At the reduced estimate, it exceeds that of all the other nations, by $9,621,960—by 176 vessels, and by 5,407 men. The New Brunswick vessels are partly owned in the U. S. as well as the Bremen, many of which are commanded by Americans.—*Polynesian.*

DIED.

In Honnolulu, Nov. 27, Joseph Franklin, colored man. He has resided about nine years upon the Sandwich Islands. Originally came from Sierra Leone, in Africa.

At the American Hospital, in Honolulu, Frederick W. Dart, seaman, Hannibal. He belonged to New London, Ct. He died of the dysentery, Nov. 8th, aged 18 years.

At the American Hospital in Honolulu, Nov. 24, —— Wolley, seaman belonging to Josephine, now lying in this harbor. He was a native of South Hampton, Long Island. The funeral exercises were attended at 4 P. M. Monday, Nov. 25, at the vestry of the Seamen's Chapel. The Captain and a large number of the men belonging to the Josephine were present. His remains were deposited in the Nuuanu Valley Cemetery, being the first interment in the new grounds.

On board U. S. S. Warren, May 14, 1844, Peter Nordville, seaman, native of Norway. May 27, P. Walker, Master at Arms, native of Massachusetts, near Northampton. May 26, John Smith, 2d, seaman, Chelsea, Mass. June 8th, Daniel Murray, seaman, Scotland. June 4th, John Christian, seaman, Liverpool, Eng. July 4th, John Hall, 2d, seaman, supposed to belong to Ireland.

On board Am. whale ship Hydaspe, Oct. 27, George Smith, aged 40. He was a native of London, shipped on board the Hydaspe at the Navigators, and came from the United States in ship Mary Ann, of Fair Haven.

On board Gen. Williams, at Maui, Oct. 31, Manuel Francis, native of Pico, aged 36 years.

On board Am. whale ship California, Aug. 29, 1842, off Cape Horn, Mr. John M. Sherman, 2d officer, belonging to New London, Ct., and Mr. Lucas J. Sanders, 3d officer, Aug. 10, 1843, a Portuguese.

POETRY.

"ONLY THIS ONCE."

BY MRS. SIGOURNEY.

"Only this once,"—the wine-cup glowed,
All sparkling with its ruby ray,
And bacchanalian welcome flowed,
And Folly made the revel gay.

Then he, so long, so deeply warn'd,
The way of conscience rashly spurn'd,
His promise of repentance scorn'd,
And coward-like to vice returned.

"Only this once,"—the tale is told,
He mildly quaffed the poisonous tide,
With more than Esau's madness, sold
The birthright of his soul, and died.

I do not say that breath forsook
The clay, and left the pulses dead,
But reason in her empire shook,
And all the life of life was fled.

Again his eyes the landscape viewed,
His limbs again their burden bore,
And years their wonted course renewed,
But hope and peace returned no more.

Yes, angel-hearts with pity wept,
When he whom Virtue fain would save,
His vow to her so falsely kept,
And madly sought a drunkard's grave.

"Only this once,"—Beware, beware!
Gaze not upon the blushing wine,
Oh, fly Temptation's syren snare,
And prayerful seek for strength Divine.

I HAVE NO INFLUENCE.—The Albany Temperance Recorder thus concludes an excellent article on the present state and prospects of the Temperance cause:—

"In conclusion, we call upon the friends of order everywhere, to enter the lists. Let no man in this conflict, to use the language of a political journal, say, 'I have no influence.' Let each and every one put his shoulder to the wheel, and labor as though success were dependent upon his individual efforts; to those entertaining the idea that their effort in the cause of temperance can be of no essential consequence, we would commend the following simple but appropriate lines:

"What if the little rain would say,
'So small a drop as I,
Can ne'er refresh these thirsty fields—
I'll tarry in the sky!'

What—if a shining beam of noon,
Should in its fountain stay,
Because its feeble light alone
Cannot create a day.

Doth not each rain-drop help to form
The cool refreshing shower,
And every ray of light to warm,
And beautify the flower?"

NOTICE.—Seamen will find a fresh supply of American Newspapers in the Reading Room, principally for the month of June, 1844. Visitors are respectfully requested not to take the papers from the *files*.

An Extra No. of the Friend will appear this month, which will conclude Vol. II. It will contain the remainder of Mr. Wyllie's valuable Notes upon the Commerce, Missions, &c. of the Sandwich Islands, accompanied with an index to the entire body of the Notes.

PORT OF HONOLULU.

VESSELS IN PORT, NOV. 27.

Vessels of War.—Her B. M. Ships Modeste and Basilisk.

Merchantmen.—Am. Brig Ontario, Eng. Brk. Honolulu, and Brig Euphemia; French Brk. Adolphe.

Whale ships.—Am. ships Maine, Josephine, Nassau, Wilmington and Liverpool Packet, Manhattan, Martha; Danish, Neptune; Norwegian, "17th of May."

ARRIVED.

Nov 13, Am. wh ship Martha, Sayer, Fair Haven, 37 mos, 600 sperm, 1100 wh, 10,000 bone.

Nov. 15, Am. wh ship Wilmington and Liverpool Packet, Place, 34 mos, 550 sperm, 2250 wh, 23,000 bone. Vide disasters.

Nov. 17, Am. wh ship Adeline Gibbs, Baylies, Fair Haven, 38 mos, 2,200 sperm.

Am. wh ship Monticello, Cogswell, Nantucket, 39 mos, 2,200 sperm.

Nov. 19, Am. wh ship Ontario, Green, Sag Harbor, 13 mos, 4,000 wh, 150 sperm, 40,000 bone, (off and on, sailed for home same day.)

Nov. 20, Am. wh ship Congdon, Nantucket, 39 mos, 1,400 sperm.

Am. wh ship Citizen, Lansing, Sag Harbor, 18 mos, 2,000 wh.—*Polynesian.*

Am. wh Brk Arab, Rightenton, Fair Haven, 15 mos, 1,300 wh.

Nov. 23, French Brk Adolphe, from Tahiti.

Nov. 25, Her B. M. S. Modeste, Baillie, from Monterey, California.

Nov. 26, Am. wh ship Manhattan, Cooper, 12 mos, 2,400 wh.

Nov. 27, Am. ship Mariposa, Parsons, from New York direct, 153 days; cargo Navy stores, principally.

SAILED.

Nov. 15, U. S. S. Warren, Hull, for Mazatlan

Nov. 19, Adeline Gibbs, and Montecello, cruise.

Nov. 20, Am. ship Congaree, Weston, and Am. brig Globe, Doane, both for Boston, with cargoes of bone and oil, principally.

Am. wh ship Orozimbo, cruise.

Nov. 25, California, Lawrence, cruise.

Nov. 26, French wh ship Mississippi, cruise.

Nov. 27, Am. wh ship Three Brothers.

PASSENGERS.

On board ship Congaree, Mr. and Mrs. Jones, with three children; Mr. and Mrs. Colcord, with one child. On board brig Globe, Mr. Heath, formerly 1st officer of brig Ontario. On board Her B. M. ship Modeste, from Monterey, Mr. Andrew Johnstone, who sailed from this port seven weeks since and remained five days at Monterey.

PORT OF LAHAINA.

VESSELS IN PORT, NOV. 23.

Peruvian, St. Johns, N. Brunswick, Patriot of Bremen; Eng. ships Fanny, Emma, and Eliza Frances; Am. ships Columbia, Narragansett, Wm. Rotch, Jown Howland, Elizabeth Starbuck, and Emerald.

ARRIVED.

Oct. 24, ship Nassau, Weeks, New Bedford, 37 mos, 1 100 sperm, 1,700 wh, 1,700 bone.

Oct. 25, Concordia, Cartwright, Sag Harbor, 15 mos, 100 sperm, 1,550 wh, 15,500 bone.

Hamilton, Peck, Bridgeport, 12 mos, 135 sperm, 1,575 wh, 15,750 bone, cruise.

Oct. 26, Hero, Chase, Nantucket, 37 mos, 400 sperm.

Three Brothers, Mitchell, Nantucket, 39 mos, 1,800 s.

Oct. 27, Mary Ann, Bonney, Fair Haven, 24 mos, 1,050 sperm.

Emma, Elbourn, London, 22 mos, 200 sperm.

Helen, Cartwright, Sag Harbor, 12 mos, 3,000 wh 30,000 bone.

Zephyr, Smith. New Bedford, 17 mos, 500 sperm.

Gen. Pike, Piece, New Bedford, 13 mos, 2,000 wh 20,000 bone.

Citizen, Lansing, Sag Harbor, 18 mos, 2,000 whale, 20,000 bone.

Hope, Tucker, New Bedford, 10 mos. 400 sperm.

Oct. 31, George, McCleave, New Bedford, 14 mos, 390 sperm, 300 wh.

Adeline Gibbs, Baylies, Fairhaven, 38 mos, 2,200 sp.

United States, Worth, Nantucket, 36 mos, 1,400 sp.

India, Walker, New Bedford, 18 mos, 3,200 whale, 32,000 bone, home.

Nov. 1, Monticello, Coggshall, Nantucket, 39 mos 2,200 sperm, Line.

Roselie, Mosher, Warren, 27 mos, 500 sperm, 1,600 whale, 15,000 bone.

Java, Lane, Fair Haven, 38 mos. 2,200 sperm.

Ontario, Green, Sag Harbor, 13 mos, 150 sperm, 4,000 wh, 40,000 bone, home.

Foster, Congdon, Nantucket, 39 mos, 1 400 sp cruise,

Thames. Bishop, Sag Harbor, 16 mos, 1,600 whale, 16,000 bone.

Tuscarora, White, Coldspring, 14 mos, 2,300 whale, 23,000 bone, New Zealand

Nov. 10, Eliza Francis, Miner, London, 25 mos, 700 s.

Nov. 11, Emerald, Cathcart. N. Bedf, 12 mos, 650 sp.

Nov. 12, Peruvian, Brooks, St, Johns, 36 mos, 300 sperm, 2,200 whale.—*Peck & Co.'s List.*

PORT OF HANALEI.

ARRIVED.

Oct 16, Ship Stonington, Hamley, New London, last from Lahaina. Stopped eight days, took in wood and water. She left no *spirits* to scatter misery among natives and foreigners of the quiet village of Hanalei, as did —— a few weeks since. A rum-selling vessel can be traced from port to port in the same way that a ship would be which had the plague or small pox on board!

DISASTER. At 11 o'clock in the evening of Nov. 15th the American whale ship Wilmington and Liverpool Packet, New Bedford, Place, run upon the coral reef about 1 mile Eastward of the mouth of Honolulu harbor. She was running down the land, under easy sail, the wind being light. Just before striking she was in 17 fathoms of water, but the last throw of the lead gave her only 5 fathoms. The sea being smooth there was but little surf. Guns were fired, and at one o'clock in the morning she was boarded by the Pilot. Prompt assistance was rendered by the officers and men of the several ships in port. Exertions were made to get her off, (a part of the cargo was discharged, viz: the bone and 1000 barrels of oil) but they were unsuccessful, until his Excellency Gov. Kekuanaoa, with a strong force of native helpers went to their aid. The Governor and his men boarded her Sabbath the 17th at 12 o'clock, about 26 hours after she struck. In 7 hours she was afloat, and about 2 o'clock on Monday morning was safely anchored in the inner harbor. The remainder of the oil, about 2,000 barrels, has since been discharged under the Governor's management. The amount of injury sustained by the vessal has not, as yet, been ascertained. The settlement of the affair has been referred to arbitrators who have awarded $200 to the Pilots for extra services, and decided that the Governor shall receive, as a salvage, 1-4 of such parts of the cargo as he assisted in saving, and 1-4 part of the value of the ship, as she now lies at the wharf. S. Reynolds, Esq. acts as agent for Capt. Place. The ship is owned by John A. Parker & Son. The amount of insurance, if any, not known;—no lives lost.

DONATIONS.

For general expenses of the Chaplainey—Capt. Lawrence, Am. wh ship California, $8,00
Capt. Bartlett, Am. wh ship Orozimbo, 5,00
Mr. Ware, Purser U. S. S. Warren, 10,00
Mrs. Weston, wife of Capt. W. (Congaree,) 5,00

For Temperance, (or printing the Friend),—Crew of U. S. S. Warren. (2 Doubloons) $32,00
Mr C. Table, (will the donor please call.) 2,75
A. M. Pratt, Am. wh ship Josephine, 1,00

For enclosing "Seamen's lot" in the Nuuanu valley Cemetery—From Capt. Royes, Josephine, $5,00

N. B. The Seamen's Chaplain hopes to receive additional donations for the purpose of enclosing the lot which has been assigned for Seamen, by the Committee of the Nuuanu valley Cemetery

For the Friend.

TO MY CRUTCH.

Dedicated to the FLEAS *at Keaiva, Hawaii.*

Thou art no great beauty, I frankly own;
In paint and varnish thou never hast shone;
A straight pine stick, with a cross at top,—
Manufactured at home, and not in a shop,
Is all thou art; yet ever in thee
Of cherished friends a memento I see,
And a wretch were I, did I not as such,
Esteem thee highly, my honored crutch!

But more, for thy meek, obedient ways
And thy faithful service, I give thee praise;
For when the *fleas*—oh! vermin accurst—
Hilt-deep in my flesh their sabres thrust,
And my foot—no longer, alas! of use—
I had to hold up, as I've seen a goose,
In a plight that a heart of stone might touch,
To my aid thou camest, my faithful crutch!

And for two long months, if I wished to go
No more than across the room, or so,
At my side thou wert, ever prompt and ready
With a vigorous arm my gait to steady;
Or, if I reclined, thou still did'st stand,
A dutiful slave, within reach of my hand;
Yea, ever unwearied, though burdened much,
Thou served'st me well, my patient crutch!

And I give thee honor for service done;
A wreath of rhymes thou hast nobly won.
Henceforth, in glory and cobwebs drest,
May'st thou in thy attic securely rest,
'Till some poor stranger, of evil luck,
By the deadly dirk of a flea is struck,
Then thee, for support, may he firmly clutch,
And find thee a friend, thou faithful crutch!

But alas! this world of ours is black
With other fleas than Keaiva's pack;
And other crutches are found to be good,
Besides inanimate ones of wood;
For malice and envy and hate are here,
Leaving a "flea" in each idle ear;
And the spirit that feels their envenomed touch,
Must needs be in want of a friendly crutch.

Oh, were all the friends that in life we meet,
As firm as thou, and no more a cheat,
The viper of slander might bruise our heel,
And our head the blows of misfortune feel,—
And yet, erect, with an honest face,
Pursue we might our appointed race;
For, on those relying that loved us much,
We'd find, in our need, a faithful crutch.

The Seamen's Friend.

For the Friend.

A Forecastle Yarn: or the Effects of Running Away.

BY BLUE WATER.

Some six or eight years ago, dear reader, I embarked on board a whale ship, bound to the Pacific ocean after sperm whales. We had a good ship and customary outfit for a three year's voyage, with twenty-three men and boys all told. First we had a Captain, who was perhaps no better nor worse than he should be, a good mate and second mate, with boatsteerers, cooper, shipkeeper, four seamen, and the rest young men and boys, who had never been at sea before.—Some of us were New England farmers' sons, embarked in the whaling business just to see how we liked it, not knowing or caring whether, after the present voyage, we ever shipped in another vessel or not. Others there were, who had been dodging sheriffs long enough from place to place, and who were glad to get away from the law, courts of justice and prisons, not caring where.—We had all run in debt more or less, on the voyage, before leaving. When my story commences, we had doubled Cape Horn, and taken two or three whales off the coast of Chili, where we had to boil them out in cold weather. At this time we did not like the whaling business much. Some of us had begun to talk of running away, as we were bound down the coast, no doubt to anchor in some port. We had got into lower latitudes, where the weather was mild and pleasant, and we were standing whole watches, that is, one half of the crew kept the deck four hours, and was then relieved by the other. It was now past 10 P. M.; the larboard watch was bringing midnight. We were lounging about, some here and some there. Among us there was an old salt, sitting on the windlass, when one of the green hands, going up to him, said "Jack," (for his name was John Rivers,) "did you ever run away?" He drew a long breath, and replied, "No, thank God! but I came near enough to it once." Surprised at his answer, we all gathered round him, and said "How near did you come? tell us all about it;" so he related as follows:

"You must know boys, that I commenced going to sea sometime before the late war. Although quite young at the time it commenced, I had *seaman* written against my name, but *ordinary* came first. Well, I was knocking about all the war, sometimes in prison, sometimes in a privateer, and sometimes at home. But after peace was declared, I went in the merchant service about six years, then went to Nantucket, and shipped on board of the ——, Capt. ——, bound round Cape Horn after a cargo of oil. We calculated to cruise on the coast of Chili, Peru, and perhaps on the off-shore ground—Japan was not then thought of. We took a whale off the coast of Brazil, and more soon after getting round the Horn. We anchored in Callao with about 200 bbls., six months out. Our Captain was an old man. He had commanded a ship in the business before the war, but when it broke out, moved into the state of New York, where he lived to the end of it, and then came out whaling again. He was a shrewd old fellow, but never could refuse us money. An anecdote used to be told about him, whether true or not I cannot say. He was in a tailor's shop, being measured for a suit of clothes. The girls of the shop kept snickering all the time he was there. When he went out, the foreman asked them what they were laughing at; they said, to think how he must have looked going on board of his ship in his drawers, after having sold his pantaloons, alluding to a circumstance said to have happened the voyage before. Well, you see the old man had a good many traps to sell, so every time the boat went ashore we had something to smuggle. Now there was a man on board by the name of James Jameson, an active man, he could hand, reef, steer, knot and

THE FRIEND.

HONOLULU, JANUARY 1, 1847.

Who support the Schools in Honolulu and vicinity?

In our last number, we enumerated 44 schools now in active operation in Honolulu and vicinity. These schools are furnishing the rudiments of education to near 2,000 children and youths, between the ages of 5 and 20. It is truly an interesting and delightful subject for contemplation. Who, that will look at the present and prospective usefulness of these schools, but may well feel it a privilege to promote their efficiency and aid in bearing his due proportion of their pecuniary support?

The Hawaiian Government supports 38 of these schools, viz: 37 among the common people, and the school of the young chiefs.

The Punahou school is supported by annual appropriations from the funds of A. B. C. F. Missions.

The five remaining schools are dependant upon tuition-fees, and private subscriptions. William Tenooe's English school for Hawaiians, needs encouragement. The schoolhouse remains in an unfinished condition, while the teacher is discouraged because the parents are not more punctual in paying the tuition-fees of their children. This school really merits attention. Any intelligent person interested in the promotion of education, surely could not ask for a more promising field; let him occasionally visit the school, encourage the teacher, and contribute a few dollars annually, for its support, and we doubt not he will find a more ample return, than 12 per cent. per annum.

From what we know of "Mrs. Gummer's school," it has been tolerably patronized. This lady is highly deserving for her ardor and perseverance.

Mr. Stidolph informs us that he has undertaken his school by way of experiment. Most sincerely we hope that he may be fully successful. His school is needed npon the same principle, that the "Oahu Charity School" is needed. The increasing number of half-cast children must be educated.—The Charity School has opened a new term with about 30 scholars. This number is sufficiently large to occupy the attention of any one teacher. These two schools, together with Mrs. Gummer's, ought not, certainly, to fail of being liberally supported in this community.

In regard to the "Charity School," by no means would we have the character of the school changed, touching the terms of admission to its privileges; but regarding its support, a change ought to be made. Parents, possessing ample means, ought not to think of sending their children without fully paying a due proportion for the teacher's support, and the other expenses of the school

The sum of $15,00, would barely pay the expenses of educating a scholar for one year at the Charity School. We ask, have not parents, in Honolulu, sent their children to that school, year after year, without paying more than $5,00 per annum? Upon examination, we believe some children enjoy the privileges of that school, whose parents contribute not one farthing towards its support. Is this right? Some months since, a gentleman intimated to us, that he had in his possession, something like $40 for some benevolent purpose. We suggested to him, the "Oahu Charity School." He gave us to understand, that he did not think that school an object of charity, so long as so many rich parents there educated their children. The season of the year is now approaching, when the officers are to be chosen, and a subscription taken, to meet the current expenses of the school. Most sincerely we hope there will be a cordial willingness to contribute for sustaining so useful and important institution as the "Oahu Charity School."

It only remains for us to allude to the select school of Mr. Wilcox. It was opened on the 19th of November, with five pupils. Already has that number been more than doubled. We are anxious that the foreign community should fully understand the present condition of this school. There is no one, we think, but fully acknowledges its importance. The children who ought to attend a school of this description, is constantly increasing. For the current term, the teacher has a salary of $150 pledged to him, in case the tuition-fees should not amount to that sum. Some parents with whom we have conversed, have expressed the opinion that the terms were too high. We think so too, and we propose to those parents, who are now withholding their children from the school on that account, to increase the number of pupils to 20 or more, and we doubt not, the coming term, there will be a reduction in the price. Could the teacher be insured 20 pupils constantly, at $8 per quarter, it would pay his salary. We suggest these thoughts for the consideration of parents, guardians, and all others, interested in the maintenance of this school.

Such is the changing nature of our community, and so many are residing here, who have no children to send to school, that a great amount of the capital of the place pays no tax for the support of schools, and the promotion of the interests of education.—Some there are, who cannot be made to feel that they have any interest in the public welfare, or the general interests of education, and of course, will do nothing in the way of pecuniary support of schools, unless a tax-gatherer should stand before them, supported by the strong arm of the civil law. We make our appeal to men of another class. Ye, who were educated in the public and private schools of England and America, but are now residents in Honolulu, are you doing as much as you ought, for the support of schools? Many of you may have no families to support, or children to send to school, still, have you no interest in the cause of education? How can you expend more profitably, a portion of your annual income, than by aiding in the support of our schools? Select some child of the village and pay for his education. Sincerely we hope it may never be said of Honolulu, that a child here grows up, without being taught the rudiments of a good common education.

"The Oahu Fountain,"

Vol. 1, No. 1, is this day published by the "Oahu Temperance Society," for gratuitous distribution. Most sincerely do we congratulate the lovers of temperance principles and publications, that a "Fountain," a pure cold water fountain has burst forth on our shores. Although a month may elapse between the seasons of its *issuing* forth, yet, we doubt not, it will send abroad streams so fertalizing, that they will impart a perpetual freshness to all parts of the Island. When vessels are about to sail for the other Islands of this Archipelago, or different ports in the Pacific, it is hoped their water casks may be well filled from the "Oahu Fountain." The appearance of this Fountain can be account-

ed for upon the well known principles of hydraulics. It will be recollected that the "Hawaiian Cascade" poured down for more than a year. The stream disappeared, being absorbed by the remarkable porous nature of our soil, for who can be unacquainted with the fact, that no sooner does the shower cease to fall, and our streets are dry again. Well, the waters of the cascade are collecting into a reservoir, which being now full, sends forth this "Fountain."

The carrier of the Friend is directed to leave a copy of the Fountain with all of our subscribers.

"Cleopatra at a banquet given to Mark Antony, dissolved a pearl worth half a kingdom and drank it. Worse things are done now-a-days; the drunkard dissolves that which is of far greater value, his character, in liquor, and drinks it."

This paragraph we take from a late American paper. Yes, the drunkard wastes and destroys that which is of infinitely greater value than the most costly pearl that ever shone in Cleopatra's necklace. The drunkard has destroyed that which the moderate drinker is doing, slowly but surely. Among men, what is so valuable as a good character?

As has been well remarked:—"A good character is no easy acquisition;—it is no sudden freak of fortune to a man;—it is not the mushroom of a day, nor the meteor of the night. It is a plant of slow growth. It must shine by a steady and uninterrupted light before others will consent to walk in its light. Character is a kind of *coral formation* in morals. Its accretions are slow, but they form a solid basis, firm as the island rock, around which the waves and winds of ocean dash and roar only to be broken by its power. A good character is strengthened even by accusation. Envy exalts it. Reproach gives it conspicuity. Detraction only draws out the bad humors, but leaves the essential moral health untouched. We read of the *reputation* of commercial houses.—Every one knows both the manner of its acquisition and the extent of its influence, as well as the magnitude of its value. So is it with individual character."

When we plead with men, young and old, to abstain from intoxicating drinks, employing our most powerful arguments,—bringing the *principle of moral suasion* into active exercise, it is that we may induce them not to trifle with, endanger or destroy their good name, or fair character. "A good name," says Solomon, "is rather to be chosen than great riches."

THE FRIEND.

Vol. V.] HONOLULU, OAHU, H. I., JANUARY 15, 1847. [No. II.

The Poet's Corner.

For the Friend.

NEW YEAR'S MORNING, IN THE SOUTHERN OCEAN.

'Tis the New Year's morn. But ah! alone,
Shut up in this ocean dwelling,
There comes to my ear no cheering tone,
From the heart of Friendship swelling,
And I think of the friends I left on land,
And how they to-day are meeting,
And pledging anew the friendly hand,
With a hearty New-Year's greeting.

On the rippling deep a summer's sun,
From a summer sky is glowing,
And strange doth appear a year begun,
When June-like winds are blowing,
And I think of New England's wintry blasts,
And the ice her pathways filling,
And her dwarfish days, and her sun that casts
Men's shadows long and chilling.

The New Year's morn;—'tis the tranquil hour
When Retrospection leans
On her pensive hand in her lonely bower,
Reviewing the Old Year's scenes.
And the Old Year shakes his solemn head,
With a sad, reproving smile,
As if in her ear he plainly said,
"Now think of your sins awhile."

And Conscience, lit by the torch of Time,
Is pointing her silent finger,
To the fading shades of wrong and crime,
As in Memory's eye they linger;
And the ghosts of hundred moments stand,
In long and fearful array,
And each hath a scorpion-lash in hand,
A debt of revenge to pay.

The New Year's morn;—O, fondly, then,
Hope's eye on a land is glancing,
Where visions before her sanguine men
Of pleasure alone are dancing.
And fondly her future plans she lays,
And builds her castles airy,
And peoples their halls with loyal fays,
Herself the reigning fairy.

Then, too, the sober, experienced eye,
Of Reason mournfully turneth,
Where the fairy land of Hope should lie,
But no fairy land discerneth,
A land of sorrow she sees instead,
And the halls of silent weeping,
And she hears Disappointment's leaden tread,
As his lonely watch he's keeping.

The New Year's morn;—with a voice it comes,
And it tells us, life is fleeting,
Like a wave, that a moment curls and foams,
And, anon, is seen retreating;
And it tells of a world to come, where sin
Ne'er soweth the seeds of sorrow,
And it bids us hasten that world to win,
Ere dawneth a hopeless morrow.

While Wisdom, lit by the warning Past,
The New Year calmly surveys,
And, as if it were written to be her last,
Like a pilgrim plans her ways.
Lightly she treads the vale of Time,
Nor tarries in idle dreaming,
But keeps her eye on a height sublime,
Where the light of Faith is streaming.

C. S. L.

The Seamen's Friend.

For the Friend.

Forcastle Yarn No. 2, or the effects of running away.

BY BLUE WATER.

While Rivers was relating his tale, an old salt by the name of Duncan Campbell was leaning over the fife-rail, listening. When he had ended, Campbell replied, "Well, John, I have run away more than once, and to this day, I am in doubt whether I have been benefitted by so doing or not—endangered my life or not." We were all very eager to have him tell his tale, and would have set up our whole watch below with much readiness, to hear it; but he said,

"As our watch is up, we will go below, and turn in, and reserve the remainder until the next opportunity offers for relating the circumstances under which I run away, and the dangers I met with."

We all watched sharply for one, but none offered until we were off Callao, the very place where poor Jim was shot. We made the Isle of St. Lorenzo one pleasant evening, and had to lay off and on, all night, with but little to do, so as we of the larboard watch came on deck at midnight to bring four, we all gathered around Campbell, and called for the untold tale. To eager ears he then related as follows:

"A number of years ago, I left the greatest place for fitting out whalers in all the world, in one of the best ships that ever sailed from that port, with everything on board for comfort and use, and with as good a crew as ever sailed, but these were of no avail, on account of the conduct of one individual, (I will not say man) viz; the Captain. To describe him, I should say he was a drunkard without conviviality, a licentious man without generosity, and a tyrant without courage. We sailors say, 'the devil cares for his own.' If our Captain thought he had none of his own, he was certainly much worse than the devil.

"Well, to make a long story short, we went to the Sandwich Islands, then on Japan, and returned to the Islands again, doing well all the time, at getting oil, but this did not do. Our treatment was too bad! The Captain went on from bad to worse, until just before going into Tahiti, he put us on an allowance af 4 lbs. of bread per week.—The consequence was, while at Tahiti, nine of us ran away. The Captain offered a bounty for us, and as usual in like cases, we were soon caught; but fortunately for us, the Captain had become so unpopular among his associates, that the sympathy of all disinterested men was with us, so, as I firmly believe, the natives were hired to let us go. And no doubt they were more ready to do so from a circumstance that happened independantly of us. One of our other shipmates, having run away, was caught, but before he was delivered over to the Captain, a mob of sailors took him by force and carried him on board his ship, and the Captain in consequence refused to pay the natives anything for taking him. So I suppose the natives that had us in keeping, had rather take a small sum in hand than run the risk of losing all by depending on the word of such a man as our Captain. However, we were let go, and troubled no more, to my certain knowledge.

"Well, the ship sailed, and we were left destitute, and more than that,—all knew us there as runaways. Now you must know, boys, that the best of ships, commanded by the best of men, seldom have their best men run away; so when you run away from one bad ship, all you can do is to ship on board another bad one. So we all concluded to get a ship as soon as we could. Three of us kept together,—a man by the name of George, another Joe, and myself,—we were young and hearty, and could do a man's duty, blow high or low. We obtained a ship soon, but with this difference, the ship we left was a splendid one, and well found in all things without exception. The one we had shipped in was an old leaky trap, without anything to make men comfortable. So after cruising on the line some time, getting nothing, we anchored in Kealakekua bay,—where Cook was killed,—before going to Japan. The land is very high there, and appears from the ship to be but a few ship's length distant.

As the Captain feared to let us go ashore, lest we should run away, we remained ignorant of the actual distance, until, one dark night, we concluded to swim ashore. We stripped off all of our clothes except a pair of duck trowsers, and tied up what few things we had, and slung them around our necks, and in that plight we slipped down the cable and struck out for the shore. We soon found the distance four times as great as we had supposed, and all let go our bundles. When about half way from the ship, poor George dropped behind. We heard him halloo, but whether eaten by a shark, or caught by a cramp, or tired out, we never knew. All we knew was, we did but just reach the shore. There Joe and I were alone on the beach, our whole wealth a pair of duck trousers a-piece."

Just then we were called to wear ship, and heard no more of the yarn that night.

N. B The foregoing list is imperfect, but embraces all the names and occupations we have been enabled to procure. It is computed there may be 100 more foreigners residing in Honolulu, constituting rather a floating than permanent population.

RECAPITULATION

Auctioneers,	2	Lawyers,	5
Blacksmiths,	7	Mariners,	13
Boat-builder,	1	Merchants,	20
Book-keepers,	4	Masons,	12
Book-binder,	1	Physicians,	5
Bar-keepers,	3	Painters,	5
Bakers,	4	Printers,	10
Butchers,	2	Public Officers,	15
Barbers,	2	Pilots,	2
Brickmaker,	1	Ret. spts. liquors,	6
Caulkers,	2	Stewards,	13
Cabinet-makers,	6	Storekeepers,	16
Clergymen and Missionaries,	7	Shoemakers	7
		Sailmakers,	3
Coopers	5	Saddlers,	2
Carpenters, house,	38	Sexton,	1
" ship,	14	Ship masters,	2
Consuls,	5	Surveyor,	1
Clerks,	29	Tinsmiths,	4
Cooks,	2	Tailors,	8
Farmers,	6	Teamsters,	3
Graziers,	4	Victuallers,	9
Hotel-keepers,	3	Warehousemen,	6
Laborers,	2	Watchmakers,	2

In a few cases, as of merchants, consuls and auctioneers, when the individual is acting in more than one capacity, we have given both, but in all others have endeavored to confine the list to one. It is difficult to be accurate in this respect, as an individual in this community frequently exercises more than one trade or profession, but take the statistics throughout which we shall give in this and succeeding numbers, and a tolerably accurate idea of Honolulu may be arrived at. In the reports received from the master mechanics, we find more included than the above recapitulation would give; as for instance, 50 foreign house-carpenters, 27 ship do., and 3 saddlers. The number of foreign mechanics employed is upwards of 150; of natives, we find 12 carpenters, 9 shoemakers, 1 engraver, 19 tailors, 4 masons, 6 book-binders, 4 printers, and some others who have some knowledge of blacksmithing and the more common arts—say about 60.

Average wages of foreign mechanics, $2 50 per day, and of native mechanics, about $1.

In the above register are included 26 American families, 7 English and 1 Belgian—34 in all.

In Honolulu there are 38 American women and 13 English, and 112 children belonging to their families.

RECAPITULATION OF FOREIGN POPULATION.

Names in the register,	353
Ladies, not there mentioned,	52
Children,	112
	517

600 in round numbers may be set down as the present average foreign population of Honolulu, of whom 146 are naturalized subjects of the King.

The number of foreigners naturalized from March 8, 1844, to Dec. 10, 1846, throughout the Islands, is 421; including their families (13 in number) 51 women and children, making 472.

Of the naturalized subjects, about one-half were American citizens, one-fourth British subjects, and the remaining fourth French, German, Portuguese, Chinese, Tahitians, &c.

SCHOOLS OF HONOLULU.

From Official Report of April 1st, 1846.

DISTRICT OF KONA.

Native Protestant Schools, 28; Teachers, 28; Scholars, 1047. Native Catholic Schools, 6; Teachers, 6; Scholars; 156. Total number of scholars, 1203.

ROYAL SCHOOL.—*A. S. Cook, Esq., and Lady, Teachers and Guardians — Thomas Douglass, Esq., Assistant Teacher.*

Scholars.—Moses Kekuaiwa, Alexander Liholiho, James Kaliokalani, David Kalakaua, Lot Kamehameha, William C. Lunalilo, Peter Y. Kaeo, William Kinau Pitt, Jane Loeau, Abigail Maheha, Mary Paaaina, Lydia Kamakaeha, Bernice Pauahi, Elizabeth Kekaniau, Emma Rooke, Victoria Kamamalu —16.

Branches of Education Taught.—The English language, in which all the studies are pursued, reading, writing, arithmetic, drawing, geography, elements of geometry, natural philosophy and astronomy, grammar, composition, elocution, moral science, history, algebra, vocal and instrumental music, the domestic branches and family economy.

OAHU CHARITY SCHOOL.—*Mr. Enoch L. Hatch, Teacher.*

Number of scholars 50—from five to sixteen years of age.

Branches of Education Taught.—Reading, writing, arithmetic, grammar, geography and juvenile philosophy.

SELECT SCHOOL.—*Mr. James C. Wilcox, Teacher.*

Number of scholars, 14.

Terms.—Higher branches, $12; primary, $10 per quarter.

All the branches constituting an English education are taught.

MRS. GUMMER'S SCHOOL.—Number of scholars, 25.

Branches Taught.—Reading, writing, arithmetic and needlework.

SABBATH SCHOOLS.—*School in the Rev. Mr. Armstrong's Church.*—Average number of scholars, 250.

Adult Bible Class at the same place.—Average number of attendance, 250, or from 100 to 400.

School in the Rev. Mr. Smith's Church.—Number of attendance, 300 or thereabouts.

There is no Sabbath School connected with the Catholic Mission; but there are other religious exercises on the Sabbath in which about 300 children engage.

CHURCH MEMBERS—*As reported by the various Pastors.*

1st Protestant Church, Rev. R. Armstrong Pastor, upwards of 1400; 2d Protestant Church, Rev. L. Smith Pastor, 1188; Catholic Church, Rev. L. D. Maigret Pastor, (believes) 2000; Oahu Bethel Church, Rev. Samuel C. Damon Pastor, 26. Total 4614.

The attendance of foreign residents on Divine worship is very limited—probably the average is not one-tenth at the Bethel.

Markets.

There are five markets in Honolulu, (thatched sheds) one of which is more particularly a vegetable market. The following articles are supplied in considerable abundance, viz: Irish potatoes ($2 to $3 per bbl) sweet potatoes, kalo, Indian corn, cabbages, melons of various kinds, pumpkins, onions, bananas, plantains, beans of various kinds, capsicums, Chile peppers, tomatos, sallad, oranges, (25 cents per dozen) limes, grapes, citrons, figs, guavas, ohia apples, eggs, (25 cents to 75 cents per doz.) and fish, both fresh and dried. Pigs, turkeys, (50 cents to $1 each) ducks, (50 cents each) fowls, (25 cents to 37 1-2 cents each) are usually hawked about the streets and meet with ready sale, particularly in the shipping season. Beef, mutton and goat are common—wild fowls scarce—prices of all kinds of marketing are high compared with Chile.

Butter is mostly made on Hawaii and Kauai.—The whole quantity made on all the Islands during the past year, may be estimated at 10,000 pounds—the average price of which has been thirty cents per lb. A much larger quantity would have met with ready sale. Milk, 12 1-2 cents per quart.

It is estimated that during the past year 500,000 lbs. fresh beef and 500 bls. of salted (Hawaiian) beef has been sold at Honolulu, at an average price of 6 cents for the former and 6 1-2 cents for the latter per lb. The number of sheep slaughtered and sold at Honolulu, during the same period, may be set down at 300, most of which were brought from Hawaii—price 12 1-2 cents per lb.

Number of Houses in Honolulu.—Stone houses, 49; wooden houses, 39; stone or adobie below, wood above, 29; adobie houses, 345; grass houses, 875. Total number of houses, 1337.

The grass houses may be valued at from $5 to $500 each; the adobie at from $100 to $3000 each; others range from $1000 to $12000. The stores range in cost from $1000 to $8000 each. Land is so locked up by the policy of the chiefs and the prejudices of its few owners, as to bear a very artificial value. Eligible store and house-lots, when beto had, command prices varying from $1000 to $8000; but such seldom change hands. The prospect is that when the labors of the Land Commissioners are complete, and its principles carried out by the chiefs, lands will come plentifully into the market and at fairer rates.

Stores and Warehouses.—Stone stores, 15; wooden stores, 10; Adobie, 15. Total, 40.

Wholesale stores, 15; retail do., 32. (The two are in general combined.) Total number of buildings, including public do., 1386.

Public Buildings

Churches.—3 Protestant churches and 1 Roman Catholic church—cost about $55,000.

Palace, House of the Queen, &c.—Cost about $10,000.

Honolulu Hale.—Cost about $10,000, containing the offices of H. M.'s Ministers and the Custom House.

Hale Kauwila.—Containing the offices of the land commissioners and of the native judges.

Court House.—Court of Oahu for the trial of causes in which foreigners are concerned.

Forts.—(*Papu o Honolulu.*)—Fort Honolulu, within the enclosure of which is the Governor's residence, powder magazine and prison, Guns, 63.

Papu Puawaina.—Battery on Punch Bowl Hill. Guns, 11.

Streets and Lanes, 18.

Wharves.—James Robinson & Co.'s, (for repairing vessels) wharfage $3 to $5 per day; R. Charlton's; Government wharf (not yet completed); Stephan Reynolds'; (Grimes and Ladd & Co.'s, (for repairing vessels) wharfage 16 cents per ton; Ladd & Co.'s, wharfage $5 per day.

Shipyards.—James Robinson & Co.'s and Drew & Co.'s.

Burying Grounds.—Old burying ground, near the stone church; Nuuanu Cemetery, owned by the N. C. Association; Roman Catholic burying ground, at Kahua; burying ground near the Rev. L. Smith's church.

Hospitals.

American Hospital.—Number of inmates for the last year, 156—under the care of Mr. John Ladd.

British Hospital.—(Little Greenwich).—Number of inmates for the last year, (British) 37; other nations, 26. Total, 63. Uunder the care of Mr. Joseph Booth.

French Hospital.—Number of inmates for the last year, 9.

Printing Offices.

Government Press.—J. J. Jarves, Esq., Director; Charles E Hitchcock, printer—established 1844.

S. I. Mission Press.—E. H. Rogers, printer.

S. I. News Association Press.—Wilson, printer—established 1846.

Periodicals.

The Polynesian.—Government paper—weekly—edited by James Jackson Jarves—price $6 per annum.

The Friend.—For Temperance, Seamen, Marine and General Intelligence—semi-monthly—edited by Rev. Samuel C. Damon—$2 50 per annum.

Ka Elele—(The Messenger.)—Published in the Hawaiian language, for General intelligence, &c.—semi-monthly—edited by Rev. Richard Armstrong—$1 per annum.

The S I News.—Newspaper—weekly—edited by A. G. Abell, R. C. Janion and J. B. De Fiennes—$6 per annum.

The Oahu Fountain.—A Temperance Journal—monthly—G. M. Robertson—gratis.

Hotels.—Mansion House, Carter & Macfarlane; Canton Hotel, Hungwa; Hotel d'Universe, Pierre Le Gueval; Commercial Hotel, H. Macfarlane.

Remarks.—Price of board, from $4 to $7 per week. Sleeping apartments, which in general are not attached to the hotels, are extra charge. Room hire and rents in general are expensive—the former from $4 to $12 per month, for ordinary accommodations, and houses neither spacious nor well contrived, rent from $300 to $1000 per annum. Building of any kind is expensive in Honolulu, and there are few that have pretentions to taste or elegance.

Victualling houses, 15; grog shops, 7; billiard tables, 3; bowling alleys, 6.

Foreign Representatives.—Anthony Ten Eyck, Esquire, United States Commissioner; William Miller, Esquire, British Consul General; Jules Dudoit, Esquire, Consul of France; Joel Turrill, Esquire, United States Consul; Stephen Reynolds, Esquire, Bremen Consul; E. A. Suwerkrop, Esquire, Danish Consul; J. F. B. Marshall, Esquire, Peruvian Consul.

Societies.

Lodge of Free Masons.—Mr. Stephen Reynolds, G. M.

I. O. of O. F.—Pacific Lodge.—Established April 30, 1846—35 members.

Hawaiian Bible Society.—R. W. Wood, M. D., President.

Nuuanu Cemetry Association.—Mr. J. F. B. Marshall President—established 1844.

Hawaiian Tract Society.—Rev. S. C. Damon President.

Oahu Temperance Society.—James F. B. Marshall, President, instituted 1846—41 members.

Military.—*From official Report of April* 1, 1846.—The corps which musters at the fort, including officers, 286; corps of King's Guards, including officers, 363; stationed at the battery, on Punch Bowl Hill, 33. Total, 682.

His Excellency, M. Kekuanaoa, Governor of Oahu, is ex officio Commander in Chief.

Police.—Henry Sea, Esq., Marshal of the Hawaiian Islands; Mr. A. P. Brickwood, Sheriff of Oahu, ex officio Prefect of Police.

The police corps consists of 2 officers and 34 men. The distinguishing marks worn by the policemen are a scarlet crown on the arm, with the initial K. III., and a red band on the cap.

Courts, Crimes, Misdemeanors, &c.

Supreme Court.—This court holds one session at Honolulu and one at Lahaina every year—at the former place in June, at the latter in December.

His Majesty the King, Chief Justice; Areka Paki, Jona Kapena, Charles Kanaina, Joshua Kaeo, Judges.

Court of Record of Oahu, for the trial of cases in which foreigners are concerned.—Lorrin Andrews and William L. Lee, Judges.—Civil suits of any magnitude have been few for 1846. We have not been able to ascertain the precise number.

Cases in the Police Court of Honolulu—Justice Hopkins—from July 1st, 1846, to Dec. 31st :

Driving cattle through the st. cont'ry to law,	2
Furious riding in the streets of Honolulu,	5
Stealing,	43
Whoredom,	38
Drunkenness,	7
Abusive language,	1
Assault,	4
Fighting,	6
Carrying unlawful weapons,	2
Taking bribes,	2
Disturbances at night,	2
Refusing to do duty as servants,	3
Secreting seamen,	2
Trespass on property,	1
Riding another's horse secretly,	2
Total,	121

Inferior Court—Native Judges, Halali, Waolani, Kuhia, Honokaupu and Kaaukai.—Statement of offences punished from January 1st to December 4th, 1846 :

Offences,	Men pun.	Women pun.
Adultery fornication, &c.,	126	127
Theft,	43	3
Gambling,	35	3
Reviling language,	12	2
Working on the Sabbath Day,	30	8
Slander,	1	
Passing false coin,	1	
Heathenish practices,	3	1
Rape,	2	
Furious riding,	6	
Interference with police,	3	
Street walking,		4
Drunk and disorderly,	6	
Assault and battery,	7	1
Desertion of husbands by their wives		3
Total,	275	152

Of the 121 cases reported for six months in the police court, at least 90 were participated in by natives, which would make an average of 607 cases as above, among a native population of about 10,000, for 1846.

Setting aside the predominant vice of the natives, the table of morality is greatly in favor of the females. There is a great deal of petty, adroit thieving among a certain class of the population—chiefly on foreigners, to steal from whom it is considered by no means as disreputable as among themselves, if it be not classed as something better—which does not appear in the cases given, for probably not one in ten is ever detected. Great as has been the improvement in the social and political relations of the natives, their standard of morality is still exceeding low, though crimes are rare. A man and woman were hung in August for murder—the second case in Honolulu for six years. House breaking is not frequent.

Honolulu.

Some of our readers may recognize an old acquaintance in the above map of our town. So much of our columns are filled up with intelligence of a local nature, copied from the Polynesian, that we have concluded to make this number still more so, by again inserting this rough outline of the place. It originally appeared in the Friend of October 1, 1845. We have altered the localities to suit the changes that two years have made, besides adding a few more.

The town of Honolulu, (measuring five sixths of a mile long, and two thirds wide,) the most populous of all upon the Hawaiian Islands, is situated upon the south side of Oahu. It is the capital of the Islands, and most important sea port in the north Pacific ocean. The population, native and foreign, has been estimated at from 8 to 10,000. Mr. Ehrenberg, a German Engineer, employed by the Government to survey the streets, sketched this map of the town.

The following description of localities may aid the reader abroad, in obtaining a more correct idea of the place than he would otherwise be able to obtain.

1 Palace.
2 Fort, and residence of His Ex. Gov. Kekuanaoa.
3 King's Chapel, (or Rev. R. Armstrong's Church.)
4 Roman Catholic Chapel, (or Rev. Abbe Maigret's.)
5 Native Church, (or Rev. L. Smith's.)
6 Seamen's Chapel, (or Rev. S. C. Damon's.)
7 Young Chief's School, (Mr. Cook, Principal.)
8 Mansion House, (Messrs. Carter & McFarlane.)
9 Government Offices.
10 Government Printing Office.
11 Oahu Charity School, (Mr. E. L. Hatch, Teacher.)
12 C. Brewer & Co.'s store.
13 Hon. Hudson Bay Co.'s store.
14 Residence H. B. M. Consul General.
15 " U. S. Commissioner.
16 " French Consul.
17 " U. S. "
18 " Bremen "
19 " Peruvian "
20 U. S. Hospital.
21 Residence of Seamen's Chaplain.
22 Road to Nuuanu Valley.
23 " Ewa.
24 " Waikiki.
25 Inner Harbor, (always good anchorage.)
26 Hotel de France.
27 Premises of the American Mission.
28 J. B. McClurg's Store.
29 E. & H. Grimes' "
30 Everett & Co.'s "
31 Starkey, Janion &Co.'s "
32 Makee & Anthon's "
33 Ricker & Johnson's "
34 H. Skinner & Co.'s "
35 J. Robinson & Co.'s ship-yard.

It must not be understood that any of the above mentioned buildings occupy the whole of the square on which they are situated. Many others might be specified which are equally worthy of notice. It may be mentioned that visitors are surprised to find that the town has come to assume so much the appearance of a *citified* as well as civilized place.

THE FRIEND.

HONOLULU, JANUARY 15, 1847.

Sober Captain and drunken Steward.

About fifteen months since, an American whaler touched at this port, and while lying at anchor in the outer harbor, during the absence of the Captain, the steward stole a bottle of brandy from the medicine chest, and drinking it, became intoxicated and very insulting to the officers and Captain when he returned. As to the guilt of the unfaithful steward there could be no possible doubt. The question arose, how should he be punished? Probably, nineteen twentieths of the masters would have ordered him to be put in irons, and when sober, siezed up to receive one, two or three dozen. If that course had been pursued, very possibly the steward would have said that "the old man had served him right," and the next opportunity that offered have run away; for it is not common that a sailor will long remain attached to a vessel on which his back has been bared to receive the "cat o' nine." In the present instance, Captain —— decided to pursue a very different course of treatment. He said nothing to the man until the effects of the liquor had disappeared, and then he called him into the cabin, and endeavored to set before him the baseness and wickedness of his conduct. The steward could not but see that he had been grossly in the fault. The Captain then told him that he would overlook the past, if he would sign "the Pledge," and promise good behavior for the future. He did so, and the Captain visited the Chaplain's study for a blank pledge, and remarked that he was trying an experiment, detailing the circumstances. In about six months the vessel returned, and among the first questions we asked the Captain how he had succeeded experimenting with his steward. He replied, "No more trouble." Another cruise elapsed, and the vessel again returned, and again we asked the same question, and the reply was as before. The *sober* Captain and his *sober* steward are now on their homeward passage. Now we ask reasonable and sober men, did not this Captain pursue a far better course than that pursued by scores of swearing, swaggering, blustering, drinking and flogging masters?

Oahu Charity School.—The Annual Meeting of the subscribers, friends, and patrons of the Oahu Charity School took place at the Mansion House on Monday evening, 4th inst. Not a sufficient number of the Trustees being present, the meeting adjourned to Monday evening the 11th inst. Few were present, but all who were expressed great interest in the success of the school. Remarks were made by Rev. R. Armstrong, (who expressed a warm interest in the institution,) Rev. S. C. Damon, S. Reynolds, Esq., and others. We were much pleased to see Judge Turrill, U. S. Consul, who also expressed much interest in the success of the Charity School. The sum of $200 has been subscribed for the expenses of the current year, and the prospects are more favorable than they have been for some time.

S. Reynolds, Esq., was re-elected Treasurer; T. C. B. Rooke, R. Holt, R. G. Davis, J. O. Carter and H. Grimes, Trustees. F. W. Thompson was also re-elected Secretary, but having declined, J. G. Munn, Esq., was unanimously chosen in his place.

It was suggested to have a library attached to the school, and Rev. Messrs. Armstrong and Damon were requested to confer with Mr. Hatch (the teacher) for the purpose of carrying forward this object. The meeting then adjourned.

F. W. THOMPSON,
Secretary of the Meeting.

In addition to the foregoing account of the Secretary, we would remark, that Dr. Rooke made some statements in regard to the school worthy of being published. He commenced by remarking that the number of pupils in the school had been erroneously stated in the Friend as thirty, when it was twice that number. We would remark, that was an error of the printer. The doctor then added, "that 59 scholars were connected with the school. Of these, 42 have fathers living and 17 are orphans. These 42 are the offspring of 28 fathers, of whom 15 are day laborers, and are in indigent circumstances; and 12 are mechanics—several of whom have large families to support, while the remainder are not in constant employ."

"The 17 orphans, it appears, are supported by various members of the commnuity, a part by the very poorest class."

We are very glad to have it in our power to publish these statements of Dr. Rooke, believing that a knowledge of such facts will serve to enhance the importance of the school in the minds of many in the community.

The following is a brief statement of the annual voluntary subscriptions for the benefit of the school:

1840,	$300	1844,	$172
1841,	342	1845,	300
1842,	244	1846,	450
1843,	177	1847, at present,	187

Foreign News.

England.—In looking over English papers lately received, we find, as would be naturally expected, much published relative to the views and opinions of the new Ministry, with Lord John Russell at its head. The Morning Chronicle for July 11, contains a speech of Lord Palmerston, who, resigning his seat as M. P., from Tirceton, accepts the seals of the Secretaryship of State for Foreign Affairs, in the place of Lord Aberdeen.

He endeavors to show that the late ministry, from the circumstances of the country, was compelled to carry out those very measures which it opposed on coming into power in 1841, specifying the case of protective duties:

"It is manifest," he remarks, "that by the law of nature, the man who labors with his hands and the man who by his capital employs and pays for the labor of others should be permitted to dispose of the produce of either his industry or capital to the greatest advantage to himself, by sending it where it is of the greatest value. There is nothing in the world so simple as the enunciation of that proposition."

He then adds, "That the only check to the full adoption of this principle should be the raising of taxes for the support of the army and navy and the other purposes of Government. But when taxes were levied, not for the general good of the community, but for the purpose of encouraging the industry of one class of the community, you are not only doing an injustice to all the rest, but as the laws of nature are always founded upon that which is just and right, and as that which is unjust and wrong never ultimately does good even to those for whose apparent benefit it is perpetrated; so in this case, these partial and unjust taxes of protection for particular interests, instead of being any real advantage to those interests, only turn to their serious and permanent injury."

To apply this principle to religious matters, and fully to adopt it, would exactly suit the large body of dissenters in England.—They think it extremely hard that they should be compelled to pay taxes levied, not for the support of religion in general, but the established church.

We are glad also to notice his lordship's remarkably liberal views in regard to education.

"It is on education and instruction only that the peace, and prosperity, and welfare, and happiness of the nation can be founded (cheers); and it is lamentable to think that not here in these agricultural counties, but with more densely peopled districts, where factories prevail, there are growing up every year vast multitudes of human beings whose education has hitherto been so imperfectly attended to, that they are growing to mature age uninformed in all those matters of morals and religion upon which their welfare here and hereafter must depend. Gentlemen, that is a subject which will necessarily engage the early and anxious attention of the Government."

The Chronicle also contains a most interesting speech of J. Babington Macauley, (the celebrated Reviewer) before a large meeting in Edinburgh.

Prince Albert's Visit to Liverpool.—*New Sailor's Home.*—When the Tepic left Liverpool July 15, as we learn from the Liverpool Courier of that date, great preparations were making for the intended visit of Prince Albert. Laying the corner stone of a new and spacious Sailor's Home was to be one of the objects of his visit.

Dreadful Occurrence at Quebec.—On the night of the 15th July a fire broke out in the Theatre-Royal, St. Louis street, Quebec, during a chemical exhibition, by the upsetting of a camphine lamp. The house had been densely crowded, but some had fortunately left before the accident occurred. A rush was at once made to the staircase leading to the boxes, by those who, in the excitement of the moment, forgot the other passage of egress. In an incredible short space of time the whole interior of the building was enveloped in one sheet of flame.—The box staircase broke down, and in five minutes nearly all who were in the theatre were a heap of calcined bones. Forty-six bodies had been recovered and identified.

Wreck of an American Ship.—Extract from a private letter, dated Swellendam, May 1: "Information has just reached here of the wreck of the American ship Jentoo, Captain Hallis, from Calcutta to Boston, laden with indigo, shellac, hides, &c. Seven persons have perished—a lady, two children, a female servant, and three of the crew. The ship is a total wreck; the cargo is scattered over the beach, and must have been very valuable. The vessel was wrecked in Struis Bay, on Wednesday night, at 11

o'clock, on the very same spot where the Duke of Northumberland was lost.—*South African.*

ITALY.—It was sometime since announced that Pope Gregory was dead; but it was not known who would be his successor. The following are items from English papers.

THE NEW POPE.—The French Government received on Saturday a telegraphic despatch from Marseilles, announcing that Cardinal Ferreti, Bishop of Imola, had been proclaimed by the conclave successor to Gregory XVI. The new Pope was born in 1792. —*Times, June* 22d.

We received last night letters of the 29th and 30th ult., from our correspondent in the city of Rome. The nomination of Cardinal Gizzi as Secretary of State, and of Cardinal Amaiti, as Minister of the Interior, had not appeared in the *Diare*, but no doubt of the fact existed. The festival of St. Peter's was celebrated with the usual pomp. The Pope sung High Mass, attended by all the Cardinals. Fifty thousand people were present at these *fetes*, but not the slightest accident occurred or the least disturbance took place. The amnesty has not yet appeared. It is in the hands of a commission, who are examining every case. The new Government is popular.—*Times, July* 11.

The Paris journals continue to be very uninteresting. Those of Thursday, which arrived this morning in due course, do not contain a paragragh of news of importance.—There are letters in them, indeed, from Rome, on the subject of the Pope's election, in which a great deal is said of the influence exercised by M. Rossini, the French Ambassador, and of the favorable results to be looked to as regards French Policy; but we suspect that imagination has quite as much to do as fact with the information that is given to us on this susbject. All that appears certain is, that the new Pope is a good man; and that if his mind be as enlightened as his motives appear to be pure, his subjects will have reason to rejoice in his accession to the potifical throne; and the liberal portion of Europe find him ready to co-operate in the amelioration of the political state of Italy—There is nothing yet to show that to the title of Pius IX., we are to add—*the Reformer.* —*Globe, June* 27th.

"COPY ENOUGH."—Scarcely had we commenced the work of cutting extracts from English papers, ere our printer forwarded a brief communication, a copy of which we give our readers in full. Although our neighbors of the Polynesian and News have been most uncommonly industrious in crowding their columns with recent intelligence, yet the English papers are by no means exhausted.

Since writing the above our printer has forwarded us another brief despatch—"a little more copy."

A most distressing accident has occurred on the railroad between France and Belgium. Many lives lost.

The subject of common school education is now prominently discussed in the English papers.

The distinction in duties between the product of free and slave labor-produced sugar will probably be established.

His Highness, Ibrahim Pacha, was on a visit to England in July. He was most favorably received. A government steamer will convey him back to Egypt.

The Duke of Wellington, at the Queen's special request, continues as commander-in-chief of the army; but his Grace declared that he should cease to speak in Parliament, excepting respecting the army.

Mr. Macauley, the Reviewer, and formerly M. P., has been appointed to the office of Pay Master General, and has a seat in the Cabinet.

It was on the 25th June that Sir Robert Peel suffered his defeat in Parliament, by a majority of 75, upon the Irish Coercion Bill.

THE NEW MINISTRY.

IN THE CABINET.—Lord John Russel, First Lord of the Treasury; Lord Crittenden, Lord Chancellor; Marquis of Lansdown, President of the Council; Earl of Minto, Lord Privy Seal; Sir George Grey, Secretary of State of the Home Department; Viscount Palmerston, Secretary of State for Foreign Affairs; Earl Grey, Secretary of State for Colonial Affairs; Rt. Hon. Charles Wood, Chancellor of the Exchequer; Earl of Aukland, First Lord of the Admirality; Lord Campbell, Chancellor of the Duchey of Lancaster; Mr. Macauley, Paymaster General; Viscount Morpeth, Chief Commissioner of Woods and Forests; Marquis of Clanricarde, Post Master General; Earl of Clarendon, President of the Board of Trade; Sir John Hobhouse, President of the Board of Control; Mr. Labouchre, Chief Secretary for Ireland.

NOT IN THE CABINET.—His Grace the Dake of Wellington, Commander in Chief; Earl of Besborough, Lord Lieutenant of Ireland; Right Hon. R. L. Sheil, Master of the Mint; Mr. T. Milner Gibson, Vice President of the Board of Trade; Right Hon. Fox Maule, Secretary at War; Mr. J. Jervis, Attorney General; Mr. Romilly, Solicitor General; Mr. C. Butler, Judge Advocate; Chief Baron Brady, Lord Chancellor of Ireland; Mr. R. Moore, Q. C., Attorney General for Ireland; Mr. Monaghan, Solicitor General for Ireland; Marquis of Anglesea, Master General of the Ordinance; Colonel Fox, Surveyor General of the Ordinance; Hon. Colonel Anson, Clerk to Ordinance; Lord Clarence Puget, Secretary to Ordinance; Messrs. J. Parson and H. Tuffned, Junior Secretaries of the Treasury; Lord Ebrington, Messrs. O'Connor Don and U. Gibson Craig, Junior Lords of the Treasury; H. G. Ward, Secretary of the Admiralty; Vice Admiral Sir Wm. Parker, Rear Admiral J. W. D. Dundas, Hon. Capt. M. F. F. Berkeley, Capt. Lord John Hay, Hon. W. F. Cowper, Junior Lords of the Admiralty; Sir Wm. Somerville, Under Secretary for the Home Department; Right Hon. E. J. Stanley, Under Secretary for the Foreign Department; Mr. M. B. Hawse, Under Secretary for the Colonial Department; Mr. Redington, Under Secretary for Ireland; Right Hon. G. S. Byng and Mr. F. Wire, Secretaries to the Board of Control; Mr. Rutherford, Lord Advocate for Scotland; Mr. T. Maitland, Solicitor General for Scotland.

ERRATA.—In the lines on the first page, fourth stanzas, fifth line, for *hundred* read *murdered.* Last stanza; first line, *warning* read *waning.*

Donations.

FOR SUPPORT OF THE FRIEND.

The Seamen's Friend.

For the Friend.

Forcastle Yarn No. 3, or the effects of running away.

BY BLUE WATER.

We anchored in Callao roadstead next morning, where we all went on shore, and among the first places we visited was the old fort, to the south of the pier, called the "dead man's castle," and there, sure enough, stood right before the grated door, the same post to which Jim was tied, (or one exactly like it) filled with musket balls, that had been fired at some poor wretch or other while tied to it; none of us runaway, I can tell you.

After going out of Callao and congratulating each other on our fortunately all remaining in the ship, the interest of Duncan's story seemed to die away with most of our crew, but not so with me; I was determined to know more of his life and adventures. So one night, as we were alone in the blubber-room, with but little to do, I asked him to relate to me his farther adventures. He paused some time, evidently feeling a little unwilling to proceed; but, at length, said, when we found ourselves ashore on Hawaii in our destitute situation, we should have been almost ready to lie down and die, but for the sad fate of poor George. Ours in comparison to his was a blessing indeed.—Now, said he, as we have not yet visited any of the islands in this ocean, I will tell you how I used to feel when we were laying there belonging to a ship. We of course had a great deal of hard work to do, and when we went on shore and saw the natives living in idleness, and, apparently, eating and drinking just when they pleased, we used to think the islands a paradise, but when we were left there destitute, and with little, or no more clothing than the natives wore, we found our situation to be about as bad as can be imagined. True, the natives gave us food, just such as we had seen them eating with so much pleasure; but whenever I sat down to their fish and poi, I was always longing for the pleasure of eating out of some of the hog troughs that I remembered in my own country. As we stood, we were ashamed to offer ourselves to a whaler, so we entered on board of a poi schooner and went from island to island for some time; at length the Government of the Sandwich Islands fitted out an expedition to the Isle of Aramango after *Sandal Wood*; the expedition consisted of two brigs, commanded by a native chief. There were a number of foreigners in both vessels and among the rest Joe and I. One of the brigs was a beautiful vessel, and was quite well manned and appointed. The other was an old trap, and when Joe and I were compelled to go in the old Becket, we almost thought of running away again; however, Joe was a blacksmith and could repair and clean muskets; the night before we sailed, he was transferred to the ——. Oh! how I felt when he left me on board the old Becket. And O, how often have I thanked God since, for the interposition of Divine Providence in my behalf; for the —— and all her crew were no more heard of after leaving one of the New Hebrides, and we, after looking for her in vain and incurring many hardships, arrived safe at the Sandwich Islands, where I remained some time, and then shipped on board of a whaler, in which I went to the United States, where, after sailing in the merchant service sometime, I shipped on board of this ship, where I shall continue to do my duty, if my life is spared, until the end of the voyage.

But, said I, you have told how often you risked your life by running away; how can you imagine you have saved it by so doing? He replied, the ship I left first, finally went into a port on the coast of California, and there some difficulties happening, the Captain called upon the authorities to interfere, and one of the crew was stabbed by a soldier. So you see I might have been as bad off if I had remained. Now, said I, Duncan, was you always the same man you are now? No, said he, far different; I was intended to be a merchant, became a hard drinker, and had to go to sea, where I was for a long time a drunken, swearing sailor. What effected a change in you? The many scenes and trials I have been witness to, was his reply. When, said I? Why, mostly on board of the *Becket*, scenes of suffering which I will only say are seldom witnessed, unless on board of a slaver crossing the Atlantic. Do you drink any thing that will intoxicate, now, said I? His reply was, no, thanks to the change that has taken place. Almost every where there is not half the inducements to drink, that there was a few years ago. Did you sign a temperance pledge? Yes, I did. And did that save you? Not that alone. What, did the change that had and was taking place? What was that? Why, you must know that a few years ago, a man that did not enjoy a social glass was a laughing stock. Few wished to be laughed at, and so most drank. In due time people attempted to put a stop to drinking, by forming temperance societies. They were of no use at first, for these reasons: The moderate drinker was not alarmed, the drunkard had no confidence in himself or the public in him, and so people signed pledges, but to break them; but as soon as it was generally talked over in all societies, both high and low, drinking became unpopular, and all but those that loved the creature dearly, left off drinking, and those that did continue, drank the more; so there soon became this distinction, viz: Drinkers and cold-water-men, instead of the many grades that existed before. So sober men became alarmed for their friends, and instead of advising them to let the temperance societies alone, they advised them to join. And when they joined, their friends and well wishers, instead of laughing at them and telling them that they had signed away their liberty, they met them with smiling faces, more especially their wives and children, and the man who before was considered lost to himself, his family, and to society, found himself in good standing and beloved by friends as of old. Who could resist such inducements but men extremely lost to all sense of shame? How often, think you, in years past has the drunkard wished that he could become a respectable man? Well, the time has come, when all that wish to be, can, by coming forward and manifesting a desire to be considered cold-water men. They have but to convince the community of their sincerity by signing a pledge to that effect and shaping their course accordingly, and all will be well.

For the Friend.

Capt. Wilkes at Hilo.

He who composes a narrative for the public should write with the most scrupulous regard to truth, "*sine ira et studio.*" His facts should neither be colored by prejudice, nor distorted by figure. If he gives them second hand, he should be well assured that his vouchers are truthful and unprejudiced, competent in every respect to give veritable testimony.

If a writer pursue a different course, he will inevitably injure his own reputation and, very probably, the good name of others.—His readers will suspect his candor and withhold their confidence. When they discover that some of his statements are warped by prejudice, or are utterly devoid of truth, the perusal of the whole work, if indeed they deem it worthy of perusal, will be accompanied with distrust and suspicion.

In Capt. Wilkes' narrative, there are a number of statements concerning matters at Hilo, which betray an utter disregard of truth. The following sentences contrasting the conduct of the present misssionary, with that of the former, are witten with inexcusable carelessness, to say the least:

"Mr. Goodrich, the missionary who pre-

ceded Mr. Coan, was very desirous of introducing the culture of sugar cane and coffee, and became very active in promoting it. With the assistance of the natives, he planted a large number of coffee trees, and was bent upon instructing them in the mode of cultivating both. He also erected a small sugar-mill. I regretted much to hear that his successor viewed all these improvements in a far different light, and, not content to allow the trees to fall into neglect, he actually took the trouble to root them up, in order to arrest the progress of the improvement of the natives in their culture."—Vol. 4, p. 209.

The impression conveyed by this language, is that Mr. Coan was an enemy to the cultivation both of coffee trees and sugar cane; but does the language coincide with facts? It is very probable that Captain Wilkes *heard* what he has published; but was he not, in duty bound to take some measures to verify the truth of the statement? He walked around in Mr. C.'s garden and saw there more coffee trees than his predecessor had left growing there. How does this fact agree with the assertion, that Mr. Coan "took the the trouble to root them up?"

But admitting that Mr. Coan did not encourage the cultivation of coffee trees, or even that his influence was against their cultivation, was there ground for placing sugar cane in the same category?

At the very time that Capt. Wilkes was at Hilo, Mr. Coan had a quantity of sugar cane growing, which was manufactured into sugar, in the following summer or autumn. Capt. Wilkes also says, on the same page from which I have quoted above, that "the natives now understand its culture well, and each has a small patch."

How is this? Mr. Coan viewing "all these improvements in a far different light;" *i. e.*: looking upon the cultivation, both of coffee trees and sugar cane with feelings of aversion, and yet cultivating sugar cane himself! Looking upon the cultivation of sugar cane "in a far different light," and yet encouraging its cultivation by an example, which is universally followed by the natives! I assert, Capt. Wilkes' statement to the contrary, notwithstanding, and without fear of contradiction, that Mr. Coan never discouraged the cultivation of sugar cane.

The following extract contains an attempt at the ludicrous, but it is at the expense of truth and candor:

"The number of district schools in Hilo and Puna, is said to amount to 100; but, of these, I only saw one, which was under Mr. Wilcox, a teacher attached to the mission. This was kept in the old church. The number in attendance, varied from 60 to 80, consisting of all ages between 5 and 15. I was in the habit of passing this building almost daily, during the latter part of my stay, and frequently was much amused at the behavior of the scholars and their teacher. These little boys are, for the most part, nearly naked; but what they wanted in clothes they made up in curiosity, and on my passing on Kanuha's white horse, out they would come without the consent of their teacher. On one occasion, I was not a little amused at his attempt to restrain them, through which a kind of hurry-skurry ensued, as though so many rats were escaping from a cage; all the teacher could do, escape they would; and when he ran to one door to close it, they would nimbly seek the other, until none were left but such as he had tumbled over. I could not help laughing at this scene."—Page 212.

Now, this professes to be a narrative of an eye witness. He "was in the habit of passing this building" (in which the school was taught) "*almost daily* during the latter part of my stay, and *frequently* was much amused," &c. How could he be mistaken, in regard to what he witnessed *almost daily and frequently*? And what a graphic sketch! There is "the old church" standing out in bold relief; the little urchins nearly naked, rushing out in a hurry-scurry, and the teacher in fruitless haste passing backwards and forwards from door to door, and, ever and anon, tumbling over some luckless wight, and, to complete the picture, there is the Commodore seated "on Kanuha's white horse," and shaking his sides with laughter. Verily, "Kanuha's white horse" must attain to as much notoriety as Alborak, an animal between the nature of an ass and a mule, which conveyed Mohammed from Mecca to Jerusalem in the twinkling of an eye. As there is one resemblance, at least, between the two animals, they both being white, so also, is there in the truthfulness of the narratives published by their riders. Mohammed's narrative was believed by some, notwithstanding its ridiculous absurdities, and so, probably, will Capt. Wilkes' account of the children's scampering from the old church by one door while Mr. Wilcox was running to the other door to close it, obtain credit from some, notwithstanding the fact, that the old church had no doors, and notwithstanding, another fact, that Mr. Wilcox was not the teacher in the old church. His school was in another building, and was composed entirely of adults,—natives teachers.

If Capt. Wilkes was so desirous of enlivening his narrative with touches of the ludicrous, why did he not describe some *real* scenes and their actors, in their "*propria persona?*" He might have told us how the passions of a certain personage committed mutiny, and drove him to such excesses that all about him were glad to retire. But instead of a full narrative, sprinkled with oaths and imprecations, we have only the follow-allusions:

"It was exceedingly provoking to learn that there was much delay in getting these articles and the provisions from the ships; which arose, as I was informed by letter, in consequence of the refusal of the Rev. Mr. Coan, to allow the natives to set out early on Sunday morning; he required the officer to state that he believed our necessities were urgent, before he would consent to the natives going."—Page 150.

And what had the Rev. Mr. Coan done, that was so deserving of censure, or that was so *exceedingly* provoking to Captain Wilkes? He had done what he could to teach his people to remember the Sabbath day, as God has commanded. Was he to be censured for this? And when application was made to members of his church and congregation to start off for the mountain, on the Sabbath instead of attending divine worship, it was perfectly natural and proper for them to hesitate, and even refuse to set out, except with their pastor's approbation. And it was perfectly proper for Mr. Coan to dissuade them from setting out on the Sabbath until he had been assured that the necessities of the party on the mountain were urgent. So far from forbidding his people to perform works of necessity or mercy, on the Sabbath, Mr. Coan would enjoin it upon them as a duty; but then, he would not see the Sabbath desecrated either by his church members, or by the officers and crews of vessels, without feeling grieved, and exerting his influence against the desecration.

On page 212, Capt. W. pays Mrs. Coan a compliment, and he endeavors to heighten it by slandering her husband. Here it is:

"She (Mrs. Coan,) is one of the most useful of the missionaries; and, were it not for the less liberal notions of her husband, would be much more so. I could not but perceive that his interference in the matter of this school, is detrimental to the progress of the scholars in civilization; when this is the case, it cannot advance their progres in true religion."

False and illiberal assertions! Capt. W. could not but perceive that his interference is detrimental to the progress of the scholars in civilization! Ridiculous! His perceptions, forsooth, must have been as wonderful as his power of vision. He could see what did not exist, as e. g. the doors of the old church, and he could perceive what was imperceptible, viz., the detrimental effect of Mr. C.'s interference; for there had been no interference.

But was not Capt. W.'s eye-sight defective? How else can the following statement be accounted for? —

"After leaving Olaa" (a place about midway between Hilo and the volcano,) "we had no distinct path to follow; for the whole surface became a mass of lava, which retained all its metallic lustre and appeared as if it had but just run over the ground—so small was the act of decomposition. There were only a few stunted bushes on our track; but some dense patches of wood were observed on our right." p. 119.

Those who have passed over the route,

know that the path is nearly, if not quite as distinct from Olaa to the volcano, as it is from Hilo to Olaa. The way is much traveled, and doubtless has been for ages, by natives who were passing back and forth, between Kau and Hilo. One who has been often over the ground, asserts that, "the road from Olaa to the volcano, is generally very distinct. Ohelo bushes grow much of the way, as well as other bushes, grass and small trees, on both sides of the road. The smooth lava, when it is not covered with soil, has been trodden so much, that it is grooved out and worn away in many places. The path is nearly as distinct as a turnpike, the greatest part of the way."

From an examination of those pages of Wilkes' narrative, which relate to Hilo, it is evident that he is prone to make assertions which have no foundation in fact, and remarks concerning individuals which betoken "less liberal notions" than become a brave and magnanimous man. And if he has made false statements about matters at Hilo, is it not probable that some of his statemeants about persons and things in other places are deficient in a very important requisite—truthfulness? There will be an impression on the reflective reader's mind, that such a probability exists, and he will be compelled to withhold his full belief, except when Capt. Wilkes' statements are verified by concurrent testimony. It is exceedingly to be regretted that Capt. Wilkes has allowed himself to publish any false statements; for, by so doing, he has injured his own reputation and the cause of science, which his voyage was so well calculated to subserve. Moreover, "we desire that brave men should be upright, guileless, friends of truth and far removed from falsehood." "*Volumus viros fortes et magnanimos, eosdem esse bonos, et simplices, veritatis amicos, minimeque fallaces. Quae virtutes ad justitiam pertinent.*"

A. V.

England,	116,929 00
China,	43,040 00
Valparaiso,	38,965 00
Columbia River,	23,101 00
California,	17,040 00
Hamburg,	4,474 00
Bremen,	4,069 00
Sidney,	1,870 00
Kamschatka,	1,087 00
Other countries, including oil, bone, &c., landed from whaleships,	22,186 00
	$598,382 00

WILLIAM PATY, Col. Gen. Customs.

HONOLULU, Dec. 31st, 1846.

The port charges are as follows: At Honolulu, pilotage in and out, $1 per foot; for piloting a vessel to anchorage off the port, $10; tonnage dues for whalers, 6 cents per ton; do for merchantmen, 20 cents per ton; buoys, $2.

At Lahaina, anchorage, $10; lights, 1.

When a vessel proceeds from Lahaina to Honolulu, the anchorage dues at the former port are remitted. Besides these, there are custom house charges incidental to the wants or business of each vessel, as from 50c. to $1 each, for stamped permits, manifests, entries, &c., of cargoes, clearances, bonds for duties, etc., of which each vessel requires one or more. The average charges upon a whaler at Honolulu are as follows:

Pilotage in and out, say 15 feet draft,	$30
Tonnage, say 300 tons, 6c. per ton,	18
Buoys,	2
Stamps, say one clearance and one permit,	2
	$52
At Lahaina,—	
Anchorage,	$10
Lights,	1
Stamps,	2
Canal, when used,	3
	$16

As an offset to the comparative cheapness at Lahaina, it is an open roadstead, exposed to blows from the south, which at times damage shipping and delay work. For safety, convenience of repairs, and the general wants of shipping, the harbor of Honolulu is unrivalled in the Pacific; these advantages much more than compensate for the additional charge of pilotage. It is besides the seat of government and depot of foreign commerce.

By the tables of the Collector General of Customs, it will be seen that the increase of imports of 1846 over those of 1845 has been $51,441. The actual annual consumption of foreign goods among the native population does not as yet exceed $3 for each individual. A large amount of goods imported finds its way out of the country in supplying the wants of the shipping.

The revenue of the custom house, for 1846, as given by Mr. Paty, for Honolulu, is to be added to that derived from Lahaina.

In 1845 the total receipts, from all sources, were		$29,220 30
In 1846, from Honolulu,		36,506 64
" " " Lahaina, first six months, harbor dues, canal, &c.,	$1,705 00	
Duties,	225 50	1,930 50
Second six months,		
Anchorage dues,	2,110 00	
Lights,	210 00	
Canal dues,	414 00	
Duties,	206 12	2,940 12
		$4,874 62
Total amount of revenue from custom house for 1846,		$41,378 26
Total amount of revenue from custom house for 1845,		29,220 30
Increase,		$ 12,157 96

For the Friend.

Education and Temperance.

Examination of Schools—His Majesty, the Premier, Paki, Governor Young and the Minister of Public Instruction, present.—Addresses—Improvements—Missionary influence, &c., &c.

Kuluaaha, Molokai, Jan. 7, 1847.

Mr. Editor,—I have had the pleasure of attending an interesting annual celebration of the children at Kaluaaha, Molokai. On the last day of December, more than a thousand children were examined in the studies of the year; arithmetic, geography and music. The result was truly creditable to all parties.

On Friday morning, January 1, 1847, all the children (about 1,100) were assembled and seated in the body of the church, while every nook and corner left, was crowded with adults; and there were more outside than the house contained. His Majesty, the King, first addressed the children and told them how happy he was to meet them all there. He reminded them that most of them were born since his last visit here. He told them they were the hope of the nation, and he was happy to hear that they had all taken the temperance pledge, and strongly exhorted them to never depart from it, not even at the solicitation of their parents, or any one else. This point he urged at some length, telling them that he well knew the evils of intemperance. "When I was last here," said he, "I urged the importance of attention to the word of God; my mind is not altered on that subject. Obey your teachers and study the word of God."

He then addressed the parents, and urged them to educate their children, the hope of the nation; to teach them to keep their temperance pledge and never induce them to break it.

When the King sat down, the Premier (Mr. Young) arose and said he united with His Majesty, in rejoicing at this temperance celebration. He told them they must not think that birth and blood will make a man a chief hereafter, without character. That many had become chiefs heretofore by birth without any character; but hereafter, character and education alone, could elevate a man. That profligacy and ignorance, would disqualify even chiefs for office, and they would see that profligate chiefs would be displaced by intelligent and virtuous commoners. He then exhorted them to keep their temperance vows and improve their minds; obey the word of God and their teachers. "We are all happy to day," said he. "This is a new scene. We enter on a new year. It is a new thing for you to meet with your chiefs here, and it is a new thing for us to see so many happy faces at a temperance celebration. It is a new temperance meeting, and you have again renewed your temperance pledge."

Paki then arose and commenced by saying that he was one of them; that this was the place of his birth, and it gave him happiness to meet them there. He urged them to keep their temperance pledge. Told them they had begun aright in childhood. "We," said he, "*know the evils* of intoxicating drink; our habits are fixed and we find it hard work to reform. We have to fight hard against our appetites, and only by hard fighting can we stand; you have begun right, I will conjure you who have taken the pledge in childhood, to stick to it; you are on the safe side. Have nothing to do with awa, touch no intoxicating drinks, use no tobacco."

The Governor of Maui, Mr. James Young, followed Paki, and made many interesting remarks. He told them he wished to encourage temperance and discourage intemperance; to befriend the industrious and sober poor; to deliver the oppressed and aid all who wished to do right.

When he had closed, the Minister of Public Instruction, addressed the parents, children and teachers, explaining some school laws which had been misconstrued and misapplied by magistrates. He clearly stated the advantages of education and temperance. At the close of his address, he called up the school of Halawa, the teacher of which had trained his scholars in manual labor; they having voluntarily planted several patches of taro, and cultivated them solely in the hours of leisure. The girls likewise braiding mats. The scholars all stood up while the Minister of Instruction commended their industry and exhorted them to perseverance, presenting in the name of the Government, two gold pieces to purchase a time-piece for the school, as a reward of merit.

The 1,100 children then all joined, in chanting the hymn, beginning

"Aole au e inu rama,
Aole inu waina hoi,
Pau ka gini, pau ka awa,
Aole loa lalau hou;
Pela hoi ka puhi paka,
Aole au e puhi hou,
Ino maoli kela hana
Pono ole maoli no."

Never I'll drink rum, no, never;
I will never tipple *wine*;
I renounce both gin and awa,
Never will I taste again.
So that nauseous bane tobacco,
Never will I smoke the weed;
Filthy, foolish, is the praatice,
Pois'ning breath, and life indeed.

After the chanting, which deeply interested all of us, short addresses were delivered by the missionaries present.

The whole congregation then sang again. Without hesitation, I must pronounce the singing the best I have ever heard at the Islands among natives.

After singing, the children again formed a procession, marching in double file, preceded by a white flag, on which was painted the motto WAI WALE NO.—Nothing but water.

In this style, they marched a third of a mile, (forming a line nearly the distance) to the mission premises, where all sat down to a temperance dinner, their King, Premier, Governor, and other high officers, setting down with them.

All appeared highly gratified. His Majesty expressed himself delighted with the whole scene, and I doubt not, it will hold a favored place with him among the pleasant reminiscences of life.

The neat clean dresses of boys and girls, (for white and blue cotton, calico, and even silks, have taken the place of the tapa and pau, both with children and adults on Molokai) as well as the good order, the sobriety, that reigned for two days among some 3,000 individuals, could not but strike every spectator most favorably.

Let those who think the gospel can do nothing for heathens, visit quiet, retired, unbustling Molokai with her 6,000 inhabitants and two missionaries. Where, indeed, only Mr. Hitchcock labored, from the year 1832, though Mr. Andrews has been associated with him the last two and half years.

Very truly yours,
C. FORBES.

Seaman's Hospital Society.—On Friday the quarterly general court of the supporters of this charity was held at the office, King William-street, City. The treasurer, John Labouchere, Esq., presided. The report for the past quarter announced the receipt of nine hundred dollars, or 187*l.* 10s. English money, from Keying, the Commissioner of the Chinese empire, which sum was forwarded to the funds of the hospital by His Excellency, in return for the aid afforded to the sick and destitute Chinese sailors. A vote of thanks was passed to His Excellency for the munificent donation. The report also announced the receipt of 333*l.* 6s. 8d. from Mrs. Somes, widow of the late Joseph Somes, Esq., M. P., who had bequeathed the same to the charity; 20*l.* annual subscription from the King of Hanover, and some other minor donations. It appeared that during the three months there had been admitted on board the Dreadnought, 11 sailors from Her Majesty's vessels, and 490 from British and foreign vessels, 160 remaining on board at the close. 534 of the number were discharged convalescent; 406 had received out-relief during the same period; thus making the total number relieved by the hospital since its formation, in 1821, 52,268, including upwards of 32,000 Englishmen, 6,300 Scotchmen, 4,900 Irishmen, 1,600 Swedes and Norwegians, 682 Germans, 632 British Americans, 925 natives of the United States, 786 East Indians, 904 West Indians, 116 born at sea, 652 Russians, 969 Prussians, 691 Danes, 146 Dutchmen, &c., &c.—[Sun.

THE FRIEND.

HONOLULU, FEBRUARY 1, 1847.

World's Convention.—For the discussion and promotion of Temperance. Many months since, we saw it announced in the English and American papers, that in August, 1846, there would be held a World's Temperance Convention. The idea appears noble. Let delegates assemble in the world's metropolis to discuss the world's curse. By the late arrival from Tahiti, we have received files of English Temperance Journals up to the first of August. The most busy preparations were making. Delegates were assembling from the East, West, North and South. In the list of American delegates were noticed the following: Rev. Drs. Cox, Tyng, Smucker, Beecher, Edwards, Brinsmade; Rev. Mr. Marsh, Editor of Temperance Journal; E. C. Delevan, Esq. and many others.

From Bombay, India, Arch-Deacon Jeffreys; Madras, Rev. F. D. W. Ward; West Indies, Hon. Hay McDowal Grant. The Delegation from Scotland and Ireland, will, doubtless be very large.

"Of course," says the Temperance News, "we calculate that the Rev. Theobald Mathew, the *real* emancipator of myriads of his countrymen, will take part in its proceedings. We shall be greatly disappointed if there be not 500, and upwards of regularly appointed delegates, and all good men and true."

Covent Garden Theatre had been engaged for a *Grand Demonstration*, on the evening of the 7th of August. Dress Boxes 2s., Second Tier 1s. 6d., Third Tier 1s. 6d., Pit 1s., Stage 1s., Lower Gallery 6d., Upper Gallery 3d.

The leading subjects to be brought before the committee, were stated in a circular issued several months since by the British National Temperance Society:

"1. To ascertain the state of the temperance cause in all parts of the globe.

2. To receive suggestions as to the most effectual method of extending the temperance reformation.

3. To attempt the formation of a Temperance Union throughout the world."

We shall anxiously wait to receive a report of this convention. Its influence must be most salutary upon the general prospects of the Temperance Reform throughout the world. Its discussions must quicken the pulse of philanthrophy, and its influence be felt in imparting new life and energy to the cause in the remotest corner of the globe. The London Committee will devote £1,000 to scattering abroad a report of the proceedings of the Convention. We shall not fail to spread before our readers the earliest intelligence which may be received in regard to the most important temperance meeting ever convened.

Teetotalism in England.—Through the politeness of His Majesty, and his Minister, G. P. Judd, Esq., we have been favored with the perusal of a file of the Bristol Temperance Herald. From these papers and others lately received from London, we gather much interesting information respecting the prospects of the temperance cause in the United Kingdom. Never have we read more encouraging intelligence from that quarter. The friends of the cause have had a long and hard struggle to bring the subject before the public mind. With shame, be it said, the clergy of the established and dissenting sects have stood in the way of the cause. They are now beginning to open their eyes, and the awful spectacle of intemperance and its consequences, makes them stare! We are glad to see that such a man as the Hon. and Rev. B. W. Noel has let his voice be heard in the drunkard's behalf. The work having been once fairly begun, is half accomplished. Some months since we met with a volume entitled, "Intemperance the Idolatry of Britain," truly its devotees are many! The press, we are glad to see, is becoming enlisted in behalf of the cause in that country. Let that engine once be brought to bear, and it will produce vast changes in the drinking habits of the English people. The discussion of the subject at home will favorably affect the British foreign possessions. We have heard the remark, that the Spaniard first erects a church when he steps on a foreign shore, the Frenchman a fort, and the Englishman a grog-shop. The American must come in for a share of this bitter reproach and burning shame. The truthfulness of the remark makes it the more cutting and reproachful.

☞ Without memory, the judgment must be unemployed, and ignorance must be the consequence. Pliny says it is one of the greatest gifts of nature.—*Montaigne.*

Lahaina Chaplaincy.

TO ALL WHOM IT MAY CONCERN.

This is to certify that a meeting of the masters and officers in port, being called at Lahaina, September 15, 1846, to consult on the propriety of repairing the reading room erected here by masters and officers.

We, the undersigned, masters and officers then present, after duly considering the present dilapidated condition of the building, the heavy expense necessary to repair it, and also that it is no longer used nor needed, for the purpose for which it was erected, did resolve unanimously, that it be sold for the sum apprized by a committee of carpenters, and the proceeds placed in the hands of the Seamen's Chaplain, to fit up a reading room under the Bethel, enclose it with a decent fence, &c.

2. Whereas, the said reading room stands on a basement owned by the American Mission, on the premises of Rev. D. Baldwin, and cannot be occupied contrary to the original intention, of a reading room, Rev. D. Baldwin shall have the refusal of taking it at the value apprized.

3. Should he refuse, it shall then be sold either to any purchaser at private sale, or at auction to the highest bidder, the materials to be removed immediately from the premises.

Daniel H. Taber,	Benj. K. Studley,
Isaac M. Case,	Stephen Devoll,

Edwin Coffin,	Mayhard Adams,
John W. Norton,	Shubal Lewis,
Nathan B. Heath,	John R. L. Smith,
F. D. Haskell,	John H. Pease,
L. C. Wimpenny,	Thomas West,
John Fisher.	

Lahaina, Oct. 28th, 1846.

At an adjourned meeting of the shipmasters and residents of Lahaina, assembled at the Reading Room, Capt. Pease was appointed Chairman, and John Ewing Secretary.

The question of the disposition of the proceeds to be derived from the sale of the building erected for a reading room for masters and officers, was taken up and considered.

On motion of Capt. Daggett,

Resolved, That the building be sold to the highest bidder.

On motion of Capt. Smith.

Resolved, That the Rev. Mr. Forbes be authorized to act as agent to dispose of the building and appropriate the funds derived from the sale thereof, as provided and authorized by the meeting held Sept. 15, 1846.

A memorial sent to Judge Andrews, was read to the meeting, and also Judge Andrews' reply, in relation to a debt due by a

Mr. Wilson, for rent; he having occupied the reading room as a dwelling, 15 months.

On motion of Capt. Dagget,

Resolved, That Judge Andrews be authorized to collect the amount due by Mr. Wilson and deposit the same in the hands of Rev. Mr. Forbes, to be appropriated as directed by previous motion.

On motion the meeting adjourned.

JNO. D. EWING, Secretary.

October 31, the reading room was sold at auction to Mr. Baldwin for the sum of		$70 00
The furniture was sold for the sum of		16 75
		86 75
Deduct expenses of sale		4 33
		$82 42

Respecting the debt of Mr. Wilson, due for the rent of the reading room, as stated above, amounted to about $75. Judge Andrews received the memorial of the Captains, and was preparing to collect the debt when Mr. Wilson absconded from the Islands and has not since been seen in these parts.

A new reading room has been fitted up floored and neatly painted, under the Bethel. The portico shingled, and the whole surrounded with a new fence, at the following expense:

Paid committee for survey of old reading room,		$3 00
For lumber and materials to finish new reading room,		116 57
For laths, and nails, &c.,		8 00
For lime and plastering,		28 25
For painting,		3 87
Native labor,		2 00
Blacksmith's bill,		4 50
For carpenters work,		79 97
Shingles, nails &c., for portico,		17 75
		$265 91
By this sum received from H. S. Swinton, Esq., as per bills of sale of reading room,		$82 42
His donation of Dec., 1846,		10 00
		$92 42
Which leaves the reading room now in debt for the sum of		$176 49

Lahaina Jan. 1, 1847.

☞ The Foreign Residents in Honolulu have been justly commended for their liberality in subscribing for charitable purposes. Among the objects presented for voluntary subscriptions, the Seamen's Chaplaincy has held a prominent place. A friend has suggested to us, that in the minds of some, there was a little uneasiness from the consideration that the subscription-paper, as was thought, had been circulated too frequently. Who those individuals are, we know not. Whether many or few, we are alike ignorant. The present, we think, may not be an unfavorable opportunity for explaining why any subscriptions should be solicited, and for exhibiting what amount has been annually collected, and how it has been expended.

It is now rising of four years since the present Chaplain entered upon his duties in Honolulu. On his arrival, he was given to understand that sufficient might be annually collected in Honolulu to defray the necessary expenses attending the Chapel, viz: Sexton's services, painting, and otherwise keeping the building and premises in repair. The following statement of annual receipts and expenditures for that purpose, may not be uninteresting to those who have contributed, or unimportant as indicating the interest felt by this community in support of the gospel. This report will extend from January 1, 1843, to January 1, 1847, a period of four years.

1843.

Subscribed by foreign residents for Seamen's Chapel,		$243 00
Unpaid,		13 00
		$230 00
Expended on Chapel, and for Sexton's services,		84 63
Balance,		$145 37

1844.

Subscribed,		423 00
Overplus of preceding year,		145 37
		568 37
Expended,		572 98
Deficit,		$4 61

N. B. The additions and repairs on the Chapel, occasioned the heavy out-lay this year.

1845.

No subscriptions,		000 00
Expended,		265 75
Deficit of the preceding year,		4 61
		$270 36

N. B. The Chaplain did not circulate any subscription paper this year, for two reasons, 1st, The liberal subscription of the preceding year. 2d. The liberal donations of the sea-faring community enabled him to meet the current expenses of the Chapel.

1846.

Subscribed,		$306 00
Expended for painting Chapel,	297 88	
" other purposes	139 87	437 75
Deficit,		$131 75

The subscription-paper has been circulated three times in four years.

Total subscribed during four years,	$959 00
Total expended " " "	$1361 11

The Chaplain desires it to be distinctly understood, that every dollar collected in Honolulu for the Seamen's Chaplaincy, has been expended on *the Chapel alone*; but that amount has been insufficient to keep the building in repair and defray other necessary expenses. To make up this deficiency, of $402 11, funds have been collected from other sources. The repairs upon the Chaplain's house, have been defrayed by donations from the sea-faring community or the Chaplain's private funds.

The subject of an Episcopal Society appears to be under consideration by persons in public and private life, among the foreign residents. Most cordially would we favor the project, and most sincerely we hope it may succeed. Whenever, in the providence of God, the residents shall invite a gospel minister to preach among them, we shall gladly welcome him to his field of labor, and hail the day of his arrival as a most encouraging and pleasing event in the religious prospects of this community. We thus frankly express our opinion, not because we are tired of preaching to residents, or wish them to leave their seats vacant in the Chapel. That building, to be sure, is small, and could not accommodate all the foreigners, if they would attend church, still, so far as it will afford sittings, the residents in Honolulu, know that they have ever been cordially welcome to occupy that portion which was not reserved for seamen. Until a new place for religious worship shall be provided, we hope that residents, so far from deserting the Bethel will resort thither more numerously and more regularly. Upon principles of worldly policy, the promotion of good morals and the good of society, we would most strenuously advocate church-going and regular contributions for support of gospel institutions. Motives, however, of a high-

er order, the duty man owes his Maker and the happy result which it is to be hoped may follow, here and hereafter, from listening to the stated ministrations of the sanctuary, these and a multitude of others which would naturally suggest themselves to a reflecting mind, ought to induce men to visit the House of God. To argue a point so plain, seems like endeavoring to demonstrate a self-evident proposition.

P. S. The Seamen's Chaplain would most respectfully acknowledge the following subscriptions for the support of the Chapel, for the current year, (1847.)

C. Brewer, & Co.,	$30 00
E. H. Boardman,	10 00
R. W. Wood,	20 00
J. B. McClurg & Co.,	10 00
G. D. Gilman,	10 00
R. C. Wyllie,	10 00
John Ricord,	10 00
G. P. Judd,	5 00
H. Grimes,	12 00

The subscription-paper will remain in the hands of the Sexton.

ROBBERY.—The U. S. Consul's house was entered on Monday morning early, and robbed of between $50 and $100 in cash. The supposed robber, a former servant in the family, has been apprehended, and will, we trust, be made such an example of as will operate to deter his numerous confederates in the system of plunder which has been practiced upon foreign families within the few months past.

Abstract of Hawaiian Laws respecting Commerce.

Vessels arriving off the ports of entry to make the usual marine signal if they want a pilot.

The pilot will approach vessels to the windward, and present the health certificate to be signed by the captain. If the vessel is free from any contagion, the captain will hoist the white flag, otherwise he will hoist the yellow flag, and obey the direction of the pilot and health officer.

Passports must be exhibited to the Governor or collector by passengers before landing.

Masters of vessels allowing baggage to be landed, before compliance with the laws, are subject to a fine of $500.

Masters of vessels on arriving at any of the ports of entry are required to deliver all letters to the collector of customs.

The commanding officer of any merchant vessel, immediately after coming to anchor at either of the legalised ports of entry, shall make known to the collector of customs the business upon which said vessel has come to his port—furnish him with a list of passengers, and deliver him a manifest of the cargo with which she is laden, containing marks and numbers and the names of those to whom consigned.

The Collector, at his discretion, and at the expense of any vessel, may provide an officer to be present on board said vessel during her discharge, to superinted the disembarkation, and see that no other or greater amount of merchandise be landed than is set forth in the permit.

All goods landed at any of the ports of these Islands, are subject to a duty of five per cent. *ad valorem.*

The following are the only ports of entry at these Islands, viz.: for merchantmen, Honolulu, Oahu, and Lahaina, Maui; and for whalers, in addition thereto, Hilo, Hawaii, and Hanalei, Kauai.

Spirituous or fermented liquors landed at any of the ports of these Islands, are subject to the following duties, viz.: rum, gin, brandy, whiskey, &c., $5 per gallon; wines, (except claret) liqueurs, cordials, &c., $1 per gallon; claret wine, ale, porter, beer, cider, &., &c., 50 cents per gallon.

Products of the whale fishery may be transhipped free from any charge of transit duty.

Whalers having complied with the laws, are entitled to receive at the custom house a "first permit," allowing them to land goods to an amount not exceeding $200, duty free; but if they exceed that amount, they must take out a "second permit," upon which the usual (five per cent.) duties will be chargeable.

Permits to trade or barter, given to vessels engaged in the whale fishery, shall not include the sale, barter or disposition of spirituous liquors; but all such traffic on the part of the whalers shall be held to constitute them merchantmen, and subject them in all respects to the like duties.

Whalers landing goods to the amount of $1000 become subject to the same charge as merchantmen.

Vessels landing goods upon which the duties have not been paid, are liable to seizure and confiscation.

If any person commit an offence on shore, and the offender escape on board of any vessel, it shall be the duty of the commanding officer of said vessel to surrender the suspected or culprit person to any officer of the police who demands his surrender on production of a legal warrant.

It shall not be lawful for any person on board of a vessel at anchor in the harbor of Honolulu, throw stones or other rubbish overboard, under a penalty of $100.

All sailors found ashore at Lahaina, after the beating of the drum, or at Honolulu, after the ringing of the bell, are subject to apprehension and a fine of $2.

Shipmasters must give notice to the harbor master of the desertion of any of their sailors within 48 hours, under a penalty of $100.

Seamen are not allowed to be discharged at any of the ports of these Islands excepting those of Lahaina and Honolulu.

It shall not be lawful to discharge seamen at any of the ports of these Islands without the written consent of the Governor.

Honolulu and Lahaina are the only ports at which native seamen are allowed to be shipped—and at those places with the Governor's consent only.

Any vessel taking away a prisoner from these Islands shall be subject to a fine of $400.

To entitle any vessel to a clearance, it shall be incumbent on her commanding officer first to furnish the collector of customs with a manifest of cargo intended to be exported in said vessel.

It shall not be lawful for the commanding officer of any Hawaiian or foreign vessel, to carry out of this kingdom as a passenger, any domiciled alien, naturalized foreigner or native, without previous exhibition to him of a passport from His Majesty's Minister of Foreign Relations.

Retailers of spirituous liquors are not allowed to keep their houses open later than 9 o'clock in the evening, and they are to be closed from Saturday evening until Monday morning.

Rapid riding in the streets is prohibited under a penalty of $5.

NOTE.—Those parts of the law concerning "passports" and the "landing of baggage" do not take effect until after the 26th of June, 1847.

The law regarding the delivery of letters by shipmasters to the collector, will only take effect on promulgation by His Hawaiian Majesty in Privy Council.

Honolulu, January 1, 1847.—tf

EVERETT & CO.

OFFER for sale the following assortment of New Goods, at low prices, received by late arrivals, from Boston, suitable for the Islands, Oregon or California Markets.

Dry Goods.

18 bales Portsmouth sheetings, 5 do New England do., 4 do stripes do., 5 do Manchester shirtings, 5 do Methuen duck, 6 do do ticks, 3 do No. 1 osnaburgs, 9 cases Merrimac prints, 14 do pure indigo blue sheeting, 1 do blue drills, 1 do Cape Horn stripes, 1 do gambroons, 2 do kremlins, 1 do fancy cottonades, 1 do long cloths, 4 do strip'd prints, 4 do blue do., 1 do aboriginal stripe, printed lawns; muslins, balzorines, mixed pantaloon and coat stuffs, blue, olive, and gold-mixt tweed, bleached cotton, &c., &c.

Groceries.

Cold water crackers, lemon do., butter do., soda do., dyspepsia do., sugar do., (in tins, $3 each,) superior snuff in bottles, currants, Poland starch, cloves, mace, pimento, pepper, cayenne, saleratus in small boxes, citron, do cocoa paste, broma, (a new preparation of chocolate for invalids,) tapioca in small baskets, almonds, figs, ground ginger, cigars, shot, ground rice in jugs, split peas in do., Stoughton's elixir, paoli and white wine vinegar, (a superior article,) assorted sauces in boxes 1 doz each, walnut catsup, mushroon do., fancy soaps, &c.

Hardware.

2 to 10 gal. iron pots; counter scales; iron shovels; steel do; do. edge iron spades; steel edge do; iron wire seives; brass do; Hunt's broad axes; handled do; house adzes; do coopers'; do broad hatchets; do shingling hatchets; lathing do; garden hoes; rakes; brads; copper and iron tacks; scissors; chisels; drawing knives; spoke shaves; mortice chisels; garden shears; wrenches; screw braces; spring do; augurs; hammers; garden trowels; gimlets; pit saws; files; anvils; vices; wr't nails; finishing do; clout do; hinges; japan tea trays; log glasses; top covers; branding irons; latches; London pins; gouges; rules; oil stones; top-sail chains; casks asst'd nails; steel mincing knives; bread trays; iron spoons, gridirons razor strops, &c.

Glass and Britannia Ware.

Tumblers by the cask, 4 sizes; ship and house lamps; cut glass wines; decanters; tumblers; lemonades; colognes, various colors; water bottles; dishes; wine coolers; champagne goblets; caroffs; salts; castor bottles; extra pressed ware; every description of cut, pressed, and blown glass ware, at exceeding low prices. Also,—Hanging solar lamps; stand do; hand do, of a great variety; candlesticks; card baskets and plates; bronzed lamps; gilt study do; counting house do; entry do; astral do; astral and solar wicks; chimnies; shades; girandoles, &c,, &c., at low prices.

Ship Chandlery.

Copper, do bolts, comp. nails, do spikes, double and single blocks, lignumvitæ pins, hickory fids, hanks, mast hoops, hand pumps, belaying pins, 1 superior power pump and gear, 29 ft long, tar, coal tar, pitch, rosin, tarred cordage, Am. manufacture, asst'd sizes; shrouding, ratlin, spun yarn, marline, house line, deep sea lines, hand lines, Manila cordage, marlin spikes, caulkin irons, ship scrapers, twine, signal and other lanterns, &c.

Stone Ware and Crockery.

3 to 6 gallon stone filterers, stone butter pans, stone jars, do jugs, blue Abbeville ewers and basins, soap boxes, brush trays, foot baths, slop jars, bowls, covered chambers, Parisian hand, teas, plates, twiflers, muffins, covered milk and water jugs, meat and vegetable dishes, London teas, soups and bowls.

Stationery.

Ledgers; journals; waste books; cash do; letter do, in sheet and Russia; mem. books: blank do; French letter paper, &c.

NEW GOODS.

25 Cases American, English and French Prints,
30 bales brown drills, 30 do do Shirting,
12 cases indigo blue Drills, 8 do 4-4 do do,
4 " 5-4 do Sheeting, 6 do 4-4 do do,
6 " Tickings, 2 bales Osnaburgs,
5 " satin Jeans, 5 do blue Drills,
6 " Longcloths, 2 do twilled Stripes,
10 " cotton Threads, 1 do Tk. red Cotton,
2 " silk choppa Hdkfs, 4 do fancy ctn. do,
1 " Furnitures, 1 bale 3-4 linen Duck,
1 " 8-4 do Damask,
1 " bleached linen Sheeting, 38 in.,
1 " 3-4 do do Dowlas, 10 dz. striped Shirts,
1 " brown cotton 1-2 Hose,
10 " palm leaf Hats, &c., for sale by
o 15 tf C. BREWER & CO.

I. H. WRIGHT,

PAINTER & GLAZIER, has lately received and offers for sale,
3000 lbs. White Lead ; 300 do Venetian Red,
250 " assorted Green Paints; 600 do Whiting,
100 gals. Linseed Oil ; Prussian Blue ;
90 " Spt's. Turpentine ; Terra de Sienne,
10 " Copal Varnish ; Yellow Ochre,
Spanish Brown; lamp Black, in kegs and papers,
Chrome Yellow ; Gold and Silver Leaf,
Paint, sash and tar Brushes ; Gum copal,
Sand Paper, pumice stone, window Glass,
Putty, &c. &c.

*** House, Sign, Coach, Ship and Ornamental Painting executed with neatness and despatch.

The Seamen's Friend.

THE YOUNG SAILOR, A Narrative Founded on Fact.

BY MRS. MARY S. B. DANA,

Authoress of "The Parted Family," "Southern and Northern Harp," &c., &c.

This is the title of a small volume issued by the Harpers, of New York, about two years since. A copy has chanced to fall into our hands; knowing the eagerness of many of our readers to peruse narratives of the sailor's wanderings, we extract two chapters for the present number of the Friend, and at a future time may draw additional matter for our columns from the same source.

Mrs. Dana, in the dedication of the work, informs her readers that "the main incidents in the following narrative, were taken from a manuscript journal, belonging to the individual to whom these incidents occurred." William Griffin, is the real or fictitious name of this person. He is attended through his wanderings and misfortunes, by Cudjo, a clever old negro. They leave Charleston, S. C., in the summer of 1797, on board the Caroline, commanded by Capt. Job Swift, of Nantucket, or as Cudjo called him, "Mass' Job Swiff." The Caroline sailed for Amsterdam with a cargo of sugar, but on account of a leak, put in to New York for repairs. After repairs were completed, the Caroline again sails for Amsterdam, as the crew supposed, but "Mass' Job Swiff" orders Mr. Griffin to prepare for anchorage in the harbor of Nantucket, of which place Capt. Swift was a native. There was no disputing the master's orders; so to Nantucket they went. Here, Capt. Swift, after pacing the deck, absorbed apparently in deep cogitations, and industriously "Whittling" all the sticks he could find, remarked to William, that he did not seem to be contented, and that, if he wished, he could have his discharge ere the ship sailed; for it was better to part then, than to go on, and have to part hereafter. To this arrangement William gladly assented, and Cudjo's discharge was likewise procured. We here take up the narrative of William and Cudjo, as delineated in chapters 3rd and 4th.

CHAPTER III. "Dis yer Nantucket is one dull sort ob a place," remarked Cudjo one morning; "let we get 'way from yer mighty soon, Mass Bill."

"I'm going, Cudjo," answered William, "in the first vessel I can find; but you only think the place dull because it isn't home. You are among strangers."

"Stranger for true," said Cudjo, looking very grave, and taking a fresh quid of tobacco for his comfort. "An' as for home," he continued, "de ocean an' ole Cha'lston is home for me. Ef I mus' be on land, let 'um be in Cha'lston, bless de ole place!"

The genuine sailor has no home but the ocean. Cudjo, however, had not spent all his life at sea, and that very time was roaming over the world entirely from attachment to his young master. William Griffin had been well instructed at home. His widowed mother had brought him up in the fear of the Lord; by her consent he followed the seas, and her fervent prayers always accompanied him. So far he had been preserved from those dreadful snares which wicked landsmen are always preparing for the unsuspecting sailor. But here was the great secret of his preservation, and his early advancement to a station of trust and honor: *William was a Christian and a thoroughly temperate man.*—Those were not the days of Bethels and Sailor's Homes—no, no; at that time it seemed as if no man cared for the sailor's soul; and a life of intemperance and vice, and an early death, seemed too often to be his portion.

William and his faithful attendant soon procured a passage on board a vessel bound for New Bedford, and thence they sailed for New York, where they arrived after a comfortable voyage.

About this time William became anxious to join the navy. Accordingly, he applied to Captain ——, who was then superintending the building of a frigate at the navy-yard at Wallabout, Long Island, and was received as a midshipman. Here, however, the monotony of his life became extremely irksome, and he panted for more active employment. He was far from home; no friends were near to recommend him to the Navy Department for a warrant, and he concluded to sail for the Mediterranean. In the mean time, his friends were to interest themselves, and obtain for him a warrant.

He was soon engaged as chief mate of a clipper schooner, bound on a trading voyage up the Mediterranean. She was already loaded when he went on board, and her hatches caulked down; but by her cargo book he discovered that she was loaded with tobacco, flour, cocoa, &c. Cudjo, of course, was employed as cook; this was a part of the bargain. The captain of the clipper, Rodgers by name, was a very different looking person from Captain Swift, of codfish memory. Instead of the dried-up, sallow visage of the Yankee captain, Rodgers rejoiced in a round red face, the very picture of mirth and good fellowship, when no one happened to cross his humor, or to disturb him while taking his wine after dinner.—"No codfish dinners now," as Cudjo said. By-the-way, Captain Rogers, too, was a Yankee.

On the 1st of November, 1797, the schooner sailed. In the larboard watch, under William's command, there was a young sailor who attracted his attention the moment he came on board. Jack Davis was his name; and there was something about his honest, sunburnt countenance which was at once a letter of recommendation. He had been married two days before, and, though a sailor has habitually to do violence to what feelings of tenderness he may possess, it was hardly possible that he should part with his young and really lovely wife without a struggle. There was another sailor in the same watch, who was known by the name of Old Sam; nobody had ever heard him called by any other name, nor would he acknowledge that he had ever had another. Old Sam was a pretty tough character; rather too fond of his grog, but a good seaman when he could be kept sober.

The wind was from the southeast, and consequently, they were obliged to beat down the Narrows. It was well for Jack Davis that the frequent tacking of the schooner kept him busy; for if he had thought too much of home, his heart would have sunk within him at the idea of the long separation he anticipated from those who made his home so dear. Jack and his wife were both natives of Nantucket; but she had come down to New York to meet him, and they had been married there. Jack said, and said truly, that his wife was as pretty a Yankee girl as could be found any where.

As William passed the galley, Cudjo popped his head out, and thus addressed him: "Enty you tink dis yer clipper berry crank, Mass Bill?"

"Indeed I do, Cudjo," answered William; "I don't feel exactly easy about her; you see she lays over with the breeze every now and then till her deck seams are awash. I must speak to the captain about it."

William was unaccustomed to fore-and-afters, so he diffidently and respectfully mentioned his fears to the captain. Captain

Rodgers smiled, and replied that there was no ground for fear. Still William felt uneasy, and so did Cudjo and Old Sam.

It was now the Starboard watch, and the other watch had gone below. Jack Davis sat upon his chest, attentively reading a little red morocco book, and Old Sam lay stretched upon another chest, humming the tune of an old sea-song.

"Why, halloo, Jack," said Sam, "have you got under way with your studies already? What trim-looking little craft is that you're overhauling now?"

"This is my Bible," answered Jack, quietly.

"Whew!" said Sam, giving a long whistle; "so you're a Methodist, are you?"

"I am a Christian," answered Jack, as quietly as before.

"Well," said Sam, ripping out a tremendous oath, "I never knew one o' them fellers that wasn't a regular skulk; so you'd better knock off religion while you're young and hearty; it'll do for old hulks, after they're laid up. They want something to amuse them then."

"Dah mos' time for you for git religion den, Mass Sam," said Cudjo, who at this moment came down the ladder; "you gittin' ole berry fas'."

"Now just twig old Snowball," said Sam; "I s'pose you've got a Bible too, stowed away in your locker; but what's the use, when you can't read?"

"*Me* no know how for read, Mass Sam!" said Cudjo; "who tell you dat? An' as for keepin' my Bible in my locker, why, I got 'um yer in my berry bosom heself! Wha you tink ob dat?"

"By jingo," exclaimed Sam, as if talking to himself, "a feller's got to keep a straight wake this trip, or he'll have some o' these Methodists afoul of him every other minute."

"But that was a very sensible remark of Cudjo's," said Jack Davis to Sam; "if you say that religion is a good thing for the old, it is time you were thinking about it."

"Oh, time enough yet," said Sam; "I've been in many a squall, and been blowed agin many a lee shore in my time, and I always fetched up in the right place."

"But when you slip your cable, shipmate," said Jack, solemnly, "when you slip your cable, and bear away to that unknown country beyond the grave, are you sure you will fetch up in the right place?"

"Why, I don't know as to that," replied Sam; "if that there book you've got in your hand is true, I'll have to knock off drinking and swearing, and ever so many other things I get catched in now. But I hope I'll be able to square the yards so as to please the Great Captain, and sail into the port of Heaven right before the wind."

"I see you know something about it, Sam," said Jack; "have you ever read the Bible?"

"Oh, I used to overhaul it sometimes, when I was young," answered Sam; "I've got a Bible in my chest now, that my old mother gave me twenty years ago—my otmher is a good old soul, that she is!" And Sam actually wiped a tear from his weather-beaten cheek as he thought of his mother.

"Your mother is living, then?" said Jack.

"I hope so," replied Sam, "though people tell me I've nearly broken her heart half a dozen times. Yes, she's living, and praying for me yet. God bless her!"

"God bless all mothers and wives," said Jack; "their prayers are a great thing for poor sailors, but they wont do much good unless we pray for ourselves."

"Confound it!" said Old Sam, starting up from his chest, "talking about my mother has set my Old eyes a leaking; I must turn in and take a snooze."

CHAPTER IV. After a very disagreeable passage, the schooner anchored one evening at Sandy Hook, in company with a fleet of vessels, outward bound. At daylight the next morning, according to orders left with the anchor watch, William was called. He immediately aroused the pilot, and informed him that all the other vessels were getting under way.

"Call all hands," said the pilot, "and we'll soon overtake them." All hands were called, the handspikes were seized, and the cable came merrily in, with a hearty yo ho! As soon as the anchor was sighted, the canvass was spread to the breeze; and before the sun had sunk in the western horizon, the whole fleet of vessels had been left astern, excepting one clipper schooner. The wind was light from the southwest, and the little craft sailed swiftly on, with all sail set to the best advantage.

It was now the third of November. The weather continued pleasant, the wind still blowing from the southwest. It was William's relief to keep the dog watch from six to eight in the evening, and as he paced the quarter-deck, his thoughts wandered to his distant southern home. What were they doing there at that pleasant twilight hour? Were his mother and sisters thinking of the wanderer upon the trackless ocean? They might be even then engaged in prayer for him. The mother might at that moment be committing her boy to the care of Him who holdeth the winds in his fists, and the waters in the hollow of his hand. There was comfort in the thought.

The captain was below, still lingering over his wine, for he and the supercargo had been indulging themselves in an extra glass in commemoration of the birthday of one or the other of them. At about seven o'clock, as William was casting his eye over the heavens, he discovered a small cloud rising in the southwest. Uneasy at its appearance, he immediately descended into the cabin, and reported his fears to the captain. "Very well sir," said the captain; but he gave no order, and made no movement for the deck. William was hardly on deck again, before he saw distinctly that the cloud was rising fast, and there was no time to be lost. He put his head to the skylight, and repeated his fears to the captain, assuring him that the schooner could not long carry the sail she then did. The captain, angry at being disturbed when at his wine, called out in a loud tone, "Well, if she cannot carry it, let her drag it."

Uneasy as he was before at the crankness of the schooner, William was now sure that she could not long bear her canvass. Accordingly, he went forward quietly, and hauled down the flying jib, and the maintopmast staysail, and lowered the topgallant sail. This made some trampling on the forecastle, which aroused one of the watch below, who rushed on deck through the scuttle.

William was scarcely back at his station on the quarter-deck, before the squall struck the schooner abeam. He immediately ordered the helm a-lee, so as to luff and shake her, to aid in giving a chance to brail up her immense foresail, or to lower it down. At this moment the captain sprang on deck, seized the helm, and hauled it hard a-weather, meaning, if possible, to get her before the wind. This manœuvre did not succeed, however; for, as she flew off from the wind, she received the blast with terrible force, and turned over in a moment, burying at the same time the whole starboard watch, with the exception of the man who had been so hastily aroused when William went forward to shorten sail. Fortunately she wore round with her masts and sails to windward.

As the schooner turned over, all who were on deck sprang to the weather side. Here, on the small part of her side which was out of water, they fell upon their knees. There was no speculating now whether the Bible was true or not. They heard the voice of God in the storm, they knew that his hand alone could save them, and to him their cries arose. But oh! the cries, the groans, the shrieks of the poor mariners who were drowning in the forecastle!

In a few moments all was silent save the howling storm. The cries of the dying were over! Each soul had winged its flight in an unexpected moment to the untried realities of eternity! Eternity, oh! eternity, what is it? what does it mean? Were those immortal souls prepared for such a sudden flight? Alas! alas! we know not, and can only shudder and turn pale when we think what may have been the fate of those poor sailors' souls.

Will my readers pardon me if I entreat them to pause a while, and ponder well this subject? How many and how great are the dangers of the sailor! How appalling are his sufferings! How cheerfully and how bravely he sustains them! We hear these sufferings described, and we drop a tear of sympathy, but we cannot realize them; we know not what they are. What can we do for the sailor? Can we not give him the Bible, the

great chart of his salvation? Can we not give him churches, and "homes" where he will be protected from insult and injury? Christians! patriots! fellow-men! what can be done for the sailor?

Let us return to the shipwrecked crew.—They knew not how soon the little spot on which they were crowded together would disappear beneath the yawning waters; or, if the vessel continued to float, they might still have to endure sufferings too horrible to anticipate. Of how much value now was an interest in Christ Jesus! William Griffin, Jack Davis, and poor black Cudjo, all possessed that pearl of great price, worth more than all the world beside; and in this time of extremity they realized its value as they never had done before.

The supercargo, Mr. Sydney, had left the cabin in so great a hurry, that he had forgotten to bring his coat. Sailor-like, with a generosity only to be expected from a genuine son of Ocean, William immediately threw off his pea-jacket, and insisted that Mr. Sydney should wear it.

"But I don't like to deprive you of it, my fine fellow," said Mr. Sydney, while a tear stood in his eye.

"Oh, never mind," said William; "I am young, and don't mind the weather."

"God bless you, Mr. Griffin; I must beg your prayers for my poor soul," said Mr. Sydney. "I cannot tell," he continued, "how soon I may be called to my account, and I know full well that I am not prepared."

"Pray for me too, Mr. Griffin," said Old Sam; "oh, my poor old mother! I wish I had listened to you, and knocked off drinking and sinning long ago, and then I wouldn't be afraid now, come what would. But see here, Mr. Griffin; see here, Jack and Cudjo, I've saved my dear old mother's Bible." At these words the poor old sailor wept, and fervently kissed the Bible which he held in his hand. "Ain't it strange?" continued Old Sam; "I've been shipwrecked five times since I had this Bible, and somehow or other it has always been saved. I took it out of my chest not an hour before the schooner capsized, and thought I'd look at it the first good chance I got, when nobody could see me."

"It is the most precious thing you could have saved, Sam," said Jack Davis; "thank God, I've got mine too."

"Yer's mine too," said Cudjo; "I always does hab um in my bosom, so I sure for sabe um ef I sabe myself."

"And is safe," said William; "so we have four Bibles among us. I wish it was daylight, so that we could see to read them."

"Nebber min' for daylight," remarked Cudjo; "enty God word is de light for we feet, an' de lamp for we pa'at?"

"Indeed it is, Cudjo," replied his young master; "it can make darkness seem light about us."

Thus did these Christians beguile the horrors of that dreadful night. "I would give any thing in this world," said the captain to William, "for the strong confidence in God that you appear to feel; it seems to be an anchor for your soul."

"An anchor for my soul it is indeed," replied William. "Why, do you know, captain, you used the very words of Scripture when you said that? 'An anchor to the soul, sure and steadfast;' that's what the Bible says."

"I begin to understand now," said the captain, "why Christians are better off than others. They have the same troubles in this world with the worst of men, and it used to stagger me when I saw that. I knew they were setting their hearts on what was to come when they got to the end of their cruise, but I wondered God did not take better care of them during the voyage. But now I see that when troubles come they have something that helps them to bear them, and lifts them over all the rough places."

"That's very true, captain," said William. "My blessed Bible says, 'In the fear of the Lord is strong confidence, and his children *shall* have a place of refuge;' you see, now, we find that saying true."

"Yes," said Jack Davis; "only think of this too: David says, 'I have set the Lord always before me; he is at my right hand; I shall not be moved.' Only think of God's being so near us; how can we be afraid?"

"Well, that book *must* be true," said Old Sam, "and I believe my poor mother was right, after all; she used to say, if it didn't come from God, how could there always be something in it to suit every situation? why, that there chap, Jack Davis, has always something to say out o' that book, that goes straight ahead, and settles the pint at once. It's a regular log-book, too; it tells all a feller ever did; besides being a chart to show him all the shoals and dangers of life's ocean. I don't b'lieve I'll ever laugh at anybody again for readin' that book."

"I hope not, Sam," replied William; "and I pray from my heart that you will love it yourself, and find the same comfort in it that we do. 'Tis meat and drink, and clothing, and everything else to those that love it; and it seems to me that the Bible is more precious to sailors than to other people. Jesus Christ loved sailors; he chose his first disciples from the sea-side; and when he was tried and perplexed by the wickedness of the people on land, he loved to get into a ship with his disciples, and push off to sea, that they might have a quiet time to talk and think. I'll warrant Simon Peter, and his brother Andrew, and James and John, all felt more at home there than they did ashore."

"You may be sure of that," said Jack.

"An' enty you 'member 'bout dat night when Jesus eben walk 'pon de sea for git to de ship?" said Cudjo.

"Spin us that yarn, Cudjo," said Old Sam; "I'd like mightily to hear about that."

"Well," continued Cudjo, "de disciples bin out ever so fudder from de sho', an Jesus bin standin by heself on de wharf, or de beach, whatever dey bin hab dey. Well, dey bin rowin' berry hard, cause bin hab head win,' an when de Master bin see dat, he bin tink he would go to dem. So he walk 'pon de water till he bin git close by dem, an den he make 'blieve he bin gwine pass dem, jis for see wha' dey gwine say. He do dem so 'pon sho' too, sometimes. Well, dey bin scare nuff, I kin tell you, cause dey tink he bin one sperrit, and den dey bin cry out. Den de dear Sabiour, only tink ob it (an let we all tink he dah say so to we dis berry minute,) he say, wid he sweet voice, 'Be of good cheer; it is I; be not afraid!" Here Cudjo was obliged to stop, for his emotion choked his utterance.

"Be of good cheer; it is I; be not afraid!" solemnly repeated William.

"Amen, Lord Jesus!" said Jack.

Old Sam's loud sobs could be plainly heard above the roaring of the storm, and every eye was overflowing with tears; but He alone to whom the darkness and the light are both alike, could see and know what was taking place in the midst of that stormy ocean.

For the Friend.

Patagonians Again.

Mr. Editor,—On looking over No. 1, Vol. 5, of your paper, I saw an article headed "The Tall Patagonians."

This, of course, excited the attention of one who, during the winter of 1833 and 1834, wandered for about three months in that wild country of fable, and among those gigantic canibals.

The article alluded to, is an extract from the "Boston Chronicle," giving an account of the visit of H. B. M.'s ship Dolphin, to the Straits of Magellan, in 1764.

The editor of the Friend remarks, "It was not until recently that we ever met with the writings of any one who could say that he had *actually* seen them."

In the Missionary Herald, volumes 30 and 31, for the years 1834 and 1835, may be found extracts from the journals of an exploring tour, and of a residence of near three months among those savage clans.

But our only object in mentioning the subject here, is to correct the statements which have been so often repeated, and so generally believed, of the *great height* and the *enormous size* of the Patagonians. While residing in the country of those Anakims, the writer, and his associate, Mr. Arms, saw nearly every native of the land, and not only so, but actually *measured the tallest of them*, and found his height only *six feet five inches*. We had no means of weighing, but it is our opinion that no Patagonian would go higher

than 200 pounds. The writer in the Chronicle says, that "some of them are certainly *nine feet high*, if they do not exceed it."—Men are naturally fond of the marvellous, and hence, perhaps, the origin and perpetuity of the reports about the huge Patagonians.

Pardon this intrusion. The subject awakened many reminiscences in my mind—but I will say no more.

Yours truly,
T. COAN.

Hilo, Jan. 12, 1847.

For the Friend.

Editorial Correspondence.

VALPARAISO, Nov. 19, 1846.

I have something to tell which will interest officers of the English and American navies. And that is the re-interment of the remains of some of their companions or predecessors, in their respective services.

There were some who lost their lives in the action of February 28, 1814, between the British frigate Phebe, supported by the brig Cherub, and the American frigate Essex; and also some who had at other times been overtaken by death here. Before 1836 there was no foreign burial ground, and to these dead strangers a resting place was granted in the fort, the old Spanish of San Jose, on one of the hills. When that was demolished these remains were removed to the new fort of San Antonio, on the shore. But that having been lately torn away, to make room for some buildings, the government mean to erect, they were again disturbed. Of this fact, the British Consul, Mr. Rouse, was informed by Commandante Simpson, the acting Intendente. And on his arrival a few days after, in the Collingwood, from Oahu, Admiral Sir G. F. Seymour was made aware of the matter. He had new coffins immediately prepared, and proper measures taken for reburial in the cemetery.

Accordingly, on Wednesday, November 11, at 11 A. M., the Admiral, with the English and American Consuls, a large company of English officers, musicians, seamen and marines; besides many citizens of both countries, proceeded to the burial ground, where they were joined by the naval and military authorities of the place.

The Rev. Mr. Proctor of the Flag Ship, then read the burial service; after which, the coffins were borne to the grave by seamen.—There were two covered with sable cloth, and both containing all the remains of several persons, were placed in the same grave. And after the Royal marines had fired three vollies over the grave, the assembly withdrew in procession.

We hope the relics of these men are now where they will not be again disturbed.

The alacrity of the Admiral and his officers in thus paying the final tribute of respect to these bones, though, perhaps, just what might be looked for from them, is still highly commendable, especially when it is remembered they were foes as well as friends. Between nations that share in feelings that lead to such conduct, and can therefore appreciate it, may hatred and animosity never be awakened again. When present on the occasion, I thought it pleasant to have the body sure of a quiet grave; and yet how much more pleasant and important to have the mind at peace with God; so that it may rest undisturbed in the possession of His favor through its whole being. D. T.

[From the London Times, October 16, 1846.]

"The *Moniteur* publishes a series of reports from the French officers commanding the naval station on the coast of New Zealand. Two lengthy despatches from Captain Berard, contain, 1st, an account of the occurrences on those shores, from the 4th of July, 1844, to the 31st of January, 1846; and 2nd, the recital of the origin, progress and present situation of the Catholic Missions in that Island, and in the Archipelagoes of Tonga and Wallis'. According to the last document, the Catholic Missions in those Islands, were very prosperous. In New Zealand, the number of Catholics in February, 1846, amounted to about 5,000; at Tonga there were between 500 and 600; at Wallis' 2,500; at Futuna 748; and in New Calidonia there were also many neophytes. The *personnel* of these missions consisted, at New Zealand, of two Bishops, sixteen Clergymen and eight Friars; at Tongataboo, of threee Clergymen and two Friars; at La Kemba, in the Viti Islands, two Clergymen and a Friar; in the Wallis Islands, a Bishop, three Clergymen and three Friars; at Futuna, two Clergymen and a Friar; in the the Navigator's Islands, a Clergyman and a Friar; in New Calidonia, a Bishop, a Clergyman and two Friars; in Western Melanasia, a Bishop, seven Clergymen and six Friars."

SEAMEN'S WAGES—A CURIOUS CASE.—On Tuesday, Mr. Thomas Crowther, owner of the Lady Combermere, recently arrived in this port from the coast of Africa, was summoned by three of the crew before Mr. Rushton, for non-payment of their wages. It appeared that the whole of the crew which went out in her had perished from sickness; the vessel had been much plundered by the natives; other seamen had been draughted into her, and the mate of the Ariel appointed to the command. The owner, it appeared, had refused to pay the seamen, unless a deduction was made from their wages for the cost of keep and freight of several parrots and monkeys which the men had brought. The owner also claimed freightage for some native spears and small baskets of shells. He estimated the freight of the parrots at 2d. per head per day—those of the monkeys at 3d. Mr. Rushton ordered the wages of the seamen to be paid without reduction.—[Liverpool Advertiser.

[From the Polynesian of Feb. 13.]

IMPORTANT NEWS!!

From the United States and Europe to Nov. 1 Offer of Peace to Mexico by the U. States—Santa Ana's refusal to negotiate—George Bancroft appointed Minister to England—Issue of Treasury Notes—Oregon Treaty—Fire at Nantucket—European Itelligence—Markets, &c.

By the Xylon, from Mazatlan, we receive U. S. papers to Sept. 5th, and English papers to Nov. 1. Letters from Boston to Nov. 6th have been received, but the only regular American mails received are those up to July. The later mails have been interrupted, though the English have come regularly forward.

United States.

President Polk had offered peace to Mexico on condition of ceding California, for which $10,000,000 in four instalments would be paid—the Mexican tariff to be reduced one-half—American vessels to enter her ports on the most favorable conditions—Ministers of each country to reside at Mexico and Washington, and sundry miner clauses, of which the most important was that Paredes should be exiled.

Santa Ana declined to negotiate on these terms until the will of the Mexican Congress, to be convened December 1st, 1846, should be known. The American Cabinet, considering this a virtual rejection of offers for peace, resolved to prosecute the war vigorously. The American armies were to advance rapidly upon Mexico, and no longer to pay for supplies—to make the Mexicans feel the real evils of war. A demonstration was to be made on Tampico. Active preparations were making by the Mexicans for resistance, by arming the *rancheros*.

Nothing later from Gen. Taylor since our last advices of the battle at Monterey, has been received.

Geo. Bancroft arrived at Liverpool 28th October, Minister to the Court of St. James. Mr. Mason takes his place as Secretary of Navy at Washington.

President Polk has issued $10,000,000 Treasury notes.

Mr. Packenham has been visiting Mr. Webster.

The Mormons, after some severe fighting, had surrendered Nauvoo, and were to leave Illinois.

OREGON TREATY.—By the courtesy of the Agents of the Hudson Bay Co., we are enabled to give our readers an official copy of this treaty, as printed by order of Parliament. It will be seen that it is more favorable to British commercial interests in the navigation of the Columbia than was first supposed.

Treaty between Her Majesty and the United States of America, for the settlement of the Oregon Boundary. Signed at Washington, June 15 1846. *Ratifications exchanged at London, July* 17, 1846.

Her Majesty the Queen of the United Kingdom of Great Britain and Ireland, and the United States of America deeming it to be desirable for the future welfare of both countries, that the state of doubt and uncertainty which has hitherto prevailed respecting the sovereignty and government of the territory on the North-west coast of America, lying westward of the Rocky or Stony Mountains, should be fully terminated by an amicable compromise of the rights mutually asserted by the two parties over the said territory, have respectively named plenipotentiaries to treat and agree concerning the terms of such settlement, that is to say:—

Her Majesty the Queen of the United Kingdom of Great Britain and Ireland has, on her part, appointed the Right Honorable Richard Packenham, a member of Her Majesty's most Honorable Privy Council, and Her Majesty's Envoy Extraordinary and Minister Plenipotentiary to the United States; and the President of the United States of America has, on his part, furnished with full powers, James Buchanan, Secretary of State of the United States; who, after having communicated to each other, their respective full powers, found in good and due form, have agreed upon and concluded the following articles :—

Art. I. From the point on the forty-ninth parallel of north latitude, where the boundary laid down in existing treaties and conventions between Great Britain and the United States terminates, the line of boundary between the territories of Her Britanic Majesty and those of the United States shall be continued westward along the said forty-ninth parallel of north latitude, to the middle of the channel which separates the continent from Vancouver's Island; and thence southerly, through the middle of the said channel, and of Fuca's Straits, to the Pacific Ocean : provided however, that the navigation of the whole of the said channel and straits, south of the forty-ninth parallel of north latitude, remain free and open to both parties.

Art. II. From the point at which the forty-ninth parallel of north latitude shall be found to intersect the great northern branch of the Columbia River, the navigation of the said branch shall be free and open to the Hudson's Bay Company, and to all British subjects trading with the same, to the point where the said branch meets the main stream of the Columbia, and thence down the said main stream to the ocean, with free access into and through the said river or rivers; it being understood that all the usual portages along the line thus described, shall in like manner be free and open.

In navigating the said river or rivers, British subjects, with their goods or produce, shall be treated on the same footing as citizens of the United States; it being however, always understood, that nothing in this article shall be construed as preventing or intended to prevent, the government of the United States from making any regulations respecting the navigation of the said river or rivers, not inconsistent with the present treaty.

Art. III. In the future appropriation of the territory south of the forty-ninth parallel of north latitude, as provided in the first article of this treaty, the possessory rights of the Hudson's Bay Company, and of all British subjects who may be already in the occupation of land or other property lawfully acquired within the said territory, shall be respected.

Art. IV. The farms, lands and other property of every description, belonging to the Puget's Sound Agricultural Company, on the north side of the Columbia River, shall be confirmed to said Company. In case, however, the situation of those farms and lands should be considered by the United States to be of public and political importance, and the United States government should signify a desire to obtain possession of the whole or of any part thereof, the property so required shall be transferred to the said government, at a proper valuation, to be agreed upon between the parties.

Art. V. The present treaty shall be ratified by Her Britannic Majesty, and by the President of the United States, by and with the advice and consent of the Senate thereof; and the ratifications shall be exchanged at London at the expiration of six months from the date hereof, or sooner if possible.

In witness whereof, the respective Plenipotentiaries have signed the same, and have affixed thereto the seals of their arms.

Done at Washington, the fifteenth day of June, in the year of our Lord one thousand eight hundred and forty-six.

Richard Packenham. (L. S.)
James Buchanan. (L. S.)

Oil Markets.—*New Orleans Price Current, Aug.* 1, 1846.—Sperm, 90c to 100c.; Whale (refined) 40c to 50c. *Bone*, N. W. 33c.; S. S. 34c. cash.

The French in the Pacific. — A letter in the Union states that the French are about to abandon all their possessions in the Pacific. The opinion is founded on the appointment of M. Levaud, who was opposed to the seizure of the islands, as governor of Tahiti.

☞ Col. Stevenson's California Regiment is to be furnished with 800 percussion lock muskets, 800 do. with flint locks, and 800 rifles. In addition to this, there will be equipments and cannon sent out for one company of artillery, and all the appointments of a corps of dragoons. This is done to make success any thing but problematical. If, therefore, on their arrival, they should not be enabled to co-operate with Gen. Kearney immediately, Col. Stevenson will at once organize the dragoon corps.—[*N. Orleans Delta*, Sept. 5.

Mexico.

We have a few hasty lines from Mazatlan, to the last of January. Santa Ana was President, and expected soon to be Dictator. No news whatever from the seat of war, except a rumor that General Taylor had been recalled, and General Worth to succeed him, and Com. Perry to succeed Com. Connor in the West India squadron.

Europe.

Intelligence has been received by the Government, up to the steamer which left Southampton on the 2d of November. What relates to cases of individuals here, is reserved for the present.

The following is a brief abstract of the most interesting items of general intelligence.

A scarcity of food, approaching almost to famine, prevailed among the poor of England, Scotland, and Ireland. The price of bread was very high, and the Government had been memorialized to open the ports. Six steamers were employed on the coast of Ireland in carrying food.

The Queen of Spain was married on the 10th of October, to the Prince Don Erancisu de Assis Maria de Bourbon, and on the same day the Infanta was married to the Duc de Montpensier, a younger son of Louis Philippe. The latter marriage had given great offence to England, it being supposed to be in direct violation of the peace of Utrecht, and of the good understanding between Great Britain and France, to have been negotiated mostly under circumstances alledged to be coersive, and without any previous communication with the British Government.

It was expected that the powers of Europe, whose influence led to the abdication of the crown of Spain in 1712, would protest against the Montpensier alliance. The *entente cordiale* between Great Britain and France was considered to be at an end.

Russia was said to concur with Great Britain in the construction put upon the treaty of Utrecht, Austria and Prussia were expected to acquiesce in that construction.

Steamers Great Western and Great Britain.—The Great Western, on her last passage to Liverpool, (Oct.) encountered a severe hurricane, and for thirty-six hours was in imminent peril.

The Great Britain went ashore on her passage from Liverpool on the night of 22d September, at Dundrum Bay, Ireland, going 13 1-2 knots, and was totally lost. 180 passengers, all saved. She cost £120,000—partially insured. Captain Hoskins attributes the disaster to an error in his chart.

Court Martial,—Hon. Capt. John Gordon, of H. B. M.'s S. America, has been court martialed, and sentenced to be "severely reprimanded" for sailing from the Pacific for England contrary to the orders of Rear Admiral Sir George Seymour.

Another revolution has taken place in Portugal. The Marquis de Palmella could not raise £3000 to pay the court and the army. Queen Dona Maria, finding this, sent for him and the other Ministers, and kept them locked up till they resigned their offices. The Marquis de Saldanha received Her Majesty's commands to form a new Ministry, of which the famous *Costa Cabral* was to be a principal member.

French influence was believed to have influenced Dona Maria de Gloria.

In the revenues of Great Britain, on the previous quarter, there was an increase of nearly a million sterling. This result was ascribed to the diminished rates of duty that had been established, a principle stoutly contended for by the previous Whig administration which preceded the advent of Sir Robert Peel and his conservative colleagues.

The radical party of the Swiss had overthrown the Government of Geneva. The revolution was attributed to French influence.

In the British colony of the Cape of Good Hope, a ruinous warfare existed with the Caffre tribes. Sir Henry Pottinger had been appointed Governor. It was expected that the difficulties between the colonists and the savages beyond the frontier, would soon terminate under his able rule.

THE FRIEND.

HONOLULU, FEBRUARY 15, 1847.

Extensive Fire at Nantucket.

In the N. Y. Herald, for July 20, we find an appeal from the select men of Nantucket, in behalf of their fellow townsmen who have suffered by an extensive fire, which had consumed one third of the town. We have searched other papers, but find no further account of the fire. We copy the appeal:

The Nantucket Sufferers. Friends—The undersigned, selectmen of the town of Nantucket, have been constituted by a vote of the town, a committee to ask at your hands such aid as you may feel able to render to our unfortunate and distressed people.

One third of our town is in ashes. A fire broke out on Monday evening last, a few minutes before 11 o'clock, and raged almost uncontrolled, for about nine hours.—The whole business section of the town is consumed. There is scarcely a dry goods, a grocery, or provision store left standing; and what more particularly threatens immediate distress, the stocks contained in them, so rapidly did the conflagration extend are almost utterly destroyed.

There is not food enough in town to keep wide spread suffering from hunger at bay a single week. Seven eighths of our mechanics are without shops, stock, or tools; they have lost all, even the means of earning bread. Hundreds of families are without a roof to cover them, a bed to lie upon, and very many of them even without a change of raiment. Widows and old men have been stripped of their all; they have no hopes for the future, except such as are founded upon the humanity of others.

We are in deep trouble. We cannot ourselves relieve the whole distress, and we are compelled to call upon those who have not

been visited like ourselves, for aid, in this our hour of necessity. We do not ask you to make up our loss, to replace the property which the conflagration has destroyed, but to aid us, so far as you feel called upon by duty and humanity, in keeping direct physical suffering from among us, until we can look round and see what is to be done. We want help—liberal and immediate. * *

FIRE AT NANTUCKET.—On the 13th July 200 buildings were destroyed. Loss estimated at $900,000—$200,000 insured.

Terrible Disaster at Sea—Loss of a Swedish Sloop of War—Seventeen Persons only saved out of a crew of one hundred and thirty-two.

The bark Swan, Capt. Snell, from New Orleans, at this port, brings the following lamentable news:

On the 3d of May, (Sunday,) about 4 o'clock in the afternoon, in latitude 25 degrees, 11 minutes, and longitude 79 degrees, 42 minutes, between Havana and the Floridas, the captain observed something at a distance, which he took for a piratical vessel, and immediately ordered the guns of the bark to be loaded, and in a few minutes every thing about the vessel was in prime order and ready for action.

He was, however, upon arriving near the supposed pirates, mistaken in his views and discovered that they were persons who had been wrecked—and were blistered by the sun in a horrible manner, and in a state of nudity—floating about on spars and pieces of wood. There were seventeen in number, all of whom were taken on board, and every possible care taken of them by the captain and crew of the bark.

Their story is as follows:—On the first of May, the Swedish sloop-of-war, Charles Krona, Capt. E. G., of Klint, sailed from Havana for Sweden, with a crew consisting of one hundred and thirty-two men, and when off Matanzas, having been two days and three nights out, was caught in a squall, which turned the vessel bottom upwards, consigning to a watery grave *one hundred and fifteen souls!* The vessel immediately sunk.

The seventeen above alluded to, saved themselves by clinging to the spars of the vessel and pieces of wood, upon which they floated and buffetted the angry waves for one day and night, when they were picked up, almost in a state of starvation, and brought to this city by the bark Swan, and the only officer saved was the First Lieutenant, A. F. Thersmeden, who is stopping at Bloodgood's, foot of Walnut Street. Lieutenants Suerin, Bilt, and Beyenstrole, were the names of the officers who were lost.

The above is a brief history of the facts as we have them from one of the crew.

Capt. Snell has provided them with every thing that will make them comfortable and happy. They are fine looking men.—[Late Paper.

Religous Anniversaries.

Late overland papers contain full reports of the anniversaries in New York City, held during the month of May, commencing on the 11th and closing the 17th. The most important were the American Bible, Tract, Education, and Home Missionary Societies. Our narrow limits will only allow us to offer a few remarks in regard to the anniversary of the American Seamen's Friend Society, held on the evening of the 11th, at the Tabernacle. The meeting was numerously attended. The number of seamen present was quite large. The President of the Society, Capt. E. Richardson, occupied the Chair. The annual Report was read by one of the Secretaries, the Rev. J. Spaulding. The Society is about to send a Chaplain to Canton China.

"*Finances.*—The receipts of the past year have been $28,930 30, and the expenditures $28,290 62; leaving in the treasury $630 68. The details are presented in the Treasurer's Report.

Most cheering results are reported in the improved deportment of seamen, the progress of temperance principles, the establishment of sailor boarding houses, and above all in the conversion of souls."

After the reading of the Report, the Rev. E. E. Adams addressed the audience. Mr. A. is the Havre Chaplain, formerly of the Cronstadt station in Russia.

He was followed by a sailor in "full rig." We copy a summary of his remarks from the Christian Intelligencer.

"Mr. J. G. Clark, a sailor, then occupied the platform. He spoke of the change that had occurred, within the last fifteen years, in the feeling of the public toward the sailor. He illustrated the prejudice formerly existing, by saying that in '34, he, was on board the Hudson, then lying in our harbor; and that among the numerous visiters of the frigate, a gentleman came with his wife and daughter; and when the little girl was handed over the side, her looks betrayed the greatest terror, the cause of which they learned as soon as the lady reached the deck, for the child at once grasped her dress, and said, 'O! mother, see how many sailors are in this ship, *and they are all loose!*' Yes, the day was when people looked upon sailors, as wild beasts that needed chaining. But now the feeling had changed, and they regarded them as men, and as men with souls to be saved. And the sailor was a man who ought to receive sympathy. His life was like that of the poor flying-fish, which is a lawful prey to any fish or fowl; when in the water, it has to use all its energy to escape its foes; wearied with the effort, it darts into the air; but there it meets as active enemies; and at last, it plunges into the water, only to fall into the mouth of some pursuer there. So the sailor, wearied with storms, and rocks, and sickly climes, seeks the land; but there he meets with more numerous and powerful enemies, who strive to destroy him, both body and soul. Therefore there is necessity for special effort on his behalf. And there are great encouragements."

Then followed the Rev. Dr. Tyng, whose eloquence is heard in the advocacy of every good and worthy object. Dr. T. is successor of the late Dr. Milnor, of New York.

In connection with the anniversary of the Seamen's Friend Society, we would refer to an important convention which was held in New York, composed of the principal seamen's Preachers in the United States.

Intelligence respecting the operations of Seamen's Friend Societies and other kindred institutions in the United States, is most encouraging. While our hearts are thus made glad with news from the new world, that from the old world is no less cheering. A copy of Wilmer & Smith's European Times, for July 26, now lies upon our table, containing a full report of the laying of the corner stone of the new Sailor's Home, in Liverpool, by Prince Albert. A further account will appear in a subsequent number of the Friend. Prince Albert's donation for the Home, was £100. The entire cost is estimated at £25,000.

☞ On the evening of the 9th a meeting of the friends of Mr. Wilcox's Select School was held at the school room. Judge Turrill was appointed to preside as chairman, and Mr. Wilcox to act as secretary. After listening to a report of the financial affairs of the school for the term about to close, it was unanimously voted that the school should be continued. Terms were adopted, as may be seen in advertisement. Rev. S. C. Damon and J. B. DeFiennes, Esq., were appointed a committee to act in concert with Mr. Wilcox, to conduct the financial and other affairs of the school. It is sincerely hoped that the school will open with a sufficient number of scholars to meet its necessary expenses.

GOOD NEWS.—The Captain of the Russian bark Alexander, reports that rum is contraband at Sitka.

☞ The Editor of the Friend would acknowledge the receipt of files of the following papers, per Xylon. New York Express, Journal of Commerce, Herald, Courier & Inquirer, Tribune, Light Ship, Sailors' Magazine, Observer, Evangelist, Recorder, News and Sun. Also, New Bedford Shipping List and Nantucket Inquirer.

Notice to Seamen.—Visitors at the Seamens' Reading Room, will find a fresh supply of American papers, received per Xylon.

☞ Please let the papers remain on file!

The California Expedition.—Col. Stevenson's California Expedition is to be composed of mechanics of all kinds, professional men, and all others who feel disposed to enlist in the service of their country and go to California.

Among other articles to go, there will be one or two printing presses, accompanied by men to operate them, and men of talent to conduct them. We are happy to say that the idea of establishing a government paper is not entertained by Col. Stevenson, but that the paper when established, will be perfectly independent. This is much better, as upon such a plan it will excercise a far greater influence.

The press and type will, we understand, go out in the government transports, but to be entirely independent when arrived there. Col. Stevenson is still in the city, in fine spirits for the expedition.—[Late paper.

Ladies Schoool, Newark, N. J., Mrs. Elizabeth Ricord, and her son, F. W. Ricord, A. M., have opened a school for young ladies at 354 Broad st., Newark. Mrs. Ricord has been long and favorably known as the principal of the Geneva Female Seminary, and from her reputation as a teacher, and her many amiable qualities, can hardly fail to raise up an institution that will be a blessing to the young, and an honor to the city in which it is located.—[Light Ship.

DIED.

On Wednesday evening, of consumption, Mr. John Niles, printer, aged 27 years. He was a native of New York city.

A seaman belonging to the Russian bark Alexander was accidentally drowned in our harbor on Saturday last.

At the hospital, (Valparaiso) Oct. 13, George Boon, an American, a native of New York State, who has been a resident there some time.

PASSENGERS.

In ship Saratoga, from New London.—Mrs. Smith. Captain's lady.

In ship Xylon. from New York—Mrs. Millington, captain's lady, and four in the steerage.

MARINE INTELLIGENCE.

PORT OF HONOLULU.

ARRIVED.

January 30.—Russian American Co.'s bark Alexander, Klinkofstorm, 30 days from New Archangel, Sitka—cargo of furs, lumber, salmon, &c.

Feb. 2.—Brem whale ship Alexander Barclay, Fish, Bremen, 18 months, 1000 whale.

5.—Am whale ship Saratoga, Smith, New Bedford, 15 months, 1500 whale.

Am whale ship Huron, Woodruff, Sag Harbor, 16 months, out, 1400 whale.

February 10.—Am merchant ship Xylon, Millington, from N. York, via Rio, Valparaiso, Callao and Mazatlan.

Feb. 11.—Am whale ship Parachute, 1700 whale, 50 bbls sperm this season.

13.—Hamburg ship Elbe, Neal, Hamburg, 19 months, 2150 whale, 350 sperm, 180 sperm this season.

SAILED.

February 6.—H. B. Co.'s bark Vancouver, Mott, for London.

Feb. 12.—English brig Tepic, Walker, for Mazatlan.

Am whale ship William & Eliza, Whitfield, to cruise.

SPOKEN.

☞ Reported by ship Saratoga, Capt. Smith, on the Offshore ground and on the Line:

Sept. 1, Norman, Gardner, Nantucket, 1250 bls; 10, off Gallapagos Islands, Jefferson, of New London, 1600, bls, bound to Chile. Sept. 2, Eagle, Wood, New Bedford, 500 sperm; 3, Aurora of Nantucket, 700 bls; 5, Equator, of New Bedford, 1300 bls; 12, Robert Edwards of New Bedford, 800 bls; 16, Nantucket of Nantucket, 500 bls. Oct 1, Hobomock of Falmouth, 800 sperm and 700 whale, Arnoldin of New Bodford, 1400 bls. Dec. 20, Phenix, Nantucket, 1100 bls sperm.

At Honahooga, Marquesas, Dec. 1, ship Henry Clay, Austin, Nantucket, wanting 200 bls. to fill; Harvest of Nantucket, 400 bls; Enterprise of Nantucket. 800 bls.

Sept. 6, President of Nantucket, 1400 bls. July 4, Charles Carroll, Nantucket, 800 bls. Dec. 31, ship Highlander of Mystic, 350 bls, reported Parachute of New Bedford, 1700 bls. Jan. 1, Peruvian, Nantucket, Folger, 1200 bls.

MEMORANDA.

☞ We learn from our correspondent at Valparaiso, that the American ship Edward Everett, arrived November 23d, 117 days from Boston. Also, American transport Lexington, 120 days from New York, with troops and government stores.

American whale ship Com. Morris, touched there in September, with a partial cargo of oil. The Columbus had not arrived November 23d.

The Xylon, damaged in a gale, put into Rio, discharged cargo, and was forty days repairing.

The Xylon touched off Mazatlan, expecting to meet the Am. squadron blockading the port, and to deliver her stores to them. Not finding any American men of war, she communicated with H. B. M.'s S. Fisgard, the captain of whom obligingly sent his boat ashore and brought off the American and English mails and put them on board of her.

The U. S. S. Saratoga arrived at Valparaiso, ninety days from Rio. The U. S. S. Independence, Com. Shubrick, and Columbus, Com. Biddle, had also arrived. (Dec.)

The "Montreal" was to leave Boston about Nov. 12th, Mr. Levi Chamberlain passenger. Freight and mission stores for this place.

The "Mount Vernon," Captain Spring, sailed from New York Sept. 25th, for this port.

The H. B. Co.'s bark Cowlitz left London in Sept. for this.

The brig Laura Ann sailed from Liverpool, Sept. 12th, with Mr. H. Skinner, of the firm of H. Skinner & Co., supercargo, for this, via Valparaiso and Tahiti.

Brig John Horton had left Mazatlan with a freight of $500,000 specie and cargo of pearl shell.

PORT OF LAHAINA.

ARRIVED.

January 25.—Am ship Huron, Woodruff, Sag Harbor, 16 months, 1400 whale.

Am ship Daniel Webster, Curry, Sag Harbor, 18 months, 1300 whale.

29.—Marengo, Cole, New Bedford, 16 months, 250 sperm, 1750 whale.

Am ship New England, Wilbur, New Bedford, 17 months, 80 sperm, 1900 whale.

31.—Brem ship Alexander Barclay, Fish, Bremen, 18 mos, 1000 whale.

Am. ship Amazon, Smith, Fair Haven, 18 months, 60 sperm, 1200 whale.

H. Howland, Fish, New Bedford—no report.

Feb. 8.—Am. merchant ship Xylon, Millington, touched and sailed same evening for Oahu.

SELECT SCHOOL.

THE second term of the Select School, kept by the subscriber, will ope n on Monday, the 22d of the current month.

At a meeting of the friends and patrons of the School, held on the evening of the 9th instant, the following terms were adopted :

Higher branches,	$10 00	per quarter
Second Class,	8 00	" "
Beginners,	6 00	" "

Each pupil shall also pay 25 cents per quarter for incidental expenses, and shall furnish his own writing desk, or instead thereof pay an additional sum of 75 cents per quarter.

The subscriber hopes by faithful application to the interests of the school, to ensure the confidence of the public.

JAMES E. WILCOX.

Honolulu, Feb. 11, 1847.

Reference—Rev. S. C. Damon, and J. B. De-Fiennes, Esq. f15 tf

DR. G. WATSON,

RESPECTFULLY offers his Professional services to the public generally. Office, next door to C. Brewer & Co.'s, where may be found a general assortment of *Drugs and Medicines*, Perfumes, Fancy Soaps, &c. Residence, with Capt. J. O. Carter, opposite the Polynesian Office.

Honolulu, Jan. 1, 1847.—isly.

SUGAR AND MOLASSES.

THE subscriber is constantly making, and has on hand, a superior quality of molasses and brown sugar, for sale cheap for cash or approved credit. Apply to WM. A. McLANE, or to jy 9 J. T. GOWER.

Makawao, Maui, Jan. 9, 1846.—1y

TEMPERANCE HOUSE.

THE subscribers beg leave to inform the public that they have taken and fitted up the house formerly occupied by John Freeman (near the Chapel), where they will be happy to furnish Board with or without lodging, to all who may favor them with their patronage.

They will also keep on hand Refreshments, usually found in a house of the kind, and they hope by close application to their business to deserve and receive a liberal share of public patronage.

CHAUNCY S. SCUDDER.
JEREMIAH WILBUR.

Honolulu, January 1, 1847.—tf

LUMBER, &c,

The Seamen's Friend.

THE YOUNG SAILOR,
A Narrative Founded on Fact.

BY MRS. MARY S. B. DANA,

Authoress of "The Parted Family," "Southern and Northern Harp," &c., &c.

"I hope, Mr. Editor, that you are not going to leave the crew of the clipper schooner in the midst of that stormy Ocean, struggling for their lives." No, kind reader, William and Old Cudjo, have by no means ended their wanderings.

[*Continued from page* 27.]

CHAPTER V. Finding that the vessel did not sink, though she was now full of water, the sufferers were inspired with hope. It was also a fortunate circumstance that the masts and sails had gone round to windward, for by this means the force of the sea was considerably broken, and they were only sprinkled by the passing spray. As they had become fatigued from holding on, they commenced securing themselves, as well as they could, from slipping or rolling off. The wearing round of the vessel at the moment of upsetting was indeed a remarkable interposition of Divine Providence, for they must have been immediately washed from their frail footing if the waves had dashed over them without any obstruction. The wind and sea roared dreadfully during all that long, long night, and every heart rejoiced when they discovered the first gray streak of light in the eastern sky. Oh yes, that rising sun was hailed with transports of joy.

They could now look about them, and ascertain their exact situation. Through all the gloomy night they had not known at what moment the vessel might go down, and leave them in those raging waters without a plank to support them for a moment. But now, to their great joy, they discovered the boat entangled in her gripes. With much difficulty they disengaged her from the wreck, and hauled her up on the side: then, after emptying the water from her, and carefully examining her frame, they launched her to leeward, and soon stowed themselves away in her. One man always remained on the wreck, to look out for any vessels that might be passing, and in this tedious, heart-sikening watch each took his turn.

Several days after the disaster occurred, they observed that the foremast had moved out of its place, and was immerged in the water. At the moment when the mast quitted its place, the corpse of the poor boatswain followed out after it. He was one of the watch below at the time of the accident. All hands were immediately on the alert to secure the body, for innumerable sharks were surrounding the wreck, and waiting for their prey. But in spite of these sea-tigers, the famished crew obtained possession of the corpse, hauled it on the wreck, stripped it, and were in the act of cutting pieces from the side to relieve the insupportable pangs of hunger, when the man upon the look-out gave the joyful, heart-thrilling cry of "SAIL HO!"

And now all were in motion to equip themselves for the chase. With their patent oars and paddles they hoped to evertake the sail, which seemed not yet to have observed them. But, before starting, they all, ten in number, knelt down, and engaged in prayer for the success of the pursuit. Having left the wreck, they pulled immediately for the spot where they supposed the sail would pass, but before they could reach the place she had gone by!

At this time they supposed she saw the wreck, for she hove to immediately to the leeward of it. A smile of hope beamed upon every countenance; and as they redoubled their exertions, and pulled before the swell towards her, each one indulged in the most pleasing anticipations. But they were doomed to disappointment. When they got within reading distance, to their utter astonishment, she bore up; and as her stern turned towards them, they read the name of Polly, of Marblehead.

What a disappointment! Their hearts died within them, and their strength seemed completely gone. For a moment they rested on their oars, apparently stupified with surprise, and lost in gloomy thought. But once more they awoke to their situation. No time was to be lost; they must work while life remained, and endeavor to regain the wreck, for that was now their only resource. They had been rowing before the swell, and, unless the wind changed, they had now to head it. The oars were relieved, and fresh vigor seemed to nerve their arms, for God was with them amid all their troubles.

When they left the wreck for the chase, it was, by the sun's bearing, about 10 A. M.; and when they returned, it seemed, by the north star pointers, to be no less than 11 P. M., so that they were thirteen hours in the boat. It was only through the mercy of God that they were brought back to the right place, for they had no compass, and if the wind had shifted in the least, it would have been impossible to find the wreck.

But they found it at length, and having returned thanks to God, they resigned themselves to his will, and threw themselves down in the bottom of the boat to procure a little rest. In a few moments all eyes were closed in sleep, save those of him whose duty it was to watch. Poor fellows! they were indeed exhausted—nearly dead from bodily fatigue and mental anguish.

The foremast, sails and rigging were hanging heavily on the mainmast, and it was bending very much under the accumulated weight; they therefore determined to cut it away. After only one or two strokes, it gave way with a crash, and the schooner immediately righted on an even keel. She was, however, completely waterlogged, with the exception of a part of the forecastle. This was on the seventh day after she had upset.

The crew were now divided into two gangs, and one was stationed at the main hatchway to obtain water and provisions, the other at the cabin skylight to get stores of hams, wine, porter, or spirits. The first thing discovered floating in the cabin was *a drowned rat*. This was immediately seized by the captain and supercargo, who tore it in half, and devoured it voraciously. The entrails, which had dropped out, fell to William's share, as the third in rank; and never did he eat the most delicate morsel with a sweeter relish. To such straits were they reduced!

The next article obtained was a case of *gin*. This was handed up by the bottle, and instantly each flagon was carried to the lips of all who could succeed in snatching them.—Soon intoxication ensued, and poor William was distressed to see that even Jack and Cudjo were stretched at full length upon the deck. He alone remained sober.

My readers must remember that in those days there were no blessed Temperance Societies to operate as a check upon the poor mariner, when he is half mad with sufferings that cannot be described. Nobody then thought that it was wrong to drink in moderation; it was only when intemperance had become an intolerable curse that the evil had to be cured by cutting it off, root and branch. It is now proved, to the complete satisfaction of millions of people, that total abstinence from all that can intoxicate is the only radical cure for the plague which has so long ravaged this fair world of ours. Now, with scarcely an exception, a man would rather lie down and die than break a pledge to which he has solemnly set his name.

Poor William was now most truly to be pitied. There was water in the hatchway—he was perishing with thirst—and there was no one to help him to obtain it. The intoxicated crew wallowed about in the water as the schooner rolled with the swell. This was

a good thing for them, as it helped very much to relieve them from their inebriation. They were well soaked; though, through God's mercy, the water was not deep enough to drown them; if it had been, few of them, perhaps none, would have arisen from their intoxicated sleep.

Chapter VI. In about five hours the crew began to recover. As soon as they were in a state to listen to expostulation, William set before their minds the folly and wickedness of the course they had pursued All were ashamed, and hung their heads; but Jack and Cudjo fell upon their knees, and with many bitter tears entreated the forgiveness of their heavenly Father, praying that he would give them strength to resist and overcome temptation in future. And now all hands went to work with a hearty good-will, and soon hoisted up from the hold, with parbuckles, a cask of good fresh water. It was the first they had tasted for many days; and William, as he drank a long, invigorating draught of the precious beverage, poured out from his inmost soul his gratitude to God. "Cold waters to a thirsty soul!" No wonder the wise man employed such a figure to denote the very extreme of pleasure. And when God, by the mouth of his prophet Isaiah, would express the blessings he had in store for his people, he says, "They shall not hunger nor *thirst*, for he that hath mercy on them shall lead them, even by the springs of water shall he guide them!" And the blessed Saviour says, "He that believeth on me shall never thirst!"

"Look here, Jack," said William Griffin, as he pulled his Bible out of his pocket, "look here; now isn't this true? Just read what God says."

Jack attempted to read it aloud, but when he saw what it was, the rising tears completely choked his utterance, and blinded him so that he could not see at all. So he shook his head, and gave back the book to William, who read these words: "When the poor and needy seek water, and there is none, and their tongue faileth for thirst, I, the Lord, will hear them; I, the God of Israel, will not forsake them."

After a solemn pause, old Sam exclaimed, "Well, I declare! is it possible that's in the book too. Why didn't you tell me that before? It was written on purpose for us, wasn't it?"

"To be sure he bin write for we," hastily replied Cudjo, who had repented, and begged God's forgiveness, and now began to hold up his head again.

"Yes," added Jack Davis; "and if we ever get to heaven, we are assured we shall thirst no more, for the Lamb that is in the midst of the throne (that means Jesus Christ) shall lead us to living fountains of water; and God shall wipe away all tears from our eyes too. If I ever get there, I shall never have to weep over my sins, as I often do here.

Pleasant and consoling as these thoughts were, they could not linger long to talk about them, for they had other duties to perform. The conversation had taken place as they stood around the cask of water, and occupied much less time than it has taken us to write it.

The prospects of the shipwrecked crew had sensibly improved, and hope within each breast was growing brighter and brighter.—They were not now in danger of immediate starvation, and had a place on which to rest the soles of their feet, though it was under water. They now began to collect their provisions, such as hams, pork, beef, porter, wine, &c. The bread they found was completely saturated with salt water, so that it was not fit for use. In the mean time, the crew had obtained from the forecastle one of their barrels of rum. They had resolved to quit the wreck and endeavor to gain the shore as soon as the boat could be fitted up and supplied with provisions, and as William was fearful of another scene of intoxication, he advised them to pour the rum over one of the barrels of bread. This was done, and it completely washed out the salt taste, but it is a question whether it was improved.

They now began to fit out the boat, and in the first place endeavored to make some provision for warding off the spray. She was about fifteen feet in length, four and a half in width, and sixteen inches in depth under the thwarts. By diving into the cabin, William had procured his quadrant. After cleaning and drying the glasses, he was enabled, at twelve o'clock on the eighth day, to find out their latitude. From that it appeared that they had drifted in a northeast direction about two degrees from the place where they had been upset, making them at this time about four hundred miles from land. Fortunately, they had also found a compass. With much perseverance and care it was restored to use, and its correctness proved by the north star.

In the mean time they continued their labors, making many additions to the little boat. They placed stanchions all around, and upon these a strong tarpaulin was fixed. The back of the binnacle served for a stern-post. This would only assist in keeping off the spray, but was a poor defence against a heavy sea. They now commenced stowing away provisions, as far as room and safety would permit. These consisted of a five gallon keg of water, a few pieces of beef and pork, a couple of hams, and the saturated rum-bread.

After a long, farewell drink at the water-cask, they all knelt down, and offered up their fervent prayers that He who had sustained them thus far, would still give to the sea his decree, that the waters should not overwhelm them, nor the floods drown them. With hearts full of gratitude and buoyant with hope, they then took their places in their frail little bark, and committed themselves to the unknown dangers of their perilous voyage. This was on the ninth day after the upset.

As they left the wreck, they shaped their course for the nearest land. There was a moderate wind from the eastward, and they hoisted their sail; and, as the sea was tolerably smooth, they were likewise able to use their oars. In this way they made about three miles an hour. The day was clear and serene; Heaven appeared to smile upon their undertaking, and their arms weae nerved with new vigor. Four of the men were obliged to lie down in the bottom of the boat.

After rowing, paddling, and sailing before a stiff breeze for two days and two nights, on the third morning the sun rose in majesty, but here and there the sky was speckled with clouds. This gave them a little uneasiness. But on this very morning a sail appeared in sight, and, O joy of joys! it stood directly for them. It is impossible for those who have never been thus situated to imagine their feelings. Every heart was elated, every eye brightened, every face wore a beaming smile, and every nerve received fresh vigor. Their allowance of water had been very scant, only the top of a coffee-pot full having been given to each man twice a day. To aid in quenching their thirst, they frequently immersed themselves in salt water, which they found of great service; but still their strength had been gradually failing.

With hearty cheer they now pulled for the brig, determined, if she refused them admission, if they could get hold of her, to force their way on board, and compel the master to receive them. But no such course was necessary. When they hailed the brig, they were responded to in the most kind and tender manner. As they neared the vessel, and the excitement of danger vanished, they seemed suddenly to have been deprived of all their strength, and almost of life itself. Poor William, who had exerted himself most manfully during all their troubles, had to be hauled up the vessel's side, for he had not strength enough to climb. When he found himself so humanely received on board, he swooned away, and it was some time before he could be revived.

Chapter VII. The vessel proved to be the brig Apollo, of and from New York, commanded by Captain Waddle, and bound for Cadiz. The captain, like a good Samaritan, provided for the wants of those whom he had rescued; but, with great prudence, would give them at first but a moderate supply of food.

The suit of clothes which Washington wore when he delived his first Inaugural Address, was manufactured in a woollen factory in the city of Hartford, Connecticut, and the first of the kind ever established in the country. It was established, it is said, in 1780.

Liverpool Sailor's Home.

Laying corner-stone—Chairman's Address to Prince Albert—Reply of His Royal Highness—Description of the buildings—cost, &c.

Laying the Foundation-Stone.—The scaffoldings, or steps, round the site of the intended Sailors' Home, were crowded by a highly respectable assemblage, including many ladies in elegant attire. The galleries round the four sides of the site of the buildings presented a most beautiful and picturesque appearance. The outward semblance was still more striking. Numerous parties were on the east top of the Custom-house, provided with all kinds of flag decorations. The houses and warehouses on the south and east side were fitted up with scaffolds in the lower stories; the window frames being taken out from top to bottom; and the whole facade of each building, as well as the apparently dangerous and lofty roofs crowded to excess. The parties who had first, by ticket, obtained access to the site of the Sailors' Home, became considerably exhausted by standing or sitting, in expectation of the coming of the procession, which arrived certainly much beyond the expected time.

Within the area of the site, previous to the arrival of the procession, were Earl Talbot, Lord Ingestre and Lady Ingestre, whose beauty attracted every eye; James Aikin, Esq., the Chairman of the Sailors' Home, John Nelson Wood, Esq., Thos. Sands, Esq., Dr. Raffles, Josias Booker, Esq., and others.

On alighting from the carriage the Prince was welcomed by Mr. Aikin, who conducted him to the site. A crimson carpet was laid down for him to walk on. Many of the clergy, corporation, and *elite* of the town, including a number of naval and military officers, assembled round the foundation-stone.

Mr. Councillor Tyrer then presented to his royal highness a small glass vessel, in which were a few coins of the present reign, struck this year, and a list of all the donors to the Sailors' Home, printed on vellum.—This his royal highness placed in a cavity in the stone; after which Mr. Tomlinson, the hon. secretary, presented a larger vessel, containing copies of all the newspapers in Liverpool.

Charles Cotesworth, Esq., vice chairman of the institution, next handed to his royal highness a thick brass plate, silvered on one side, with which he covered the orifice.

A mallet, plumb rule, and level, in mahogany, the workmanship of Mr. Haigh, were then handed to his royal highness, with which he tried and proved the stone.

James Aikin, Esq., the chairman of the Sailors' Home, then came forward and presented the trowel to His Royal Highness, with the following address:—"May it please your Royal Highness,—As chairman of the Committee of the Liverpool Sailors' Home, it is my duty to express to your Royal Highness our grateful acknowledgements and thanks for your kindness and condescension in consenting to lay the first stone of the building to be erected on this site. Your Royal Higness is already aware that the great object of the establishment is to benefit the seamen frequenting our port, to improve their condition and their character, and to rescue them from perils of the shore, often more dangerous than those to which they are exposed at sea. Allow me most respectfully and most sincerely to congratulate your Royal Highness for having endeared yourself to the people of this nation, by associating your illustrious name with institutions formed for religious, scientific, and philanthropic purposes, by these means securing the triumphs of peace and the blessings of Christianity; and for having this day added to your well-deserved popularity, by recording yourself as the friend of the British sailor. It now only remains for me to perform the pleasing duty of presenting to your Royal Highness this trowel, for the purpose of enabling your Royal Highness to lay the first stone of our Liverpool Sailor's Home."

The reading of the address was frequently interrupted by the loud applause of those within hearing. Mr. Aikin read it in a clear, loud, and emphatic tone of voice.

The Prince then read the following most gracious reply:—"I return to you my best thanks for this loyal address, which gives a most gratifying account of the state of this institution and its future prospects. I join with you in fervent prayer, that the realization of its praiseworthy object, towards which this town has shown such liberality, may be further ensured by the solemn act we are about to perform, and in which it has given me the greatest pleasure that you should have invited me to take a part."

The Prince then spread the mortar with the handsome trowel, made by Mr. Dismore, and the stone was lowered into its place, while the immense assemblage sang "Rule Britannia!" The Prince struck it three times with a mallet, and applied the plumb line, &c.; after which the Rev. Rector Brooks offered up a long and appropriate prayer, and also the Lord's Prayer.

His Royal Highness joined audibly in repeating the Lord's Prayer, and at its conclusion responded with a hearty Amen. The Rev. Rector Brooks then pronounced the benediction.

Three hearty cheers were then given for the Prince, and three for the Queen, when his Royal Highness took leave of the authorities, and returned at a rapid pace to the Railway-station, where he arrived at sixteen miuutes to four. In the course of eight minutes, during which he walked up and down the station, he departed for London in an express train.

To those who are aware of the size and importance of Liverpool, her resources and commercial greatness, it will be a matter of no little suprise to be told that until within the last few months no active steps had been taken to provide for the comforts and preserve from imposition so large a body of men as those who form our mercantile marine.

We now propose to give a brief account of the principal architectural features, and the dimensions of the proposed building.—The site selected for the Sailors' Home is bounded on the south by Hanover-street, on the east by Paradise-street and on the north by a passage leading from Canning-place to Paradise-street. The main front will face the Post-office. The extreme length of the building is about 170 feet. The front to the Post-office about 95 feet, while that to Paradise-street the land being irregular in shape, is 53 feet. The style of architecture is purely English, being that adopted in the reigns of James and Elizabeth, and from its exceedingly light appearance, its numerous windows, and ornamented pinnacles, it will form a pleasing contrast with the heavy buildings of the vicinity. At each angle of the building there is a square tower, with an extremely neat ogle shaped roof, which is surmounted by a gilt ball and pinnacle, the effect of which is admirable. The elevation of the towers is considerably greater than the rest of the building, being 104 feet in height. The west front has three curvilinear gables, which are beautifully shaped, the side ones having pinnacles from the rise and at the top, while the centre one is surmounted by a vessel rigged with a spar, with cross-trees, stays, &c., which forms, in an admirably characteristic manner, the flag-pole of the institution. The gables on each front project nine inches, and are at the top ornamented, supporting brackets, caryatida, scollop shells, &c., most tastefully and usefully introduced. In this front is the main entrance, which in point of elegance of design, boldness, and adaptation of characteristic detail is unequalled by any thing our town can boast of. At each side of a three-quarter Doric column, cut in the Elizabethan style, headed by boldly projecting mouldings reaching to the second story. The door-way is arched, and in the upper part is a well-adapted oval fan-light; surmounting the mouldings of the door-way is a Liver in the centre of a circle formed of a coil of rope, which, with numerous purchase blocks, flags and other emblematical ornaments, completes this beautiful design. At the Hanover-street front there are five breaks or projections, the tops of which are ornamented with shields, bearing severally "The Liver," "The Rampant Lion of Scotland," "St. George and the Dragon," "The Harp of Ireland, and the Anchor, and Trident."—Along the whole of the top will be an open ballastrade, and the top will be so arranged as to form a promenade.—[Willmer & Smith's European Times, July 26.

THE FRIEND.

HONOLULU, MARCH 1, 1847.

Twenty-Second of February.

The one hundred and fifteenth anniversary of Washington's birth-day has passed. As usual, salutes were fired from the shipping in Port. The occasion was not marked by so much public demonstration of joy as former anniversaries have been, yet it was far from being forgotten. Washington's exalted character loses nothing by the lapse of time or the revolutions which have transpired since he moved upon the theatre of human action. Lord Erskine once remarked that for Washington, "he felt an awful reverence." If a contemporary of another nation could so speak, what words can adequately convey the mingled emotions of love, affection and reverence, which American citizens cherish for the Father of their country. In this connection, we cannot forbear to quote a panegyric of another eminent British Statesman upon the character of Washington:

In the British Parliament, Fox said of him: "Illustrious man, deriving honor, less from the splendor of his situation than from the dignity of his mind, before whom all borrowed greatness sinks into insignificence. It must create astonishment, that, placed in circumstances so critical, and filling, for a series of years, a station so conspicuous, his character should never once have been called in question. For him it has been reserved to run the race of glory without experiencing the smallest interruption to the brilliancy of his career."

A copy of Mr. Webster's address, on the completion of the Bunker Hill Monument, June 17th, 1843, has recently fallen under our eye. In addition to many truly eloquent paragraphs, the address contains an eulogium upon the character of Washington, alike worthy of the subject and of the eloquent orator.

"Few topics are more inviting, or more fit for philosophical discussion, than the effect of institutions, founded upon these principles, on the happiness of mankind; or, in other words, the influence of the New World upon the Old.

Her obligations to Europe for science and art, laws, literature and manners, America acknowledges as she ought, with respect and gratitude. And the people of the United States, descendants of the English stock, grateful for the treasures of knowledge derived from their English ancestors, admit also, with thanks and filial regard, that among those ancestors, under the culture of Hampden and Sydney, and other assiduous friends, that seed of popular liberty first germinated, which on our soil has shot up to its full height, until its branches overshadow all the land.

But America has not failed to make returns. If she has not cancelled the obligation, or equalled it by others of like weight, she has, at least made respectable advances towards equality. And she admits, that standing in the midst of civilized nations, and in a civilized age—a nation among nations—there is a high part which she is expected to act, for the general advancement of human interests and human welfare.

* * * *

America has furnished to the world the character of Washington! And if our American institutions had done nothing else, that alone would have entitled them to the respect of mankind.

Washington! "First in war, first in peace, and first in the hearts of his countrymen!" Washington is all our own! The enthusiastic veneration and regard in which the people of the United States hold him, prove them to be worthy of such a countryman; while his reputation abroad reflects the highest honor on his country and its institutions. I would cheerfully put the question to-day to the intelligence of Europe and the world, what character of the century, upon the whole, stands out in the relief of history, most pure, most respectable, most sublime; and I doubt not, that by a suffrage approaching to unanimity, the answer would be Washington!

The structure, now standing before us, by its uprightness, its solidity, its durability, is no unfit emblem of his character. His public virtues and public principles were as firm as the earth on which it stands; his personal motives, as pure as the serene heaven in which its summit is lost. But, indeed, though a fit, it is an inadequate emblem.—Towering high above the column which our hands have builded, beheld, not by the inhabitants of a single city or a single State—but by all the families of man, ascends the collossal grandeur of the character and life of Washington. In all the constituents of the one—in all the acts of the other—in all its titles to immortal love, admiration and renown—it is an American production. It is the embodiment and vindication of our transatlantic liberty. Born upon our soil—of parents also born upon it—never for a moment having had sight of the old world—instructed, according to modes of his time, only in the spare, plain, but wholesome elementary knowledge which our institutions provide for the children of the people—growing up beneath and penetrated by the genuine influences of American society—living from infancy to manhood, and age, amidst our expanding, but not luxurious, civilization—partaking in our great destiny of labor, our long contest with unreclaimed nature and uncivilized man—our agony of glory, the war of Independence—our great victory of peace, the formation of the Union, and the establishment of the Constitution—he is all—all our own! Washington is ours. That crowded and glorious life—

> 'Where multitudes of virtues passed along,
> Each pressing foremost, in the mighty throng
> Ambitious to be seen, then making room
> For greater multitudes that were to come;—'

that life, was the life of an American citizen.

I claim him for America. In all the perils, in every darkened moment of the state, in the midst of the reproaches of enemies and the misgiving of friends—I turn to that transcendent name for courage, and for consolation. To him who denies, or doubts whether our fervid liberty can be combined with law, with order, with the security of property, with the pursuits and advancement of happiness—to him who denies that our institutions are capable of producing exaltation of soul, and the passion of true glory—to him who denies that we have contributed any thing to the stock of great lessons and great examples—to all these I reply, by pointing to Washington!"

The following remarks upon the *policy, advice* and *piety* of Washington, we copy from a late No. of the "Christian Intelligencer, published in New York:

His Policy was Peace.—The policy of Washington was peace. The Declaration of Neutrality, in 1793, was characteristic of his administration. The French recognition of the Independence of the United States, and the French alliance, with its treasures of silver, and of gold, and of noble hearts devoted to the maintenance of that independence, were remembered by the gratitude of America. The first shout of the French Revolution was echoed by our country. The banner of the French Republic was hailed with exultation by thousands on our shores. And in the war of France against England, multitudes desired that the United States, reviving revolutionary sympathies, should put forth all their energies, to secure the triumph of their magnanimous allies of the sister Republic. Gratitude, the love of freedom, and the sacred faith of treaties, were all invoked. French agents endeavored to excite the people to the utmost. But in opposition to the tide of popular feeling and the torrent of public abuse, Washington firmly maintained the Declaration of Neutrality, the symbol of his sentiments, the basis of his system, and the foundation of the American policy of peace with the world.

The Treaty with Great Britain, in 1795, was another of his great measures; and it also was a measure of peace. When the ani-

mosity of the Revolution was revived by subsequent acts of Britian, and exasperated by the agents and friends of France, and there was needed but a spark to kindle the flames of war, he manifested his desire for the preservation of peace, by the mission of Jay to England. A treaty was the result. It was conditionally ratified. When its terms transpired, public feeling was excited against it; meetings, petitions, and various forms of remonstrance, evinced the opposition of multitudes. But Washington calmly continued negotiating, until the treaty received its full ratification. Opposition to it appeared in Congress. The House of Representatives called for its accompanying documents, and seemed inclined to defeat its fulfillment.—Washington refused compliance with their call, and at the sacrifice of popularity, and the hazard of suspicion, in the face of abusive opposition, maintained the Treaty, believing it must be either that treaty or none; either that treaty or war.

His Advice was Peace.—This was the spirit of government. In 1796, before the expiration of his presidency, he published a Farewell Address to the people of the United States. This paper was the mature fruit of reflection; he wrote it with care, had it for years in his possession, submitted it, at different times, to the revision of Madison, of Hamilton and Jay, and finally published it as the result of a long life of public service, solemnly addressed to his countrymen. They received with reverence its advice: "Observe good faith and justice towards all nations; cultivate peace and harmony with all. Religion and morality enjoin this conduct; and can it be that good policy does not equally enjoin it?—Just and amicable feelings towards all should be cultivated. Antipathy in one nation against another disposes each more readily to offer insult and injury, to lay hold of slight causes of umbrage, and to be haughty and intractable, when accidental or trifling occasions of dispute occur. Hence frequent collisions, obstinate, envenomed and bloody contests. The nation, prompted by ill-will and resentment, sometimes impels to war the government, contrary to the best calculations of policy. The government sometimes participates in the national propensity, and adopts, through passion, what reason would reject; at other times it makes the animosity of the nation subservient to projects of hostility, instigated by pride, ambition, and other sinister and pernicious motives. The peace often, sometimes perhaps the liberty of nations, has been the victim. The duty of holding a neutral conduct may be inferred, without any thing more, from the obligation which justice and humanity impose on every nation, in cases where it is free to act, to maintain inviolate the relations of peace and amity towards other nations."

Words worthy of Washington! Peace has been to our land the source of countless precious blessings. Under her smiles, prosperity has abounded; villages and cities have risen; the community has been united in interest and intercourse; the institutions of good government have been established; human happiness has increased; the arts and sciences have flourished; Benevolence has founded her asylums for the distressed of every name; and Religion has reared her temples, and taught the love of God. Peace is, indeed, the triumph of the Gospel, and the type of heaven.

His Piety.—These sentiments of peace were in beautiful consistentcy with his piety. The principles of religion were early implanted in his mind. Among the rules of behavior he wrote out, probably copied, when thirteen years of age, we find these: 'When you speak of God, or his attributes, let it be seriously, in reverence. Labor to keep alive in your breast that little spark of celestial fire called conscience.' That these were deeply graven on his heart, was proved by his whole life, near the close of which we hear him declaring; 'though I prize as I ought the good opinion of my fellow citizens, yet, if I know myself, I would not seek or retain popularity at the expense of one social duty or moral virtue.'

Examination of Mrs. Gummer's School.

Whether intended or not, we think the examination of Mrs. Gummer's school on the morning of the 22d ult., no inappropriate celebration of Washington's birthday.—Washingtonian temperance is most excellent, and we doubt not that Washingtonian education would be equally good. Mr. Reynolds well deserves the thanks of the parents and friends of the scholars for opening his house, and for the untiring zeal which he has manifested in behalf of education in Honolulu. Would that every man rode as good a hobby! The pupils who have enjoyed the instruction of Mrs. Gummer in the rudiments of education, and the art of needlework, appeared to good advantage. Specimens of their needlework were exhibited, reflecting favorably upon both teacher and pupils. We have on another occasion expressed our opinion of the importance of the school in this community, and most certainly, after attending the examination, have no disposition to alter our opinion. Mrs. G. is highly deserving for her patience, perseverance and success. We have attended nearly every examination of schools in Honolulu for the last four years, and most confidently we assert, that never have we seen so highly respectable a company of official and non-official persons present. Not one more, no not even so many as ought to have been present. Good schools are all important, and let no one think it beneath his notice to attend a school examination, although it may occur on Monday morning. His Excellency Mr. Wyllie, in expressing his approbation of the performances, remarked that unexpected duties prevented the attendance of his Majesty. This was setting a good example. No person ought to neglect a school examination unless he has a good excuse; certainly no parent who has a child in the school. In conclusion, we say to Mrs. Gummer and every other school teacher in Honolulu, go on. We bid you most cordially God speed in your arduous, praiseworthy and useful labors. Full well we know some of your trials and difficulties, but be not discouraged. To our fellow residents we say, let us cheerfully and liberally sustain these schools. If we do not it will be to our deep disgrace and shame. If we do, we shall bequeath a richer legacy to posterity than houses full of silver and gold.

Pitcairn's Island.

By the arrival of the Alexander Barclay, Capt. Fish, we have received intelligence from Pitcairn's Island. Many of our island readers will recollect Mr. Buffit, who visited the islands some eighteen months since. He is one of three foreigners now residing there. Under date of December 28, 1846, he writes as follows:—"The affairs of the island are about the same as when I last wrote to you. Our number at present is 134. There has been one death, since my arrival [nearly a year] that of a child which was burned and died in about 24 hours. This year 40 ships have touched here, being a greater number than we have ever had before. We have experienced a great drought; there has been scarcely any rain for the last two or three months, and should the weather continue the same much longer, I fear there will be a falling off in our yam crops.

"We have seen the Friend of September 1st. In your paper we saw an account of the death of the Rev. Mr. Whitney, and it was read from the pulpit last Sabbath day. Our school house, which is also our chapel, has been taken down and enlarged. Mr. Nobbs has now 48 scholars. As he acts as

doctor, and clerk of the market, when ships are here he finds plenty of employment."

It is interesting to watch the progress of the inhabitants on this small island. We are extremely glad to learn that so much attention is paid to education. What other community in the world can report so large a proportion attending school—48 out of 134 inhabitants!

Temperance.

Reminiscences of Sabbath Noon at the Parsonage,

Or, Old Grandsir B. Reformed.

The Sabbath,—what precious and delightful associations cluster upon the recollection of this quiet portion of our toilsome life.

Poets have sung of the sweet stillness of the morning of the hallowed day, and we have often enjoyed anew the peaceful scenes of its quiet evenings, in a sweet Sabbath hymn. The Lord of the Sabbath has made its hours all precious, and let pious poets sing its praises.

How cheering to wake at early dawn, before the shadows flee away, and know that the blessed day, so mercifully appointed by our Maker, has again returned; and how consoling, as we repose again on our pillows at night, to reflect, that week after week of toil and care, will end at such holy resting places.

Who but will respond to the language of Doddrige,

"Thine earthly Sabbaths, Lord, we love"

Memory delights to dwell upon the Sabbath noon of my childhood, especially on those cold wintry days, when, after the morning service, a portion of the congregation would gather around a large log fire, in an old fashioned fire-place in the pastor's kitchen, the doors of which were always open, and the room made comfortable for the reception of any who might wish to spend their intermission there.

Meeting-houses in the country had then no stoves, and there were no Sabbath schools to occupy the time of those who stayed at noon. The long settee, with its high back, screening those who sat upon it from the current air from the numerous doors of the spacious kitchen, was drawn up at one end of the fire-place, and chairs were furnished to make up the circle.

After a passing remark upon the coldness of the weather, sickness and health, general and particular, among the people, one after another would repair to the dresser for a tract or other serious book, deposited there by their pastor.

In those days lived "Old Grandsir B." He used to walk nearly four miles to meeting, and that even in very cold weather, so earnest was he to hear the preached word.

I well remember how the venerable old man looked, as he entered the meeting-house doors, and walked up the broad aisle, with his buskins tied over his shoes, and his blue and white handkerchief placed smoothly over his head and pinned under his chin. The handkerchief, serving the purpose both of a wig and ear cap, was always worn during service.

He used to take his place in one of the long body seats, as they were called, in front of the pulpit, and he seemed to drink in every word the pastor uttered, with a zest which few seem now to experience, because few take so much pains to enjoy the privilege.

Happy pilgrim! He has reached his journey's end, and we believe he is at rest. But his widow yet lives, with a character, in the estimation of her Christian friends, well nigh as pure as were the diamond white spots in that blue 'kerchief. I have looked upon that head-dress when I should have been thinking of other things, and wondered how it could so long be kept entirely unsullied.

When Mr. B. was able to be at meeting, he was a regular visiter at the parsonage on Sabbath noons. Being quite old, he used to be invited to take a seat with the family in the sitting-room, and warm himself with a cup of hot tea. The children were always pleased to see him, for he loved "the babies" as he called us. He taught us to call him "Grandsir B." As soon as he entered the room, before he sat down, he used to call one of us, to draw from his ample pocket the package of "saucer cakes" which his "woman" had made for "the babies," and such cakes as were made by "grand ma'am B." "the babies" never tasted elsewhere. One of "grandma'am's" saucers must have been as large as a small pan, for the cake could not enter that great pocket without being halved, and, though the children were numerous, there was a generous piece for each.

But "Grandsir B." had not always borne the character described. He had been a drunkard, and when under the influence of strong drink, one of the most savage sort. Reformed inebriates were not common in those days, but Mrs. B. had learned what some of this generation have at length found out, that even the drunkard may be won by kindness.

It is not uncommon for the inebriate to mourn over the strength of his appetite, and promise again and again that he will reform. This was the case with "Grandsir B." and on these occasions, although it seemed oftentimes like hoping against hope, his "good woman" would always encourage him.—There were two articles besides ardent spirits, of which he was very fond. These were such cakes as have been named, and *good warm coffee.* Always when the old gentleman went to market, his wife stored his pocket with cakes; and he was sure, on his return, to find in readiness plenty of hot coffee.

Unceasing love and kindness, showing itself in every possible way, and persevering prayer at length prevailed. Although at the eleventh hour, he entirely reformed. And what a change was that! It will not cease, through eternity, to be matter of gratitude and praise; he became not only a *temperate man*, but, as we believe, a *Christian.*—[Boston Congregational Visiter.

For the Friend.

Mr. Editor: Permit me to correct a typographical error or two in the Friend for Feb. 1, 1847.

The following will correct the errors, and place the whole subject of this chaplaincy in a clear light.

Receipts of Lahaina Chaplaincy during the year 1846.

From various seamen, for support of chaplaincy,	$59 56
From residents, for chaplaincy,	26 00
Total, for chaplaincy, 1846,	$85 56
During the year 1846, I received for repairs on bethel, from seamen,	$77 79
From residents,	12 31
Total, for repairing bethel,	$90 10

I do not here mention what I received for the Friend, and for bibles and hymn books, because I reported them before as paid over to the proper agents.

The above funds I expended as follows:

Paid Mr. Halstead for carpenter work performed on bethel in 1845,	$32 87½
Paid Mr, Halstead for work on bethel, June, 1846,	41 75
Paid for painting the interior,	39 12½
Services of sexton, (erroneously $35 in Friend of Feb. 1)	25 00
Hymn books gratuitously distributed, and used in chapel,	27 25
Bound vols. of Friend given away,	23 00
Two indigent seamen,	2 00
Total,	$191 00

Thus it will be seen that while the whole sum received by me for support of chaplaincy and for repairs on bethel was only $175 66, the sum paid out by me was $191 00, leaving the sum of $15 34 yet to be paid.

It will also be clearly seen from the above that I have used for my own support not one dollar of the funds contributed.

From some source funds ought still to be raised to put on a shingled roof, with belfry, and plaster the whole building outside. A bell could be procured, and should be possessed. We are now dependent on a small school bell belonging to the natives.

Yours, &c., C. FORBES.

☞ Masters and officers of vessels visiting this port are requested to forward for publication in the Friend such items of Marine intelligence as may be of interest to the commercial and seafaring community.

DIED.

On the 16th, Mr. JOHN KEDZLIE, a native of Scotland, aged 53 years, during one half of which, he resided on these islands, and was much respected by all who knew him.

At the United States hospital, Honolulu, Feb. 24, J. B. WATERHOUSE, a native of Marsden, England.

It is believed that a brother and sister of the deceased are now residing in the city of New York. He had been for several months gradually wasting away with consumption. Fully conscious of his situation, he aimed to be prepared for an exchange of worlds, and died in the full belief of Christianity. In early life he was brought under the influence of some truly pious Methodists, his parents belonging to that denomination.

PASSENGERS.

In ship Xylon, for California—Mrs. Millington, captain's lady, and Messrs. J. B. McClurg and C. Lafrenz.

MARINE INTELLIGENCE.

PORT OF HONOLULU.

ARRIVED.

February 11.—Am whale ship Parachute, Devoll, New Bedford, 17 months, 1650 whale, 40 sperm, this season

12.—Fr whale ship Meuse, Le Brec, Havre, 19 months, 900 whale.

15.—Am whale ship South Boston, Hoxie, Fair Haven, 47 days from San Francisco—no report

17.—Am whale ship Wm. Penn, Wimpenny, New Bedford, 19 months, 900 whale, 100 sperm,

18.—Am whale ship Minerva, Smalley, New Bedford, 125 sperm this season.

Am whale ship Cavalier, Merchant, Stonington, 18 months, 650 whale,

February 20.—Am bark Hamilton, Babcock, Sag Harbor, 17 months, 1100 whale.

Brem ship Averick Hennikin, Rounseville, Bremen, 19 mos., 2100 whale.

23.—In offing and sailed same day, whale ships Amazon and India, from Maui.

SAILED.

Feb. 24.—Am ship Xylon, Millington, for San Francisco.

MEMORANDA.

At San Francisco, Dec. 27., Am brig Elizabeth, King, hence for Monterey, to return here in two or three months.

VESSELS SOON TO ARRIVE.—H. B. Co.'s bark Cowlitz, left London in September.

Br. brig Laura Ann, left Liverpool 12th September.

Am Bark Toulon, Cresby, from Oregon, via San Francisco.

Am ship Montreal, left Boston about Nov. 12.

Am ship Mount Vernon, left New York Sept. 25th.

Am brig Wm. Neilson, Weston, China, due last month

Haw brig Euphemia, Rossum, next month.

SHIPWRECK.—The American whale ship Heroine, of Fair Haven, Capt. West, was wrecked on Palmerston Island in October last. She had on board 1000 barrels of oil, 300 bbls. of which was saved. Only one man was lost, although the vessel went ashore in the night. The officers and crew were taken off by the Alert, Captain Middleton, of New London, and carried to the Bay of Islands, N. Z., Dec. 1.

N. B. Captain Babcock, of the Hamilton, reports that he spoke the Heroine on the 25th November, in 41 south and 160 west; hence there must be some mistake in regard to the name of the vessel reported as lost; but that a vessel is lost, is quite certain.

☞ Capt. SMALLEY, of the "Minerva," reports the following vessels at Tombas, Peru, Oct. 23d:

Spartan, Fisher, 1400 sperm; Joseph Maxwell, Perry, 1600 sperm, and wanting 300 more; Mobile, Bunker, 550 sperm and 150 whale; Marriner, Wray, 800 sperm and 500 whale; Hydaspe, Taylor, 550 sperm and 100 whale. Heard from bark Equator, full, bound home; Robert Edwards, 1000 sperm, 16 months out; American, of Nantucket, 100 sperm, 12 months out.

PORT OF LAHAINA.

The Seamen's Friend.

THE YOUNG SAILOR, A Narrative Founded on Fact.

BY MRS. MARY S. B. DANA,

Authoress of "The Parted Family," "Southern and Northern Harp," &c., &c.

A correspondent writes us, "That story of Mrs. Dana's about the sailor is well selected. It will do good." This is encouraging, and must serve as an apology, if any is needed, for occupying so much of several successive numbers of our paper with matter that the reader might find elsewhere. This work of Mrs. D. has not, we presume, become as yet extensively circulated. It belongs to a class of books which will always find many readers, and perhaps none will more eagerly peruse its contents than the tenants of the forecastle. It is for them particularly that we are desirous of furnishing entertaining and useful reading. Read then, shipmates, an account or hear read "a yarn" about William and Cudjo being impressed on board an English man-of-war. We omit the narrative of the Apollo's voyage until her arrival on the coast of Spain.

[*Continued from page* 34.]

CHAPTER VIII. Early in December, the Apollo made the coast of Spain. While running in for Cadiz, they discovered off the mouth of the harbor the British fleet. They were drawn up in sailing order, thereby giving themselves the power of examining all vessels arriving at or leaving the port. In a few moments, one ship was observed to leave the line. After a variety of signals thrown out by the different admirals, she gave chase to the Apollo, which was soon obliged to heave to. The pursuer proved to be the Edgar seventy-four, commanded by Captain John M'Dougald.

Repeated communications now took place between the ship and the brig, and soon the ship hoisted out her launch. She brought a lieutenant, who sprang lightly up the Apollo's side, and no sooner did he tread her deck, than all hands were ordered to muster aft. A slight examination ensued, when those who had belonged to the shipwrecked schooner were ordered to get their "duds" ready, and repair instantly on board his majesty's ship, and report themselves under the surveillance of a British reefer. They remonstrated, but it was in vain. They had no papers to corroborate their statements, therefore go they must, and go they did.

The poor fellows had but little trouble in packing their "dunnage," for all they had in the world they carried about them. The instant they arrived on board, they were mustered aft. A variety of questions were then asked, and many side glances passed between the officers. Captain Waddle was soon informed that he could return to his vessel; the supercargo was likewise allowed his liberty, but all the rest were detained. They were, in short, impressed for the British service!

This was a hard fate for men who were born as free as air, and had imbibed a love of liberty from their mothers' breasts. It was not long before that America had freed herself from the shackles of the mother country, and men had not then forgotten, as some seem now to have done, what their liberties cost. Boldly, but respectfully, did the brave fellows remonstrate against the decision. The captain of the Apollo, who felt convinced that William's tale was a true one, and that he was really a native of Charleston, stood up manfully in his defence, and told the British officers he was willing to pledge his life that he was an American. But it was all in vain. With a sneer of contempt, the friend and preserver of the shipwrecked crew was peremptorily ordered into his boat.

Farewell to joy—farewell to hope! Ah no, *hope* did not leave them; and that God, who had protected and preserved them thus far, was with them still. The British ship was badly manned; sailors were mixed with land-lubbers of all trades, and it was evident that the majority of them were not volunteers, but slaves impressed. "Oh, can it be," thought William, "that I am now the slave of a king?" Gloomy indeed were his reflections; but his religion came to his aid, and he was enabled to bear the trial with patience.

It was a sad sight to those impressed seamen to behold, as they now did, the Apollo, that friendly sail which had received them when threatened with destruction, steering off for Cadiz, the port to which she was destined. There they might speedily have found a vessel to convey them home, and now their hearts sank within them as they thought of their fate. But sailors do not dwell upon their misfortunes, and each man soon went to his duty, inwardly resolving that he would take the first opportunity of escaping from a service to which he had been so unjustly forced.

As soon as the ship had set sail, William was summoned aft by Captain M'Dougald, who inquired minutely into every particular of the shipwreck, and the subsequent rescue. William answered all his questions with much frankness and dignity. The captain, after expressing himself pleased with the narrative given by William, thus addressed him: "I am very destitute of young officers of good character, and if you will be content on board here, I will immediately rate you as a midshipman; if not, why, you see the walls in which you are enclosed; you'll have to do duty either in the tops, afterguard, or waist."

William was literally in rags, but for all that he looked the very image of dignity, and more than once Captain M'Dougald almost quailed before the stern glances of his eye. Folding his arms upon his breast, he compressed his lips together for a moment, and then replied, "Sir, I have been unfeelingly impressed by you; through the Providence of God I have been deprived of my protection; now I am your prisoner, you can do with me as you please."

The captain received this rebuke with a scornful smile. He then called a midshipman, and ordered him to accompany William below into the cockpit, and take him to his mess; at the same time giving him a strict injunction to treat the new comer with great kindness. They accordingly descended to the pit, which William found indeed a pit of vice. Blasphemy, intemperance, and wickedness of all sorts reigned there with horrible sway, and William's heart sunk within him when he considered what was before him. One of the mess was the vilest of women, who could fight and toss down her grog with the worst of them; and swore and blasphemed in true Billingsgate style.

This was a hopeful initiation for one for whom a tender and pious mother had labored and prayed; and these were horrid scenes for a youth of eighteen to behold. But William possessed that "anchor to the soul" of which we have before spoken; and though the gales of vice were blowing, and though a rocky shore was stretching away under his lee, that anchor held him fast, so that he made no shipwreck of his faith. Oh that all sailors possessed such an anchor, more precious than gold!

We will now give a brief description of the ship's officers. The captain was an Irishman, from the middle class of society, who had fought his way to distinction by his gallant conduct when lieutenant of a flag ship on the Flemish coast. As a recompense for his bravery, King George had clapped a brace of epaulettes on his shoulders. He was a good officer, and was very kind to his

men, but would indulge, after dinner, in a glass too much.

The first lieutenant likewise indulged too freely in the pleasures of the cup, but was every inch a sailor. He also was an Irishman. The second lieutenant, likewise a son of Erin, was neither more nor less than a sot. The third lieutenant, an Englishman, was a good seaman, and was polite and attentive to his duties; but he too loved a cheerful glass. The fourth lieutenant was a native of Bengal, and was the captain's nephew. Without the use of pipe-clay, his face was very much the color of well tanned leather. He was neither sailor nor soldier, but acted only as a walking trumpet. At night, like a booby, his head was always under his wing; but he was the most sober of all the officers. As for the midshipmen and surgeon's mates, all, with two exceptions, were intolerable drunkards. Indeed, on gala days, it was not uncommon to see every soul (with the exceptions above mentioned,) officers, men and women, entirely and helplessly drunk; and this, too, when they were at anchor off Cadiz, in sight of a superior Spanish force, from which they were only protected by want of courage in the latter.

No means were left untried by William's messmates to entice him to a participation in their wicked practices. Allurements of every kind were offered; they coaxed, they teased, they threatened him; but his "anchor" still continued "sure and steadfast." He kept constantly in mind these words of the wise man: "My son, if sinners entice thee, consent thou not;" and when they called him "a fool," and "a puny-hearted ninny," he never returned "railing for railing," but bore all their taunts with a mixture of dignity and meekness. He had always found that the Bible gave him good advice, and it was the Bible which now warned him particularly against intemperance, and the flattery of "the strange woman, whose feet go down to the chambers of death, whose steps take hold on hell."

Jack Davis and Cudjo were separated from William, but now and then they had an opportunity to exchange a word or two, and William rejoiced to hear that they also had been enabled, through God's help, to resist temptation. Poor old Sam had fallen into sin more than once; but Jack Davis kept a strict and brotherly watch over him, and still hoped that the Spirit of God was at work within his heart.

A purser's bed was prepared for William, which resembled more a selvagee strap than a place on which to rest his weary limbs; but, being accustomed to hardships, he turned in, and said nothing about it. A little after midnight, all hands were aroused by what seemed to be the report of a cannon. William listened intently, for he was three decks below the scene of confusion, which seemed to increase every moment. In another instant, however, he was out of his hammock, and as he had turned in with all his rags standing, his toilet was soon completed. By the light hanging in the cockpit, he attempted to make his way up the ladder.

Before he had ascended far, he was met by a midshipman, whom he soon recognized as one of his *amiable* messmates, and of him he inquired what was the cause of the confusion on deck. "Nothing," he answered, carelessly, "but a few wretches launched overboard, and many others scorched with lightning!"

Chapter ix. During the remainder of that awful night, all hands were busy at preventers, shrouds, and crane-lines, and it was not long before daylight appeared. A signal was then made to the admiral, Sir James Curtis, who was on board the Queen Charlotte ninety-six, stating damages, &c.; and answering signals were soon discovered, ordering them to make sail for Gibraltar, to repair. Every rag of canvass that could be set was then spread to the breeze, and the next morning they anchored in Rosa Bay, under the Rock of Gibraltar.

As soon as the mainmast could be stripped, it was taken out, carried on shore, and condemned; for the lightning had burned it so much as to render it useless. Near the shore where they landed, covered by a mole, lay nearly all the prizes of Lord Nelson, as well as some of his disabled ships. After a few days William was sent on shore to assist at the dockyard, and there he had an opportunity of viewing the French ships that had been battered by the British, as well as several British ships which were in no better situation. They were literally riddled, and many of the mouths of the guns entirely shot away.

One morning there was a British frigate cast away in Rosa Bay, in sight of the dockyard, and William was ordered with the rest to repair thither to her assistance. After much difficulty they saved some of her sails, and William was again ordered, with a party, to carry them to the dockyard warehouse. On his way he met and recognized an old Charleston acquaintance. With a joy not to be described, he sprang forward, and seized his hand; for the thought of escape was ever uppermost in his mind, and it immediately struck him that his old friend could now identify him as an American. The recognition was mutual. As soon as William had told his story, his friend promised to use his utmost exertions to aid in procuring his discharge, and immediately started off to the American consul to report the case.

It was not long before he returned, accompanied by the consul, a Mr. Isnardie. They passed William, and, going up to Lord St. Vincent, who was commanding admiral of the fleet, claimed him as an American citizen. William's breath came thick and fast, and the blood coursed through his veins with wonderful rapidity. Some words ensued between the consul and Lord St. Vincent, and William soon had the mortification and misery of seeing the representative of his beloved country make his way out of the dockyard much quicker than he had entered it.

Affliction sometimes elevates and prepares us for great things. Hope had been strong in William's breast from the moment when he had cast his eyes upon his Charleston friend; in fact, he felt nearly certain that he would be discharged, and in imagination he was already at home, with his arms around his mother's neck, and kissing away the tears of joy from his sisters' cheeks. When he found that the application had been unsuccessful, for a few moments the internal struggle was terribly severe. "God has forsaken me," he thought, "and left me to my unhappy fate, and I care not whether I live or die."

But God will not forsake his children when they are in trouble; if they will only look to him, they will find that he chooses the time of trouble to give them the richest proofs of his love. William did look to his heavenly Father; his lips moved in prayer, though no sound was heard; and he prayed for patience. He remembered the friendly advice of Solomon: "My son, despise not thou the chastening of the Lord, neither be weary of his correction; for whom the Lord loveth he correcteth, even as a father the son in whom he delighteth." And while he inwardly determined that he would leave no means untried to effect his escape from a service which he despised, he also resolved to do nothing rashly, and to bear with patient dignity what he could not help. And furthermore, he prayed that God would give him strength to act well his part, in whatever situation he might be placed, and thus to honor his Christian profession. No wonder, then, that a smile of resignation sat upon his features, which astonished all who knew of his disappointment. After the labors of the day they returned to the ship, and William saw no more of his Charleston friend or the consul.

A Thought for Seamen.

BY ELIHU BURRITT, ESQ.

Every sailor, as well as landsman, should be in favor of peace. Nothing is so disastrous to individual and national prosperity as war. Nor does any thing so effectually prevent the spread of religion, and produce open immorality.

Elihu Burritt, Esq., familiarly known as the "Learned Blacksmith," has sent us the following thoughts on war, which forcibly commend themselves to the consideration of every friend of peace. We most cheerfully give them a place in the Light Ship:

The mercantile shipping of the civilized world amounts to about 8,000,000 tons, which is worth, new and old, $30 per ton, and nets, clear of interest, insurance, &c. 10 per cent., or 24,000,000 per annum. The appropri-

ation to the British Navy, for the current year, is $33,620,200 ! ! Is not this a sober fact ? that the annual expense of one nation's navy exceeds the net profit of all the mercantile shipping owned by the civilized world ?

The war debts of the European nations amount to $10,000,000,000. It would require the labor of *four millions* of men, at $150 per annum for each man, to pay the *interest* of this sum at 6 per cent. To pay the principal, it would be necessary to levy a tax of at least Ten Dollars on every inhabitant of the globe ! Another fact, rendering this more impressive, may be found in the "scrap of curious information," that no heathen nations are in arrears for the butcheries they have perpetrated on the human race. They pay cash down for all that is done for the devil under their hands. Christian nations alone "go on tick" for that kind of service.

From March 4th, 1789, to June 30th, 1844, our government expended on the War Department, $663,438,851. The interest of this sum, at 6 per cent., would build Whitney's great railroad from the Lakes to the Pacific, of 2,500 miles in length, at $15,000 per mile; and thus erect a highway for the commerce and communion of the family of nations, which should be reckoned in all coming time one of the greatest enterprises that ever blessed the race.

In 1842, there were produced in the United States, 100,000,000 bushels of wheat, and 140,000,000 bushels of Indian corn ; which, at $1 per bushel for the former, and 25 cents for the latter, were worth $135,500,000. Fifteen per cent. clear of the interest of the capital invested in lands, implements, hired and personal labor, is a liberal estimate of the profit accruing to the wheat and corn grower. Then the profit of this amount of grain would be $20,325,000. The appropriation to the army and navy, during the same year, was $20,150,501. In other words, the army and navy ate up the whole harvest of wheat and corn throughout the Union ! Will not the hard working farmers think on this fact?

The government, though carrying on extensive armories of its own, has recently contracted with a private company in Connecticut for the supply of 30,000 pistols, at $6,50 each; or, $195,000 worth of those weapons so much in vogue with duelists and assassins. The American Bible Society congratulates itself on receiving, the past year, $166,652, the aggregate of all that has been given throughout the Union for the dissemination of the Word of Life at home and abroad. So it goes ; Christendom expends more in one year on the means and instruments of human slaughter, than has been given to the promulgation of the Gospel since Jesus Christ died on the cross ! [*L. Ship.*

Example works more cures than precept.

Temperance.

A Better Use.—In one of the reports presented to the Board of the City Tract Society, a missionary says : "A tract visitor called upon me to see a room that had been offered him, that he might gather into it a Sunday school, and hold in. it temperance and prayer meetings for the benefit of the colored people in the neighborhood. The owner is a colored man, who for a number of years had either kept or let to others this place for a bar-room, and other purposes calculated to hurry souls to perdition. About the beginning of 1845, he was induced to sign a temperance pledge ; shortly afterwards his mind was divinely impressed, as he believes, with a sense of his lost condition as a sinner, and of the horrid nature of the business he was conducting. He then without delay closed the concern, resolved that the place should no more be appropriated to the same use, either by himself or any other person. When we went there, it had been shut up thirteen months, and was just as when first closed, with its decanters, glasses and half filled bottles. "Now," said the man, "I will fit up this room and do the necessary repairs, and I wish you then to come and occupy it, for I want to do all I can to build up what I have been so long assisting to destroy."—*N. Y. Evangelist.*

Temperance Pilots.—There are 70 pilots in the pilot service of New York, none are eligible *except total abstinence men.* Therefore vessels are never lost owing to drunken pilots. The English here might borrow a leaf out of the American's book. The first thing an English pilot asks for is a glass of grog ; whilst the New York pilot who boarded us a hundred miles from port, was pledged in common with the other 69 of the fraternity, to drink nothing stronger than tea or coffee, *or they would be refused a license.*—*Rubio's Rambles in the United States.*

New Use of a Church.—There is a temple of the Most High in Rhode Island, once a Congregational church, now turned into a *brewery.* The steeple stands, and on the outside of its consecrated walls is written in large letters "*Read's Brewery.*" Here, says the Temperance Journal, are the downward tendencies of ruin. Let intemperance prevail, and this is the use which will be made without compunction, even of consecrated churches, and there Deacon Giles' demons will grow rampant.

State Patronage.—The Swedish government, in order to put a stop to the increasing progress of drunkenness in Norway, has appointed a *missionary* for each of the four provinces of that kingdom, to travel through them, preaching abstinence from strong liquors, and promoting the establishment and extension of temperance societies. Compensation is again offered to all such distillers as shall resign their licenses for making brandy, and entirely relinquish their business.

Statistics of Distilleries.—The Albany Knickerbocker says:—It is estimated that the present number of distilleries in the United States is 10,400; the number of gallons of distilled liquors, distilled annually, is 41,502,607, which, if sold at 20 cents per gallon, would produce $8,000,000, 4,000,000 of quarrels, half a million of assaults and batteries, one hundred thousand thefts, eight hundred suicides, and about one hundred murders.

A Mother's Power.—One of the most interesting examples of the power of a mother's early instructions in ensuring the safety of her children through life, is recorded in the Sailor's Magazine for April, in the account of the recent wreck of the John Minturn. This was one of the most disastrous shipwrecks that has ever been known upon our coast. Thirty-eight lives, or more, we believe, were lost, and that within a few rods from the shore. One of the sailors who was saved, "on being asked how it was that he succeeded in weathering the chilling waves and the freezing wind on that wreck for thirteen hours," replied, "Five years ago, when I left my home in the State of Maine, I promised my father and mother three things :—that I would not gamble, that I would not swear, and that I would not drink anything stronger than water. That promise I have kept; and while others on that wreck were chilled through, I was as comfortable as one could be in so cold a storm, drenched by every returning sea."

Let fathers and mothers think of this promise, when they send their sons to sea. We venture to say that those parents put a Bible also in their son's chest, and entreated him to read it. In ten years, it is stated in the Sailor's Magazine, nearly four thousand vessels, and six thousand five hundred lives have been lost, principally on our coast. And most of these young men ! How great the responsibility resting upon the mothers of young sailors ! If they would in every case send their children to sea with *the Bible in their hearts*, and the habits and example of a temperate household in their lives, with holy promises exacted by a mother's love, our sailor boys would in most instances become sailor Christians. When a mother has pursued these efforts at home, she may follow her boy with her prayers upon the ocean, secure that God will answer them, in making the object of her parental anxiety the child of heaven's care.

THE FRIEND.

HONOLULU, MARCH 15, 1847.

"The Learned Blacksmith."

For Merry England.—Elihu Burritt, the "learned blacksmith," intends making a pedestrian tour over England. He says: "About the 1st of June we propose, under certain conditions, to take steamer or packet for England. On our arrival we propose to take a private hickory staff and travel on, like Bunyan's pilgrim, through the country, at the rate of about ten miles a day."—*Am. paper.*

In a late English paper, we read a notice of his arrival in London, as one of the delegates to the World's Temperance Convention. We know of no person who would more enjoy a ramble amid the ancient and venerable relics of by-gone ages, which render the British Isles so full of interest to the lover of English literature and history. He will doubtless find so much to interest his mind and which he will wish to "note down" in his diary that "ten miles a day" is rather an over estimate of his speed. It will be not merely the old castle and moss covered abbey that he will examine. He will wander through the manufacturing districts, talking with the day-laborers and listening to the huge blows of the trip-hammer. Although he has become more or less acquainted with some *fifty* different languages, yet until very recently he has daily labored beside the anvil and forge. It was our privilege in the summer of 1841, to become somewhat acquainted with this man, whose reputation as a linguist has become so extensively spread abroad. He was then residing in Worcester, Mass., working six hours a day at his trade, as blacksmith, and devoting the remainder of his time to his favorite study of the languages. We recollect to have once called upon him after dinner, and found him reading a chapter in the Hebrew Bible, while there lay upon his table an Hawaiian Bible and dictionary.

In the course of our conversation, he related an incident connected with his studies which was full of interest. As near as we recollect, the facts were as follows:—The managers of the American Antiquarian Society having given him free access to their valuable collection of books, which is now becoming one of the best in the United States, he found among them a dictionary and one other book in the Celtic language. This language is entirely obsolete as a spoken language, and is now known only as a written language to but a few even of European scholars and linguists. By the aid of those books he acquired such an accurate knowledge of the Celtic, that he composed a letter in that language, addressing it to the President or Secretary of the Royal Society of Antiquities in France. The President of the society replied to his letter, and expressed great surprise that an American mechanic should have been able to compose a letter in a language so very obsolete, while it was with no little difficulty that a member of the society could be found sufficiently acquainted with the Celtic tongue, to make a translation of the letter. The society honored Mr. B. by publishing his letter in its transactions and forwarding him a copy.

During the last few years Mr. Burritt has conducted a weekly paper, published at Worcester, Mass., called the "Christian Citizen." He has displayed considerable ability as an editor. Many of his articles have been extensively copied into other papers. He is the unflinching advocate of temperance and peace principles. In another column will be found a specimen of his reasoning from facts. Most cordially we wish him a pleasant trip to "Old England." With staff in hand he asserts that he shall travel on like Bunyan's Pilgrim. We hope he may not like the Pilgrim fall into the Slough of Despond, and get "grievously bedaubed with dirt," or find himself in Giant Despair's Castle, and there be detained against his will from "Wednesday morning till Saturday night, without one bit of bread or drop of drink or light, or any to ask how he did." He will doubtless wander through Vanity Fair, and may his path lead through the land of Beulah. When his wanderings cease, may an account thereof be as interesting and find as many readers as that of Bunyan's Pilgrim.

We have now lying before us Mr. Burritt's autograph, which he wrote July 13th, 1841. He accompanied it with the latin motto, "Per ardua ad astra." Truly his own position among the literary "stars" of the age is a most striking confirmation of the sentiment contained in that motto. He is a self made and self educated man. Let this fact encourage others toiling at the anvil.

Summary of Foreign News.

Mexico.—The American army under Gen. Taylor has taken possession of Monterey, after a severe engagement, in which the Americans lost, in killed and wounded, 571, and the Mexicans 1200.

United States.—News has been received from New York up to the middle of November. The most important item of political intelligence is, that the whigs have carried New York State. Governor Whig, Legislature Whig, and 23 out of 34 members of Congress Whig.

Whale oil, 32 to 33 cents; sperm, $1.

Flour in New York $7 per barrel.

California.—Com Stockton has sailed for the United States via Panama. Commodore Shubrick is now commander-in-chief. A severe battle was fought between Americans and Californians, at the City of the Angels, on the 7th and 8th of January. It resulted in restoring peace to the country. The war is thought to be at an end. Ex-consul Larkin and Lieutenant Bartlett were restored. It is reported that a territorial government will soon be organized. Col. Fremont is contemplated as governor. The U. S. S. Savannah left San Francisco for home, Feb. 13, via Monterey and Valparaiso. Trade is brisk, but the country very unsettled. The Independence is now the flag-ship of the station.

The emigrants have experienced almost incredible suffering in the mountains.

Oregon.—News has been received from Oregon up to Dec. 10th. We would acknowledge a file of the "Spectator" up to that date. The Americans were overjoyed at the news of the settlement of the boundary line. It gives satisfaction. The people were anxiously waiting for official intelligence from Washington. The legislature had met, but no business of importance was transacted on account of the uncertainty of events, respecting the U. S. government. The Governor's message is published in the Spectator of Dec. 10th. It occupies the first page. In addition to numerous topics, it refers to that of making and vending ardent spirits. He alludes to the fact that some evil-minded persons have been engaged in the nefarious business, yet the following is the encouraging language of His Excellency:

"We have as a community taken a high stand in the cause of temperance; among

our earliest efforts may be found the abolishing of ardent spirits from our land; and to this in a great measure, may be attributed our peace and prosperity. No new country can be pointed out where so much harmony prevailed in its first settlement, as in this. Laws we had none; yet all things went on quietly and prosperously. I have no doubt if ardent spirits is kept within its proper limits, we shall continue to prosper. It is said by some that we have no right to say what a man shall make, or what he shall not make. Yet we find in all large cities, that certain manufactories are forbidden to be carried on within the limits of the city, because they annoy the inhabitants, and hence are declared to be public nuisances, and by law are compelled to be removed; and if the city increases and extends to the place where they are located, they are removed again. Intoxicating drink is an enormous public injury and private wrong; its effects in every way, shape and form, are evil, and therefore should be restrained within proper limits by law."

See in another column remarks upon the navigation of the Columbia River.

Russia.—The Journal of Debates publishes a letter from St. Petersburgh of the 22nd ult., which states that the Emperor had commanded that all foreign Jews, even those of Poland, who are at present in Russia, should quit the Russian territory within three months should they even be established and possess landed property in the country. In future no foreign Israelite is to be permitted to reside in Russia without a special permission from the government.—*Am. paper.*

Turkey.—A most violent religious persecution is going forward at Constantinople against the Evangelical party in the Armenian Church. We copy the following from a communication signed by all the members of the American Mission in that city :

"The Patriarch holds up the terror of anathema to every one however near of kin to the persecuted who buys from or sells to, or refuses to join in bringing calamities on these pious men. Calumnies are circulated in high places as to the nature of this religious movement. The moneyed influence of Constantinople, which is chiefly in the hands of the Armenian bankers, is brought to bear with fearful effect, in preventing any persons high or low, civil officers, merchants, shopkeepers or householders from relieving or sustaining the persecuted. They are driven out of houses owned by themselves or held for a term by contract; they are spoiled of their goods, all but one of their shops in the city having been forcibly shut, many have been iniquitously deprived of their trade licenses and four are contemptuously and cruelly confined in a foul prison. They are prosecuted for debts never contracted or not yet due, and are impotent to secure their own debts by the arm of the law. Their houses are mobbed and stoned, and it has become impossible for them to walk in safety in many parts of the city. And the thousands who sympathize with them in their distresses are deterred by threats of similar injuries from becoming their sureties or testifying to the truth in their behalf. And to crown all, they are threatened with exile.

"The number who have been made to suffer in consequence of these persecutions is probably several hundreds including families. And the number who have felt themselves obliged to succumb to the demands of the ecclesiastics, to keep their families from starving is not a few, yet we rejoice to state that with three or four exceptions, all those who had given us evidence of sincere piety, have shown great firmness of faith, cheerfully suffering persecution for Christ's sake. They are chiefly men of the middle walks of life, who were in comfortable business and are of solid and sober character.

"We believe that they are thus entitled, and that they will find all needed aid. And therefore we have actually taken upon ourselves the responsibility of receiving in the name of Christ one or two hundred persons thrown by oppression upon the wide world without the right to work for their own support, and of providing them for the present with food and shelter at the charge of the universal church of Christ, persuaded that this is what all the friends of the rights of conscience would expect and demand at our hands. And we shall not cease this necessary provision for them, till we see from the want of the supply of funds, that there are none who care for the interests of the truth here."

Fernando Po.—The Spanish authorities have ordered the Baptist missionaries to leave the country immediately, assigning as a reason that the Catholic faith can allow no other sect to exist within its jurisdiction.

☞ Some days since we heard some complaint on the part of captain's and seamen from Maui, that due respect had not been shown to the remains of two seamen who had died at the hospital. We were determined to learn the truth of the matter and wrote the Rev. Mr. Forbes upon the subject. We have received from him, as well as from the Rev. Mr. Baldwin, a detailed account of the circumstances. Their communications can be seen by any one who takes sufficient interest in the subject to call at the chaplain's study. Did we deem such foolish and ill founded complaints worthy of a moment's serious consideration, we would publish the communications referred to. It is insufferably mean and grossly unkind, to catch a stranger's ears and fill them with foolish and slanderous reports about missionaries or any body else.

We would merely add, that in regard to the burial of one seaman, the Rev. Mr. Forbes (acting chaplain) was unable to attend on account of lameness, while the Rev. Mr. Baldwin would, had it not been for a partial misunderstanding about the hour appointed, although it would have subjected him to serious inconvenience in consequence of previous engagements. No request was made upon other Protestant missionaries in the vicinity. In regard to the burial of the other seaman, we quote some remarks from the communication of the Rev. Mr. Baldwin :—"The second affair was an outrage committed against the dead, by whom I will not say—by any and all who may have agreed to bury a poor Scotch sailor, without calling on any Protestant missionary, when five such were within 20 minute's walk of the hospital. Nobody supposes that brother Forbes or myself had any thing to do with this. They only sent for a Popish priest, and he was out of town. Any thing else you may wish to hear of these concerns, which I or brother F. can explain, you shall have."

☞ J. F. B. Marshall, Esq., President of the Oahu Temperance Society, delivered the first of a series of monthly lectures before the Society, on Friday, the 6th instant. We are alone prevented from presenting our readers with an abstract of the lecture, by the expectation of publishing it entire in our next number. His subject was the "Importance of a correct public opinion." The next in the series of lectures will be delivered by J. R. Jasper, Esq., Vice President of the Society, on the first Friday evening of the coming month.

Father Mathew.—The Cork Examiner says Father Mathew still perseveres in his work, declaring that the few cases of backsliders which have come to light may be clearly traced to the very great temptations which have been presented by the dealers in strong drink, or by persons who employed strong drink as the instrument for effecting some nefarious purpose. He still numbers more than *five millions* of consistent teetotalers. A distinguished writer gravely questions, whether there are any backsliders, except such as habitually use tobacco.

Mouth of Columbia River.

So much has been said prejudicial to the entrance of our great river—the necessary labor magnified into dangers, and every accident that happens in its vicinity taken as proof positive of its difficult and hazardous character, that we are at length compelled to say something upon the subject—to tell the truth, to speak it plainly, boldly, and in a manner that will silence opposition; and more particularly are we induced to this course, by seeing in the marine news of the Polynesian of October 10th, a report by Capt. Parsons of the ship Mariposa, that "the Mariposa struck several times on the bar, in coming out of the Columbia River." We must very bluntly tell Capt. Parsons that his ship was not in the channel if she "struck several times on the bar," or if she was she must draw an immense quantity of water, as there is at any stage of the tide *full five fathoms of water in the channel.*

Two U. S. vessels of war have been wrecked at the mouth of the Columbia, and many years ago a ship belonging to the Hudson's Bay Company. This is the foundation of the prejudices against the entrance of this river. It is taken for granted that the entrance must be a bad one, and the falsehood has been spread abroad to the terror of numerous sea captains, and to such an extent that a whaleman would rather be wrecked outside than venture in. Now we say that the mouth of the Columbia is as good a mouth as any river can boast, and the entrance as convenient and safe if proper prudence is only exercised in undertaking it. The channel may at first appear intricate, but it is broad and plain if the necessary means are taken to become acquainted with it. In proof of this, we have but to state the fact, that Captain Crosby of the bark Toulon, readily acquainted himself with this channel; that upon the strength of this acquaintanceship, he piloted the Mariposa in at night and anchored her safely in Baker's Bay—that as commander of the Toulon, he went out of the river on his last trip to the islands, with the wind dead ahead—beating out—making tack for tack, and in four tacks from the bay was at sea. We would likewise state the fact that the Toulon came in this last time by the lead, without her commander seeing the land until he had made the cape at the mouth, as there was a heavy fog prevailing at the time.

Let no one say, much less believe, after this, that the Columbia is a bad and dangerous river to enter; facts, and the master spirit of experience, declare to the contrary. We may safely assert, that our river affords a better harbor than most others, and this harbor may be found at the head of Tongue point. Our great channel of inland communication, the magnificent Columbia, which year upon year, must become better appreciated and infinitely more valuable, we cannot calmly hear underrated and abused, much less its advantages denied and its availibility called in question, and upon this ground we take issue and pledge ourself at all times to stand up for the utility and gloriousness of nature's grand design, in cutting through stupendous mountains a course for this mighty river, that opens us a communication with the valley of the Mississippi, and the enterprising marts of the Atlantic sea board.—*Oregon Spectator, Dec.* 10.

Items from late Papers.

New Shoal.—The following is a description of a shoal fallen in with by the ship Ianthe, of Salem, on the passage from New Zealand to Manilla, and not laid down in any chart at the present time This shoal is directly in the way of whale ships and other vessels bound to the islands in the Pacific.

"On the 9th of January, 1845, discovered a dangerous shoal near us—in all light sails and hauled close on the wind to the S. and W., passing over the eastern edge and within one or two ship's lengths of the shallowest part, which appeared to be of sharp rocks, not more than eight or ten feet under water—the water very much discolored, of a milky whiteness. The coral branches could be very distinctly seen under the bottom, soundings not exceeding, probably six to eight fathoms. The shoal appeared to extend from S. by E. to N. by W., about half a mile. By means of two chronometers that varied but little from the time of leaving Auckland, a period of 45 days, we placed the shoal in long. 145 deg., 39 min. east, and by a good meridian observation, in lat. 5 deg. 53 min. north—the nearest land, at the time, being the Caroline Islands, about eighty-five miles distant."—*Salem Register.*

Prohibition of Horse Racing.—We learn from the Newark Advertiser, that a bill passed the Legislature of New Jersey to prohibit horse racing—by just the constitutional number of votes—not one to spare.—Racing for money, or where twenty or more people are assembled, is declared to be an offence, and all persons concerned, directly or indirectly giving notice of it, advertising, &c., to be guilty of a misdemeanor, and punishable by $1000, fine or imprisonment not exceeding one year.

Literary Missionary.—Fanny Forester, (Miss Chubbuck,) the popular magazine writer, it is said in a Philadelphia letter to the Journal of Commerce, is to be marrid to Rev. Mr. Judson, and will accompany him on his missionary labors in India. She will carry with her, it is added, the high devotion which a former one of the name exhibited, who followed the missionary fortunes of her husband in the East.

A Short Name.—The newly born fourth daughter of the Queen of Portugal was baptized on the 22d ult., in the chapel of the palace at Berlin, by the Cardinale Patriarche of Lisbon. The little princess received the names of "Antonia Maria Fernanda Michela Gabriela Rafaela de Asis Gonxaga Silveria Julia Augusta de Braganza e Bourbon-Sajonia, Coburg-Gotha."

Elements of British Legislation.—In the British House of Commons there are two Admirals, 1 General, 1 Lieutenant General, 7 Major Generals, 22 Colonels, 32 Lieutenant Colonels, 7 Majors, 67 Captains of the army and navy, 12 Lieutenants and 2 Cornets, making a total of 153 legislators interested in the consumption of gunpowder.

The Missing Tahiti Schooner.

In the Friend of Dec. 15, it was stated that a schooner left the Society Islands, Oct. 2d, for Honolulu, via Raiatea. She was owned by a Mr. Tibbetts, who was coming here with his family. Several passengers were on board, and among them some merchant Catholic priests. The vessel has been supposed to be lost, but Capt. Parker, of the "Elizabeth Starbuck," reports her having touched at Upolu, one of the Navigator Islands, under most distressing circumstances. It appears that she came north, into the vicinity of the Sandwich group, as was supposed, and after a fruitless attempt to find any of the islands, sailed for the south and fell in with the Navigator's group. She went into Apia on the island of Upolu. The schooner's company was in almost a starving condition. After the vessel was refitted by Mr. Pritchard, the English Consul, with rigging, sails, provisions and water, she made the second attempt, having secured, as was supposed, the services of an experienced navigator. She left Upolu on or about Jan. 1847. Capt. Parker confidently expected to have found her in this port. He left there the 5th of February, making the passage direct. The schooner must now have been out more than two months. Serious fears are now entertained that she must eventually have been lost, or else, that she is still searching, in vain, for the islands.

☞ N. B. The above mentioned vessel arrived this morning; heard no particulars.

☞ Terms of Yearly Advertising in the Friend.—One column, $40,00; half a column, $20,00; business card, $6,00.—Merchants will find our columns a convenient medium for circulating information among the seafaring community.

GREAT-TEMPERANCE CELEBRATION.— We extract the following from Elele of March 6:

This Temperance festival was held at Hauula, Koolau, on the 30th of January last. Great preparations were made on the part of parents to unite with their children and teachers, in this celebration. The day was fine, and the guests were seated in the open air; with long tables spread upon the grass, with curtain coverings over-head.

The number of guests was 1550; of these, 470 were children.

Of tables, there were 77; chairs, 137; plates, 277; bowls, 134; knives, 236; forks, 187; spoons, 186; tumblers, 264.

The money paid out in preparation exceeded $500, besides new articles of dress for parents and children.

The number of horses assembled on the occasion, was 256. On the Sabbath preceding the celebration the word of God was preached in the open air, because the crowd of people could not get into the meeting house.

Then followed the examination of schools; at which were present, 509 scholars. Readers of the Bible, 347. Catholic schools were also examined, present 152 scholars.

Mr. Emerson, the writer, remarks that there has been an advance in the qualifications of teachers in Koolau, that the number of scholars had increased since August, 103; that the people of Koolau are by no means destitute of resources, having expended perhaps more than $1,000 on this celebration.

DIED.

At Hilo, Hawaii, Feb. 18, MRS. MARY PARIS, wife of Rev. John D. Paris, of the American Mission.

At the early age of 13 years, Mrs. P.—then Miss Mary Grant—considered herself the subject of renewing grace, and her joy and peace in believing, her steadfastness in the service of Christ and her delight in the sacred Scriptures remained uninterrupted till the day of her departure. Her illness was long and painful—often agonizing—but she bore all with christian fortitude, and calmly and joyfully waited for the coming of her Lord. She had no fear of death—saw no "dark valley," and felt no "cold sullen stream." The road was open and smooth and all bright with heavenly radiance. Her faith looked to her living Redeemer and saw him coming to receive her according to his promise—John 14, 3. Death had no sting for her—the grave no victory over her. She desired to depart to be with Christ. Her desires are granted; she rests from her toils, from pain and sin; she sleeps in Jesus; she is not dead, but sleepeth.

"'Tis the survivor dies."

On the afternoon of the 19th, the funeral was attended at the native church, and a large procession, consisting of the mission families, foreign residents, native schools, and the inhabitants of Hilo, followed the remains to the grave and joined in the solemn obsequies.

"Blessed are the dead that die in the Lord." T. C.

At the U. S. Hospital, Lahaina, Feb. 3, CHARLES LOPER, aged 22, of ship Columbia, of Sag Harbor.

Feb 4, JAMES HILL, of Leith, Scotland, aged 22.

PASSENGERS.

Per schooner Currency Lass—Messrs. E. L. Gray, Hays, F. G. Blume, Eli Jones, McTavish, and Shelly.

In the Gen. Kearney, for San Francisco—Messrs. H. Rhodes, L. C. Gray, F. G. Blume, G. Kenway and P. B. Shelly.

In the Com. Shubrick, for San Francisco—Mr. C. F. Hoben, of New York.

In the Currency Lass, for San Francisco—Messrs. A. Johnstone, Hay, B. Stark and J. Booth.

In the Francisca from California—Messrs. H. Grimes, R. T. Ridley, P. Brothers, Charles Nelson,

MARINE INTELLIGENCE.

PORT OF HONOLULU.

ARRIVED.

March 2.—Fr whale ship Gange, Villiers, and sailed same day to cruise.

4.—Fr schr Currency Lass, McLean, 15 days from San Francisco.

March 6.—Am whale ship Magnolia, Simmons, New Bedford, 20 months, 450 sperm, 1350 whale, 25 sperm and 280 bls. elephant oil this season.

8.—Brem ship Europa, Curn, of Bremen, from Maui, and sailed next day.

11.—Am. schr Santa Cruz, 27 days from Cape St Lucas.

March 13.—Am. brig Francisca, Lemoine, 17 days from Santa Barbara, bringing the mail of the U. S. frigate Independence.

In offling, Am. whale ship Edward Carey, Sayer, from Maui, and sailed the 12th.

SAILED.

March 3.—Am whale ship Parachute, Devol, New Bedford, to cruise.

Am whale ship Saratoga, Smith, New Bedford, to cruise.

Am whale ship Wm. Penn, Wimpenny Falmouth, to cruise.

March 10.—Schr Gen. Kearney, (late Hookaika) for San Francisco.

11.—Cavalier, Merchant, Stonington, to cruise.

Minerva, Smalley, New Bedford, to cruise.

Bark Hamilton, Babcock, Sag Harbor, to cruise.

Averik Henekin, Rouseville, to cruise.

Schr Com. Shubrick, (late Victoria) Von Pfiister, for San Francisco.

12.—Elbe, Neil, Hamburg, to cruise.

South Boston, Hoxie, Fair Haven, to cruise.

Schr Currency Lass, McLane, for San Francisco.

MEMORANDA.

The Mount Vernon, Capt. Given, sailed from New York September 26th, with naval stores for San Francisco and this place.

The Montreal, advertised to sail Nov. 5th, for this place direct, had not left Nov. 10th.

The Brutus was to leave New York Nov. 15th, with troops for California.

The bark Whiton was advertised to leave New York Nov. 15th, for California.

Arrived at San Francisco Jan. 27th, Am bark Toulon, Crosby, 9 days from Columbia River, with a cargo of 1250 bbls. flour, lumber, &c.; sold and returned to the River for another cargo.

The Haw. bark Don Quixote, Paty, hence, arrived at San Francisco in 17 days.

The brig Elizabeth of Salem, King, arrived at Monterey June 20th, from San Francisco.

The brig Euphemia, may be expected here shortly from the coast.

A passenger in the Currency Lass, reports the arrival of the Loochoo and Susan Drew, with troops on the coast. News of their arrival came by a messenger from Monterey, which arrived at San Francisco just before the Currency Lass left.

ADDRESS

Delivered before the Oahu Temperance Society,

BY J. F. B. MARSHALL.

In coming before you this evening as a Lecturer, I am assuming what is to me an entirely novel character—a character which neither my judgment or my experience give me any reason to hope that I shall succeed in maintaining either with credit to myself or advantage to you.

I shall, however, offer no other apology for attempting to comply with your wishes, than an earnest desire for the prosperity of this Society and the progress of those great principles of temperance upon which it is founded. There are, I feel confident, many members of this Society who are capable of imparting to us, by their lectures, both entertainment and instruction; but who, having never attempted to exert this power, are ignorant that they possess it, and would therefore in their modesty, gladly follow the example set by me as President, were I now to decline the call with which you have honored me. I therefore feel it my duty to make the attempt to contribute to your entertainment, confident that whether I succeed or fail in the endeavor, my motives will be fully understood and appreciated by you.

In this isolated community we cannot avail ourselves of the means of intellectual entertainment and improvement afforded by the lectures of scientific and learned professors. We have here, no lyceums or literary associations, where we might occasionally spend an evening with gratification and instruction. We must endeavor therefore, in order to keep pace in some degree with the progress of the age, to supply this want by such means as are within our reach. The chief of these means are books, and we cannot too highly appreciate the blessing which we enjoy in having within our reach this means of self-improvement and intellectual enjoyment. In the words of Channing, "God be thanked for books. They are the voices of the distant and the dead, and make us heirs of the spiritual life of past ages. Books are the true levellers. They give to all who will faithfully use them, the society, the spiritual presence of the best and greatest of our race. No matter how poor I am—no matter though the prosperous of my own time will not enter my obscure dwelling. If the sacred writers will enter and take up their abode under my roof, if Milton will cross my threshhold to sing to me of Paradise and Shakspeare, to open to me the worlds of imagination and the workings of the human heart, and Franklin to enrich me with his practical wisdom, I shall not pine for want of intellectual companionship, and I may become a cultivated man though excluded from what is called the best society in the place where I live." But besides the aid received from books, we can do much by our mutual exertions, to contribute to each other's gratification. We are not all of us able to obtain books here, and it is still more difficult for us to get books of the right sort. Many of us too, after a day of toil, find it hard to confine our attention to a book, and get drowsy and listless; though this is a difficulty that may be almost always overcome by perseverance. We can, however, at such meetings as these, do something towards entertaining and instructing each other by our debates and lectures, however humble our efforts; and though most of us are more familiar with the contents of our *tool-chests* or *invoices* than we are with the contents of our *brains*, though we are more used to handling the *hammer* or the *yard-stick* than we are to handling *ideas*, yet we may find on investigation that we have much in our brains that we were not aware of; much that is capable, by proper culture and development, of being made subservient not only to our own gratification and improvement, but also to that of our friends.

With these views, I have thought that our time this evening would not be unprofitably occupied in considering the subject of the importance of a correct standard of Public Opinion.

Public opinion, in its influence and effects upon society is an all powerful principle. Few can resist its mighty influence, or prevent themselves from being carried along by its sweeping current. Sometimes that current is setting in the same direction towards which our own thoughts and feelings tend, and we willingly avail ourselves of its aid, and are borne along on its rolling tide. At other times we are hurried down its rapid stream, in a direction contrary to our wishes and judgment, and in spite of our endeavors to stem its almost resistless current. No barriers will serve to stay its course. Its stream cannot be dammed up by human means. We may give to its mighty current a different direction, if we use proper measures, but we cannot check its progress, or destroy its power.

What then is this mighty engine public opinion? whose iron sceptre is stretched over every community, and whose commanding voice has for ages made itself heard and obeyed in every society and by all ranks and conditions; now making the palaces of the great and the noble ring with its echoes, causing the monarch who had bent thousands to his will, to tremble and obey the stern behests of a mightier power than his, and now summoning the peasant from his fields with an authority whose mandates he dares not disobey.

What are the materials which compose this powerful element in society? How are its mighty operations conducted? What is our share in producing it, and what are our individual duties and responsibilities in regard to it? I propose to glance at these topics, more in the hope of drawing your attention to them, so far as they relate to the state of public opinion in this community, and thus leading each one of us to consider what his own duties are in regard to it, than with the expectation of being able clearly to point out those duties myself.

Public opinion then, is the general voice of a community in regard to the subjects which agitate or interest it. The popular sentiment of the mass; the standard by which the majority of men measure their own acts and govern their own conduct, without looking further for any deeper motive or principle. It follows in the track of civilization, knowledge and refinement, sometimes indeed afar off, and at others, almost keeping pace with their progress, but never overtaking or outstripping them. Sometimes public opinion in regard to any particular subject seems but another term for popular prejudice, keeping the minds of men enslaved for years in regard to it; while again it seems to be the voice of "the Divinity that stirs within us," as it displays itself in some moral revolution. which as it were in a moment scatters an error that has been cherished for centuries. The progress of public opinion is always onward. It may move with a slow pace, or it may seem to stand still for centuries, but when it does take a step, that step is always onward, and in the right direction. Like revolutions, it never goes backward. History amply proves this.

Every change of public opinion in regard to any great subject, from the earliest ages down to the present time, has been progressive, and towards perfection. It may cherish prejudices and vital errors long after reason or science has declared them to be such, but when it does take a step in regard to them, it is always towards the truth. Take for instance, the subject of intemperance, and look at the changes of public opinion in regard to it. Those changes have been more marked during the last century because the subject had not been considered of importance enough to occupy the public mind, until within a comparatively short period. Every one had witnessed the evils which intemperance was causing around him, but it was looked upon as an evil for which there was no remedy; as a private matter, with which the public mind had nothing to do. People would as soon have thought of trying to put a stop to eating, on account of the excesses of the glutton, as of endeavoring to prevent habits of drinking, on account of the practices of the drunkard. The public mind had never been given to the subject. The use of intoxicating liquors as a beverage, was universally supposed to be, if not a necessary, at least a harmless practice and an innocent enjoyment of which a man would be foolish indeed to deprive himself, or wish to deprive his neighbor, simply because a few silly fellows indulged in the practice to excess, and injured or ruined themselves by so doing. The moderate drinker as he returned from the ale or club house where he had been having a few hours of quiet enjoyment, and had perhaps taken as much as he could carry off comfortably, would pass by the miserable inebriate in the gutter, and wonder that a man should so degrade himself below the brute. While he, in his turn too, as years passed on, might be perhaps found in the same gutter, and be moralized over in like manner by others, who were unconscious that they too, were fast following his footsteps. The drunkard's wife, while suffering from the absence or neglect of him who had vowed to cherish her, would quiet her crying babe with the soothing draught of sweetened gin and water, while at the same moment perhaps she would* at last force on him the bitter conviction that resolutions were of no avail, and without further struggle, he would resign himself to his fate. Public opinion looked on the miserable victim with pity or contempt, but while it loudly deplored or condemned the end, it had openly sanctioned the means. Public opinion had stood quietly by, and seen the combustibles collected and the torch applied, and had looked on approvingly; but when the wide spread conflagration had scattered ruin around, when the stately edifice had been reduced to a heap of ashes, then was its voice loud in condemnation and regret. But when the evils of intemperance became too prominent to remain longer unnoticed, when the prosperity and happiness of whole communities was threatened, and the seeds of wretchedness and ruin, sown broad cast over the land by its evil influences, were springing up in every direction, threatening destruction to the fruits of industry and enterprise, laying waste the finest genius and depriving the talented and intellectual of the rich endowments with which God had blessed them, then public opinion began to awake to the magnitude of the evil, and the results are daily becoming apparent. Good men in all communities, who had the well being of their fellow men at heart, began to take hold of the subject; to measure the extent of the evil, and to cast about for a remedy. They found that they had for ages been endeavoring to heal a wound by outward applications, while the thorn which occasioned it was still left in the flesh, without any effort being made to extract it. Physicians gave their attention to the subject; and they ascertained by careful and thorough investigation, that the use of intoxicating liquors so far from being necessary, or even an innocent practice, was not only dangerous but absolutely pernicious. That its effects upon the system when used habitually, however moderately, were highly injurious, and only evil continually. Total abstinence was found to be not only practicable for the moderate drinker, but also for the habitually intemperate; and indeed the only sure remedy that could be devised for staying the progress of intemperance, and rescuing millions from ruin. Public opinion responded to these appeals to reason and humanity, and the cause of temperance has since steadily progressed, saving and redeeming multitudes who were fast destroying themselves, and bringing to their abodes happiness and prosperity in the place of wretchedness and ruin. This has been the progress of public opinion in this matter, and were we to trace out its course in regard to other important subjects, we should find that on all of them, its changes have been always for the better.

Public opinion then has a most important bearing and influence upon society. It forms its tone; its views are in general the laws by which society is governed. The majority of men are willing to govern their actions by its requirements. So long as we conduct ourselves in any community in such a manner that the popular sentiment of that community is not shocked or opposed, so long as public opinion looks on our course approvingly we are too apt to remain satisfied, and to look no further or deeper for our principles of action. We are but too willing to do as other people do. We do not wish to be any better or wiser than our neighbors, and if our course of conduct is satisfactory to them, why should we look farther. This is too often the reasoning of the mass. How many there are in every community who are only restrained in their habits and indulgences by the voice of public opinion—who are moral and honest men only so far as public opinion in the society in which they move, places restraints on dishonesty and immorality. How many there are who are only restrained from plunging into intemperate and dissipated habits, because the public opinion of the community in which they live discountenances dissipation and intemperance. Men whom no sense of honor, no motives of religion, no remonstrances of conscience could affect, are yet brought under the mighty influence of public opinion, and made to conform in their habits and actions to its salutary laws. It is true, that we are all of us but too apt to ask ourselves when we are meditating any action, what will others think of us, rather than what shall we think of ourselves. What says the voice of public opinion, rather than what says the still small voice of conscience. Even with good and pious men this is sometimes the case from neglecting to examine for themselves into the nature of views and opinions which have long had the sanction of public sentiment. They adopt them without inquiring further than to know that such views have been held by other good men, and they do not doubt their propriety. Look at the history of the christian church, and you will find that the most cruel and unrelenting persecutions have been fomented and encouraged by men who were evidently sincere in their attachment to what they considered the cause of Christ; whose motives were good and who thought that in aiding to root out heresies from the land, in looking on with approbation at the tortures inflicted upon the victims of their zeal and fanaticism, and in piling the faggots round the stake of the martyr, they were really doing God service. History is full of such instances, where the grossest cruelties have been inflicted with the sanction of men whose sincerity in what they supposed to be the cause of christian truth cannot be doubted, and who, were they living in this enlightened age, would look back with shuddering horror on the atrocities which had been committed in the name of religion. These things, thank God, are at an end. An enlightened public opinion no longer permits such a manifest perver-

* See page 54 of Friend.

sion of the precepts of that religion whose founder submitted to an ignominious death at the hands of his enemies, rather than to use force to propagate his divine doctrines. But even now, we see religious zeal, or rather sectarian prejudice, inducing men, who in other respects are really good and sincere christians, to inflict on their fellow men, simply on account of conscientious differences in their religious opinions, moral persecutions and proscriptions, which may be as hard to bear, and as cruel in reality, as the more bloody persecutions of olden times. Even in *this* enlightened age we may see men whose lives and conduct are irreproachable, who endeavor to be sincere and humble followers of Christ, and to govern their conduct by his precepts, who take the Bible as their guide, and conscientiously endeavor to obey its dictates, shut out from all religious sympathy and communication with professing christians in the community in which their lot may be cast, only because they cannot conscientiously subscribe to all the articles of a creed which is of *man's invention*, and liable like all his works, to *errors* and *imperfections*. Good men, who are themselves sincere and pious followers of the Saviour, are yet so under the influence of long cherished opinions and the popular prejudices of their sects as to exclude their fellow man from the church, from any participation in the christian privileges which they enjoy, and from a seat at the communion table of their common Lord and even to deny him the name of a christian,—forgetting the command of Christ himself, "Judge not lest ye be judged,"—and this, not because his life is not that of a christian, but simply because his conscience will not allow him to consider a creed framed by man, to be of equal or greater authority than the inspired Word of God. Thus discouraging him in his efforts to walk in the straight and narrow road, by denying him the kind words and sympathies of his fellow christians, and making that road still narrower and more difficult to him, instead of extending to him that charity and love which the Saviour expressly commands us all to exhibit to our neighbors. This species of persecution, I repeat, is too common even at the present day, and among good men; and when the lapse of time shall have scattered the errors and prejudices of this age, when the cause of truth and true christianity shall have advanced, bringing the voice of public opinion along with it, christians of every sect will look back upon the sectarian prejudices and exclusiveness which are cherished by christians at the present day, with very much the same feelings and reflections as those with which we now look on the religious persecutions and horrors of the 16th century. But it is not my purpose to dwell on this topic. I have alluded to it, to show the power of public opinion, and that under its sanction, good men have committed errors which equally good men have afterwards loudly condemned.

If such be the power and influence of public opinion, if to the majority of minds its voice is more attentively listened to, and more implicitly obeyed than the voice of reason or conscience, if such is its mighty influence upon society how vitally important is it that a correct tone should be given to it. How essential to the well being of every community, to its progress and improvement in civilization and refinement that a high and correct standard of public opinion should be maintained. If it is the governing principle of the majority, how important is it that it should be a noble and lofty principle. And how incumbent is it upon every member of society to exert all his influence to give to public opinion a healthy and proper tone—a correct standard. And in this community especially, surrounded as we are by the relics of heathenism and barbarism among a people who but a quarter of a century since were sunk in savage degradation and ignorance, how great are our moral obligations to maintain among ourselves at least, those principles of morality, honesty and virtue, which govern the communities which we have left. We have voluntarily exiled ourselves from home and country, and those homes and countries the most enlightened and refined on earth, and have for a time cut ourselves off from many aids to virtue and to moral and intellectual improvement, and planted ourselves here, surrounded by ignorance and vice. Some of us have done this to benefit ourselves either in body or estate; and some, actuated by higher impulses, have done it in the hope of benefiting others. But most of us hope at some future day to return to our native homes, and settle among our kindred and friends; and we hope too to return with the same feelings of attachment to home, to the customs and institutions of our native lands, and the society of those friends to whom we are united by ties of kindred or affection that we entertained when we left them. This we all anticipate, and I trust that we may not be disappointed. But in order that we may accomplish this desirable result, we must *guard well our actions* and *conduct while here*. We must be constantly on the watch lest we gradually lose those views and feelings with which we left home, and acquire almost unconsciously habits and ideas here, which will unfit us for enjoying the society of our friends and the customs and institutions of our native land. We must be on our guard against allowing ourselves to conform in our conduct to the standard of public opinion as it exists here, where it is lower than at home. But we ought rather to endeavor to elevate that standard to the same height that it maintains in our native country. We must do this, not only for our own individual safety and happiness, but also for the sake of the whole community. And we must not only endeavor to do this, but also to keep pace with the progress of the age, or when we return home, we shall find ourselves far behind it. But how little has this been done. How very far are we now, in this community, behind the age in the standard of character and morals which has been maintained here. Public opinion in the foreign community here, has to be sure, advanced with rapid strides within a few years past; but it is still far below what it should be. Far below that of the society in which we were brought up. A laxity of morals and manners has prevailed here, and still prevails, which we ought no longer to wink at, if we wish to remain uncontaminated and uncorrupted by its influence, or to return home with the wish or ability to maintain the standing in society which we occupied when we left it. We must no longer be satisfied to do all that public opinion requires of us; we must not allow its dictates to usurp the authority of conscience in prescribing to us our rule of conduct, while we live here. If public opinion is faulty or lax in its laws, let us not bring on our own heads the responsibility of its errors. This great responsibility, however, will be ours, unless we do all in our power, both by precept and example, to elevate its tone. Every man in this community has some influence on the state of public opinion. No matter how little, still it is something. Every man has some share in forming public opinion; and if he does not exert that influence in endeavoring to reform its errors, to promote and elevate its standard, just in proportion to the extent of his influence will be the measure of his responsibility; and he cannot escape from that responsibility so long as he neglects or is insensible to his duties in this respect.

Every man, I repeat, has some influence over the standard of public opinion. Every member of this society when he signs that pledge throws the weight of his influence into the scale of public opinion in favor of the cause of temperance; and, aside from the good which he does to himself by so doing, he does a good deed to his fellow man, which will be a constant source of pleasing reflection to him. The influence of a society like this on the public opinion of the community is almost incalculable. Every member of it so long as he remains true to his plighted word and honor,

even though he may apparently have been in no danger himself, when he signed the pledge, can yet go abroad in the community with the cheering conviction that in this respect at least, he is *doing good*, and what reflection affords more real gratification than this. It is a thought that will console him in the heaviest troubles of life, and cheer and comfort him in the hour of death. A society like this, even though it should fail to draw within its saving and healthful influence a single inebriate, will yet be the means of preventing many men from becoming such. I have known men who came out to these islands sober, steady and industrious, of good though not sufficiently fixed principle, and who, had they found a healthy state of public opinion to sustain them in the character with which they landed, would undoubtedly have continued sober and industrious. But finding themselves surrounded by temptations to dissipation on every side, and no counteracting influences to recall them to virtue and industry, have gradually yielded to those temptations, until, before they themselves were aware, the habit had obtained the mastery over them, and they were branded as drunkards. Public opinion then, when it was too late, denounced them, and they found themselves despised and shunned by the very men who had quietly looked on and seen them every day sinking, without making any effort to save them from ruin. These men would undoubtedly have been saved, had a society like this existed on their arrival, where they could have found the friends of the cause and of humanity, united to cheer and encourage them in their endeavors to resist temptation. And this is as true of the great virtues of morality and honesty, as of temperance. Let public opinion no longer be silent or undecided in regard to these great subjects. Let *this* safeguard at least be thrown round the tempted, and this restraint around the depraved, that the popular voice of society condemns their course, and frowns sternly on immorality and dishonesty; and the only way for public opinion to take this stand is first for those who compose or control it to do it. Let none of us shrink from expressing our conscientious, honest convictions on any subject, merely because those convictions are opposed to the views or the habits of the majority, or to the popular sentiment of the community. Unless we do speak out those convictions the popular sentiment will never be changed, but with a firm and free expression of opinions, if those opinions are founded in truth, public opinion will sooner or later adopt them as its own; for truth is mighty and will prevail. In the words of an eloquent writer, "Would that the world were changed we say; but how is it to be changed? Would that the evils and vices of society were done away; but how are they to be done away? Whence is the power to come? I answer. One fearless voice—that of Luther—broke up the spiritual despotism of centuries. One fearless voice in England—that of Hampden—shook the throne of corruption to its base. Any one human arm, lifted up in indignant rebuke, is clothed by the power of God, with all-conquering might. The popular mind ever wants leaders. The people want that some one should interpret the voice that is in them—should speak the commanding word that marshals the hosts of society to the work of reform.

"I am not now advocating any particular opinions. I am only advocating a manly freedom in the expression of those opinions which a man does entertain; and if those opinions are unpopular, I hold that there is so much the more need of an open and independent expression of them. What is ever to correct the faults of society, if nobody lifts his voice against them; if everybody goes on openly doing what everybody privately condemns; if all shrink behind the faint hearted apology, that it would be over bold in them to attempt any reform. Let the ministers at God's altar, let the guardians of the press, let all sober and thinking men, speak the thought that is in them. It is better to speak honest error, than to suppress conscious truth. Smothered error is more dangerous than that which flames and burns out. But why do I speak of danger. I know of but one thing safe in the universe, and that is, truth. And I know of but one way to truth for an individual mind, and that is, unfettered thought. And I know of but one path for the multitude to truth, and that is thought, freely expressed. Make of truth itself an altar of slavery, and guard it about with a mysterious shrine; bind thought as a victim upon it; and let the passions of the prejudiced multitude minister fuel; and you sacrifice on that accursed altar, the hopes of the world!"

I have already stated that the standard of public opinion among the foreigners on these islands, has advanced within a few years with rapid strides. Many who now hear me can bear personal testimony to the truth of this assertion. Scenes of dissipation and licentiousness have been enacted on these shores by foreigners from civilized and enlightened lands at which humanity and decency might well blush. Men who were of respectable standing at home, and who, when at home, conformed outwardly at least to the requirements of public opinion, here seemed to think themselves absolved from all allegiance to laws either of God or man, and rioted in the wanton violation of both. Such was the character of the place and the habits of but too many who visited it, that it became a proverb that "when men came out to the Sandwich Islands they left their consciences off Cape Horn." Even as late as nine years since, when I first contemplated a visit to these islands, I was implored by a lady who had but recently returned from here, broken hearted from the disappointment of her brightest hopes, to desist from my purpose. She had come out here with her husband, who was engaged in a prosperous and profitable business, her heart beating high with the hope of being a source of comfort to him while engaged in earning an honorable independence in these seas, and of returning after a few years of pleasant sojourn in this delightful climate, to enjoy again in comfort and affluence the society of her friends. But she was bitterly disappointed. Her husband had not sufficient firmness of principle to resist the allurements of what is so falsely called pleasure, and habits of dissipation and gambling had gradually wound their withering folds around him, and step by step had drawn him on to ruin, until at last, his substance wasted in riotous living, his business and character gone, his heartbroken wife had returned home to die among those friends, whom but a short time before, she had left with the confident hope of returning in comfort and happiness. It was but a few months before she died, that I left home, and she warned me most feelingly against the dangers of a place which she had had but too much reason to term "a sink of ruin." She said that if I were a son, she would rather see me in my grave than on my way out to this place. To her it had indeed been a sink of ruin. She left here universally pitied, esteemed and beloved by the community for her excellent qualities of mind and heart and her patient endurance of sufferings that might have bowed to the earth stronger frames than hers. But the community had silently permitted and sanctioned a state of public opinion that had offered no restraint upon those habits of dissipation which had so cruelly blasted her hopes. And still there were good men in this community, men who were endowed with noble qualities of heart and mind. But public opinion was suffered to remain at a standard so low, that those persons who made it their measure of duty, were obliged to fall to reach its level.

We have, however, much to do yet in elevating the standard of public opinion, and in encouraging more refined and elevated tastes, pursuits and pleasures. Look around us in this village, search out all the means and sources of amusement or

the occupation of our leisure hours, and what is their nature? Are they designed to contribute to the gratification of the animal, or the intellectual wants of man? Alas! I fear we should find it very difficult to point out many of the latter class. On every hand we may see a bowling alley, a billiard room, or an eating or drinking house, but in vain do we strain our eyes in the hope of finding some evidence that we are as carefully providing means for the gratification of the nobler part of our nature, the intellectual. In vain do we look for a public library or lecture room, a museum, or even a newspaper reading room. Not a building or an institution of this kind is to be seen. It is true, this is in a great measure owing to our position here, as a small community, thousands of miles from civilized countries, formed of individuals who have come here in search of health or property, and offering no attractions as a residence to the scientific and the learned, whose lectures or essays might entertain and instruct us. But this is an excuse that can only be offered in palliation for this apparent want of all external or public aids to intellectual improvement and entertainment. "These things ought not so to be." If we would restrain ourselves or our neighbors from too frequent attendance on unworthy, or expensive, or dangerous amusements, if we would elevate their tastes and induce them to attend less to the gratification of the *animal* passions and pleasures, and more to supplying the wants of our *intellectual* nature, we must place within their reach the *means* for gratifying those wants. The Sandwich Islands Institute, an institution that reflected great credit on its founders and members, should be revived and supported. *This* society should be warmly encouraged by every one who feels an interest in the welfare of his fellow man and in the development of those noble qualities of heart and intellect with which our Maker has endowed us.

Let us then no longer shut our eyes to our duties as intelligent, accountable beings, while in this quarter of the globe. Let it not be said of us, that when we come out into these soft climes and into these smooth seas we leave our consciences off Cape Horn. If we own no higher motive of action than the requirements of public opinion, if that is the power which at *home* induces us to act like moral and intelligent beings, let us raise at once the standard of public opinion here to the same commanding height; and when we have done this, if not before, let us look *higher*, and ask ourselves what our conscience and our God requires of us. Let us remember that we have no more right to stifle the voice of conscience here than at home. The dictates of the moral law are not to be violated here with impunity any more than at home. Let us remember that however distant we may be from the restraints which our own country or the presence of our friends imposes on our actions, however far beyond the reach of its censures or its praises we may consider ourselves, we are the same rational, accountable beings here as there, and however successfully we may stifle the voice of conscience, we cannot silence it forever. Let us not blind our eyes to our best and highest interests. Let us strive with all the powers that God has given us to acquire that honorable independence, for which we have placed ourselves in these scenes of trial. If we came out here to get riches, let us endeavor to do it, but let us do it *honorably*, or let us not do it at all. Wealth honestly and honorably acquired is a great blessing. I do not wish to depreciate its value. If a man acquire riches honorably he will hardly fail to use those riches honorably and usefully. But we must not forget that unless wealth is acquired by honorable means, unless in our exertions to acquire it, we have remembered our duties to ourselves and to our fellow men, and have constantly endeavored to promote the cause of truth, religion and morality, our riches can never afford us any real enjoyment, even in this world, and the recollection of our neglected duties will embitter the moment of our departure for another. No matter how successful we may be in our struggle for wealth; if in acquiring it, we have used dishonorable means, if we have defrauded the ignorant native, or imposed upon the credulity, or taken advantage of the necessity of our own countryman; if we have amassed wealth by spreading among these islanders the cup of ruin, if we have made gold our idol and sacrificed to it, the higher attributes of our nature, and our taste for pure pleasures and intellectual enjoyment, or if we have in our pursuit of pleasure and the gratification of our sensual passions forgotten the laws of morality and the laws of God; if we have done all these things or any of them; then we shall find that in coming ont to these distant shores, leaving friends, home and civilization behind us, in the hope of obtaining the means to purchase happiness, we have not got what we came for. In commercial language, we have not only lost our time, but we have made a very losing speculation. We have got wealth it is true, but having got it, we find it is not what we bargained for. We sought it and toiled early and late for it, only that we might with it purchase happiness. This was the only reason we wanted it, and now we find that happiness is not to be had for it. With the whole of our hard earned wealth we cannot purchase a single year's happiness. We cannot make this coveted investment of our riches, but we are obliged to take instead, a troubled conscience (which we shall find will not remain off Cape Horn, however much we may wish it,) and perhaps a constitution enfeebled or broken down with our excesses. We turn with feelings of envy to the companions of our early days, whom we left years ago earning their bread by the sweat of their brow, when our hearts were as light as theirs, and who are still toiling, but with hearts as light and consciences as clear as ever; and while contrasting our feelings with those which are expressed in every feature of their cheerful countenances, we are involuntarily led to exclaim, "What shall it profit a man, if he gain the whole world and lose his own soul;" or to paraphrase the question and apply it to our temporal interests alone, "What doth it profit a man, if he gain the whole world, and in his struggles to gain it, should lose the capacity for enjoying it?"

Let us then, during our residence here, use all our endeavors to purify and elevate the standard of public opinion. Let us thank God that our lot was not cast here in the times when the temptations to vice were almost irresistible, and the external incentives and aids to virtue were so feeble and so few. And while we are careful not to let the authority of public opinion usurp that of conscience in its influence over our character or conduct, let us do all in our power to give to its mighty energies a noble and lofty aim; until the ægis of its powerful protection shall be thrown over the cause of virtue, and vice shall shrink back to its secret haunts under the condemnation of its stern and withering rebuke; until by the wholesome influence of its salutary laws, the weak and the tempted shall be restrained from the paths of dissipation and vice, and the erring and the fallen be recalled from the ways of destruction to those of happiness and virtue; until the cause of truth, temperance, morality and religion shall find in an enlightened public opinion, its warmest advocate and most powerful guardian; until by the social institutions which it sustains and encourages, it shall teach us that our highest happiness, our purest and most enduring pleasures are to be found, not in gratifying the desires of our animal nature—not in indulging those sensual appetites and passions which we share in common with the brutes, but in satisfying the wants of our higher, our intellectual nature, and in developing the hidden resources and exhaustless capacities of the immortal mind.

THE FRIEND.

HONOLULU, APRIL 1, 1847.

World's Temperance Convention.

By the arrival of the "Laura Ann," we have received a copy of the London Temperance Chronicle, for Sept. 1, 1846. It contains a full report of the Convention. More than 300 delegates were present. In the reported list, we notice 32 from the United States, and others from different parts of the world. Aside from the daily sessions of the delegates, a mass meeting was held at Covent Garden Theatre, on Friday evening, August 8th. Pit, galleries, and boxes "were crowded to excess." The Morning Chronicle of the following day, remarks, that "The theatre was crowded with as large and respectable a mixed audience as we ever saw in that magnificent saloon, collected by the most attractive performance or appearance, theatrical, royal, or political." The United States appears to have furnished a majority of the "actors" on the occasion. The speeches are reported of the Rev. Drs. Beecher, Patton, and Cox, the Rev. E. N. Kirk, the Rev. John Marsh of New York City, Henry Clapp, Esq., of Lynn, Mass., Professor Caldwell of Dickinson College, Pennsylvania, and Frederick Douglass. The last speaker, Mr. Douglass, appears to have created a "sensation" from the circumstance that only a few years since he was a slave in one of the southern States.

It was anticipated that great good would follow the convention. A great amount of important statistical information was obtained, some startling facts mentioned, and great principles discussed. Mr. Beggs, Secretary of the National Temperance Society, stated that "In the town of Bury, it had been ascertained that an average of £2 3s. 4d. per head was yearly spent in the purchase of alcoholic drinks; that it had been computed that 30,000 persons go to bed drunk every Saturday night in Glasgow alone; and that in the same city every tenth house was a public-house. While the revenue of the United Kingdom is fifty-two millionst, sixty millions are annually spent in the purchase of intoxicating liquors."

The time indeed has come for *active* ACTION; "30,000 persons go to bed drunk every Saturday night in Glasgow alone," with a population of a little over 300,000.

OUR CALIFORNIA READERS.—Intelligence occasionally received, encourages the belief that the Friend is not an unwelcome visitor among residents, officers and seamen on the coast of California. One gentleman writes us, under date of Feb. 15, "There is nothing our sailors read with the interest they do that paper. Be assured it is doing an immense amount of good. It operates silently but surely, and brings about moral results without parade and noise." Such testimonial expressions from good sources we prize. Not unfrequently we have more *substantial* expressions. U. S. naval officers and seamen have always liberally sustained the Friend. It is our uniform custom to forward packages to the several vessels of war on the coast. Sometimes to individuals, at others to seamen and marines in general. Should any individual in that quarter desire the paper forwarded regularly to his address, he will please make application to the Rev. W. Colton, at Monterey, whom we have requested to act as our agent. He will also receive and forward donations for support of the Friend, and so long as he remains on shore will be constantly supplied with bound volumes of the Friend for sale. ☞ Seamen supplied at one half the subscription price.

A SAILOR'S GRATITUDE.—Recently, Captain Thomas, of the English brig Laura Ann, handed us the sum of $3,00 from a Swedish sailor at Marquesas. It appears that he kept in grateful remembrance some act of kindness shown to him while at this port. We are utterly at a loss to recall the man, but in acknowledging the donation, we would assure him that every cent shall be expended in helping some distressed sailor. For a poor Swedish sailor at Marquesas to send us $3,00 we regard as something like a certain poor widow mentioned in Mark 12: 42, who threw into the treasury of the Lord "two mites." To have a sailor keep any act of kindness in grateful remembrance, which we may have shown him, imparts to our heart real happiness and encourages us more implicitly to trust the declaration of the Preacher, recorded in Ecclesiastes 11: 1—"Cast thy bread upon the waters, for thou shalt find it after many days."

☞ We take great pleasure in presenting our readers with a copy of Mr. Marshall's Address. Only let merchants take correct ground in regard to the use and sale of intoxicating drinks, and very soon would a more healthy public opinion exist in all parts of the world.

☞ We have received several interesting communications, but must necessarily defer them until our next. "Cruise of the Mary Ann," "Terrapin hunt," "Obituary," "A Friend," &c., &c., will appear soon.

☞ In the address of Mr. Marshall, published in to-day's paper, through mistake, the following portion of it was omitted. The first side of our paper was struck off before we discovered the error:—"Be offering up, in her wretchedness, a heartfelt prayer to God, that he would reclaim her husband, and save her child from imitating his example. Even the minister of his parish, visiting him to talk of the error of his ways, would perhaps preface and conclude his eloquent appeal to the miserable man, by helping himself from the decanter on the sideboard, to a glass of the creature comfort. And even if the intemperate man *did* make a solemn resolution that he would never again drink to intoxication, society gave him no aid or encouragement. If he went among his friends, he would perhaps be congratulated on his return to good habits, and urged to take a moderate glass with them "in a quiet way," and thus being constantly invited to treat his resolution, experience would"—See p. 50, 1st column.

☞ Recently we heard one of the American Missionaries remark, that at a Sabbath school exercise, one native child repeated 207 verses from the Bible, another 192 and a third 170, without prompting.

☞ The old proverb, "It is not all gold that shines," has again been most triumphantly confirmed by the attempts of the crews of the American whale ships Brookline and Hibernia to obtain gold ore on an island in Marguerita Bay, California. Not finding whales, they commenced digging and blasting for gold. One of the Brookline's crew reports that they worked between 30 and 40 days. Several tons of supposed gold ore was taken on ship board; but ere long, it was satisfactorily ascertained that whatever kind of ore it might be, it was not gold ore! Recently, a quantity was landed on one of our wharfs and is to be employed for the useful purpose of house building. After the gold fever was over, these ships were very successful in taking oil in the bay. The Hibernia has sailed homeward.

☞ Yesterday, March 31, was the 27th anniversary of the landing of the Am. Missionaries on these islands.

☞ Mr. Jasper, President of the Oahu Temperance Society, will deliver the 2d monthly Lecture, to-morrow (Friday) evening. The public are respectfully invited.

Capt. John Paty,	5 00

Obituary.

On last Christmas day, December 25 1846, in the longitude of 148° 33' W. and latitude 44° 32' S., we lost our third mate, Gorham Thing, on a whale. His boat was stove a quarter of a mile to windward of the other boats, and he was drowned before they reached him. Mr. Thing was 26 years of age, a native of Hallowell, Maine, and this was his third voyage at sea. He was a smart, active officer, beloved by his fellow officers, and much liked and respected by the crew. Always cheerful and good humored, he did not follow the example of that large class of officers who seem to think that their station aboard ship requires and sanctions the use of profane and abusive language to those under their authority, but he knew how to respect the feelings of others, and so win their confidence without losing their esteem. He was not only faithful in the discharge of his duties, but he was a man of sound moral principles, and every one who knew him will add of sound moral practice. He was a member of the temperance society, which was formed on board the Florida; and on shore he did not participate in the licentiousness which is unhappily so prevalent among all classes of seamen, and which has proved such a curse to most of the islands in the Pacific Ocean. In him the crew of the Florida lost a friend, whose example was calculated to elevate and improve them, and whose place they will in vain attempt to supply.

Mr. Thing's parents are both living, and an only sister a few years younger than himself. The news of his sudden death has not yet reached them, and they are still ignorant of the sad event, which will strew with cypress the pathway where they had hoped to gather only flowers. Alas! how many hearts in our native land are now beating with anxiety for the fate of those who are daily exposed to the perilous chances of a whaleman's life. God comfort and watch over them! The sudden death of a shipmate—of one too in the very prime of youth and health and energy, has a peculiar and solemn effect upon all who are not utterly thoughtless. Truly no man knows at what hour the Son of man cometh. Happy are they who can meet His summons with an unshrinking heart and an approving conscience. Should not each one of us grave on his heart the beautiful admonition of the poet:—

"So live that when thy summons comes to join
The innumerable caravan, that moves
To that mysterious realm, where each shall take
His chamber in the silent halls of death,
Thou go not, like the quarry slave at night
Scourged to his dungeon, but sustained and soothed
By an unfaltering trust, approach thy grave,
Like one who wraps the drapery of his couch
About him, and lies down to pleasant dreams."

P. CAROT.

Ship Florida, off Honolulu Harbor, March 24, 1847.

DIED.

In Twinsburg, Western Reserve, Ohio, March 27, 1846, Mrs. ELIZABETH GREEN, aged 75 years, the venerated and beloved mather of Rev. J. S. Green. Makawao, East Maui.

Drowned, January 21, 1847, at Cedar Island, on the Coast of California, WM. HENRY HASSELL, belonging to the crew of the American whaleship America, of Stonington.

We well remember this young man, and sincerely mourn his untimely end. We learned the particulars of his death from S. J. Hudson, who was with him at the time. Mr. Hudson is 3d officer of the Magnolia, which vessel was in company with the America taking elephant oil.

Killed by a whale, January 28, 1846, LEDOZE WILKINSON, of Auburn, aged 17—at Magdalena Bay, California.

A man from the ship Catharine was killed by a whale in February.

A Portuguese, from Fayal, boatsteerer on board ship Menkar, Norton, New Bedford, became entangled in the line, Feb. 25, 1846, was taken down and was never seen more.

PASSENGERS.

In the schr. Mary Ann from Tahiti.—Two French priests, two French mechanics, Mr. and Mrs. Tibbey and family.

In the Laura Ann from Liverpool.—H. Skinner. Esq., of the firm of H. Skinner & Co.

MARINE INTELLIGENCE.

PORT OF HONOLULU.

ARRIVED.

12.—Am. ship Elizabeth Starbuck, Parker, Nantucket. 15 months, 400 sperm.

13.—Am. ship Sarah Parker, Russell, Nantucket, 21 months, 150 whale, 150 sperm.

Eng. schooner Mary Ann, Page, Tahiti, 54 days from Navigators.

15.—Eng. brigantine Laura Ann, Thomas fm. Liverpool, via Valparaiso and Marquesas.

16.—Am. ship California, Fisher, New Bedford, 7 months, 400 sperm, 500 whale.

17.—Am. ship Romulus, Montgomery, Mystic, 18 months, 900 whale, 100 sperm.

18.—In the offing, barks Elizabeth Frith and Bayard.

March 20.—Am ship J. E. Donnell, Hussey, 14 m, 230 sperm 780 whale.

23—Am ship Samuel Robinson, Turner, New Bedford, 9 m, 100 barrels.

Chilian brig Argo, Jurnvich, 15 days from San Jose.

24—Hawaiian bark Don Quixote, Paty, 14 ds fm Monterey.

Am ship Brookline, Jeffries, New London, 21 m, 130 sperm 2270 whale.

Eng brig Mary Ann, Moore, from Sydney via Tahiti, 25 days.

25—Am ship Ontario, Green, Sag Harbor, 200 sp. 20 w t s.

SAILED.

March 20.—French ship Meuse, Le Brec, to cruise.

March 28.—Hawaiian bark Don Quixote, Lindsey, China.

29.—Magnoila, Simmons, to cruise.

30.—Chilian brig Argo, Jurnvitch, China.

MEMORANDA.

Naval.—The Don Quixote left at Monterey, March 10th, U. S. S. Columbus, 84; Independence, 60; Savannah, 50; Warren, 20; and store ships Lexington and Erie, 8—the last said to be bound for this place and China, to remove Government stores to California.

The U. S. S. Congress was expected in a few days from the leeward coast.

The U. S. S. Cyane, 24, was at San Francisco.

The U. S. S. Pourtsmouth, 24, and a schooner were blockading Mazatlan.

The troop-ships and other men of war not arrived.

The Erie left Payta Jan. 5th, ultimo, arrived at San Francisco February 14, bringing Capt. Watson, bearer of dispatches to Gen. Kearney and Commodore Stockton.—Left N. York Nov. 12th, Col. R. B. Mason, 1st Dragoons, arrived by same conveyance. The dispatches contain powers to organize a civil government.

H. B. M S. Constance, Capt. Sir B. Walker, was at Mazatlan March. 10th.

☞ The Haw brig Euphemia, Rossum, sailed from Monterey March 9th, for San Francisco. Same day, for do., Am. bark Tasso, Libbey.

Brig Juanita (late Hawaiian) has been purchased by Wm. Leidesdorff, Esq , and sailed for Columbia River.

Feb. 16th, Am brig Elizabeth sailed from Monterey for leeward.

Nov. 5th, Br brig Mary Dare, Cooper, sailed from the Downs for this.

Nov. 23, Br brig Texian, from Liverpool, for this.

English ship Athol, arrived here 19th, spoke off Peru Am troop ship Thomas Perkins, of Boston, with 300 troops of Col. Stevensons Regiment for California—all well.

Lost.—Fr. whaleship Valiant, Vanier, of Havre. December 30th, near Margarita Bay, Lower California, 600 bbls oil. Part of crew arr here in the J. E. Donnell, Capt. Hussey, who saved 200 bbls oil and other property from the wreck. Captain Hussey reports that Capt. Nash, of the America, was mistaken in his opinion of the whalers captured in Margarita Bay, as given in our last. The ships were lying there fishing, as usual, and the schooner was bound to the wreck of the Valiant. The Brookline took 1000 bbls. in the Bay.

By a letter, under date March 29, from Maui, addressed to S. Peck, Esq , we learn, upon the report of Captain Devol, of the Braganza, " that Captain Bowers run the ship Galen on shore, at the Falkland Islands, in February, 1846, sold the cargo, and took the money, and has gone into the country in South America."

PORT OF LAHAINA.

ARRIVED.

March 12.—Am whale ship Mercury, Pendleton, Stonington, 9 months, 65 sperm 400 whale.

13.—Am whale ship Navy, Norton, New Bedford, 18 months, 25 sperm, 1100 whale.

Am whale ship Nile, Case, New York, 17 months, 160 sperm 1200 whale.

al,

☞ **NOTICE TO SEAMEN.** ☜

For the information of stranger seamen, visiting the Port of Honolulu, the Seamen's Chaplain would give the following notices, viz :

Religious services every Sabbath morning at 11 o'clock, and Sabbath evening at 7 1-2 o'clock, at the Bethel. On every Thursday evening a religious meeting is held in the Vestry Room, under the Bethel, and the Seamen's Concert for Prayer, on the third Monday evening of every month, at the same place,

A weekly temperance meeting of the Oahu Temperance Society is held at the Vestry Room, at which seamen are invited to attend. Should any desire to sign the pledge, they are invited to call at the Chaplain's Study.

All seamen are invited to call at the Chaplain's Study, where they can be supplied, gratuitously, with Bibles and Testaments, (in various languages) religious books, hymn books and tracts ; also, with copies of the Friend. The Chaplain has constantly on hand back volumes of the Friend, neatly bound, which will be furnished to seamen at a *reduced* or *cost price.*

☞ The hours between 2 and 4 o'clock, P. M., every day, the Chaplain will be found in his Study, and most happy to receive visits from his seafaring friends. Inasmuch as many call at the Bethel, supposing that they will there find the Chaplain, please take notice that the Chaplain's Study is adjoining his dwelling house, in the street near the west end of the Catholic Church. Over the Study gate, Seamen's Chaplain. tf.

The Poet's Corner.

For the Friend.

MOUNA LOA.

Though there crowns thee, monarch mountain,
No array of frowning peaks,
Thy bold profile on the heavens
True sublimity bespeaks,
Domed and vast, in silent grandeur,
Swells thy Titan-head on high,
Smoothly shaven, and forever
Propping up the leaden sky.

Deep within thy bosom cradled,
Lies the old volcanic fire,
In a boding, fitful slumber,
Nursing for some errand dire,
From thy yawning summit-craters
Oft the fiery flood hath gushed,
And in raging, wasting torrents,
Down thy sides in vengeance rushed.

Stream on stream successive resting,
Slowly upward thou hast grown,
Leaving notched the cycling ages
In thy changeless heart of stone.
Oh, what wondrous world-upheavings
Thou hast witnessed in thy day!
Islands, mountains, freshly risen,
Venus-like, from ocean's spray.

Round thy infant head the monsters
Of the primal ocean played,
Strangely, at thy fiery tossings,
From thee darting, sore dismayed;
E'en old ocean, foiled and vanquished,
Fled thy Vulcan-tempered arms,
And in triumph, thy proud summit
Rose from out a sea of calms.

Mighty art thou, ancient mountain,
Mighty—but more mighty still
He who in his palm hath weighed thee,
And controls thee by his will.
Lo! he speaks! and all thy burnings
Instant sink in dull repose;
Lo! he speaks! thy fires rekindle,
And like wax thy substance glows.

Ah! how soon, at his commanding,
E'en the flinty globe we tread,
Melting, burning, glowing, wasting,
Its expiring glare would shed.
Be thy dome, then, mighty mountain,
God's own altar evermore,
And let him who feels thy grandeur,
There creation's God adore.

C. S. L.

For the Friend.

(Written in a stormy morning at sea.)

What! though the clouds all black and dread,
Like a funeral pall are darkly spread,
And lagging morning's gleaming light
Displays old ocean capped with white,

Though loud his angry billows roll,
Why dost thou fear,—ah, faithless soul?
He who from Genesaret's wave
His servant drew, still lives to save.

To save us while on earth we live,
And after death new life to give;
For death through him is but the way
To regions of eternal day.

L. A. B.

For the Friend.

Sketch of the life, character and death of Mrs. Mary Paris, wife of Rev. John D. Paris, of the S. I. Mission, who died at Hilo, February 18, 1847.

Mrs. P. was the daughter of Mr. and Mrs. John and Nancy Grant, and was born at Albany, New York, April 27, 1807. She was early the subject of serious impressions, and although she had no special religious instruction in early childhood, yet she made the Bible her constant companion, and through its teachings and the gracious and faithful guidance of the Holy Spirit, she was led to the Lamb of God, and as she ever afterwards thought, born again, at the age of 13. She was then residing at Johnstown, New York.

At this time, and for some three or four years after, the penitent, confiding, joyful emanations of little Mary's heart were known only to her Heavenly Father. While all around her were thoughtless and worldly, she sat delighted and unknown at the feet of her Saviour. Like Mary of Bethany, she had "chosen that good part which should not be taken away from her."

When about 16 years old her parents removed to the city of New York. Here Mary was soon found by that excellent and lamented servant of the Lord Jesus, Rev. E. W. Baldwin. Under his kind and faithful instructions, her hopes were brightened and her faith strengthened, and she was permitted publicly to consecrate herself to the Lord; an act in which she greatly rejoiced. She united with the church under the pastoral care of Mr. B., for whom she ever after cherished a high regard. In this congregation she became a Sabbath school teacher, a work in which she engaged with much zeal and delight, and in which she continued until she left the shores of her native land. After removing to New York, she attended the school of Mrs. Smith, a daughter of Isabella Graham. With an original and ardent thirst for knowledge, she made rapid progress in her studies, and soon became an assistant teacher in the school; a situation which she occupied for several years while prosecuting her own studies. On leaving this school, she was invited to the city of Washington, to take charge of a select school for girls, which she taught with much interest and success. While engaged in this school, she took a violent cold, from the effects of which she never wholly recovered, and which may have prepared the way for that painful illness which terminated her earthly career. On recovering from this attack, she became an assistant teacher in the female seminary at Georgetown, D. C., under the care of Miss English. Not long after this, however, her health failed, so that she was obliged to relinquish her work and return to her friends in New York. Here she continued in rather feeble health for some time; but at length she recovered so as to be able to return to the more active duties of life. Again she engaged in teaching in the city of New York, in which work she continued until called in the providence of God to relinquish teaching and take charge of her sick mother, and superintend the domestic affairs of the family. During the summer of 1840, her mother died, and on the 25th of October following, she was married to the Rev. John D. Paris, an appointed missionary of the A. B. C. F. M., and destined to the Oregon.

On the 14th of November, she embarked with her husband and other missionaries, on board the ship Gloucester of Boston, bound to the Sandwich Islands. On their arrival at the islands, their destination was altered, and by the request of the brethren here, by their own consent and that of the Prudential Committee, they were transferred to this mission.

They were soon located at Kau, a district on the southern shores of Hawaii, and about eighty miles distant from any other mission station. This was one of the most self-denying posts at the Sandwich Islands, as it was a new station, unprovided with mission houses and the common facilities and comforts of older stations, without a port, and in the midst of a rude and ignorant people, without a civilized sister or brother within 80 miles, and that distance more than doubled by the difficulties of the way.

To this post Mrs. P. repaired with the greatest cheerfulness; and here, in concert with her husband, she labored with a self denial, a patience, a contentment, a zeal, and a faith worthy of the missionary name, till called to retire from her post of earthly toils and prepare for the services of heaven.

Her desires to help the native females and to guide the rising generation in the ways of wisdom and holiness, were ardent, and her plans for their improvement were wise and sanguine. But she was not permitted to accomplish all that her liberal soul advised.

From a predisposition to rheumatic and other affections, from a bleak and damp climate, and from the peculiar trials and privations attendant on the commencement of a new station, she soon found her system threatened with invasion from disease and pain. It was not however until the summer of 1845 that serious apprehensions were entertained as to health. About this time, she

made a visit of several weeks at Hilo. It was hoped that this journey and relax would remove, or at least relive the symptoms which threatened her constitution; but she returned to Kau little or nothing benefitted by the experiment. Several unsuccessful efforts were made to secure the attendance and advice of a physician during the early stages of the disease. Dr. Andrews, the only missionary physician on the island, was sick and unable to leave his station. At length, after many weeks of anxious suspense, Dr. F. W. Wood, an English surgeon and physician, recently located at Hilo, was called in. He succeeded in giving a temporary relief to some of Mrs. P.'s symptoms, which had now become alarming. About the last of March she was removed to Hilo, where she might enjoy the aid of her missionary sisters and the advice of a physician. But her cough and rheumatism not abating, she was soon removed to Honolulu, to try the effects of a dry climate. Here she remained until the last of July, enjoying the constant attendance and the excellent medical advice of Dr. Wood of that place. Still her disease made progress, traversing and rending at times the whole system with excruciating pains, and approaching the citadel of life.

On the 31st of July, Mrs. P., with her husband and their two little daughters, the elder 5 1-2 and the other 4 years, re-embarked for Hilo, the place selected by her to lay aside her earthly tabernacle. Here she continued gradually to decline until the morning of the 18th of February, when her longing spirit took its joyful flight to the realms of glory, leaving her weeping husband and two motherless daughters to mourn in solitude and in sadness this early and this desolating bereavement.

It now remains to give a few extracts from the many expressions which fell from Mrs. P.'s lips during the last stages of her illness, as recorded by her bereaved companion. These extracts will show better than any remarks of ours, the character of her piety, and the manner in which she met the messenger which called her home.

On the 30th of September, after having been told that no one thought it probable she would ever recover, she made a pause of some five or ten minutes, and then calling her partner to her side, she said, "I hope you will not grieve or be troubled in mind, my dear husband. You must not be anxious about me. I commit all to the Lord, to live or die. I have had a strong desire to be spared for your sake and that of our dear little ones. O, our precious children! I hoped to live to see the image of Christ impressed upon their hearts. They will need a mother's care, a mother's instruction, a mother's watchfulness. I still have some hope that the Lord will prolong my life; but not my will, his be done. He has always been good to me, infinitely better than I deserve. Let us leave all with him. His time is best." On being asked how she felt in relation to her own soul in view of death and eternity, she replied, "I have had no distressing fears. I know I love my Saviour and that he loves me. I sometimes shrink from the thought of death and the cold, cold grave; but when I look beyond, all is calm, all is peace. The Saviour himself is gone to prepare us mansions in heaven, and he hath said, 'I will come again and receive you to myself.'" It was remarked to her that it is a precious thought that we shall meet again, in our Saviour's likeness, no more to part, no more to suffer, no more to sin. "O, yes," she exclaimed, "it is a precious, a *glorious* thought! We shall all meet again, and meet with the whole family of Christ. He is the head, we are the members." After a little pause, she said, "The Saviour can give us such a view of his glory as to remove all fear of death. It has often seemed to me as if, during my sickness, he has appeared at my pillow speaking peace to my soul. O, I have had such views of his love when all alone!"

On another occasion, raising her hands and her eyes from a bed of languishing, she said, "O, the love of Christ! how free, how precious, how unchanging! It is different from all other love. It does not pass by or cast off the chief of sinners. He loves us to the end. 'Who shall separate us from the love of Christ?' I shall soon be separated from my beloved firstborn, but the love of Christ makes it easy."

One morning, after a season of agonizing pain, succeeded by a trembling and sinking of the whole system, she said, "O, this *mud house* is giving way—it is coming down—it will soon return to dust; but I have another house, not made with hands; I have long ago sought and found rest there. I have no other rest or resting place."

At another time, she said, "I love to go back and review my past life, and trace the hand of the Lord. * * * I remember well, when I was thirteen years old, the first *sense* of *pardoning love*; how the Saviour revealed himself to me, and what a sense of peace and joy I had in believing. No one conversed with or counselled me at that time on spiritual things; but the Lord taught me by his own blessed Spirit. I had no one to whom I could unburden my bursting heart but Jesus. I am a monument of his rich and distinguishing grace."

On being asked if she regretted coming on a foreign mission, she replied, "O, no; the Lord has led me, and I rejoice in it. I am sorry, my dear husband—bursting into tears—I am sorry that I have been such a poor helper." Speaking of the children, she said, "I trust I shall receive them again in heaven. I have had feelings of assurance respecting their salvation, which I dare not utter. * * God is faithful.

"And you, my dear husband, I must leave. I was only lent to you and you to me for a little season—a few days; but you will soon come and meet me in our Father's house." Hearing the remark that heaven is attractive to the true christian, because Christ is there, she exclaimed, "O, that is it. Whom have I in heaven but thee, and there is none upon the earth I desire like unto thee. My soul thirsteth for God, for the living God. When shall I come and appear before God? O, I long to see my blessed Saviour as he is."

During a restless night on the third of February, her husband, speaking of heaven, remarked, "There is no night there, and you will have but few more here;" she said, "No sin, no pain." On the morning of the 5th, after a night of extreme suffering, she said, "I have had a hard night, but the Lord knoweth what is best. O, my dear husband, I have had such longings last night for death." On being asked if the grave had no terrors, she replied, "None. Welcome the tomb—since Jesus hath lain there, I dread not its gloom. O, I want to drop this shell and fly away and be at rest. I long, yes, I long, to be with Christ." Mr. P. remarked, "It is very repugnant to our natural feelings to look into the grave, and see our bodies crumbling to dust." "So it is," said she, "but I look beyond the grave. Ehen shall I be satisfied, when I awake in thy likeness :

> 'O, glorious hour! O, blest abode!
> I shall be near and like my God.'

I long to depart, to go and be with my blessed Saviour."

Hearing the phrase, "the dark valley and shadow of death," she inquired, "What does that mean? I do not understand it. I look upon death very differently. Jesus will come and take the soul to himself. It will be released from its trembling house of clay, and wafted to the realms of immortal glory. The valley does not look dark to me now, but perhaps it may. I think it will not be dark to me any where if my Saviour is with me; and he will never, no more leave me."

On another occasion, and during a night of great pain, she would often say, "It is just right. It is my Father; I love to lie passive in his hand; to know no will but his." Again, she says, "O! how sweet, how precious are the promises of God. I love to believe and take him at his word.—His word is truth—everlasting truth. It can never, never fail."

One night when near her end, she urged her husband to seek rest in sleep. He objected, saying her hands and feet were cold, her pulse feeble and irregular and that he feared she would swoon away and wake no more. "Oh!" said she, "you ought not to feel so. It would be a blessed swooning

to swoon away into the arms of my Saviour and awake in his image. Don't be afraid, my beloved husband. If Jesus should come and take me away from your side, without a struggle or a groan, you would not feel badly or grieve."

A few days before her departure, her husband inquired if she had any preference as to where she should be buried. "No," she replied, "I have not thought of this poor crumbling dust. My thoughts have been above. It is of but little consequence what becomes of this bundle of bones. I leave that with you to do what is proper." Then breaking out, she exclaimed,—

"Oh, for a sight, a pleasing sight,
Of our Almighty Father's throne!
There sits my Saviour crowned with light,
Clothed in a body like our own."

She then said to Mr. P., "When the hour of my departure is come, I would like to have all silent and still. It is often thought that everybody must crowd around the dying bed. I would like to have our precious children, one on each side, and you at my pillow. I wish them to see their mother die when all is calm and nothing to disturb."

On hearing the hymn commencing "High in yonder realms of light," she said, "That hymn is good, but it has not vigor enough for my mind. I love to drink in such hymns as these,—

'My God, the spring of all my joys,
The life of my delights,
The glory of my brightest days,
And comforts of my nights,' &c.

And,

'My God, my life, my love,
To thee, to thee I call.'

My soul takes in such hymns as these. God is the source and centre of all blessedness.

Continuing to live and suffer longer than she had anticipated, she said, "We must wait our heavenly Father's will; when He calls me, then I will go joyfully. His time is best. O, for grace, for patience to suffer all his will!"

On another occasion, when Mr. P. read, "On Jordan's stormy banks I stand," and spoke of Bunyan's river of death, remarking that she now stood on its verge, she replied, "I do not like that view of death. It is not the view which our blessed Saviour gives us. He has told us that he will 'come again' for his own, and 'receive' them to himself. I love to believe his words, and to commit my soul to him. If he takes me to himself, death is swallowed up in victory. What are all the dark vallies and rivers if Jesus is with us? O, precious to believe him, to believe just what my Saviour says!"

About 36 hours before her departure, she exclaimed, with great emphasis, "Bless the Lord, O my soul, forever bless his holy name! This has been the language of my heart all the day. How good! how good! O, how good He is! We know but little of his goodness."

Thankful that her peace was made with God, through the blood of the cross, and having an intense and fearful view of what would be the condition of a dying sinner, racked with such mortal pains as hers, and yet unprepared to meet his judge, she exclaimed, "How dreadful! O, how awfully dreadful! If I had remained unreconciled to God until this dying hour! O no, this is no place to prepare to die—no time to prepare to meet God."

The day before her death, while in a paroxysm of agonizing pain, she cried out, "O, how can I bear it!" Then checking herself, she said, "He tempers the pains to my strength." With a soul breaking for its longings after God, she then exclaimed, "O, my beloved, come! thou beloved of my soul, come quickly!"

During the night previous to her release, she exhibited great sinking and prostration of her physical powers, alternately sleeping and waking, without much ability to converse. Mr. P. tried several times to rouse her, saying at one time that he feared she would sleep the sleep of death. "O, don't be afraid," said she, "if I do, it will be well! Jesus is present—he is precious."

After this, she made several efforts to converse, but was unable. The messenger had entered her chamber; the windows of her earthly house were being darkened; the veil which separated her from the other world, was being rent; the "golden bowl" was being broken. After raising both hands several times, and making a great effort to speak, she articulated the name of her first born—"Mary, Mary." The children were waked and placed by her side, as she had requested; but she saw them not, nor spake again. "Mary" was the last word which fell from her mortal lips.

Morning was breaking upon the mountains of Hawaii, and a morning of immortal brightness and glory was dawning upon her soul. Her mortal powers gently gave way. The "silver cord" was loosed, and at 8 o'clock, A. M., she quietly left us for the bosom of her Saviour.

"Thus star by star declines,
Till all are passed away,
As morning higher and higher shines,
To pure and perfect day.
Nor sink those stars in empty night
But hide themselves in heaven's own light."

As we stood with suffused eyes around this dying couch, and watched the waning eye and the slow returning gasp of the departing saint, we felt that the chamber was a place

"Privileged beyond the common walks of virtuous life;
Quite on the verge of heaven;"

And as thought pursued the freed spirit in its joyful flight to the realms of glory, we felt the force of the lines,

"In vain my fancy strives to paint
The moment after death."

Thus peacefully and triumphantly ended the mortal career of our dear sister. She sleeps in Jesus; she rests from toil, from pain, from sin.

The Master came and called for her. She was found waiting for her Lord. She welcomed the messenger and the call to go. Through grace, we believe, she has washed her robes and made them white in the blood of the Lamb. Through this blood she overcame, and she now wears "a starry crown." Her "rest is glorious."

Had not this sketch already exceeded its proposed limits, we might speak of some of the characteristics of the departed. Of her humility, her unostentatious deportment, her energy and decision of character, her zeal in all good things, her conjugal and maternal tenderness, her self-denial for the cause of Christ, her veneration for the word of God, her love to the Saviour, her delight in spiritual things, and her simple childlike faith in Christ. Through this faith she triumphed. To her it was the "substance" of things hoped for, the "evidence of things not seen." It was founded upon a rock. It cheered her amid the trials of life, and saved her in the billows of death. It disarmed "the last enemy" of his "sting" and despoiled the grave. It swallowed up both in victory." Who would exchange this simple, this undying faith in the Redeemer for all the science, the fame, the treasures and the diadems of earth?

"Blessed are the dead who die in the Lord."

T. Coan.

Koloa, Kauai, April 1, 1847.

Dear Brother Damon,—We have been visited with a tremendous flood at this place. It had been rainy for a month, and the streams were high and the ground saturated with rain. On the evening of the 21st ult., the rain commenced falling in torrents, and continued most of the night accompanied with terrific thunder and lightning. The stream which runs through Koloa soon began to overflow its banks, driving the natives from their houses, and sweeping down bridges, fences and everything in its way. Before morning, it burst into Mr. Pogue's house and drove him from it. In his attempts to reach the house we occupy, he was carried down by the torrent the distance of half a mile towards the sea, where he was found in the morning covered with wounds and bruises, and nearly exhausted.

On visiting his house next morning, it presented a sad spectacle. The floors were broken up, doors split, the partitions were sprung from their places, and books, furniture, clothing, together with the mud and rubbish lay mixed up in sad confusion.

The basement room of my house, which I had occupied as an office and store-room, was flooded, and books, papers, medicine, &c. were destroyed.

Yours in haste,

J. W. Smith.

The Seamen's Friend.

The Bible among Seamen.

NEW YORK, May 9, 1846.

Rev. Samuel C. Damon:

DEAR BROTHER,—I embrace a moment to inform you that the good work is prospering here. The distributions of the New York and Marine Bible Society, in April, were 1,862 Bibles and Testaments; among seamen, 390 volumes in English, Danish, Portuguese, Swedish, German, Finnish, Italian, French, Spanish and Dutch.

I have been cheered in my visits from ship to ship, and from boarding-house to boarding-house, to witness the interest generally manifested by seamen in the word of God. It has been my privilege, in some instances, to read the Scriptures to those who could not read themselves. The attention of others I have endeavored to arrest by directing them to particular portions of the sacred volume. Some have earnestly inquired what they must do to be saved, and I have tried to direct them to the "fountain of life," commending them to the God of all grace. These tokens of divine favor will rejoice your heart, and I scarcely need ask an interest in your prayers that such may find peace in believing. The mariners churches are well attended, and not unfrequently the officers and seamen of ships about to sail, ask an interest in the prayers of God's people, for the Divine blessing to accompany them, or return thanks for their safe arrival. I subjoin a few extracts from my journal:—

April 5—Sunday. Visited in the vicinity of the Mariner's Church; supplied the sailors found destitute with the Scriptures; tracts were also distributed, and thankfully received. At one of the boarding-houses, I found a sailor reading "The Devil on two sticks." I inquired if he thought that a suitable book to read on the Sabbath? "I do not," said he, "but I have nothing else to read." I gave him the book that reveals Him of whom Moses and the prophets wrote. He accepted the gift thankfully, laid the "Devil" aside, and promised to go to the sanctuary.

9. Visited the sailor boarding-houses in Front, Water and Cherry streets. I met a Russian sailor, who took me by the hand, and cordially thanked me for the Russian Testament and tracts. Said he, "I have read the Testament through and through." I sold two Bibles and one Testament, and gave 9 Testaments.

11. Three sailors, who were five days on the wreck of the Edward Kent, and taken off by the Cotton Planter, called for Bibles. I supplied them with Bibles and tracts. I expressed the hope that the goodness of God would lead them to engage in his service. One of them replied, "I have learnt a lesson that I hope will be a blessing to me."

15. Had a pleasant visit among the shipping; sold a captain a Bible for 75 cents, also one to a sailor for the same price, and another in Danish to a sailor for $1, and gave to others a Danish and Swedish Testament and two English Bibles.

17. The mate of the brig ———, bound to Madeira, called and purchased a six shilling Bible. Said he, "I gave mine to a Jew on the last voyage; we have had good times on board for several years; a good captain and good crew; we have prayers night and morning, and on Sunday the 'old man' reads a sermon. The blessed influences of the Holy Spirit accompanied us on the last voyage, and three of the crew found peace in believing." I placed in his hands 2 Bibles and 4 Testaments for the use of the ship's company.

21. Yesterday morning, I visited and supplied ship ———, for Canton, with the scriptures, &c. The captain called this morning and gave the "Seamen's Friend Society" twenty dollars, remarking "I hope you will send a seamen's chaplain to China soon enough for me to have the pleasure of hoisting the bethel flag for him on board my ship."

Let us contrast the facts I have related above with the following facts, related to me this morning by a pious shipmaster. He said, "the first nine years of my seafaring life, (whaling,) commencing in 1816, I never saw a seaman that made a profession of religion, or that seemed to think seriously on the subject." How changed the scene! to God be all the glory.

22d. Sold a Danish sailor a Testament and gave him a supply of tracts. I inquired if he had reason to hope he was one of the Lord's children? "Far from it," said he, "but I am striving to become one." His eyes filled with tears, as I directed him to the only refuge.

In Philadelphia, 50 seamen have been added to the church under the care of Rev. Mr. Douglass, and a precious revival is in progress on board the U. S. revenue cutter ——, now at sea. Seven have been brought out of nature's darkness into God's marvellous light.

Yours in the bonds of the gospel,

L. P. HUBBARD,

Agent N. Y. Marine Bible Society.

For the Friend.

Gallipagos Islands.—No. 1.

A SAILOR'S EPISTLE HOME.

ALBERMARLE ISLAND, Jan. 5, 1847.

Your hearts would be delighted, my dear friends, to look upon the magnificent scene which is spread before us this morning. The pencil of Catherwood could but faintly portray it, and even Washington Irving would be puzzled to do justice in describing it.—We are in the centre of a noble bay, twenty miles wide by thirty long. Its surface is only disturbed by a gentle breeze, and our good ship makes a pleasant picture in the centre, her white canvass glistening in the sun. Her sails are hardly filled with wind, yet she moves through the water and slightly ripples it at her bows. Around us are six mighty peaks, the tops of which are lost in the clouds. These clouds are of fleecy whiteness, and rise and descend in laziness around the lofty summits of these mountains. At sunrise, they were of gold and azure color, and dazzled the eye with their brilliancy. On our larboard beam is a huge volcano, on an island called Narbrough; the fire is ascending day and night from its crater, and down its side the melted lava is running in fiery streams to the ocean. Sea birds are in large numbers fishing, and flit by our ship, simply turning an eye towards us as they pass, not at all concerned by our visit. On our weather quarter is the ship American of Nantucket, beating to windward, while right astern is another, the Franklin, of the same place, standing out to sea. The hills are burned and scorched in all directions, by lava which has run down from the mountains at some period. A great number of cabbage trees are seen, but other than these, there appears to be nothing but low bushes. No inhabitants are here, and all is still save the roaring of the breakers on the rocky shore, and possibly the barking of a wild dog on the hills. The terrapin here finds his mysterious home, and among rocks and in the deep secrecy of these wild bushes, lays its eggs in the sand, or seeks its food under the shade of the curious cabbage tree. Here for hundreds, and perhaps thousands of years, they live before they arrive at maturity.

Our visit here is looking for whales and some wood. Presently, our boats will go ashore, and I hope to be among the number who go. My writing was disturbed by the call of all hands, and the larboard and bow boats were lowered to go ashore in search of wood. We commenced pulling up the bay, and pulled eighteen miles before we could find any place where we could land our boats in safety. The shore was iron bound as far as we could see, and tremendous breakers were dashing in their fury over their black sides. Almost exhausted, after pulling without the least cessation for over three hours, we at last, in a nice little bay, formed by large rocky points, found a sand beach just large enough to haul up one boat at a time on. Having our boats well secured, we jumped out of them in hot pursuit after seal, which were about the rocks in great numbers. Ten of these very curious animals were soon killed; and while some were occupied in cutting and bringing wood to the boats, I was employed in taking off the skins of these amphibious creatures. They were of the hair seal kind, and most of them young

pups. They are very like a dog about the head, with flippers which answer the purpose of feet and fins. In the water they are very sprightly, and raise their heads out and look about with an impudence which is unequalled. On land they get along rather clumsily, hopping rather than running. The manner of killing is to hit them a lick on the end of the nose. They live a long time after this, and it pained me much to see them in their death agonies. On the rocks were many large guanos, a shocking looking animal of the lizard species. The evil spirit could not conceive a more horrid sight than one of these. They are about 2½ feet long, their tails making two-thirds of this length, of a dirty black and brown color, with stiff bristles on their back, and a face somewhat like a monkey. Never did I see such dreadful looking creatures, and I cannot at all give you a correct idea of them. I belive they are harmless, and am told they are good for food. Sea birds were very numerous. The noble pelican was there by dozens, so little alarmed by our visit that they could be knocked over in the water with sticks. Boobys and sea pigeons were in large flocks, eating all round the boats the carcases of the seal we had killed. I saw one beautiful bird, somewhat like a partridge, but we could not get at him. A small species of penguins were about the rocks, and swimming in the water in great numbers. One of these we killed, but the plumage was not as pretty as those from more southern latitudes. We killed a hawk of the eagle kind, which was very savage in appearance. All these were killed with sticks, and had we been disposed, we might have filled both boats with such game. We found some wood called mangrove, which was very convenient to the beach, and soon we filled two boats.

At 3, P. M., we were joined by the starboard boat with our dinner, which was excellent terrapin soup and sweet potatoes.—To this we did justice. The little picture which we presented was singularly interesting to me. Around the kids which contained our dinner were seated twelve men, black and white, and of several nations. Under the shade of some small mangroves, we found a shelter from the sun. Close at hand was a small sand beach; on this our boats lay, so that the water could not carry them off. Before us was the little bay, on either side of which were huge masses of lava, black as coal; and all around, save a narrow entrance into this bay, the breakers were dashing with great fury their mighty masses of white water. The deep roar of these "combers" was very deep, and told awfully to us if perchance we should get among them. On the bosom of this bay the great pelican swam lazily about, now and then seizing some fish or a bit of the fat of some of the dead seal which was floating about. The seal would also occasionally raise his head above the water, or climb up the rocks, and roll as a dog does when he feels fine. Smaller sea birds were enjoying the repast we had furnished for them, and were chattering and fighting over the dead seal. The shark was also here, and came up so far on the beach that we killed him with a boat-hook. Hawks were abundant, and one suffered death at the hands of one of us. He was very savage, and fastened his claws to the hands of Jim Hall, a kanaka. Behind us was another pretty smooth bay, in which seals abounded. Some birds of the partridge species were noticed among the bushes. Above us was a mighty mountain about 3,000 feet high, the sides of which were black and scored with lava.

Across the bay was Narbrough, burning and smoking, but in the day time the fire is not seen; at night the great illumination takes place. Nature has here been prolific in its freaks. Seamen call it the residence of the evil spirit, and he could not have selected a better home. All is desolation. A few scattering groves on some of the points of land is all there is green. No sounds are heard, save the noise of the breakers or the splash of a seal in the water. No fresh water save that you have in your boat. At night our ship had reached nearly opposite the bay, about four miles off, and the wind was fair to take us on board. Both boats being well loaded, we left the scene of our day's labor, and soon were safe on board our good ship. We tacked ship, and stood out off the bay with a cracking breeze.

Around these islands many whales are taken, but we have not as yet seen any sperm whales. We shall go ashore once more, to wood, at another place, and I hope to see some other interesting sights. The health of our crew is excellent, and our living is fine—terrapin soup three times a day, and plenty of it.

Yours affectionately, J. W.

Cruise of Schooner Mary Ann.

Having in former numbers published notices of the "Mary Ann," and expressed the fear that she might be lost, some of our readers may peruse with interest, the following communication, which Capt. Tibbey has kindly placed at our disposal. It is the copy of a letter addressed to a friend at Tahiti.

Honolulu, March 22, 1847.

Dear Friend,—You have no doubt, long before this, heard the Mary Ann was lost, and all on board perished; but we are thankful to the God and Father of our mercies, the report of our loss had no foundation in truth, but our friends spoke their fears.

The man (George Stewart) recommended to me by our friend, Capt. Dunnett, proved bad, and inadequate to the office for which he shipped. You will remember how he got the vessel under weigh before I had finished my business in Tahiti; and had not Mr. Hooten been just going on board his own vessel, and gave me a passage in his boat, I should have had some difficulty to have got on board. Through his misconduct, the crew were soon in a state of insubordination. Add to which the dreadfully immoral state of the leeward islands. Many of our men preferred their bucket of rum and wallowing in the filth of intoxication, than do their duty, and we were obliged to leave them behind among the great number of runaway sailors there. Our mate, William Haynes, jumped overboard while we were coming out of the harbor of Bora Bora, (he was laboring under some disease caused by excessive drinking,) and he was with considerable difficulty saved.

We left Bora Bora on the 15th of October, and were in the latitude of Owyhee on the 8th of November—according to the sailing master's account—134 miles east of it. We then run to the westward expecting to see it in about 24 hours; but after running more than 8 days, and no islands appearing, I began to suspect we were to leeward of the group, when we bore up for them. I then called all hands aft, to consult what was best to be done. The sailing-master still insisted upon it, that we were to windward of the Sandwich Islands, but the passengers and some of the crew thought, with me, that we were never far enough to the eastward.—There was now nothing before us but to steer either for California or go again to the southward. I disapproved of steering for the coast on account of the strong gales and winter season there, together with the improbability of procuring supplies. We therefore agreed to go to the southward, making as much easterly as possible in hope of falling in with some whalers on the line, or finding some one of the islands a few degrees to the north of the line, and disappointed of these, eventually find the Navigators. I then took account of our provisions, and apportioned it as follows :

Beef 115 lbs., beans 26 quarts, divided into 30 days provision for 11 men, which gave 3¾ lbs. of beef and nearly 1 quart of beans per day. We also found 2 lbs. of rice, 1 of arrow root, 17 of flour and 8 of oatmeal, which we divided between 8 females and children, giving nearly 2 ounces per day each. Our allowance of water was one pint per day to each person.

On the 13th of November, we hauled our wind and steered southeast, going two points free, hoping in less than 30 days to find the Navigators. Our distress was great for want of water, but in a few days our gracious Father sent a great quantity of rain. We filled up our casks, and had abundance during the remainder of the voyage.

We recrossed the equator on the morning of the 28th of November. Our longitude

was of course unknown, but according to my account, in 166 west.

We had considerable mental suffering now in consequence of disagreement among the men, and I was obliged to watch day and night that the vessel's course might not be changed. The sailing master used to me the most insulting and threatening language. On the 4th of December, he called me down into his berth, and informed me that by his reckoning, we were 990 miles from the Navigators, and we had better shape our course for Tahiti, and that we should make another reduction in our allowance of food. I agreed to the latter, but as my reckoning placed me in 11 deg. 21 m. south latitude, and 166 deg. 56 m. west longitude, I would not alter our course. We had not seen an island or vessel of any kind, and we were now worn down with want and many with despair. All the children suffered very much except the infant. Mrs. T. was exceeding weak, but in good spirits. She was very wonderfully supported both in mind and body.

On the 7th of December—3 days after my sailing master's advice to me—at daylight in the morning, the man from the masthead called out land ho! on the lee bow. You may depend it was a heart-cheering sound to us. The land proved to be the eastern part of the Navigator Islands. In the afternoon, we got some provision on board, and the next day arrived at the island of Upolu. Mr. Pritchard came on board and received us with his usual kindness. Arrangements were soon made for us all to go on shore, and our kind friends, Mr. and Mrs. Buchanan, soon had their house full of skeletons. My eldest daughter was very kindly invited by the lady of the American Consul, under whose care she soon recovered her strength.

When we arrived at the Navigators, an epidemic, called by the Samoans farmi, was raging all over the island. Europeans and natives alike suffered. There was perhaps scarcely a healthy person on the island.—Both my family and the crew, from their debilitated condition, soon caught the disease. Mrs. T. and the younger children suffered severely; but while the natives were dying all around us, we all recovered through the care and kindness of our truly christian friends.

I got men to work and refitted the vessel, and on the 16th day of January, we bid adieu to our friends, and re-embarked. About 2 o'clock in the afternoon, sailed once more for the Sandwich Islands. On the 12th of March we sighted Hawaii, and on the 16th were safely anchored in Honolulu.

I am, dear sir, yours truly,

W. H. Tibbey.

Honor.—It is a shame for a man to desire honor because of his noble progenitors, and not to deserve it by his own virtue.—*St. Chrysostom.*

THE FRIEND.

HONOLULU, APRIL 15, 1847.

☞ It is a well known principle that the middle and lower classes in society are powerfully influenced for weal or wo, by those moving in the higher or fashionable circles. When drunkenness, licentiousness and infidelity find patrons and advocates among the honored and influential, then their pernicious influence will be most disastrous among those accustomed to look up to others for example. The reverse is equally true. When temperance, virtue and religion are practiced and advocated by those moving in the higher walks of life, an influence will be shed around, "falling like the gentle dew upon the young and tender grass." How solemn and responsible the duty of those whom wealth, learning, talents, office, birth, or any circumstance has rendered influential among their fellow men. The Rev. Theodore Parker of Boston, may have uttered a great many heterodox sentiments, but the following is certainly not one of them. We commend it to the serious consideration of our readers:—

"There is scarcely anything in nature more astonishing to a reflecting mind, than the influence of one man's thought and feeling over another, and on thousands of his fellows. *There are few voices in the world, but many echoes, and so the history of the world is chiefly the rise and progress of the thoughts and feelings of a few great men.* Let a man's outward position be what it may—that of a slave or a king, or an apparent idler in a busy metropolis—if he have more wisdom, love and religion, than any of his fellow mortals, their mind, heart, and soul, are put in motion, even against their will, and they cannot stand where they stood before, though they close their eyes ever so stiffly."

But we are in danger of omitting to mention the point we had in mind when we sat down to write, which was, to express our gratification in view of the happy change now taking place in the mode of celebrating public, literary and national festivals in the United States. The inauguration of Mr. Everett—late minister to England—as President of Harvard University, took place without the aid of Champaigne and Cognac.—This is a new leaf—a bright page in the history of that venerable institution of the Pilgrims. Long enough have revelry and debauchery been associated with literature and science.

The last 4th of July was celebrated with an unusual demonstration of interest by the Bostonians. Upon the spacious tents spread over the "Common," were such mottoes as the following:—

1. Cold Water from Long Pond—Free.
2. This is the drink which nature to us brings,
   And sends it gushing from ten thousand springs,
   To slake our thirst, our parching lips to cool,
   Refresh our spirits and rejoice the soul.
3. O be thy drink the cooling water clear,
   Through all the seasons of the circling year.
4. Here a cup of water take,
   Neither head nor heart will ache;
   When you reach your home at night,
   Head and heart will both be bright.

The demand for water was great, and from 4½ A. M. to 4 P. M., the tents were thronged—at this hour some of them failed in their supply, while others held on till past 6 o'clock. The quantity used was about *three thousand gallons.* It is estimated that over thirty thousand persons partook of this delightful beverage. The water was *pure, sparkling,* and much gratification was evinced by all who tried it.

"I have broken Sabbaths Enough!"—Those who have been our readers for years past, are well acquainted with our sentiments upon the subject of Sabbath whaling. It is not our object now to assert them anew, only so far as they find expression in the following lines, copied from a letter lately received from the master of an American whale ship. "The —— takes no whales on the Sabbath, nor looks for any. I have broken Sabbaths enough. The Lord help me that I break no more." Are there not others ready to unite in this noble sentiment and adopt this truly christian principle? Could owners, masters and officers be persuaded to adopt this principle, most honestly do we believe it would promote good discipline on ship-board, make the ship's company far happier, by no means protract the voyages, and above all, benefit in a high degree the moral and religious character of all concerned.

Naval.—U. S. Frigate Constitution, Captain Percival, arrived at Boston Sept. 27, completing her cruise round the world, via Rio, Cochin, China, Sandwich Islands, Mazatlan, Valparaiso, and Rio. From the last port she convoyed 6 merchant vessels. The Constitution was absent from the United States from 29th May, 1844, to 27th Sept., 1846—2 years and 4 months.

Donations.

FOR THE FRIEND.

Navigator of Alexander Barclay, $1 00
Capt. Smith, Metacom, 5 00

DIED.

At U. S. hospital, Honolulu, April 4, Mr. Amon S. Taber, carpenter of the Am. whale ship William Tell. He has been gradually failing with consumption for several months. The ship arrived the day of his death, and he died a few hours after being landed.

In Honolulu, April 4, Maria, wife of Mr. John Wheeler.

In Honolulu, April 7, Mr. John Glandthorp, a German, blacksmith. He left Europe on board the whaleship Bremen, of Bremen, and had left her for the Gustav, of Bremen, from which ship he was discharged in this port last autumn.

PASSENGERS.

In the Eng. ship Athol—Mrs. Coffin captain's lady, and two children.

In the Haw. bark Don Quixotc for China—Theodore Shillaber, Esq.

In the Haw. schr Queen Kalama, for Tahiti and Valparaiso—J. B. Marpillero, Esq.

In Bremen ship CLEMENTINE—Mr. Lewis Anthon and lady and Mr. Hoffmire.

MARINE INTELLIGENCE.

PORT OF HONOLULU.

ARRIVED.

March 19.—Eng ship Athol, Coffin, St. John, 19 months, 750 sperm.

March 27.—Brem whale ship Hansa, Husing, Bremen, 10 months, 80 whale.

Am whale ship Nile, Case, New York, 17 months, 160 sperm 1200 whale.

30.—Brem whale ship Alexander Barclay, 50 sperm.

April 4.—Am whale ship Wm. Tell, Glover, Sag Harbor, 6 months, 200 sperm and 250 whale. Am whale ship Elizabeth Starbuck, Parker, to cruise.

8.—Am whale ship Samuel Robinson, Turner, to cruise.

Am whale ship Metacom, Smith, to cruise.

Brem whale ship Alexander Barclay, Fish, to cruise.

9.—Am whale ship Gen. Scott, Sistare, to cruise.

Am whale ship Brookline, Jeffries, to cruise.

10.—Am whale ship Romulus, Montgomery, to cruise.

Am whale ship Nile, Case, Greenport, to cruise.

MEMORANDA.

☞ Am. whale ship Hannibal, reported being at Falkland Islands, Dec. 24, 1846, 5 months out, 600 bbls. of oil. Capt. John W. Brown is still in command of the Hannibal. It will be recollected that last voyage he was left at Honolulu quite sick. The Hannibal has as tender the schooner Sarah Lavinia, the same vessel on board which Babe, the pirate, committed the deeds for which he has recently been tried in the United States—murder, piracy, &c.

PORT OF LAHAINA.

ARRIVED.

March 27.—Fr whale ship Nil, Neve, Havre, 7 months, 40 sperm, 530 whale.

Am whale ship Braganza, Devol, New Bedford, 6 months, clean.

29.—Fr whale ship Angelina, LeCresnier, Havre 9 months, 48 sperm, 508 whale.

Am whale ship Alexander, Reynard, New Bedford, 9 months, 200 sperm, 700 whale.

April 1.—American whale ship Waverly, Crowell, New Bedford, 7 months, 300 whale.

Am whale bark Alice, Woolley, Cold Spring, 7 months, clean.

Am whale ship Rowena, Adams, Fall River, 7 months, clean.

Am whale ship Lancaster, Crowell, New Bedford, 22 mos., 450 sperm, 950 whale, 100 sperm this season.

Am whale bark George, Taber, Stonington, 20 months, 35 sperm, 700 whale.

2.—Am whale ship Fabius, Smith, New Bedford, 20 mos., 50 sperm, 400 whale.

Am whale ship Emily Morgan, Ewer, New Bedford, 8 mos., 150 sperm, 50 whale.

Am. whale ship Wm. Thompson, Ellis, N. Bedford, clean.

Am whale bark Solomon Saltus, Fales, Fall River, 19 mos., 150 sperm, 1050 whale.

3.—Am whale ship South America, Soule, Providence, 5 months, clean.

GEORGE RISELY,

BUTCHER AND GENERAL MEAT SALESMAN.

GEORGE RISELY begs leave most respectfully to inform the residents of Honolulu and shipmasters generally, that he has taken the stand owned by Mr. French, and lately occupied by Messrs. Robinson & Co., where he is determined to sell none but the best of meat, and trusts that by cleanliness and strict attention to his business he may merit a share of public patronage.

G. R. trusts nothing shall be wanting on his part to give satisfaction to those whom he may have the honor to serve.

N. B. Ox Tongues and Corned Beef cured in a superior manner.

Honolulu, March 15, 1847.—tf

NOTICE.

JAMES ROBINSON & CO., having opened their new Butcher Shop on the new wharf opposite the Custom House, respectfully inform their friends and former customers, that they will be able to supply them with the best BEEF the islands afford, at the usual prices. a1 6m.

☞ NOTICE TO SEAMEN. ☜

For the information of stranger seamen, visiting the Port of Honolulu, the Seamen's Chaplain would give the following notices, viz :

Religious services every Sabbath morning at 11 o'clock, and Sabbath evening at 7 1-2 o'clock, at the Bethel. On every Thursday evening a religious meeting is held in the Vestry Room, under the Bethel, and the Seamen's Concert for Prayer, on the third Monday evening of every month, at the same place.

A weekly temperance meeting of the Oahu Temperance Society is held at the Vestry Room, at which seamen are invited to attend. Should any desire to sign the pledge, they are invited to call at the Chaplain's Study.

All seamen are invited to call at the Chaplain's Study, where they can be supplied, gratuitously, with Bibles and Testaments, (in various languages) religious books, hymn books and tracts ; also, with copies of the Friend. The Chaplain has constantly on hand back volumes of the Friend, neatly bound, which will be furnished to seamen at a *reduced* or *cost price*.

☞ The hours between 2 and 4 o'clock, P. M., every day, the Chaplain will be found in his Study, and most happy to receive visits from his seafaring friends. Inasmuch as many call at the Bethel, supposing that they will there find the Chaplain, please take notice that the Chaplain's Study is adjoining his dwelling house, in the street near the west end of the Catholic Church. Over the Study gate, SEAMEN'S CHAPLAIN. tf.

INFORMATION WANTED.

A person residing in Lorain county, Ohio, thus writes to a gentleman in Honolulu. "I earnestly solicit your assistance in getting some intelligence concerning my brother, John L. Smith. His native place was Washington, N. H., which place he left in 1825, and at Boston shipped on board the whale ship John Jay. We received a letter from him when at Valparaiso, S. A. The captain was soon after sent home in irons, and tried for the murder of his mate, and report says, many of the sailors left the ship at Guayaquil, and my brother was one of them. In 1835, put in at Honolulu, and said that a ship carpenter was there, by the name of John L. Smith, from Boston, and in describing the man, described my brother as near as possible. He is now 38, has a mole on one cheek, and one stiff middle finger."

Signed, Yours &c.,

HIRAM SMITH.

☞ Please forward information to editor of the Friend. tf

[COMMUNICATED.]

Sermon, preached at the funeral of the U. S. Consul, Mr. Blackler, at Tahiti, by the Rev. R. Thompson.

Introductory letter to the Editor.

PAPEETE, S. I., Sept. 8, 1846.

MY DEAR BROTHER,—Turning over some papers the other day, I found the following "Fragments of a funeral sermon preached in the Bethel Chapel, at Papeete, in November, 1844, on occasion of the death of the late American Consul for the Society Islands, R. Blackler, Esq., of Boston." At the re-request of some of Mr. Blackler's friends, who wished to keep an outline of the sermon as a memento of his death, I wrote the following on Monday morning. It has ever since lain in my desk. I send it to you, to show that in the Bethel Chapel we stand upon the ground of our common christianity, and know nothing of national distinctions. I have sometimes supposed, when I have seen several American ships in port, and but few of their sailors in chapel, that many have not attended service as the preacher was an English and not an American minister.

Will you, my dear brother, by an article in your useful paper, aid in disabusing their minds of such an unworthy prejudice. Allow me to offer you a few words as to the character of our Bethel Chapel. It was built about fifteen years ago, by the voluntary subscriptions of the residents, and captains of whalers then frequenting the port. The missionary of the station officiates every Sabbath at 11 o'clock. The doctrines of the gospel are preached in their own simplicity, without any sectarian bias. Our only desire is to see souls prepared for heaven, and regard it as a matter of indifference by whatever name they are called, so long as their lives show that they bear the image of Christ. Our congregation is occasionally composed of men of different nations and different creeds—Episcopalians, Presbyterians, Wesleyans, Independents, Baptists, and sometimes even Roman Catholics. We preach to all, always more anxious to see a change of heart than a change of name. We desire only to make them better men and better christians, and when they leave us for another land, they unite again each with the denomination to which they belong. Clergymen of the Church of England and of the Episcopal Church of America, Presbyterians and Independents, both of England and America, have preached in the Bethel Chapel during the last two years. Thus you see it is based upon the widest principles of christian liberality. Connected with the chapel is a small library for the use of seamen during their stay here, and ships are supplied with tracts for their voyage. I am aware that the phenomenon which Tahiti presents, in having *two Sabbaths*, debars many from the privilege of attending service, but this difficulty will not always exist; at present it is inevitable until the political difficulties of the country are settled.

The following is an outline of the sermon mentioned:—

"Prepare to meet thy God!"—AMOS 4: 12.

In selecting this text, we only give utterance in language to the solemn warning which we so lately received in the providence of God. And while the voice from the tomb yet lingers on the ear, and claims our thoughts, the word of God enforces the demand, adds the living voice to the echoes from the grave, and proclaims aloud, "Prepare to meet thy God."

The warning language of scripture is at all times solemn, for it comes with the authority of heaven. Yet there are times when its claims are listened to with deeper attention. When the hand of death has broken the circle of our friends and carried away one of our number, while the heart yet bleeds at the fresh remembrance of its loss, and the tear yet dims the eye, then the heart is disposed to turn to heaven for that consolation which earth cannot give. There are some however who never turn to heaven for consolation under the trials of life; they too tremble when the king of terrors enters their circle, and hear too with solemnity the warnings of scripture; but it is the solemnity of fear. They hear the warning voice, "Prepare to meet thy God," but the sound disturbs their peace—they fly to the arms of pleasure, and in scenes more congenial with their minds, they try to banish every serious thought. * * * Let us then listen to the call which the events of providence and the voice of God alike urge upon our attention.

The death of our friend reminds us that we too must die. A few days ago he was uniting with us in our enjoyments, and we know not how soon we may be laid beside him. Let us then listen to the solemn warning now addressed to us—enforced, as it has been, by the voice of death in our midst. Death is to us a solemn and an unwelcome thought; we have too many enjoyments here to think of leaving them. Nature smiling in gay luxuriance around us, and pleasure inviting us on every hand—health with all its attendant blessings—friendship with all its endearing ties and social enjoyments, bind us to life, and render dreadful the thought of death. We cling to life, and cannot bear even the idea of leaving "the warm precincts of the cheerful day, nor cast one longing, lingering look behind." If death be dreadful, where can it be more so than in a land like this, where disease, when it seizes upon the frame, makes such rapid strides; where there is often such a short period between the first symptom of disease and the last struggle of expiring nature! No time for repentance, no time to prepare for death, before its cold hand has shut the ear and sealed the eye, and hurried the soul away into the presence of its God! How dreadful is thy hand, O death! Circumstances often combine to embitter death. When the exile on his dying pillow thinks of his distant home and absent friends, it often adds a keener pang to the last struggle. He whose death we now lament keenly felt that pang, and in the interval of returning consciousness gave utterance to his feelings. He died a stranger in a stranger's land, far from his kindred and his country. The hand of friendship, it is true, was ever ready to minister to every want; but still it was the hand of a stranger. No relative was there to soothe the anguish which they could not heal, nor close the dying eye. The presence of relatives around the dying bed, and the thought that our dust may rest with the ashes of our forefathers is a consolation which is denied us here. The remains of our friend lie interred in a foreign land, where affection's tear shall never bedew the spot; and even the frail memorial which marks the grave, may soon be removed, nor tell where his ashes rest. Such thoughts oppress the heart; but this is not what arms death with terror. It is the dread eternity which lies beyond; that bourn from which no traveler returns to tell us of the world of spirits. These are the thoughts which darken the brow of death—the secrets of the grave which we cannot know until we pass through the dark portals of the tomb. But those secrets we yet shall know; each of us must yet feel the power of death; we have yet to pass through the grave, and to enter alone upon that unknown land. We know not how soon we may be required to enter upon that journey. How well then does it become us to listen to the warning which is addressed to us, and "Prepare to meet our God!"

The death of your friend and the text before us, suggest many serious thoughts. At present we select three, to which we shall, very shortly, turn your attention.

We invite you to think upon *the certainty of death*—upon *the consequences of death*—and *the necessity of preparation for death.*

When the voice of pleasure rings in our ears; when the wealth and the honors of the world are before us, and buoyant hope looks

forward to happiness to come; then, the very mention of death appals the heart. But it is otherwise when sorrow and distress oppress the soul; then, calm reflection enables us with less dread to think of death; to contemplate the grave, and try to realize something of the dread realities which lie beyond. Then we feel, however we may dread the thought, that death is certain. And when we think of departed friends; when we remember their last painful struggles, and try in imagination to trace the flight of the spirit to the other world, and there gaze upon the solemn scenes which would then burst upon the view, we feel that we too have yet to pass through all this; for death has received his commission from on high; nor shall his hand be staid till the last of mortality has fallen beneath his stroke, and He shall come whose right it is to reign. Then shall death be swallowed up in victory. No condition, no circumstance in life, can save from his remorseless power; age, wealth and rank fall alike beneath his stroke. The infant finds no shelter in its mother's arms, and the silvery locks of venerable age protect not from the hand of death. Beauty in its richest bloom, and manhood in his strength, become alike the prey of this great destroyer. He enters alike the cottage and the palace; the pomp and glitter of the one cannot allure, nor the poverty of the other repel. Resistless and remorseless he holds on his way. Small though the circle of our society is, in this isolated isle, yet even here the hand of death finds its victim; lately has he been in our midst, and removed from amongst us one of our number; the representative of a mighty nation, a country, which is equalled by few in all the elements of real greatness; the representative of a country destined yet to act a distinguished part on the stage of time; a country whose numerous, noble and benevolent institutions reflect the brightest glory on their land, and gild the future with high and holy anticipations. Oh! if the dark stain of slavery were but wiped from her brow—if color were not regarded as a crime, and the banner of Washington could float alone over the enlightened and the free; then, would America shine forth in all the glory which her future destiny portends.

Whatever be the power or glory of a country, it must fade away before this dread conqueror of the human race. To him all must submit. Our fathers, where are they, and the prophets do they live for ever? One after another they have slept the sleep of death. With noiseless step does this great tyrant of our race move on; we mark not his progress, but let the eye roll back on the past—let memory revisit the scenes of our childhood, and ask, where are those who entered upon life with us? and "echo answers, where!" Then we see what havoc death has made; then we feel how dreadful is his stroke, how certain his approach. Although certain the approach of death, yet how uncertain is the time of his approach. We all know that we must die, but as we know not when, we live as if we were immortal. * * * Although we all think that we have many years to live, and that from each of us death is far away, still we think that our neighbors are not so secure as we.

"All men think all men mortal but themselves."

How strange the infatuation. We tread on the very verge of the grave, and yet we see it not; we look back for the companions of our early life, and we feel that we stand almost alone; still the thought that we too must die, we put far away. The voice of Providence which calls to us from the events of every day, calls unheeded; the word of God, which warns us of our danger, lies neglected! Beware my friends, how far you trifle with such solemn warnings, lest the next warning should be the voice of death himself, thundering in your ears, "Prepare to meet thy God!"

Death is certain in its approach and awful in its consequences. * * * Some of the consequences of death we know. We have seen the form of a friend stretched cold and motionless; we have seen the eye which beamed with affection, glazed and dim; while the tongue which had often instructed and amused, which had often lighted up the social circle with delight, lies forever silent; and the ear sealed even to affection's voice. We know as one of the sad consequences of death, that the frame must moulder away, and return to the dust as it was. But the more awful consequences of death we can only know when the curtain of time is drawn aside, and eternity disclosed. When we stand amid the dread realities of eternity—when we hear the sentence of our judge and enter upon the glories of heaven, or the eternal miseries of hell, then shall we begin to know the consequences of death.

Some may think that the consequences of death are annihilation—that when life leaves the body, the soul perishes like the frail casket which contained it. But it is not so. Can we for one moment conceive that the wise and the holy, the generous and the good—the noble-minded which have adorned society, and blest mankind—can these excellent ones of the earth, whose names descend to posterity, and whose virtues are every where revered—can they have passed away forever? Can they have sunk in the shades of annihilation? Can those stars have set forever? Ah, no! they have set, but they will rise again, and rise with a brighter radiance—rise glorious in immortality.

Death is dreadful; but there is a hope beyond death. A land of pure delight, of holy enjoyment and perfect love, stretches beyond the confines of the grave. A land which bears on it all the bright impress of immortality, and where those whom death has separated here shall meet again; where the friendships of this world, transplanted to a happier soil and a purer clime, shall bloom in everlasting blessedness. A land where bliss is perfect and eternal, and where "sighs and farewells are a sound unknown." * * *

The voice of Providence in the death of your friend, has already warned us, and the voice of God in the holy scriptures, now warns us to "prepare to meet our God!" Oh, let not the warning be in vain! If we neglect these warnings, we may be left to trifle on, until we read our sentenees at the flames of hell. * * *

Let me urge upon you the necessity of preparation for death. You know that it is certain. Think of the awful consequences of death to those who are unprepared to meet their God! Prepare to meet thy God is the most solemn warning which could be addressed to us. Oh, see that it be not addressed to us in vain! Once let the sentence be pronounced, and your doom is eternal! O, think that that awful sentence may be pronounced even while you are on earth, even while you are committing sin. He that being often reproved and hardeneth his neck shall suddenly fall into destruction, and that without remedy. If you persevere in sin, the sentence may go forth, "Ephraim is joined to his idols, *let him alone!*" O, if the sentence should have been pronounced against you—*he is attached to his sins, let him alone!* What then will become of your soul?

Preparation for death consists in having our sins forgiven, and our natures sanctified by faith in the Lord Jesus Christ. Without this there can be no preparation for death. Outward ceremonies and attention to forms are of no avail if the heart is not changed. Let each of us seek that new heart so that we may be ready for the awful summons, "prepare to meet thy God." If we live prepared for death, we live as the heirs of immortality, waiting for the coming of our Lord. Then,

"Though corruption may this frame consume,
The immortal spirit in the skies will bloom."

New York Correspondence.

New York, Sept. 19, 1846.

Dear Brother,—The drum! it has no music for me, made to drown the shrieks and groans of the murdered in battle. But its associations at the present moment are worse than its noise Not many yards from me it is drumming up, or drilling recruits for the Mexican war. War with Mexico! Yes, war. And why? Many answers are given, but none so satisfactory that our ministers and christians can enter the pulpits and closets and pray for the success of our arms. Not a single prayer have I as yet heard that the Almighty would give us the victory. A sad position this—to be where we cannot ask Him to give us prosperity. We have succeeded in shooting a few dozen of the Mex-

icans and in spending a few millions of dollars; and I think we shall succeed in getting a *name*—enviable or otherwise—among the nations; and if we do not get the *stern rebukes* of the God of nations, it will be owing to his wonderful forbearance. War, with all its appendages, I am happy in assuring you, is less popular than a few years ago. No man who advocates war can long retain his popularity. It is indeed matter of rejoicing that the candle of such soon goes out to be rekindled no more. We had some war spirits in our last congress; men who doubtless intended to make political capital by crying havoc, and letting slip the dogs of war; but they took the shortest cut to political bankruptcy and the cordial dislike of the moral and religious community.

A cloud still hangs in our southwest horizon, so that we cannot predict what shall be the end of these hostilities; but should they, as in the case of the British forcing opium on China, be the means of introducing a pure christianity into benighted Mexico, no thanks to the originators and instigators of the war; but all to Him who bringeth good out of evil and causeth the worth of man to praise him.

The voice of the civilized world calls for peace. Pecuniary and commercial interests require it, and christianity demands it. May the God of peace grant it. At one time there were serious fears entertained of war with England, for the rabbit pasture called Oregon. Good sense however prevailed, and more of it on the eastern than on the western side of the Atlantic, so that the clouds passed serenely away.

Very truly yours, J. S.

For the Friend.

Public Opinion.

Mr. Editor,—Is it true that "the progress of public opinion is always onward, and in the right direction?" and if it is true, how are we to account for the change to the worse that passed over the Athenians, the Spartans, the Romans, and other nations? There was a time when—in the words of Tytler—"A virtuous but rigid severity of manners was the characteristic of the Romans. The private life of the citizens was frugal, temperate and laborious, and it reflected its influence on their public character." A few hundred years pass, and the character of the nation is changed. Sallust asserts that "licentiousness, gaming and other refined gratifications prevailed. All regard to chastity was relinquished. Sea and land were ransacked for dainties to gratify the palate." Similar is the testimony of Seneca: "All things are filled with crimes and vices. The love of sinning increases daily, and shame is continually diminished. Laying aside respect for what is good and just, lust rushes on whithersoever it will. Crimes are no longer concealed; they come forth before our eyes."

Now is it possible that this change could have taken place in the morals of the Romans without a corresponding change in the public opinion of the Romans?

These thoughts have been suggested by a few sentences in the excellent address on Public Opinion, published in the Friend of April 1. A Reader.

What is a Novel?—"It is a little gallant history, which must contain a great deal of love, and not exceed one or two small volumes. The subject must be a love affair. The lovers are to meet with many difficulties and obstacles, to oppose the accomplishment of their wishes, but at last overcome them all; and the conclusion or catastrophe must leave them happy.

A novel is a kind of abbreviation of a romance; for a romance generally consists of twelve volumes, all filled with insipid love nonsense, and most incredible adventures. The subject of a romance is sometimes a story entirely fictitious; at other times, a true story, but generally so changed and altered, that one cannot know it. For example; in Grand Cyrus, Clelia, and Cleopatra, three celebrated romances, there is some true history; but so blended with falsities and silly love adventures, that they confuse and corrupt the mind instead of informing and instructing it. The greatest heroes of antiquity are those represented in woods and forests, whining, insipid love tales to their inhuman fair one, who answers them in the same style. In short, the reading of romances is a most frivolous occupation, and time merely thrown away."—[Chesterfield's Letters.

The absent minded man.—I never will converse with an absent man; one may as well talk to a deaf one. It is, in truth, a practical blunder, to address ourselves to a man, who, we see plainly, neither hears, minds nor understands us. Moreover, I aver that no man is, in any degree, fit for either business or conversation, who cannot, and does not, direct and command his attention to the present object, be that what it will.—[Ibid.

Lord Chesterfield's opinion of Swearing.—You may sometimes hear some people, in good company, interlard their discourse with oaths, by way of embellishment, as they think; but you must observe, too, that those who do so are never those who contribute, in any degree, to give that company the denomination of good company. They are always subalterns, or people of low education; for that practice, besides that it has no one temptation to plead, is as silly and as illiberal as it is wicked.

Praiseworthy.—Captain Land, of the ship Rainbow, famous for its quick passages to and from Canton, offered to his crew on the last return voyage, as we learn from the Tribune, a premium of $80 if they made the trip within a given time. The noble fellows worked the ship home far within the required time, and thus divided the captain's gift—$40 to the Mariners' Industrial Society, $25 to the Floating Church of our Saviour, and the remainder to the Bible Society. In regard to the first of these donations the following acknowledgment has been made:—

The treasurer of the Mariners' Family Industrial Society gratefully acknowledges the receipt of forty dollars, from the crew of the ship Rainbow, Capt. Land, which sum they decide should be appropriated to the benefit of the poor families of seamen.—[N. Y. Journal of Commerce.

Etchings of a Whaling Cruise; to which is added a Brief History of the Whale Fishery. By J. Ross Browne. Harper & Brothers; pp. 580, 8vo.

This work tells with great spirit the exciting and eventful life in a whale ship.—Some of its scenes are full of interest, and all are very readable. The author was an educated young man, who went into the forecastle of a whaler for his health and the novelty of the thing; and from the tenor of his complaints we should suppose got enough of it. The tale he tells of the morals and usages of these whale ships is adapted to excite both indignation and inquiry. The work will therefore not only please, but instruct and edify, and cannot help doing something to excite sympathy for the condition and sufferings of the large class of whalemen. It is handsomely illustrated from drawings by Mr. Browne, and every way well executed.—[N. Y. Evangelist.

Whale Ships.—The ship McLellan arrived at New London on the 10th from Davis's Straits with (one fish) 150 bbls. oil. The McLellan is the first ship ever sent from the United States to the Greenland whale fishery. She sailed April 8th, and has consequently been absent about 5 months. The captain states that the ice in the north part of the Straits has remained firm and close all the season, not allowing the ships to cross to Lancaster Sound. Have been to lat. 74 N. Left the latitude of 65 N. Aug. 22. Has not seen a whale since the 11th May. The English ships took what fish they have early in the season. Had the McLellan sailed in March, she could have probably made a very successful voyage.

Responsibility of Drunkards.—It is a maxim in legal practice, that those who presume to commit crimes when drunk, must submit to punishment when sober.

THE FRIEND.

HONOLULU, MAY 1, 1847.

World's Evangelical Alliance.

THE NINETEENTH OF AUGUST, 1846, will hereafter be referred to as a memorable day in the history of Protestant Christianity. For years the minds of enlightened and evangelical christians have been tending to UNION upon the great and essential truths of religion. The benevolent enterprises of the age are among the powerful agencies which have been at work to melt down the icy barriers which kept christians asunder, making enemies of those who ought to be bound together by the strongest cords of fraternal love and christian affection. The minds of even great and good men have viewed as utopian the union of the different sects and denominations of the Protestant world. That the plans of the most sanguine advocates for christian union have been more than realized we think clearly manifest by the meeting of the World's Evangelical Alliance, held in the city of London on the 19th of August, 1846. Would that our limits afforded the space for spreading before our readers a report of the meeting as it appears in the columns of the New York Observer of Sept. 26. As one of the incipient movements for this great gathering, seven ecclesiastical bodies of Presbyterians in Scotland sent a circular to the different churches of England, Wales and Ireland to meet in a general convention in Liverpool, in October, 1845.—Measures were then taken for the meeting on the 19th of August in London. The honor of suggesting the idea of assembling delegates to represent the entire range of evangelical christians throughout the world, was made by the Rev. Dr. Patton of New York. "There was found, when the day arrived," writes an eye witness,*

"In London a vast concourse of believers of every name. It was a sublime spectacle to behold thus associated, representatives from all nations: the European, the Asiatic, the African, the American, the Jewish, and the Polynesian; of all orders and ranks of men, the nobleman and the plebeian; the duke, the earl and the baron, the philosopher, the statesman, the merchant, the mechanic; the Justice of the Queen's bench, the physician and the officers of the army and the navy; men who offered the Lord's Prayer in English, in Irish, Welsh, French, German, Dutch, and many other languages; more than twenty branches of the christian family, the Church of England with every kind of nonconformity and dissent; the established Presbyterian Church of Scotland, with all the varieties of secession; the Wesleyan, the Baptist, the Independent, the French Reformed, the German Reformed, the Calvinist, the Lutheran, the Moravian, and the converted son of Abraham; the representatives of Cambridge and of Oxford, of the colleges and theological seminaries of dissenters, of the Church Missionary Society, of the London Missionary Society, of the Baptist Missionary; in short, a gathering of christian disciples from all the prominent nations under heaven, and representing all the interests of learning, of religion, of mankind.

On the 19th, the conference assembled in the large hall of Free Masons tavern, Great Queen street, memorable by the meetings there of the British and Foreign Bible Society.

"It was in this hall, and under these circumstances, that this conference assembled; not a political body, not an ecclesiastical body, not at the call of courts or cardinals, but a voluntary gathering of the children of God;—men of venerable years, the fathers whose name and praise is in all the churches, men honored in the pursuits of literature and science; the young man in his vigor; the toil-worn missionary,—all, all with one mind and heart, to seek for union and love, and the divine blessing, mingling in unbroken harmony their devotions and their songs, and constituting as fitting an emblem of heaven as any scene the earth has ever witnessed before.

"The silence was broken by the voice of the venerable father Bunting—the patriarch, the honored and beloved of all, nominating the Rev. Dr. Bickersteth to preside over the devotional excercises. The hundredth psalm, old version, was then given out and sung standing.

'All people that on earth do dwell,
Sing to the Lord with cheerful voice;
Him serve with mirth, his praise forth tell,
Come ye before him and rejoice.'

"Dr. B. then read the 133d Psalm:

'Behold how good and how pleasant it is for brethren to dwell together in unity,' &c.

"He then read the 17th chapter of the gospel according to John. Never before have I heard this chapter read, or read it, when there seemed such depth of meaning in it. The last ten verses, particularly, seemed to fall upon the ear almost with the emphasis and power of a new revelation.

"'Neither pray I,' seemed the Saviour, in the very midst of us, to say to each of his disciples, 'for these alone, but for them also which shall believe on me, through their word: that they all may be one; as Thou, Father, art in me, and I in Thee, that they also may be one in us: THAT THE WORLD MAY BELIEVE THAT THOU HAST SENT ME.'

"Rev. John Angell James engaged in prayer. It were quite impossible to convey a just idea of the sweetness and fervor of devotion that pervaded all hearts. The voice of a speaker never seemed so much to me as not his own, but the embodiment of the utterance of the emotions and desires of all hearts.

"Dr. Bickersteth then read the 62d hymn of Watts:

'Come, let us join our cheerful songs,
With angels round the throne;
Ten thousand thousand are their tongues,
But all their joys are one.

"The devotional exercises were closed by a prayer by Rev. Dr. Cox, of New York, when the chairman addressed the conference on the great object for which it was convened. He alluded to the memorable conference at Liverpool, in which the key-note of all hearts was Love. To-day he would suggest another sentiment, Praise.

"He called on all to render heartfelt and hearty *thanks* to God for his goodness. He cited Scripture examples in which God had often interposed the richest and most signal blessings, at the very moment that his people were offering up their *thanks*.

"One of the secretaries, Dr. Steane, then stated the order of proceeding: the first of which was the nomination and unanimous election to the chairmanship of the conference, of Sir Culling Eardley Smith, Bart.

"Sir Culling is apparently about 40 years of age, of middle stature, fine figure, erect and commanding in attitude, of great dignity of manners, and with a countenance indicating much intelligence, decision, firmness and amiability. Altogether, he is one of the most courteous, skilful and interesting presiding officers I have ever seen in the chair of a deliberative assembly.

"On taking the chair, a low murmur of applause ran through the assembly. He addressed the conference in a few happy remarks. With an air and grace that won at once the hearts of all who had never seen him before, he acknowledged the honor to which he was raised. He had no occasion to say, as he did, that he was overwhelmed with emotions. Every line of his countenance, the beam of the eye, and the peculiar modulation of the voice, told more emphatically than words could do, the emotions that were swelling within. With unaffected simplicity he said he placed himself in the hands of Christ, and he hoped that in this hour, when we were attempting the first experiment to bind together the great interests of truth and love and bear them round the globe—when we were indeed a spectacle to Christ, to angels and good men—that we might so discharge the responsibilities rest-

* Rev. G. D. Abbott, correspondent of New York Observer.

ing upon us, that the NINETEENTH OF AUGUST, 1846, would long be remembered by coming generations."

The meeting of delegates thus auspiciously opened, continued its sessions more than a week. It was agreed to form an Evangelical Alliance. It was however to be distinctly understood that this alliance was not to be viewed as a new sect or denomination. Those forming the alliance were to be regarded as acting in their individual capacity.

"The parties composing the alliance shall be such persons only as hold and maintain, what are usually understood to be evangelical views, in regard to matters of doctrine understated, viz:—

1. The Divine inspiration, authority, and sufficiency of the Holy Scriptures.
2. The right and duty of private judgment in the interpretation of the Holy Scriptures.
3. The unity of the Godhead, and the Trinity of Persons therein.
4. The utter depravity of human nature in consequence of the fall.
5. The incarnation of the Son of God, (and) his work of atonement for sinners of mankind, and his mediatorial intercession and reign.
6. The justification of the sinner by faith alone.
7. The immortality of the soul, the resurrection of the body, the judgment of the world by our Lord Jesus Christ, with the eternal blessedness of the righteous, and the eternal punishment of the wicked.
9. The Divine institution of the Christian Ministry, and the (authority) obligation and perpetuity of the ordinances of Baptism and the Lord's Supper."

We must here close our quotations and remarks. We cannot however without subscribing our full assent to the nine points forming the doctrinal basis, upon which more than 1200 delegates, from the four quarters of the globe, most unanimously agreed to form an Evangelical Alliance. We cannot refrain from adding a few more remarks, and one additional quotation.

The subject of slavery came up for discussion, and for a time seemed so to divide the convention, that there was a prospect of *disunion* instead of *union*. The American delegates, while they were ready to denounce the system as most abominable, yet would not *un*church and denominate as man-stealers all who might, in God's providence, have their lot cast in a slaveholding state or country. Writes the same individual, whose remarks we have before quoted,

"The whole subject of slavery is left out of the constitution of the Alliance, and remains, with other evils with which the world is filled, to be relieved and ultimately removed, in God's appointed way, by the progress of the principles of the gospel of Christ. The plan of general organization is somewhat modified, and the way left entirely open for the American churches to form a corresponding alliance for our own continent, under the most happy auspices. We shall be agreed with the whole evangelical world in the unity of the FAITH OF OUR ALLIANCE. Thus has closed the most interesting and important assembly in the christian era.

During this discussion we were greatly indebted to the calm and clear reasoning, and the christian spirit exhibited in the addresses and the private influence of Dr. Beecher, Dr. Skinner, Dr. Dewitt, Dr. Cox, Dr. Patton, Dr. Peck, Dr. Olin, Dr. Emory, Dr. Erskine Mason, Dr. Schmucker, Dr. Baird, Dr. Smyth, Rev. E. N. Kirk, Rev. Mr. Pomeroy, Thomas Brainard, Rev. E. P. Humphrey and Rev. Mr. Adger, missionary from Smyrna, R. T. Haines, Charles Butler, Daniel Safford, and Sidney E. Morse, Esquires. Our country is indebted to these men, and others who ought to be named, for a great service.

The closing scene was an affecting one. The final hymns, the touching address of good old Father Bunting, the prayers, the solemn accents of the closing words of Sir Culling Eardley Smith, 'I pronounce this conference dissolved,' will never be forgotten by those who heard them. The lingering of American and British brethren to bid adieus, and the cordial shake of the hand, by those who had differed in opinion, and the farewell, '*God bless you, brother,*' long years will not efface from the memory. And I should not envy a heart that, notwithstanding all, was not endeared to British Christians, by the scenes of the conference of August, 1846.

NEWSPAPER PRINTING AT SEA.—The ship Rainbow, which recently arrived at this port from China, was absent only six months and a half; being the quickest voyage on record. When she left this port, the Chaplain of the Floating Church accompanied her to sea, and when outside of Sandy Hook, prayers were offered that all might be guarded from danger, and from the evils to which those are exposed who go down to the sea in ships. Two amiable, intelligent and right minded young ladies, (says the New York Evangelist,) beguiled the tedium of the passage by editing a weekly paper, which was printed in the forecastle and distributed throughout the ship. The Sabbath was strictly observed on the voyage in and out, and on the homeward passage a handsome sum was raised for religious purposes, the Floating Chapel and its excellent and pious clergyman not being forgotten.—[N. Y. paper.

WRECK OF THE BRIG RIENZI, OF BOSTON, (U. S.,) AND DREADFUL LOSS OF LIFE.—We have received a detailed account of the loss of the brig Rienzi, of Boston, together with 16 lives, in the storms to which the Great Western was exposed on her passage from Liverpool. The account is copied from the log book of the ship Minerva, and states that on Saturday, the 26th of September, in latitude 37 30, longitude 48 30, at five o'clock P. M., they made a wreck on the larboard bow. The wind being light they approached her very slowly, and at a quarter past six lost sight of her altogether, previously taking her bearing; sent the boat to see if there were any persons on board, providing the boat with a compass, signal lanthorn and a bucket of fresh water; the boat was manned by the first officer and four men, who, after pulling for about an hour in the direction of the wreck, smelt something to windward similar to the carcase of a whale, pulled directly to windward and soon discovered the wreck; they then made a signal to the ship and she hove to under the lee of the wreck. As they neared the wreck, heard cries of distress and succeeded in rescuing the following named survivors: James S. Dyer, second officer; George Buntin, Appleton Lathe, Lloyd Brown, and George L. Howe, seamen. The poor fellows were mere skeletons, one being delirious, and would probably have died during the night if he had not been relieved. They were taken on board and their wants administered to. The following particulars of the disaster we have from Mr. Dyer, 2d officer of the Rienzi. She sailed on the 3d of April last from Provincetown, on a whaling voyage. On the 15th of September experienced a severe gale from S. S. W.; at about 11, P. M., the fore spencer was blown away; the gale increasing, at about 1, A. M., on the 16th, the balanced reefed mainsail, under which sail the brig was lying to, was entirely blown away; the gale still increasing every moment, and the brig laying almost on her beam ends, cut away the boats to ease her. Mr. Small then ordered the topmast to be cut off as the only means of saving the vessel; the rigging was accordingly cut, and a man sent aloft to saw off the mast, but on going aloft lost the saw overboard and was returning with a hatchet, when the brig was knocked down, the hatches burst off, and the vesssel immediately filled with water. She remained in that situation 20 minutes, when she wore round and righted, completely dismasted, with nothing remaining on deck, and a perfect wreck. Mr. Small, his mate, a young son about 16 years of age, together with two boatsteerers, shipkeeper and steward, were drowned in the cabin. Some of the crew were drowned in the forecastle, and others were washed overboard. Two boys, George Mann and Geo. Campbell, died the night previous to the rescue of the survivors.—[N. Y. paper, Oct. 14.

The Great Britain's Disaster.

Late English and American papers contain repeated allusions to the disaster attending this vessel, 12 hours after leaving Liverpool, on the 22d of September. She was stranded on the coast of Ireland, but most providentially all lives were saved. In a late number of the London Pictorial Times we see the captain's account, wherein he assigns as a reason the omission of a notice of St. John's light, in the chart of 1846, and complains that the chart was not an 'admiralty' chart. The same paper reports that the Great Western steam ship Company exculpate Captain Hosken from blame. Notwithstanding these statements, the public mind in England and America, is not satisfied, and the cry is abroad for an investigation more thorough. In the mean time scientific men are devising plans to "get her off." We copy the following from a late American paper.

"A letter has been written to this country by a gentleman of great distinction, who was one of the passengers of the Great Britain at the time of her disaster, stating that if the officers of the steamer had been temperance men, the accident would never have occurred. This statement, which is publicly made, will create, as it should, a powerful sensation, and will demand the strictest possible investigation. We have seen and conversed with a clergyman who has resided within ten miles of the spot where the vessel went ashore, and from the published statement of the nature of the disaster, he gives it as his opinion that nothing but carelessness unknown in navigation could have allowed its occurrence. He is perfectly familiar with the locality, and thinks the officers must have been under some unexplained hallucination.

In our London papers we find hints to the same effect, and we trust that the public will demand the investigation of this subject, and *that so thoroughly* that the whole truth will be elicited. It is due to the passengers then on board, and due to those who may travel hereafter that the occasion of this strange disaster should be ascertained.

And this is a good connection in which to remark that no man who indulges in the use of intoxicating drinks is fit to be trusted with any responsible situation on a steamboat or railroad. If a rule were adopted on this principle, we know several men who would soon be obliged to seek a livelihood in some business where the lives and limbs of others would not be endangered by their excesses.

It is also worthy of consideration that on any occasion of public interest, when crowds throng these conveyances, the agents and officers are under stronger temptations to indulge, and consequently they are unfitted for the accurate performance of duty at the very moment when their clearest powers of observation and caution are demanded.

☞ "The Colonial Magazine and Foreign Miscellany," published in London and conducted with marked ability, by P. L. Simmonds, Esq., has copied from our columns Mr. Wyllie's Notes, without any abridgment, even to the engraving of the "Bethel" and the "map" of the harbor. Considering the elevated character of this ably conducted monthly of 150 pages, it is certainly a most complimentary tribute to the author. Those Notes published in a volume of octavo size and good type would fill more than 120 pages. The great amount of useful reading which those Notes contain is highly calculated to diffuse abroad correct information respecting the islands.

A few copies remain unsold at the Study of the Chaplain. Price, $1 single copy; $1,50 two copies.

King's Speech.

At the opening of the Hawaiian Legislature, on Wednesday, the 28th ultimo.

[TRANSLATION.]

Nobles and Representatives:

I have ordered you again to assemble to deliberate together, for the benefit of my subjects and of foreigners who reside under my jurisdiction.

I have ordered my ministers to lay before you, in detail, the reports of their several departments.

I am happy to say that peace and order prevail throughout my islands; and that the cause of education, religion and morality, is steadily advancing.

It pains me to tell you that in some districts, there has been a scarcity of food, arising in some places from drought, in others, from the trespass of cattle, in others, from an unusual concourse of ships, and in others, from neglect of cultivation.

I recommend to your most serious consideration, to devise means to promote the agriculture of the islands, and profitable industry among all classes of their inhabitants. It is my wish that my subjects should possess lands upon a secure title; enabling them to live in abundance and comfort, and to bring up their children free from the vices that prevail in the seaports.

I hope the Land Commissioners will settle all disputed titles to land, upon principles uniform and equitable, and that you will consider the best means of equitably dividing such lands as may be held by several proprietors, or of enabling one of the proprietors to buy out the others, so as to remove the existing shackles to transfers of land—so as that those who own land, without the means of cultivating it, may be enabled to sell it to others who have the means, and so as that the buyers may not be afterwards molested by claims of others than the seller.

What my native subjects are greatly in want of, to become farmers, is capital, with which to buy cattle, fence in the land and cultivate it properly. I recommend you to consider the best means of inducing foreigners to furnish capital for carrying on agricultural operations, that thus, the exports of the country may be increased; and also for you to consider whether it be not expedient that the income derived from the sale of lands, should be loaned on good security, to such naturalized foreigners and natives, as will use it in developing the resources of the islands.

I recommend to your consideration, the propriety of establishing a new and more efficient system of police and prison regulations; and also the propriety of re-organizing the military force, and establishing volunteer companies to be available in the seaports, when required, to suppress disturbances created by foreign sailors, and whether it would be desirable to establish a city magistracy in those seaports.

I recommend you to consider the question whether the law requiring foreigners to take the oath of allegiance before they marry native females, can be repealed with safety to the interests of such females, and of general morality.

It is my wish that no other restriction be put on foreigners in such cases, except such as are necessary to prevent hasty and unsafe marriages, and to prevent husbands from abandoning their wives.

I am glad to announce to you, that it has pleased HER MOST GRACIOUS MAJESTY, THE QUEEN OF GREAT BRITAIN AND IRELAND, to solemnly ratify the Treaty of 26th March, 1846, in a manner which places the independence of my Kingdom and its friendly relations with Great Britain upon the securest basis.

I have appointed plenipotentiaries to negotiate a treaty with the Commissioner of the United States, with which Republic, I am glad to say, my relations continue to be of a character corresponding to the friendly assurances and recommendations of the PRESIDENT.

My relations with FRANCE continue to be of the most friendly kind; as an evidence of which, I would mention the mediation of the French Consul, in a suit instituted against my Government; and the efforts he has made to bring it to an amicable termination.

I have made a treaty with HIS MAJESTY, THE KING OF DENMARK, through His Chamberlain, Capt. Steen Bille; which, I hope, His Majesty will be pleased to ratify. I consider it eminently calculated to promote harmony, and mutually advantageous relations between the two kingdoms.

With all other nations, what relations subsist, are of the most friendly kind.

I earnestly recommend that all the judges and magistrates of the kingdom, under their responsibility to me, extend the same protection to foreigners, that they do to my native subjects; and that all foreigners, without distinction be allowed to enjoy the same rights and privileges as are allowed to the subjects of the most favored nation.

I have appointed the Hon. William Lee, as an additional judge in Honolulu. I wish you to consider all ameliorations required in the laws, or their administration, so that the law may be equally and justly applied.

I recommend to your consideration whether there be any means of supporting schools, which would be less onerous than the present labor tax; and whether some method cannot be adopted for the protection of the poorer classes from oppression under a misapprehension or misapplication of the laws.

Finally, I especially recommend to you the great interests of education and religion, with a view to extend them to all classes, and to maintain on a just and equal footing, the rights of all, whether they be rights of conscience or rights of property.

May the Almighty enlighten your councils, and guide you in the paths of truth and justice, and may all that you say or do, redound to His glory and the best interests of my people.

MOTIVES.—The two great movers of the human mind are, the desire of good and the fear of evil.

DIED.

At her late residence in this town, on the morning of the 23d inst., after a long and distressing illness, Mrs. Hannah Holmes Jones, aged 46 years.

The funeral exercises took place on the 26th, attended by a large assembly. Services at the Rev. Mr. Armstrong's church, were principally conducted in the native language, concluded by a prayer in English. The procession being reformed, accompanied her remains to the family vault.

In Honolulu, April 22, James Gaines alias Cheazy, of Bristol, England. He was a ship carpenter by trade, and had resided near 20 years upon the islands.

PASSENGERS.

In brig EUPHEMIA, from San Francisco—Messrs. W. H. Davis and C. E. Pickett.

In ship BETSEY WILLIAMS, (arr. at Lahaina)—Messrs. Alfred W. Bush and Benjamin F. Bolles, of New London,

Per schooner PROVIDENCE, from Tahiti.—Mr. and Mrs. McAlear, Mr. and Mrs. Carrington and Mr. Pratt.

Per MARY ANN for California.—Captain John Paty and Master Allan Brinsmade.

MARINE INTELLIGENCE.

PORT OF HONOLULU.

ARRIVED.

April 18.—Haw. brig Euphemia, Rossum, 20 days from San Francisco, to Messrs. E. &. H. Grimes. Left at San Francisco, U. S. Ships Independence and Cyane; transports Lexington, Thomas Perkins, Loo Choo and Susan Drew; store ships Xylon and Mount Vernon; ship Tasso and bark Moscow. The Mount Vernon and Xylon to sail in a few weeks for this place.

19th.—Am. whale ship Hannibal, Canning, Sag Harbor, 18 months, 350 whale.

22.—Fr. whale ship Gen. Teste, Morin, Havre, 5 months, no report.

April 29.—Fr. schr. Providence, Sajhur, 31 days from Tahiti.

SAILED.

15.—Fr whale ship Ville de Rheims, Ballou, to cruise.

17.—Am. schr Santa Cruz, for Monterey,

April 19.—Am bark J. E. Donnell, Hussey, New Bedford, to cruise

20.—Brem. whale ship Clementine, to cruise.

April 20.—Haw. brig Mary Ann, Southworth, for California.

24.—Am whale ship Wm. Tell, Glover, Sag Harbor, to cruise.

26.—Eng. brig Texian Alleyne, for Mazatlan.

MEMORANDA.

DISASTER.—The whale ship William Thompson, Ellis, of New Bedford, sailed from here the 17th April for North West Coast, put into Waimea, Kauai, on the 19th in distress, being on fire in the fore hold. The fire was first discovered at 10 1-2, P. M., on the 18th, the ship being then 45 miles N. W. from Kauai. The captain immediately ordered the hatches to be battened down, and stood for Kauai. When within a few miles of the island he dispatched two boats ashore with his papers, chronometer, &c. On getting at the anchorage on the day following, the fire had increased and extended towards the main hatch way. Holes were bored in the deck and water poured down—this making the matter worse, the holes were stopped, sails unbent and placed over the deck and kept wet. On the 20th, the fire having increased, the captain made another attempt to put it out by water, but the heat and smoke prevented all access to the burning part. Everything was made tight again, with the hope of smothering the fire; but by evening little hope of saving the ship was entertained. On the 21st the fire appeared to be subdued, and the captain reported it out, but a later report from Waimea reports it as not wholly extinguished. The damage is not yet ascertained. The fire was confined chiefly to the starboard side from the fore to the main hatch. The decks are nearly burnt through, the beams destroyed, and sides much charred—a large quantity of junk, staves, lumber, gear of all descriptions, with sundry dry goods belonging to the captain, are supposed to be ruined. There was but 50 bbls. sperm on board, which are supposed to be uninjured. Captain Ellis intends coming here to repair.

The fire was the work of incendiaries. Three of the crew are confined in the fort, on suspicion—one, Lyman Lockman, a young man of 20 years of age, shipped from the New York house of refuge, being supposed to be the principal, and Silver and Nicholls, accessaries.

The ship has been fired twice before by desperadoes on board, since she left New Bedford, Nov. last. Two men were sent to the United States for trial, from Pernambnco, charged with this offence. The authors of the second attempt, on the line in the Pacific, were undiscovered.

Such a succession of diabolical outrages is very remarkable, and manifests most reckless depravity.

The William Thompson is a fine ship and Captain Ellis a gentleman, who stands high in his profession. We cannot imagine a motive for such iniquities.

☞ Recent letters from Tahiti inform us that the Montreal, Captain Doane, arrived there March 29, from Boston, via Rio. Jan. 7, where she put in to land Mr. Hill, a passenger, who was dangerously ill. Mrs. Hooper and two children, Miss Morse, Messrs. Williams, Chamberlain, Christie, and Brown are passengers. Mr. Chamberlain is in much better health than when he left Honolulu in 1845. The Montreal lands two passengers and 100 tons of freight at Tahiti, besides making sales of much of her cargo which is in demand. She was expected to leave for this about 15th April.

NEW SCHOONER.—Mr. Torbert's new schooner, "Chance," 54 tons, launched recently at Hanaaula, Maui, arrived here last week. She is a fine looking craft, and will make an excellent addition to our coasters.

☞ Captain Marston, of the ship George, reports French whale ship Larmatine ashore at Waitatuck, Society Islands.

☞ Heard from in January, Br. whale bark Indian, Maughn, 70 bbls. sperm since leaving Oahu—bound to London.

☞ The late gale caused several of the Maui fleet to drag their anchors. The Canada dragged afoul of the Edward, and did her boats and davits some damage. The South America, Soule, lost a boat's crew of fine green hands, who are supposed to have pulled out to sea during the evening, having gone ashore after the first officer. They were immediately missed and three boats dispatched to cruise for them, but as no traces of them were discovered, it is supposed they perished. It was blowing hard at the time.

☞ The Cortes, of New Bedford, Captain Swift, fell in with an English brig in distress in the latitude of the Cape de Verde Islands. She belonged to Dublin, and was bound to Halifax. Captain Swift took the officers and crew and what goods could be saved, when she was abandoned. The crew were landed at the Cape de Verde Islands.

PORT OF LAHAINA.

ARRIVED.

April 16.—Am whale ship Orozimbo, Norton, New Bedford, 17 months, 80 sperm, 1920 whale, 800 whale this season.

Am whale ship Nimrod, Sherman, New Bedford, 22 months, 300 sperm, 1300 whale, 90 sperm and 40 whale this season

17.—Am whale bark Cherokee, Cleaveland, New Bedford, 8 months, 120 sperm, 100 whale.

Am. whale ship Betsey Williams, Hall, Stonington, 5 mos, 75 sperm.

Fr bark Eliza, Malherbe, Havre, 6 months, no report.

Fr whale ship Gen. Teste, Morin, Havre, 5 mons., no report.

18.—Am whale ship Trident, Stetson, New Bedford, 5 mos., 100 sperm.

20.—Am whale ship George, Marston, Fair Haven, 7 months, 200 sperm, 50 whale.

Am. whale ship Portsmouth, Munroe, Warren, 14, months, 1100 whale.

Am whale ship Uncas, Gelett, New Bedford, no report.

Am whale ship Citizen, Lansing, Sag Harbor, 7 months, 600 sperm. 50 whale.

Am whale ship Josephine, Hodges, Sag Harbor, no report.

April 20.—Am whale ship Bowditch, 5 months, clean.

Am whale bark Ann, Edwards, Sag Habor, 7 months, 40 sperm, 180 whale.

21.—Fr, ship Ferdinand, Postel, Havre, no report.

24.—Am. whale ship Armata, Fitch, New London, 9 months, 450 whale.

25.—Leonidas, Swift, off and on.

☞ NOTICE TO SEAMEN. ☜

For the information of stranger seamen, visiting the Port of Honolulu, the Seamen's Chaplain would give the following notices, viz:

Religious services every Sabbath morning at 11 o'clock, and Sabbath evening at 7 1-2 o'clock, at the Bethel. On every Thursday evening a religious meeting is held in the Vestry Room, under the Bethel, and the Seamen's Concert for Prayer, on the third Monday evening of every month, at the same place.

A weekly temperance meeting of the Oahu Temperance Society is held at the Vestry Room, at which seamen are invited to attend. Should any desire to sign the pledge, they are invited to call at the Chaplain's Study.

All seamen are invited to call at the Chaplain's Study, where they can be supplied, gratuitously, with Bibles and Testaments, (in various languages) religious books, hymn books and tracts; also, with copies of the Friend. The Chaplain has constantly on hand back volumes of the Friend, neatly bound, which will be furnished to seamen at a *reduced* or *cost price.*

☞ The hours between 2 and 4 o'clock, P. M., every day, the Chaplain will be found in his Study, and most happy to receive visits from his seafaring friends. Inasmuch as many call at the Bethel, supposing that they will there find the Chaplain, please take notice that the Chaplain's Study is adjoining his dwelling house, in the street near the west end of the Catholic Church. Over the Study gate, SEAMEN'S CHAPLAIN. tf.

GEORGE RISELY,

BUTCHER AND GENERAL MEAT SALESMAN.

GEORGE RISELY begs leave most respectfully to inform the residents of Honolulu and shipmasters generally, that he has taken the stand owned by Mr. French, and lately occupied by Messrs. Robinson & Co., where he is determined to sell none but the best of meat, and trusts that by cleanliness and strict attention to his business he may merit a share of public patronage.

G. R. trusts nothing shall be wanting on his part to give satisfaction to those whom he may have the honor to serve.

N. B. Ox Tongues and Corned Beef cured in a superior manner.

Honolulu, March 15, 1847.—tf

NOTICE.

THE undersigned have entered into a Co-partnership at this place, under the firm of R. VIDA & VON PFISTER, for the purpose of carrying on the SHIP CHANDLERY and COMMISSION BUSINESS, at the store on the beach, next to that occupied by Mr. Peter Corney.

Gallipagos Islands.---No. 2.

A SAILOR'S EPISTLE HOME.

ALBERMARLE ISLAND, Jan. 5, 1847.

Notes of a Terrapin Hunt.

For three days the crew of our ship had been ashore on Chatham Island and brought back with them two or three boat loads of the most desirable animals which abound on these islands. They always came back nearly exhausted, and their feet and hands were well torn with briers. Clothes which were whole in the morning were rags at night, and new shoes were all gone save possibly a small portion of upper leather.—Hats were shocking bad, and the appearance of all betokened hard service. I should here remark, that for four days, we had been anchored off Chatham Island, one of the largest of the Gallipagos group. Our ship lay about two miles from a sand beach, which had been selected, as affording a good place to land. At. 10 A. M. we lowered a boat and pulled ashore, the surf was somewhat heavy, breaking over a reef, but we found the landing very good. Having hauled our boat up alongside the three boats already on shore, our party, consisting of Capt. A., Mr. M., 3d mate, the shipkeeper and self, started, just taking a drink of water from the boat kegs on shore. We had provided ourselves with a few oranges and a small flask of lime juice mixed with water. The path took us immediately into thick bushes, many of which were cotton bushes here growing wild, which, saving in the path, were very thick; other bushes were covered with long sharp briars and were entwined all around, so that to force your way through them subjected you to having your hands and ancles torn. A small bush bore red berries which we tasted, but so bitter were they, that our mouths were hours recovering their natural taste. The path soon became very rough and was covered with bits of lava, broken and very destructive from the sharp edges to feet and shoes. Ahead of us was a lofty mountain, and on our right hand another, barren and rough in the extreme. The first two miles went off pretty well, Capt. A. being naturally a fast traveller, led the way followed closely by us, indian file. Mr. M. took with him a tin horn, and as we passed along would blow a blast, hoping soon to fall in with some of our shipmates on the road to the boats. Presently shouts answered our horn, and the chief and second mates of our ship met us, the former had one large terrapin, the second two of smaller size, slung to their backs, behind them was Jackson with a still larger one. They cheered us heartily. We stopped a moment and were directed by them which path to pursue, as our path forked just ahead. They looked very much fatigued and pointed to a still more distant mountain which they had crossed and found terrapin in abundance. They had with them part of a bottle of water and did not need any assistance. Passing along half a mile towards the mountain we met Jim Hall, a kanaka; under a cabbage tree lay Jim with a terrapin of large size and a small one, a heavy load for one man. The tree afforded him some shade, but he was evidently much exhausted. Mr. M. gave him an orange which he ate with much satisfaction. The cabbage tree is a curious shrub growing about 15 feet in height, the leaves are like the prickly pear, of oval shape and about one foot in circumference, of light green color. The trunk is in some cases as large as a man's body, and when cut appears like a cabbage stalk, the outer bark like a pitch pine tree. There is much juice in the leaves, and they afford excellent food for the terrapin. As a substitute for water nothing could be more valuable to this singular animal, for their island home being sometimes for months without rain and no springs of fresh water being found, nature has kindly provided them with this tree, which answers well for food and water. The sun was blazing down upon us and before we were half way to the ground I almost regretted having started. Every moment the road grew more rough and the sharp pieces of lava made serious inroads into the soles and sides of our shoes. We in the course of an hour reached the base of the mountain for which we were steering, rugged indeed was the side presented to us, it rose very nearly perpendicular to the height of fifteen hundred feet, huge masses of calcined lava seemed to form its foundation, and no doubt it had been a volcano, but our time would not permit us ascend to its summit. Just here we met two other of our kanakas, they were boys but each bore his terrapin; one, a very small lad of 12 years, had one of considerable size, and he held it up to our captain with much satisfaction. They had part of a bottle of water with them. On questioning them as to the best spot on which to find terrapin, they offered to go and show us plenty, but we declined, as they had already brought down a load before. After rounding the base of the mountain, we concluded to divide our party, the "old man," as the masters of whale ships are always called, and myself taking the right hand, and Mr. M. and the shipkeeper the left. We were on terrapin ground and now to find them. We looked among bushes and rocks, but could see none; presently we heard Mr. M. shouting "Town O!" which is a signal when a terrapin is found. We did not join them as they were some distance from them. After looking in vain for some time for the game we were in search of, we travelled on and reached the top of a smaller mountain, its sides were quite smooth, but covered with bushes.—Having descended on the other side, we reached a valley abounding with rough stones, the passage across, which was very difficult. Bushes full of thorns we met at every step, and if you took hold of them to keep you from slipping from the stones, your hands would be severely lacerated. The ground now rising, led us to a huge crater more than a mile in circumference, and in depth several hundred feet. It presented a singular and grand spectacle, its vast size, the sides and bottom overgrown with trees and bushes, the rough lava, the awful stillness around, all was grand and sublime.—We were amazed as we stood upon the edge of this mighty work of Him whose skill formed the mountain and the seas. Our heads swam as we looked down its awful depth, the reflection striking us, should we fall, hope would no longer be a virtue.—From top to bottom it was a straight line, all around was immense blocks of lava, all black as coal. A short distance from this we came to another crater of smaller size, it was overgrown, as the first mentioned, with trees and bushes, and could not have been burning for many years. It was, if possible, still more rough, and we did not dare look at its depth, as the top overhung the opening in part, and one look satisfied us. On the edge of this crater, we each ate an orange, our thirst was very great, but we would not yet taste our water. No terrapin appeared about, and we concluded to descend into another valley of great extent. Having passed this and ascended a rising, we saw a line of cabbage trees, under one we saw a very large male terrapin, far above our ability to carry, and on looking a little further we found under almost every tree one of the same kind. These huge creatures here sat unconcerned, and it was our impression that there they had been for the last five hundred years. When disturbed, they draw in their feet, drop their lower shell on the ground and make a hissing noise not unlike a snake; they do not offer to bite, neither will they run. Some of them were eating cabbage leaves, which had fallen from the trees. Here, again, how wonderful are the arrangements of Him who provides food

but few facilities for obtaining food, neither being able to climb trees or to kill other animals, so slow is their motion. Under these trees, which afford them comfortable shade, they rest, watching the fall of a leaf, and when it falls they eat it; if one should not fall for a month, why he could remain without eating, but from paths leading from tree to tree, no doubt they move from one to another. We now went a little further and found two of about the right size. With two bits of canvass, as straps, we fastened their legs and placed them on our backs, precisely as a soldier does his knapsack, the strings passing under our arms. The weight of each was about fifty to sixty pounds. We now having secured our prizes each took a swallow of water. At the first start we found but little difficulty, the path being quite smooth, but soon we came to stones and bushes, and the weight on our backs made us stagger, as we jumped from one rock to another. We lost our way and struck into the thickest range of bushes we had yet met with. It was now three o'clock, the sun blazed down like what—nothing like the sun on the line—our mouths were parched, and each step we took, only led us from better to worse. Every few minutes we would lose sight of each other in the bushes and have to halloo in order not to get lost. We walked about half a mile and then took off our load and rested—again all ready—sharp stones grew more thick, and we were disheartened at losing the path—we altered our course in hopes of meeting a better one, but none could we find—again we rested—I wished the terrapin were all in Jerico, for with or without them, we had at least ten miles to travel before we could reach the beach. Here we concluded to eat our last two oranges, and you cannot imagine our disappointment when on feeling for them, to find that I had lost them from my pocket.—It appears a small matter but I can assure you that their value to us at that time, was very, very great.

Occasionally we would get a glimpse of the ocean and our ship in the distance, and never did I in my boyish days so long to get home as I now did to be safe on board the good craft. Just now Capt. A. slipped and fell from one rock to another below him, bruising his knee, he recovered himself without any further injury. We could find no traces of a path, and we were about to leave our terrapin behind, but the reflection that all our shipmates would laugh at us, induced us to press on, and if we did fail, to try at least to fall in with some of them and let them see that we had at least tried to do our duty. Here I should remark, that from the time we had landed, until we left in our boats to go on board, we had been followed by a host of large flies of a blueish green color, who, without cessation, would light upon our faces and hands, and particularly the lips, their bite was sharp and it was only by constant brushing that we could partially keep them away. I have seen flies before, but never any that would for so many miles follow a traveller. Often we passed the spots in the sand where the terrapin deposits its eggs, they were nicely covered over and there left for the sun to complete the work of incubation. In size they were a little larger than a goose egg, perfectly round, and the shell the same as that of the fowl.—How long they remain before hatching, I could not ascertain, or how long before the animal reaches maturity. We now retraced a part of our steps, and struck into a path more clear of bushes and clinkers, and found quite a good path. Here we ventured to take another swallow of water. After another hour's travel, we met the cooper, one boatsteerer and the steward, so intent were they in pursuit of game, that though we passed within a few feet them and they did not notice us until we "sung out" to them. They had been twice to the boats, each time with terrapin, and told us that we had gone in the wrong direction, that they should soon return to the boats, for their terrapin ground was close by. The cooper gave us a draught of water, each of his party having a full bottle with them. We now started in good spirits and soon fell in with the chief mate, who had brought for us a small keg of water at a cross road, and was waiting for us to come up. He kindly offered to take either of our terrapin for us, and we allowed him to take one from us by turns. We had but five miles to travel, and after winding around the base of the mountain first spoken of, the path was excellent in comparison to that which we had passed over. From his water keg I drank freely, never did water taste so good, lips were parched, tongue dry and swollen. We soon reached the beach and with some satisfaction lay down our terrapin; they were pronounced of good size, and an old sailor patted me on the shoulder and said well done. The ensign was flying at the mizzen peak of our ship, and looking out seaward, we saw a small brig standing close in shore. As this was just in the midst of the Mexican war, and privateers might be about, the old man gave orders to launch the boats and go aboard. She proved to be a Columbia schooner who visited these islands to take terrapin oil to the Spanish main.—Our boats brought off that day thirty-seven terrapin, which, with those on board, made one hundred and thirty collected in four days. Some of these were of large size and were carried by three men, some so small that one man could carry two.

It is a happy provision of nature that these animals are placed on these islands; they furnish a most excellent recruit for ships cruising in this part of the Pacific Ocean, and when it is remembered that they may be kept on ship board for six or nine months without food or water—it will be seen that they are almost invaluable. Aye! says the old man, if we only had these in New York to-day, what a beautiful sum they would fetch—and how well they would fill the bellies of some of the hungry men at Washington—and how for four months have we lived on terrapin soup every other day, morning noon and night—sea pies made savory with good things—who would not go a whaling. The next morning we weighed anchor and stood along to a settlement about a day's sail from where we took our terrapin, and purchased fifty more of large size. The residents here are about twenty in number—the chief man is named Williams, an Englishman; his colony is composed of Spaniards and Americans, and two slaves. He visited our ship and received trade for his terrapin, cloth, etc., charging us from 50 to 75 cts. each for them. He has two or three hundred of them always on hand for such ships as may call on him. After a delay of a few hours we stood away for another cruising ground. CAMILLAS.

New York Correspondence.

NEW YORK, Sept. 19, 1846.

DEAR BROTHER,—As a native of New England, I know you are interested in what pertains to her mountains and her morals, her meadows and her merchandise, her streams and her schools, her rocks and her reputation. A chapter then of observations made in a recent tour through all her States, but one, may be the most palatable dish I can spread before you. New England forever! Her mountains and hills were never prouder or crowned to their very summits with richer wheat and clover, than the present year. Her streams are vieing with each other to see which shall drive the most machinery, and turn out the greatest quantity of Yankee notions. Some of her manufactories have been held in check by recent tariff regulations, but her expansive ingenuity and enterprise will not suffer them to be idle. If her mills cannot make cloth they will *grind out* something. Like Burns' text,—

> But how the subject theme may gang,
> Let time and chance determine;
> Perhaps it may turn out a sang,
> Perhaps turn out a sermon.

Sang or sermon, there will be some productive result. General prosperity attends all her departments of business. Some portions of the land, however, seem to be stationary. Neither the farms, nor the villages indicate any advance made for the last 20 years. While in other places the reverse is true, the wilderness is converted into the fruitful field, and the beautiful villages smile where but recently stood the blackened stumps. From these stationary portions, the young and enterprising have gone, some in search of the salt sea, and others of the

shining silver. The railroads now running in every direction, will render her productive soil more valuable; and if a judicious financial policy is pursued, will make her streams, and forests, and hills of granite, tributary to her general prosperity.

The general absence of revivals of religion, and a consequent want of a healthful moral influence excited by the church, has lifted the gates for iniquity to come in like a flood. Repeatedly have I been shocked of late in overhearing in such groups as gather around the country post office, or tavern, or stable, the language of blasphemy and obscenity. Groups of boys and young men from the outskirts of society are drawn from feelings of socialty and want of employment, and readily learn to smoke and swear. Larger or smaller circles of this description hang about most of our large villages and swarm in our cities. Drinking is less common with such, as with all classes, than formerly. Here are schooled the Sabbath breakers, and the candidates for *hempen* orders, and the inmates of our prisons.—Much have we to make us sad, and much to cheer, when viewing the young of New England. Strong as is vice, virtue must have the ascendancy. Much as is the Sabbath desecrated, I believe it is gaining in a proper sanctified observance. And still inclined as many are to mingle strong drink, the principles and the practice of temperance are sure of victory complete and permanent.—The benevolent spirit of New England expands every year, and this is one of her brightest features and surest indications of future prosperity. God will not forget her labors of love—she will find in his smiles, and in her full basket and store, that it is infinitely more blessed to give than receive.—Thus have I generalised, without even a word about your native village and hills. Thus—they stand *as*, and *where* they used to, and I am affectionately yours.

Native Schools—Temperance Celebrations.

Waimea, Hawaii, March 25, 1847.

Dear Brother Damon,—A thought from some source or other, has sprung up in my mind, to give you some account of a tour which I have lately made through my field. If you deem any portion of it as worthy of a place in "The Friend," you have the liberty to publish it. I will speak separately of the several objects to which my time and attention were devoted.

1 *The Children's Schools.*—The whole of these is 21; whole number of pupils, 984. There never was a time, perhaps, when native schools were more prosperous; but then they are native schools, and their prosperity must be understood in a native or comparative sense. They will by no means compare with common schools in the United States, but may very well compare with other similar schools on these islands. I found that much attention had been given by the pupils, i. e., that kind of attention which consists in reading over chapters for the sake of committing them to memory. And in the line of committing the schools have certainly done well. According to my estimate about 45,000 verses of scripture have been committed to memory by the different schools, during the year 1846. Many pupils are reported by their teachers as having made advances in mental and written arithmetic.—Doubtless they understand something of branches—a great wonder if they did not. But here allow me to correct a mistake some how or other set afloat in this ocean. The Hawaiians are by no means natural arithmeticians. Perhaps more artificial arithmeticians cannot found on the globe. What knowledge of figures they obtain, has, to speak rather bluntly, to be beaten into them by main force. The effort of communicating arithmetical instruction to a Hawaiian might not abruptly be compared with that of administering medicine to an obstinate child, which is done by pouring it down his throat. I speak from a fifteen years' experience.—But then, medicine poured down, produces, if it stays down, the same effects as if taken in the natural way. So Hawaiians well enjoy the benefits of their arithmetical knowledge, though obtained in artificial way, provided it "stays where it is put." Another thing I observed in the schools was the aspect of civilization obvious in the clothing of the pupils. All the girls appeared in English dresses of some kind, and in some schools there was quite a display of bonnets. Most of the boys also dashed out in their white and blue and striped shirts and pantaloons of various descriptions. Jackets, and frock coats, were by no means wanting.—Hats and caps were also numerous, though many were destitute.

Another thing may be stated in relation to the schools: all the schools may be regarded as constituting so many temperance and anti-tobacco societies.

The children, as a matter of course, are all temperance children—intoxicating drinks being prohibited by law—tobacco is not prohibited—many parents are great smokers. The children once followed their example, but now the anti-tobacco societies in the schools have delivered them from the filthy and pernicious practice, to which they were once addicted A pupil in the school is ashamed to be seen smoking. All the pupils large and small, have pledged themselves that they will not smoke or use tobacco in any way. And I was happy to learn that but few had violated their pledges; and on the part of this few the pledge was renewed.

2. *Temperance Celebrations.*—During my tour I attended 14 temperance celebrations. These celebrations consisted of processions, meetings and festivals. The children of the schools, and all the adults connected with temperance societies, united in these exercises. Many of the societies appeared with their temperance badges attached to their arms or hats and bonnets, with long feather brushes and flags of various descriptions, waving in Hawaiian splendor, as they performed their temperance evolutions. The different temperance companies, all decently and many fantastically dressed, presented in them, while marching beneath their gay and flying banners, quite a military appearance. The indescribable music of a Hawaiian drum, in some instances, cheered on the marching temperance army.

Any thing to wake up Hawaiian stupidity, and break up Hawaiian stagnation.

But the festivals deserve a word—they were observed in booths and groves, &c.—great preparations had been made—tables had been procured, and some altogether, and many partially furnished with plates, knives and forks, spoons, bowls, tumblers, &c. A far greater number were seated by tables at these festivals than on any preceding occasion of this kind. But what is deserving of particular attention is, these tables are not to disappear at the end of the feast and the guests return to the floor as formerly, but the eating on tables is to be a permanent thing. About 200 have made this resolution. So there is a little hope yet of Hawaiians becoming civilized. I had long been laboring to get the people up from the floor from among the dirt, and fleas and dogs and cats, and what not, and eat on tables like human and civilized beings; but I did not seem to accomplish any thing by efforts, and was about giving up in utter despair, but my courage can now take a new start.

But one thing more on the subject of temperance. I do not know that a single drop of rum or any distilled liquor has been drank by a native in my field during the past year. There may have been some instances of drinking ava, but none amounting to intoxication to my knowledge.

The foreigners too, seem to have partaken of the sobriety of the natives. So you see we live in quite a temperance atmosphere.

There are other points in my tour that I might mention; but I will relate but one more, and that is my wonderful deliverance from threatening death. While sailing on the ocean and attempting to land at a certain place, the canoe was buried beneath the raging surf, and all on board plunged into the deep. Unable to swim, especially in such oceanic Niagara, I began at once to sink, but was grasped in a few moments by a thoughtful fellow sailor and brought up above the foaming and dashing waves, but I

had but just breathed again as it were, when another wave came with great violence and turned the canoe over and plunged me beneath it; I was now separated from my former deliverer, and thought that perhaps I must struggle and gasp and die beneath the dark rolling billows of the deep; but my deliverer again grasped me and I was finally borne safely to the shore, a monument of God's preserving mercy.

Yours most sincerely,
L. LYONS.

THE FRIEND.

HONOLULU, MAY 15, 1847.

American Board.

The Annual Meeting of the A. B. C. F. Missions was held in September, 1846, at New Haven, Ct. There was a large attendance of members. Besides 80 corporate members, there were about 400 honorary members present.

RETURNED MISSIONARIES.

John Scudder, M. D.,	Madras,
Rev. F. D. W. Ward,	"
" Samuel Hutchings,	"
" E. Doty,	Amoy, China,
S. Wells Williams,	Canton, "
Rev. J. F. Lanneau,	Beirut, Syria,
" Eli Smith,	" "
" Hiram Bingham,	Sandwich Islands,
Levi Chamberlain,	" "

The Annual Sermon was preached by Rev. Dr. Hawes of Hartford. Text 1 Sam. 7. 12. "Hitherto hath the Lord helped us."

"He commenced by giving a succint history of the rise and progress of the Board, from the time when *thirty-six* years ago it consisted of *five* men who met in a private parlor of a Connecticut pastor to transact its annual business, and by exhibiting the present as compared with the past he drew a strong reason for saying in the words of the text, hitherto hath the Lord helped us, and in the name of the Lord we will go forward. He passed rapidly over the field of the Board's labors to show that those fields have been vastly enlarged, and that the barriers in the way of progress have been broken down, so that God has opened every door, until five hundred millions of heathen are now accessible. The world is like the Roman Empire at the propagation of primitive christianity when roads had been cut into all parts of the empire so that the gospel was readily carried by its ministers in every direction. The communications by Commerce are great aids to the missionary work, and here a deserved tribute was paid to Sir Stratford Canning, British minister at Constantinople, for his generous and noble protection of the truth."

The receipts of the Board for the year closing July 31, 1846, were	$263,072 55
Expenditures for the same time,	257,605 23
Showing an excess of receipts of	4,4468 32
On the 1st of August, 1845, there was a balance in Treasury of	17,295 89
Showing a balance on hand, August 1, 1846, of	$51,764 21

Of the receipts thus reported, $93,436 were from legacies, and $40,000 the bequest of one deceased friend, the late Mr. Waldo, of Massachusetts.

In addition to this amount, the Board has received from the American Bible Society, $4,000

From the American Tract Society, $7,500

Out of 350 Missionaries and their assistants, laboring in foreign lands, the following persons have died, viz: Rev. Samuel Whitney, Mrs. Munger, Mrs. Bradley, Mrs. Doty, Mrs. Pohlman, Mrs. Bissell, and Rev. David Abeel.

The Board is now sustaining 26 missions, embracing 93 stations; 134 missionaries, including 10 physicians; 73 churches, connected with which, are 24,824 members; 7 seminaries for native preachers, and 487 pupils; 34 boarding schools and 1,874 pupils; 15 printing establishments, including 32 presses, 40 fonts of type and materials to print in 27 languages. Who can contemplate these mighty agencies for good and not feel it to be a privilege to cooperate in so good, great, and noble undertaking, as making known the everlasting gospel to the ignorant and destitute?

We are indebted to the New York Observer, of September 12, for the forgoing particulars.

Annual Report of the American Board of Commissioners for For. Missions, Boston, 1846.

Since preparing a sketch of the meeting of the American Board, to be found in another portion of our columns, we have received the above mentioned document. It is a well printed and neatly executed pamphlet of 256 octavo pages. From the perusal of this report the philanthropist and christian may glean abundant evidence that the limits of christianity are gradually enlarging and Zion is lengthening the cords and strengthening the stakes of 'her tent.' Under the ample folds of that tent, are now gathering converts to the gospel, dwelling in every zone, and inhabiting every quarter of the globe. Every successive report of the American Board and other kindred institutions, developes the ennobling ideas, that truth is gaining ground, and that onward progress is the tendency of the XIXth century. The annual reports of our benevolent societies, when carefully prepared, we regard as holding the same relation to the passing age, that the book of the "Acts of the Apostles," does to the first century of the christian era.—Most cordially would we recommend the reading of this report to the *enemies* as well as the *friends* of missions.

Examination of Punahou School

We take great pleasure in recording brief notices of our school examinations. If possible, we always aim to attend. It is a duty quite too much neglected. Good schools are an honor to any community, and well attended examinations tend to make good schools, by encouraging both teachers and scholars. As is well known to many of our readers, the Punahou School is expressly intended for the children of the American Missionaries. The literary department is under the direction of the Rev. Mr. Dole, and the domestic of Mr. Rice and Miss Smith. The examination on the 30th ultimo, passed off in a manner alike creditable to instructors and pupils. We noticed, with pleasure, that a sound and thorough acquaintance with the several branches of study, characterized the recitations. Mr. Dole pays particular attention to the department of the languages, and should any of his pupils hereafter pursue a collegiate education, his thorough training will be of invaluable service. A class in Natural Philosophy, under Mr. Rice's instruction, appeared well. If we may be allowed to make a suggestion, we do think the teachers ought to train their pupils to recite with more distinctness and a louder voice. This is a common fault in most schools, and hence, all teachers ought to combine in a common warfare against the evil, which may, and ought to be overcome. The closing exercise of choosing sides to spell, forcibly reminded us of by gone years, when with blithe and merry school mates we attended the district school in happy New

England. We must not fail to express our gratification at the attention paid by Miss Smith to the improvement of the pupils in singing. It is a department hitherto too much neglected. It is now introduced into Boston schools, which may well serve for model-schools to the rest of the world.

At the close of the examination the following original hymn was sung, prepared by Mr. Dole:—

Homeward our young affections turn,
Away, away from school;
Our hearts to be with parents yearn,
Away, away from school.
Our hearts leap up with vigor brave,
To speed away, across the wave
Where parents love can never cool,
Away, away from school,

At Punahou we would not stay
Away, away from home,
For love allures another way,
We start for home, dear home;
And loving hearts with fervor burn
To greet the day of our return,
To see the vessel cut the foam
That bears, that bears us home.

With joy unfeigned, we bid farewell
To all our tasks at school;
Thou shalt not call us more OLD BELL
From sleep or sports, to school.
From writing, drawing, we're away,
From Latin, Greek and Algebra,
And all this doing things by rule,
That vexes us at school.

Drunkenness and Licentiousness.

According to the reasoning and belief of of some persons, man receives on this side the grave the full punishment of his sins. Such an opinion would appear quite plausible, if drunkenness and licentiousness were man's only sins. Look at the poor debauchee! Intemperance and lewdness have obtained a mastery over him. Sometimes one vice and sometimes the other takes the lead. Among the ancient Romans there was a barbarous and offensive custom of compelling a murderer to carry upon his back the dead corpse of his victim, until corruption and decay should remove the loathsome burden. The man of intemperate and licentious habits, by his free act, renders his own body that dreadful badge of guilt. Let no misguided and mad victim of these vices think to escape the certain execution of God's fixed laws, in regard to his physical nature. "Be sure your sin will find you out." Strange as the fact may appear, in all probability, you will become the tale-bearer of your own vile practices. You need not enquire who may have "started reports" about your manner of life. You, doubtless, first proclaimed your own shame. A good clock will not more certainly proclaim the hour, than that such men will herald forth their own deeds, and yet they may foolishly imagine no one knows their conduct, but themselves. Counterfiet coin can be more easily circulated than such men pass *incog.* "Be not deceived, God is not mocked, for whatsoever a man soweth, that shall he also reap."

A Sandwich Islander in China.

About two years ago, a small ship's boat containing six men and a girl, left Honolulu for Maui. During the night, either in consequence of the carelessness of the steersman, or the darkness or mist preventing the stars from being seen, the boat was carried out of her course; and when the day dawned, these unhappy people found themselves out of sight of land, and ignorant which way to steer to regain it. Their boat too was leaky, and their stock of provisions very small; and a speedy death seemed inevitable, when the bark Hopewell of New York, Captain Engle, on her way from Honolulu to Canton, found them and rescued the whole company.

These seven persons were kindly received. They were clothed, partly by those on board, and partly from a small package of cottons which they had in their boat, and brought with them to China. On their arrival at Macao, some of them were received on board ship in the harbor; and one of them soon died ashore, of the small pox, a disease to which the native Hawaiians are particularly subject in China. Among this company was the father of the girl, an old man of fifty, who was too weak to go aboard ship, and was, therefore, with his daughter, received into the house of one of the missionaries, where she could be taught something useful. The Rev. Mr. Mead, a passenger in the Hopewell, had interested himself in the old man, from having learned that he had a certificate of church membership, signed by Mr. Alexander, one of the missionaries in the Islands; and a place was soon found for him and his daughter, from whom he would not consent to be separated, as he desired to be with her to see that she did nothing wrong. He had learned to read, and this was now a source of great satisfaction to him; for except with his daughter he could converse with no one. The Testament and hymn book given him were constantly in his hand. The former he read and re-read with the earnestness and devotion of one who feels he has obtained a great treasure, and he always conducted with utmost propriety. The old man had a peculiarly placid look which attracted the attention of every one; and those who saw him daily, were more and more pleased with the regularity of his religious exercises, as giving evidence of the genuineness of his conversion.

A consumption began to show itself a few months after his arrival, and he was apprised of the nature of his malady, as well as it was possible to do; but the announcement gave him no apparent uneasiness. During a long illness, he exhibited the same gentle spirit; and was in every respect a striking instance of the power of grace, giving those around him no unnecessary trouble, and readily complying with every thing they wished him to do to alleviate his sickness.—He had lived a heathen for half a century, having been born and nurtured amidst its pollutions, and having delighted in its abominations; but he was now "in his right mind," and evidently waiting for the summons of his Saviour. He died in the summer of 1844; and soon after, Mrs. Ball, who had done much to alleviate his sufferings, and had taken the charge of his daughter, was also called away to her rest.—*Mr. S. Wells Williams.*

For the Friend.

United States Hospital.

Honolulu, May, 1847.

Mr. Editor,—It is always gratifying to notice efforts made for the comfort of poor sick mariners, when left helpless on strange shores.

It was with much satisfaction, I lately visited the U. S. Hospital at Honolulu.—The commodious airy apartment forming the wards below, and the neatness and cleanliness of the rooms and furniture, speak well for the managers. I was glad to learn that cleanliness is one of the laws of the institution. It is no less gratifying also to notice that this rule is carried out in the cooking department. Any visiter must be agreeably struck with the neatness and order in the refectory and cooking apartment. The neat bright kettles and pans, arranged all in their places; the clean floor and tables, and every thing just as it should be to provide for invalids, form such a striking contrast with what one so often meets in such establishments, dirty floors, greasy beds and bunks, black greasy dishes, and a cook whose whole appearance indicates as much need of soap and water as grease and dirt can prove, that one is very agreeably impressed on visiting a hospital where neatness and cleanliness prevail.

It is certainly not the object of our government to make their hospitals, boarding establishments; but it is their object to provide a *comfortable home* for their sick and destitute subjects in foreign lands. For this, a liberal provision is made, and no man ought to have the management of a hospital, who will not give due attention to the cleanliness and comfort of the sick, both

in furnishing suitable *cleanly apartments*, and in preparing food of a healthful quality in a suitable manner. Especially ought cleanliness to be insisted on in every department of a hospital. I am glad there is one hospital, at least, at these islands, of which this is true. I refer to the one at Honolulu in charge of Mr. John Ladd.

I do not here speak of the merits of the other two hospitals, viz: the American hospital at Lahaina and the British hospital at Honolulu. Let others visit and examine them all for themselves and draw such comparisons as they deem right.

Yours &c., A VISITER.

The Missing Brig, Wm. Neilson.

This vessel left the port of Honolulu, August 5, 1846, for China, expecting to return as early as Christmas. Fears have been for months entertained respecting her fate, but conjecture has inspired the hope that she was not lost; perhaps, she might be sold or otherwise detained. The "Mary," which left China, March 2d, reports that up to that date no intelligence had been received respecting her. We can with difficulty bring our mind to the conclusion that all on board have perished and not one survives to report the story of her disaster. There is the possibility, that like the brig "Express," the "Wm. Neilson" may have been wrecked on some of the numerous islands in that part of the broad Pacific. It is reported, however, that a succession of terrible gales and typhoons was experienced in that region of the ocean during the months of September, October and November. Ex U. S. Commissioner, Brown, and Capt. Dominis, passensengers, and Capt. Weston commanding the brig, are removed from their families, which will not soon cease to mourn the absent husband and father, while a wide circle of friends and relations will deeply sympathize with the bereaved. No person in our community was more generally esteemed for his many excellencies as a neighbor, friend and citizen, than Capt. Dominis, and his family have met with an irreparable loss.

During Mr. Brown's long residence at the islands, he gained many friends, and his private character, we believe, to have been above reproach. Tbere are many in this quarter of the world who will sympathize with his deeply afflicted family. There are many here, who will also sympathize with the family of Capt. Weston. On a former voyage Mrs. Weston accompanied her husband to our shores, when he commanded the ship Congaree. In addition to the above mentioned individuals, it becomes our duty to record the names of others belonging to the ship's company, viz: Mr. George Brown, Junior, passenger; Mr. Charles Green, a passenger, belonging to Barnstable, Mass. He came to the islands as Capt. Dominis' 1st officer, on board the schooner Swallow. One Chinaman and five Lascar sailors were also passengers.

Belonging to the crew of the brig, were the following: 1st officer, Mr. Hammet, Martha's Vineyard; 2d officer, Mr. Benson, Baltimore, Md. Seamen, Seth T. Peterson and Amhesat Peterson, brothers, belonging to Marshfield, Massachusetts. David Mann and Walter Tybu, both belonging to Hanover, Mass. The names of cook and steward, we are unable to learn. Two seamen, John Pitts and J. Gilbert, were discharged sick at this port, just before the sailing of the vessel.

The vessel, we are informed, was insured, as well as the whole, or a part of the cargo, $22,000 in specie.

In reflecting upon this, and similar events, we are reminded of the words, "For my thoughts are not your thoughts, neither are your ways my ways, saith the Lord, for as the heavens are higher than the earth, so are my ways higher than your ways, and my thoughts than your thoughts." Isaiah 55, 8, 9.

Late Intelligence.

California.—By the arrival of the bark Toulon, Crosby, we have received intelligence from Monterey, to April 26. Quiet generally prevails throughout the territory. The horse thieves create the most trouble. General Kearny has appointed General Sutter as sub-agent of Indian Affairs. The Brutus arrived at St. Francisco, 17th of April, passage 5 months, bringing remainder of Col. Stevenson's soldiers. There is a general complaint of want of money, wherewith to make purchases. The issues of government scrip would not currently pass.—The papers speak of improvements now in progress at St. Francisco and Monterey.

U. States.—Intelligence has been received from the United States via California, up to the middle of January. A correspondent at Monterey, thus writes under date of April 26th: "We have a late messenger from the U. S., who left Washington Jan. 14, Pensacola 23d, via Panama and Callao. He came in the 'Preble,' so that we have the President's Message, and lots of 'Public Documents,' and begin to see how we look as reflected in the prints at home." Another correspondent at Monterey thus speaks of the late news from United States: "The war spirit still seems to be up in the country, and no prospect of a speedy peace. Commodore Morris has succeeded to the command of the Gulf Squadron, 24 sail, and General Scott commands land forces in place of Gen. Taylor.

Mexico.—Nothing of importance has transpired since the battle of Monterey. We copy the following from the Californian of April 3:

"U. S. Army at Saltillo and marching on San Luis Potosi, Dec. 12th. U. S. Army at Tampico, with a Division at San Vicente enroute to capture the Mines of Huesteca and Toluca, December 8th. U. S. Army near Chihuahua, early in Dec. U. S. Army marching on Durango, Dec. 1. U. S. Squadron Blockading Vera Cruz, and Gulf coast, Dec. 28th. The U. S. Frigate Brandywine and Sloop Boston, lost at Turk's Island, in December, also U. S. Brig Somers, and a Pilot Boat, while cruising off Vera Cruz."

Lieutenant W. L. Maury, U. S. S. Warren,	8 00
By the native church at Kaluaaha, Molokai, to constitute the Rev. H. R. Hitchcock and Rev. C. B. Andrews Life Members,	20 00

DIED.

In Concord, Oct. 16, Eli Russell, son of Mr. Eli Jones, of this place, aged 3 years and 4 months.

January 26th, in consequence of a fall from the fore topsail yard, John Wardworth, seaman, belonging to American Bark Cherokee. He belonged in Albany, N. Y., where it is believed he has a mother still residing.

At Lahaina, Richard Proctor, April 27th; aged 28. Native of Colne, Lancastershire, England. He left the bark Prussia, at Lahaina, two and a half years ago.

At Lahaina, April 21, Wm. Jones of New Hampshire, aged 24, steward of ship George, Capt. Marston, New Bedford. Came ashore on liberty, declaring to his shipmates that he would never go aboard again. Hired a horse and rode some 5 or 6 miles from the village in company with another, where they remained until dark and were taken by the police. Soon after his apprehension he was observed by the natives to take from his pocket a phial, which contained 3 or 4 rolls nearly the size of cigars, afterwards proved to be opium rolled in paper. One of these he commenced eating, paper and all. The natives suspected nothing; bnt in a short time he called for water and drank largely twice, after which, he lived 2 or 3 hours in much distress. On examination, after death, his stomach was found to contain large masses of opium rolled in paper just as he had swallowed it, which had not had time to dissolve, besides much in solution, probably, in all, more than half an ounce, enough to have killed 20 men. These rolls were still in the phial. Truly, he died as the fool dieth, for "no murderer hath eternal life abiding in him." How shall he who murders himself from any false notion of the unbearable ills of life, appear before his God?—[Communicated.

Buried at Lahaina, April 21, Capt. Edwards, of ship Ann, Sag Harbor.

Drowned, December 1846, Joseph Simons, of Boston, ship Benj. Rush, by the boat being stove with a stroke from the flukes of a whale, on the coast of Chile.

On board the Thames. Capt. Bishop, a native of these islands, on the passage out, Sept. 10, 1846.

April ——, Frank, a Portugese seaman, belonging to the Magnet, drowned at Hilo.

Lost overboard, Dec. 7, 1846, Robert Dager, aged 21, of Philadelphia, of the ship Chas. Drew, Capt. Coffin. Same ship, January 7, 1847, Chas. Grover, of Newburgh, Orange County, New York, aged 18 years.

On board the Jennette, Capt. Atkins, a native. January, 1847, same ship, in March, of New Bedford.

At sea, a native of Mangier.

In the U. S. Hospital, at Lahaina, March 28, 1847, Henry Williams, 17 years and 7 months of age, from Pittsfield, Berkshire County, Massachusetts, where his parents reside. He left the ship Sarah, only 6 months from home, sick with dropsy, of which he died, said to be caused by hard usage on board. Poor lad! like many a sailor youth, he found an untimely grave in a strange land.

March 31, 1847, Manual Joze, of St. Jago, aged 27 years.

In this town, on the 1st inst., Dr. Richard Ford, a British subject, aged 52 years.

PASSENGERS.

In the Toulon from San Francisco—Benjamin F. Stark, jun., and George S. Kenway.

Per Montreal from Boston—Messrs. Levi Chamberlain, Edward W. Brown, John G. Christie, David Flitner, N. L. Williams, Mrs. Hooper, 2 children, and Miss Morse. From Tahiti—S. S. Lincoln, wife and 2 children, Geo. K. Chapman, and Andrew Johnson.

Per Columbia from San Francisco—A. Johnstone, Esq.

Per Mary from China—Edward A. Suwerkrop, Esq., Royal Danish Consul.

In schooner Providence, for California—Mr. and Mrs. McAlear, Mr. and Mrs. Carrington and Mr. Pratt.

MARINE INTELLIGENCE.

PORT OF HONOLULU.

ARRIVED.

May 1.—Am. whaleship Wm. Thompson, Ellis, N. B., from Kauai, to repair.

3.—Am. merchant ship Montreal, Doane, from Boston, via Rio and Tahiti.

5.—H. B. Co.'s bark Columbia, from Columbia River, via San Francisco, lumber and flour to Pelly & Allen.

Eng. schr. Mary, Mohran, 64 ds fm Hong Kong, mdz. to H. Skinner & Co.

May 1.—H. B. Co.'s brig Mary Dare, Cooper, for Columbia River.

5.—Am. whale ship Hannibal, Canning, S. H., to cruise.

May 14.—Am. whale ship Phillip Tabb, Jolls, Warren, 20 months, 500 whale, 25 sperm. Left here in March—met a typhoon in 39 N., 153 E., 11th April—shipped a heavy sea that shattered the vessel terribly—leaked from 8000 to 40,000 strokes per day—put back to repair—touched at Lahaina the 13th inst.; will have to be discharged, and possibly condemned, as she is 33 years old. Saw whales in lat. 31 51, long. 167 7, in April. March 15th, spoke bark Globe, West, of Mystic, nothing this season. Left at Lahaina, 13th, bark Clement, Lane, New London, from New Zealand, and ship Rosseau, of New Bedford.

14. Am. merhcant bark Toulon, Crosby, Columbia River via San Francisco and Monterey,

SAILED.

May 11.—Am. whale ship Uncas, Gillett, N. B., to cruise.

MEMORANDA.

☞ The brig Henry, Kilborn, hence, arrived off Columbia River in 17 days, but in consequence of bad weather, scarcity of water and provisions, put into Victoria. Her passengers went across the country to the river. She arrived up the river March 12th, having lost both anchors and chains, and narrowly escaped going ashore on her passage up. Had discharged and was loading for this place.

The Columbia left bark Toulon, Crosby, brig Palace and H. B. M.'s S. Modeste—the Toulon to sail the next day for San Francisco, and the Modeste about the 15th of April for this place.

The U. S. S. Independence sailed from San Francisco April 11th, for Monterey. It is believed the whole squadron has gone south to blockade the ports of Mexico.

The Columbia left at San Francisco transports Loo Choo, Susan Drew and Thomas Perkins, to sail shortly for China. The two latter may be expected to touch here. The Mount Vernon and Xylon were at Monterey, shortly to sail for the islands.

The schooner Gen. Kearney, hence, arrived April 3d, and sailed the 11th for the leeward coast.

The schooner Currency Lass, hence, arrived April 9th, discharged, and sailed the 16th for Bodega to load with lumber.

The schooner Com. Shubrick, hence, arrived April 14th, and was expected to go up the Sacramento River to dispose of her cargo.

The brig Edouard Marie, hence, arrived at Tahiti in 28 days, and sailed for Valparaiso.

The Montreal left at Papeete, 1 French frigate, 2 steamers, 1 brig, and H. B. M.'s S. Grampus.

Hong Kong.—The ship Brooklyn, Richardson, hence, arrived Dec. 21—had sailed for New York.

The ship Mariposa, Spaulding, hence, arrived, and sailed Feb. 6th for the continent. Sold for $16,000.

Ship Angelo, Hastings, hence, arrived Feb. 2d, and sailed the 16th for Whampoa to load for Singapore and other ports, thence back to China.

Ship Gen Harrison, Kennedy, hence, arrived Feb. 28.

Eng. schooner Sarah Ann, Dunnett, from Tahiti, arrived Feb. 19.

Danish brig Napoleon, from Tahiti, arrived Feb. 21.

Columbian brig Rocafuerte, loading at Hong Kong for Mazatlan, Feb. 27.

The whale ship William Thompson has arrived from Kauai, and is undergoing repairs. The damage sustained by the fire is estimated from $5,000 to $8,000.

Nov. 23, sailed from Isle of Wight, John Wesley, Bush for Polynesian Islands.

At Monterey, April 27. U. S. Ships Columbus, Preble, Warren and Lexington, Transports, Xylon, Mt. Vernon, Loo Choo, and Thomas Perkins The Xylon and Mt. Vernon, for this place in a few days. The Brutus Transport, arrived at San Francisco, April 17, from New York in Nov., with troops, stores &c. The Currency Lass was loading at Bodega with lumber for the Bay, but it was doubtful whether she could land her cargo, as Com. Biddle had decided to enforce strictly the law prohibiting the coasting trade to foreign vessels. Vessels from New York now clear coastwise for Oregon.

The Cowlitz, Henry and an English Brig, were at the River when the Toulon left.

A CARD.

Koloa, April 26, 1847.

Dear Brother Damon,—Permit me through "The Friend," to acknowledge my obligations to the foreign residents of Koloa, for their liberal donation of $119 00, to replace my Library, which was destroyed by the late flood at this place. May that blessing which cometh from above, and addeth no sorrow, descend upon those who have thus manifested their sympathy towards me in my time of affliction.

JOHN F. POGUE.

SELECT SCHOOL.

THE third term of the Select School will commence on Monday, May 24th; Tuition per quarter of 11 weeks.

For higher branches,	$10 00
" Common "	8 00
" Beginners,	6 00
" Incidental expenses,	25
" Furnishing desks,	75

Honolulu, May 15, 1847.—tf.

$500 REWARD.

Whereas, it has come to the knowledge of His Majesty's Government, that a secret *Lodge* or *Society* of rogues has existed and still exists at Honolulu, banded togother by an oath of fidelity under a desperate leader, (said to be about forty-five years of age, and once a man-of-war's man) and whose object is to get possession by stratagem of His Majesty's yacht, Kamehameha III., or some other fast sailing vessel, to cruise in these seas for purposes not yet disclosed, but believed to be piratical, and whose presence in this kingdom is dangerous to persons and property, the above Reward of Five Hundred Dollars, will be paid from His Majesty's Exchequer, to any person or persons who will give information that will lead to the detection and conviction of the whole or part of said *Secret Lodge or Society*.

It is believed that they have in their possession a new figure head, and a stern board to supply the place of the crown on the stern of the Kamehameha III. They have also sets of false papers and flags to be used as required. One set is Mexican. They designed to take the Kamehameha III., by taking passage in her for Maui, with their arms concealed in their chests, and to overpower the crew on the passage and put them ashore on Lanai. These particulars may aid in their detection, and put all persons on their guard against their attempts.

Honolulu House, May 1, 1847. tf

NAUTICAL ACADEMY.

MR. M. PAGE, late Master of the Schooner Mary Ann, having opened an Academy under the Bethel, has taken this opportunity of informing the public that he will instruct in the several branches of Trigonometry, Geometry, Navigation, Astronomy, &c. &c. He will also instruct in Reading, Writing, Geography, and the various branches consistent with a sound education.

Hours of adults, from seven until nine o'clock P. M. Hours for the attendance of the half whites, from 2 until 4 P. M.

N. B. Application under the Bethel at the above named hours will be strictly attended to.

GEORGE RISELY,

BUTCHER AND GENERAL MEAT SALESMAN.

GEORGE RISELY begs leave most respectfully to inform the residents of Honolulu and shipmasters generally, that he has taken the stand owned by Mr. French, and lately occupied by Messrs. Robinson & Co., where he is determined to sell none but the best of meat, and trusts that by cleanliness and strict attention to his business he may merit a share of public patronage.

G. R. trusts nothing shall be wanting on his part to give satisfaction to those whom he may have the honor to serve.

N. B. Ox Tongues and Corned Beef cured in a superior manner.

Honolulu, March 15, 1847.—tf

R. VIDA & VON PFISTER,

WILL keep constantly on hand a general assortment of Ship Chandlery, Provisions, &c., usually required for whale ships touching at this port for recruits; and will supply them at the lowest market prices for cash or Bills of Exchange on the United States, England and France. f 27tf

NOTICE TO SEAMEN.

For the information of stranger seamen, visiting the Port of Honolulu, the Seamen's Chaplain would give the following notices, viz :

Religious services every Sabbath morning at 11 o'clock, and Sabbath evening at 7 1-2 o'clock, at the Bethel. On every Thursday evening a religious meeting is held in the Vestry Room, under the Bethel, and the Seamen's Concert for Prayer, on the third Monday evening of every month, at the same place.

A weekly temperance meeting of the Oahu Temperance Society is held at the Vestry Room, at which seamen are invited to attend. Should any desire to sign the pledge, they are invited to call at the Chaplain's Study.

All seamen are invited to call at the Chaplain's Study, where they can be supplied, gratuitously, with Bibles and Testaments, (in various languages) religious books, hymn books and tracts ; also, with copies of the Friend. The Chaplain has constantly on hand back volumes of the Friend, neatly bound, which will be furnished to seamen at a *reduced* or *cost price*.

☞ The hours between 2 and 4 o'clock, P. M., every day, the Chaplain will be found in his Study, and most happy to receive visits from his seafaring friends. Inasmuch as many call at the Bethel, supposing that they will there find the Chaplain, please take notice that the Chaplain's Study is adjoining his dwelling house, in the street near the west end of the Catholic Church. Over the Study gate, SEAMEN'S CHAPLAIN. tf.

I. H. WRIGHT,

PAINTER & GLAZIER, has lately received and offers for sale,

Wants of Seamen.

No. I.

MR. EDITOR,—I have been more or less thrown into contact with this class of men for two years past, and perhaps a few suggestions upon the above topic, which have often occurred to me, may not be unprofitable to your readers. Though applicable to sea-faring men in general, they have particular reference to *whalemen.*

A sailor wants—

1. *A fair understanding as to the voyage before entering upon it.* This he does not always get. It may sometimes be his own fault. The buoyancy of youth brightens the dark horizon, smooths the rough seas, amplifies the narrow accommodations, and softens the hard words and the hard fare incident to the life he covets, and little does he think and less does he care as to where, with whom, and how long his home is to be upon the ocean wave. Without a tear he turns his back upon the dull scenes of his childhood, and with the blue deep in his eye, merrily shakes off the habiliments of the landsman, and with tarpaulin and trowsers welcomes mast head, windlass and helm. He makes few inquiries, and gets or cares but for little knowledge of what is before him. This is both his fault and his misfortune. His fondness for sea life must amount to a passion if stern usage and hard work do not dash his hopes and sadden his heart. But he has no one to blame. His own imagination blinded his eyes and thrust him into his prison. Be his bed hard, his fare coarse, his labor perilous, his thoughtlessness incurred them, and he must bear them; the fault is his own. He must abide his time, as patiently and cheerily as may be—meanwhile dreaming of his praying mother, and sighing for his home.—Had he known where he was to make his bed, with whom and how he was to eat, what perils and escapes of wrecks and flukes he was to meet, he would have thought old ocean a deceiver, and the oil of her monsters easier *bought* than *obtained.* Perhaps his disappointment will wear upon him and sicken him of his adopted element; if so, Jack will become landsman again, having learned one valuable lesson, to "*look* before you *leap.*"

Some do "look." They have before hardened their hands to the same work, and their ears, and perhaps their tongues, if not their hearts to sea profanity, and often to obscenity. Though in one sense it is often "in the *dark,*" yet they know where they are to "leap." They know the "dark hole" under the bows of the ship; they have sat down to their "grub" on the deck or on their chests, or under the lee of the bulwarks; they have dodged to escape the fragments of their shivered boat, and heard the "whiff" of the descending fluke that hurried their less fortunate shipmate into eternity. They have tugged long at the dying whale, which perhaps, at length sunk from their reach, leaving them through sudden fogs and with much weariness, and with no prize to repay them, to toil back all day, over a "chopt sea," to their lost vessel, and perhaps an ordinary supper. All this they know, and they will have it again. Perhaps they have no better home on land, or having a better, still love the exposures and excitements of the worse. They enter the lists again, and if not trampled on by their superiors, these sturdy fellows will fill the ship with little trouble to her officers, only anxious of promotion, or content at their voyage's end, to draw their well earned "shares." They have got what they expected, a sailor's berth and a whaleman's toil, rigid rule and a full ship. They have generally no ground of complaint.

But there is a class who *have.* It would be foolishly credulous to believe every tale of abuse that reaches our ears, yet if the word of officers and men can be at all relied on, there is on the part of those who ship men, a *gross amount of deception* practised in the whaling fleet. Flattering and often false representations are made of the ship, its accommodations, character of the master and officers, shortness and profitableness of the voyage, &c. &c., thus creating expectations which the first day at sea dooms to disappointment and chagrin. Perhaps it is his first voyage to sea. No matter what cause led him to the enlisting office. There or from the owners or the master he receives such replies to his inquiries as induce him cheerfully to give in his name. He takes the boat or car to the place of departure. He is provided at the shipping establisnment with a chest and clothes suitable to his new life. He looks at his bill, then looks again, but he tries to suppress the growing conviction that it is *rather* extravagant. But the Master seems obliging, and the officers are familiar and pleasant, the ship is newly painted and in trim, and a merry song reaches his ear from her jovial "tars;" the sky is fair and the wind favorable, so he looks at the stars and stripes waving at the stern, and gladly hears the clanking of the cable that is to go down again in distant waters, and bind him to a strange soil. All ready, he is taken aboard. A strange kind of sensation creeps over him as he stands upon the deck and recognizes himself a "raw hand." But he has hardly looked *down* where he saw his chest go, and wondered why it should be thrust into *such* a hole, when a stern voice from the starboard quarter orders his trembling limbs aloft.—He thinks that *somebody's* voice has very *much changed* in tone, but "loose the jib," and "shake out the fore-topsail," startles him to do *something* and go *somewhere.* He is naturally awkward in his first attempt aloft, and a louder voice hurls an *oath* after him that nearly brings him to the deck. "What," thinks he, "*it was a law of the ship that no profane language should be used on board!*" Perhaps *another oath* from the consistent master, or under officer, breaks for a while his reflections, while he exerts himself to his utmost at his work, to save them another curse and his own feelings further pain. Sails unfurled and anchor hauled in and made fast, the ship fills away and sails quietly out to open sea. The halyards properly adjusted, and the decks clear, he begins to think of where he is to lodge, and with whom he is to associate. The lewd song and the profane words of those about him, send the cold chills over his frame, and he shrinks inwardly from their companionship. He asks himself "are these the 'likely chaps' I was told would be my shipmates?" The most unpleasant anticipations begin now to cloud his brow. He ventures at length to ask for his berth, and he is pointed where he saw his chest go down. He approaches and looks down. "But I was told," he says to himself, "that the accommodations were every way comfortable." He undertakes his descent, and the first step sickens him; but he "plucks up," and through bilge stench and tobacco fumes, his ears meanwhile pained with oaths and ribald songs, he makes his way to the *place* for which he has exchanged his own soft bed and cheerful lodgings. He throws himself in, but not to rest. He listens to the loose talk of older tars, and realizes that he must be like them or be alone,—go along with their muddy current, or make head against it if he can. He learns that he is bound for *three* years instead of *two*—that the ship is *old and leaky* instead of *new*—that he is to have *no Sabbath*—that the *books are not for foremast hands!* He shrinks from the prospect before him, and he would give all the oil of all oceans could he be freed from his prison. In short, he finds himself *grossly deceived.* Naturally enough his heart resents the injury. What wonder that dissatisfaction exists among this class of seamen, and what else can be expected but that they should seek their discharge or discharge themselves at the first port they enter? Though this is not the class to give the most trouble, yet who can blame them if they should make some. Sailors are often unreasonable,

as well as their officers, and it is generally a dissatisfied and worthless set that desert and give most offence to their superiors, yet who will not say, but that the deceived class I have mentioned above, are the injured party. Justice would respond "Amen" should they *demand* a discharge, and make the guilty party smart for their deception.

It is to be regretted that offices for enlisting whalemen are ever opened in cities distant from the places of departure. But the number of seamen required in this service created the necessity. But no plea of necessity can justify deception. Better leave the king of the deep undisturbed in his dominions, and their own purse to a lighter burden, or to emptiness, than man their ships by means so detestable. Let young men know *where* they are bound, *who* they are going with, what *treatment and accommodations* they may expect, that *hard work and dangers* are their lot, nor *overrate* their *shares*, nor *underrate the duration of their voyage*. In a word, *be honest*, and honesty here, as every where else, would be found the best policy. One great source of discontent would thus be removed and a great favor conferred both upon officers and crews.

T. DWIGHT HUNT.

Missionary Department.

For the Friend.

Biographical Notice of Mrs. Andrews.

Mrs. Parnelly P. Andrews was born June 12th, 1807, in Woodbury, Connecticut.

Of her early years the writer of this communication knows but little. From early childhood, she seems to have possessed an ardent thirst for knowledge, and to have been distinguished for her diligence in acquiring it.

When fourteen years of age she became hopefully pious. The following extract of a letter to a young friend, contains a brief account of her conversion:

"I have, sometimes, an almost overcoming desire to see you and tell you what I once could not. When you left this place, you were thought to be in a decline; but I am happy to hear of your recovery, and I think it calls for your gratitude to Him, who has prevented wasting sickness from laying you low in the dust, in the morning of life. But probably you will think it strange to hear the once thoughtless P. telling of gratitude to God. It is strange, and possibly you may take it for jesting; but believe me, my friend, there has been an unspeakable change in my views and feelings since I saw you; a change which I can ascribe to nothing but the grace of God. He saw me madly rushing into remediless ruin, and he pitied me. Like the troubled sea, I could not rest. Yet I was insensible of danger. I thought not of the wrath to come, when suddenly the glittering sword of Divine vengeance was shown me, hanging directly over my head. The thunders of Sinai sounded in my ears. The flames of destruction seemed to be kindling on every side. I desired a place of refuge, yet for a long time I lingered. I could not bear the thought of forsaking all and spending the remainder of my days in gloom and dejection; for such was my idea of a religious life. At length, after a long contest, overcome by the love of God to sinners, my stubborn heart was brought to bow. The blood of Jesus Christ was applied, as I trust, to cleanse my soul from guilt. (I John, 1: 7). Light was diffused through my path. My joy was great. Unspeakable love glowed in my heart."

Soon after her conversion she commenced a journal, which, while it indicates a maturity of mind unusual in one of her years, discloses what is of far greater value, a heart deeply imbued with the spirit of her Divine Master. It betokens also a watchful jealousy of the workings of the mind and an intense longing for conformity to the will of God, and for increasing resemblance to His character.

On the first sabbath of January, 1822, in the fifteenth year of her age, she united with the church in Woodbury, under the pastoral care of Rev. S. R. Andrews. This was a season, to which she loved to look back, and especially when revolving seasons brought its anniversary. The act of publicly professing her attachment to the Savior and to His cause, had been a joyful one, for love constrained her. At the time, she felt that she should never regret the act. The Savior had required it, and He had connected with it an act of His which would consummate her felicity among the redeemed. "Whosoever shall confess me before men, him will I confess also before my Father." (Mat. 10: 32). It was an act like true repentance, not to be repented of. (II Cor. 7: 10).

Having lost the use of her left arm by a fall on the ice, she entered with zeal upon a course of study, in order to fit herself for the responsible duties of a teacher. If she thirsted for knowledge, it was because she considered knowledge an instrument of usefulness.

Nor was she less diligent in cultivating an acquaintance with the Bible. She loved the word of God; she hid it in her heart; she pondered it. It was a lamp to her feet and a light to her way. In this most important of all studies, she enjoyed the privilege of Bible class instruction under the care of her excellent pastor. One of the exercises was to prepare written answers, accompanied with reflections, to a series of questions upon portions of the sacred scriptures. These exercises have been preserved, and they show how familiar the writer was with the word of God, and they indicate progress in heavenly knowledge. The quotations are numerous and appropriate, and the reflections show that her heart was in the study. She was growing in grace as well as in knowledge.

She early forsook the society of the gay and frivolous, and would never mingle in those large circles, where the children of God are so often led into temptation. In pursuing this course she was not actuated by feelings of misanthropy. She had found access to the fountain of living waters, and, in consequence, had lost her relish for the streams of time. Having tasted spiritual joys she thirsted not for earthly pleasures.

When 18 or 19 years of age, she commenced teaching, in which employment she continued until summoned in the fall of 1835, to attend her dying mother, and scarcely had she performed the last offices of filial affection for her mother, when her father was seized with a violent inflammation of the lungs, which ended his days. Thus was she bereft of both her parents in the short space of one month.

Though weighed down, at times, with the consideration of her responsibilities as teacher,—with the reflection that she was helping to form characters for eternity, yet she delighted in her employment, and was successful in an unusual degree in imparting instruction, and in acquiring the affection of her pupils. When far removed she maintained a constant correspondence with many of them, from whom she often received valuable tokens of their affection for her, and of their interest in the cause of missions.

The following extract from her correspondence of 1830, portrays some of her feelings, and shows that she had at heart the best interests, both intellectual and spiritual, of her pupils.

"Ever dear Friend:—After the busy yet pleasing employment of the day, I seat myself at the side of Ellen, (who is practising in the most delightful exercise of writing composition,) for the novelty of writing a letter. Our school consists of 21 scholars. Next week the number will probably be increased to 25, and we can admit no more, consistent with the *best interests* of all concerned; and those interests I shall consult in preference to my own. I could take passable care of 35, but I can never be satisfied with that. To see parents at the expense of sending their children to school, and furnishing them with facilities for acquiring a good education, and then not have them improve, is painful in the extreme. I prefer self-sacrifice.

Did you ever feel upon your spirit an almost insupportable weight of responsibility, in view of having charge of immortal beings? I verily thought, this morning, upon entering the school-room, that I should sink under the burden. The idea of contributing in any degree to the formation of characters for eternity, overwhelmed me. I felt incompetent to the task before me, and it was only

by silently, though tremblingly seeking strength from the Almighty, that I could proceed with the duties of the day. In such seasons of sensible weakness, how precious is the privilege of prayer! And after having obtained the mercies sought, how evanescent appears the world and all its vanities! And how the soul pants to wing its flight to its only satisfying portion, the glorious source of perfect happiness!"

From the time of her conversion, she manifested a deep interest in the cause of missions. In a letter to a friend she says, "When I first gave my heart to the Savior, my mind was immediately directed to the condition of the heathen. The love of Christ seemed so great, that I wished all to share it. The idea that so many millions had never heard of that love, affected me, although then a mere child." At that time she made known her feelings to her friends, and requested to receive such an education as would prepare her for the missionary work. Efforts made by individuals to dissuade her, only increased her attachment to the good cause. Years passed, but her interest was undiminished.—Whenever she thought of the poor, perishing heathen, she was unhappy. The woes of of six hundred millions sitting in midnight darkness were before her, and allowed her no longer to stifle convictions of what seemed duty.

She consulted with her pastor, but while the subject was under consideration, she was visited with dangerous sickness, during which she says, "A horror of great darkness filled me with anguish. I felt that I had neglected duty, and then, with eternity in full prospect, I promised that, if my life should be spared, and Providence should prepare the way, I would forsake all for Christ."

A few years pass, and Providence opens the way for her to become a missionary of the cross. Late in 1836 she was united in marriage to Dr. S. L. Andrews, and bade a last adieu to friends and native land. And will she not repent of her decision, and wish herself back among the scenes and the friends of her youth? No. She had counted the cost. To a friend who proposed questions of this kind, she replied:

"Long have I pondered the momentous question;—
Have thought intensely, and in earnest sought
Divine direction;—and in view of all,
Have said to ills and dangers, welcome
For the sake of Christ. Welcome the trying hour,
When that most bitter, bitter word, FAREWELL,
Shall make me feel that I am living now
For my dear Savior,—and for him shall leave
My native land, committing life to him
And every interest; hoping thus to be
A humble instrument in the great work
Of bringing back to its allegiance
This rebel world. And when the last, loud trump,
Shall wake my slumb'ring ashes from the tomb
In a far, heathen land, I fondly hope
To hear the plaudit of my Judge, in view
Of *this important act;* I hope to meet
On Zion's plains above, all the dear friends
I loved on earth, and with them celebrate
The praises of our King and Savior, God."

On missionary ground, she was ardently desirous of being engaged in her loved employment of teaching, and occasionally and for short periods, her desires were gratified. But the professional duties of Dr. A., the only physician for the six stations on the island of Hawaii, called for frequent and protracted visits, in which she usually accompanied him. Thus, in consequence of her peculiar circumstances, much of her missionary labor was performed in the sick room.—When she did not accompany her husband in his visits to other stations, she, in a manner, performed his duties as physician, and manifested much judgment and skill in the healing art.

Once and again was she bereaved of a beloved child, the first a little less, and the second a little more than a year old, but she did not murmur. She felt that she needed purifying, and she would rather be subjected to such a furnace, than not to have the process going on. In those hours of inexpressible solicitude and anguish, when with a mother's love, she was watching a dying child, was manifested the strength of her faith and of her confidence in the goodness and wisdom of her Heavenly Father. If at such a time, with the Hebrew Prophet, you had made the inquiry, "Is it well with thee? Is it well with thy husband? Is it well with the child?" You might have read on her countenance the answer, "It is well." The Savior once said to Paul, "My grace is sufficient for thee," and she could testify that His grace was sufficient for her in every trial. Two or three weeks after her first bereavement, she writes, "I can see that I needed this very affliction. My Father knew it. His holy will be done." Thus meekly did she receive the chastisement of her Heavenly Father, believing with child-like confidence, that "Whom the Lord loveth He chasteneth."

And soon after her second bereavement, when her husband was confined to his bed by an attack of dysentery, she manifested the same cheerful resignation, notwithstanding that her anxieties for him must have been greatly aggravated by reflecting that her little Lucy had died of the same disease. During his sickness, also a native boy died in his house, of inflammation of the bowels; a circumstance which tended to increase her solicitude. Yet when his case was most alarming, and during all his subsequent illness, even when for weeks and months together, he was subject almost daily to seasons of the deepest depression, she manifested the serenity of one whose trust is in the Lord.

But she was approaching the end of her course. Her last illness was brief. After danger was apprehended, only a few hours were allowed her to set her house in order. When informed that death was near, she received the tidings with calmness; said that her trust was in the Savior; committed her children to the care of Mrs. Thurston; disposed of some articles as tokens of affection; commended herself and all dear friends to her Heavenly Father, and her work on earth was done. As a mother, she had ever been most deeply solicitous to train up her children in the nurture and admonition of the Lord. Two preceeded her to the world of light and two survive. May those who survive give their young affections to God that they may be prepared to join their mother and sisters in heaven. In the conjugal relation she was equally faithful, ever kind and affectionate; but the summons came and she departed. Paul had a desire to depart and be with Christ, which is far better than a continuance here. Mrs. A. is now, we doubt not, with the Savior, and she must be unspeakably happy. Blessed are all they who so live that the Christian's death and the Christian's eternity will be theirs.

Origin of the Polynesian Tribes.

In the July number of the North American Review, 1846, there is an interesting article reviewing "Ethnography and Philology," by Horatio Hale, Philologist of the U. S. Exploring expedition.

Upon the following extract from Mr. Hale's work, the reviewer offers some remarks, which will be found below.

"As the examination of the customs and idioms of the Polynesian tribes leaves no room to doubt that they form, in fact, but a single nation, and as the similarity of their dialects warrants the supposition that no great length of time has elapsed since their dispersion, we are naturally led to inquire whether it may not be possible, by the comparison of their idioms and traditions, and by other indications, to determine, with at least some degree of probability, the original point from which their separation took place, and the manner in which it was effected."

"By this point our author means, in the present inquiry, the island or group in the Pacific which was first inhabited, and which bore to the rest the relation of the mother country to the colonies.

"Mr. Hale pursues the investigation with great care and ingenuity. He examines the grammar and vocabulary of the various dialects, and finds many forms in those of the western groups which are entirely wanting in the eastern tongues; others, which are complete in the former, are found defective in the latter, and perverted from what seems evidently their original meaning. A similar examination of the religious characteristics shows that in the west a simple mythology and spiritual worship exist, which are perverted, as we advance towards the east, into a debasing and cruel idolatry. The fashion of tattooing also, which, in Samoa and Tonga, is intended to answer the purposes of decency, has degenerated elsewhere into a mode of ornament.

"At one of the Hervey Islands there is a tradition among the inhabitants that their an-

cestor ascended from a region beneath, called *Avaiki*; a similar tradition prevails among the Marquesans, who give to the region the name of *Havaiki*. This name is evidently connected with the *Hawai'i* of the Sandwich Islands; and all these terms are the precise forms which the name of the largest of the Navigator Islands (Savai'i) would assume in the different dialects. Mr. Hale thinks, that by following this clue, the different tribes of Polynesia may all be referred back to their original seat. In fact, the dialectical changes which this name would undergo, according to the rules laid down in the comparative grammar, are:—

"1. Original form,	Savaiki.
2. Samoan dialect,	Savai'i.
3. Tahitian,	Havai'i.
4. Sandwich Island,	Hawai'i.
5. Rarotongan and Mangarevan,	Avaiki.
6. Nukuhivan,	Havaiki.
7. New Zealand,	Hawaiki."

"This name, therefore, our author considers, with strong reason, to be the keyword of the Polynesian migrations."

Communications.

The following commucication was received some weeks since, and should have appeared at an earlier date, but it was accidentally mislaid. EDITOR.

YERBA BUENA, California, February 6, 1847.

The town of Yerba Buena, situated in the Bay of San Francisco, in all probability will be the principal seat of business in California, as the majority of the mercantile gentlemen on the coast have located themselves at that place. The little town of Francisca, however, situated on the opposite side of the Bay, will also in course of time, be one of the principal cities of California. Lately, great preparations have been made in Yerba Buena for a large city; a gentleman at present is busily engaged in surveying the place, and laying out streets, and there would be a very rapid increase of buildings, were it not for the scarcity of lumber. Two vessels, however, the Moscow, Capt. Phelps, and schooner Juanita, Capt. Youngs, sailed a week or two since for Bodega, for cargoes of that much required article.

Owing to the number of families who have lately come into Yerba Buena, some have been obliged to occupy sheds that were formerly henroosts for the Californians. The majority of the residents are Mormons, who I am happy to say seem to be a most industrious people.

There has been a great deal of rain this season in California, which has given much encouragement to the farmers, as they anticipate great crops.

In a few months we are in hopes of having a wharf built off the town for the convenience of boats and vessels discharging their cargoes, as at present you can only work by the tides, which undonbtedly causes much detention to the vessel, loss on the part of the owners, and the danger of damaging goods in landing.

The Californians mostly reside on the opposite side of the bay, on their ranchos, but frequently come to Yerba Buena, bringing potatoes, onions, butter, and such other articles as they have for trade; at present, however, all kinds of vegetables are very scarce and much needed, owing principally to the great consumption of the U. States' forces. But now as the war is at an end, things seem to revive. The Californians have again resumed their much admired dances, and all things seem to go on as formerly "*con mucho amistad.*"

New York Correspondence.

NEW YORK, Sept. 22, 1846.

REV. S. C. DAMON:

My dear Sir:—Since your "New York Correspondent" last wrote you, our political waters have been seriously disturbed. The last session of Congress was one of great interest, and its acts affect deeply most of the business pursuits of the land. The party in power succeeded in carrying through what are called the sub-treasury plan of finance, the modification of the tariff of 1842, the warehouseing system, and the loan bill.—Some of the best minds and hearts in the nation opposed these measures; and some predicted the most calamitous results to all the departments of business. All protection to home industry, said they, is gone by the board; the principles of fair, reciprocal trade are abolished; and all motive to start and prosecute any honorable business is annihilated. And such for a time seemed to be the result. The manufacturers looked like a fleet of Cape Ann fishermen hesitating whether they shall put to sea in the teeth of a threatened northeaster. The mechanics laid down their tools and began to "cipher;" and the independent farmers even, began to aver, that if the manufacturers and mechanics are thus reined in, they will have no money to pay us for the productions of the earth, and we may as well shut up shop too. These sombre apprehensions, I am happy to say, are not, and will not be fully realized. Some of the Departments of business must of necessity be injured; but there is too much mental elasticity and genius and indomitable perseverance in this land to have any legislation, however bad, completely ruin us. And I may add, that strong as is the power of party, *self-interest* is mightier, and will rectify mad legislation rather than run into universal bankruptcy.

The French newspapers are scolding us soundly for our tariff restrictions; just as they scold you; and we are quite willing they should scold themselves into a good humor in respect to the taxes laid upon their luxuries. We can do without them; and in respect to many of them, it would be an immense gain to our morals to have them kept at home or sunk in the ocean. Pity that the tax on brandy had not been 1000 instead of 100 per cent. At present our trade with Great Britain is in our favor. We send to her more goods than we receive in return, so that a considerable cash balance is credited to us. The abolition of her corn laws is an immense boon to her poor as well as a blessing to the farming interests of the United States. This year the "bread stuffs" of this land are immense. Not only the valleys but the hills are covered over with corn. Money is plenty. Industry is amply rewarded. Wherever it is possible every rail road is stretched and the speed thereon increased. New rail roads are projected to day and completed to morrow. The rates for fare and freight have been considerably diminished. A road from this city to Boston has been projected and chartered, and the books are now open for subscriptions to the stock. I do not believe the books at the termini of the rout will be open a week before all the stock will be taken. Shortly we may breakfast in one city at 6 and dine in the other at 1 o'clock!

Our lightning communications are in full operation and are extending. My paper, left at my door at sunrise, brings me intelligence from Baltimore, Buffalo, and Boston of *last evening!* What are we coming to! or rather what is coming to us! Would 'nt you like to live in the 20th century, and witness the improvements in the arts and sciences in their influence on the character and destiny of man! And especially to mark the influence of all these improvements in facilitating the progress of the gospel! Such will doubtless be the results as to make both angels and men rejoice. The world belongs to God—not to Cæsar—and his promises secure to it a golden age of social and moral improvement. Blessed the man who understands and appreciates the privilege of the living, and right-acting now. Better live now than in the millenium. There is more work to be done, more self denial to be practised, and a proportionately greater reward to be gained.—Let us not then be weary in well-doing. Pull away at the ropes on your side of the globe, and we will pull on our side, and with divine assistance our success will be great and our reward blessed. As ever, Yours, J. S.

Sailor's Correspondence.

SHIP CITIZEN, NORTH PACIFIC OCEAN, April 18th, 1847.

MR. EDITOR:—I will, with your leave, as I have an hour of leisure time, while away a part of it by giving you a narration of our passage from America to the Sandwich Isl-

ands. It was on the morning of the 19th of September, bidding adieu to friends and home, with a fair wind and pleasant weather, we sailed from Sag Harbor to encounter the dangers of a whaling voyage.

The first land we made was the Cape de Verds; on the morning of the 14th of Oct. we passed between the islands of St. Vincent and St. Antonio. It being just at sunrise, their lofty hills and pleasant valleys gave to one's eye a most beautiful and picturesque appearance. We sailed on without incident of importance, crossed the equator on the 22d, in longitude 17° 23′, and much to our gratification by being made sons of Neptune without the old monarch's paying us a visit, and the initiation usually practised on such an occasion. Oct. 29th, losing what oil we had on board for ship's use, we lowered and took two out of a school of blackfish, which made about five barrels of oil, and on Thursday, Nov. 26th, in latitude 42° 25′ S., longitude 52° 20′ W., we took our first whale. We lowered away and fastened; he run, rolled about, and lashed the waters to a foam; but with well-experienced officers, and willing hands we soon conquered the great monster of the deep, and secured him along side.—We cruised about two months in nearly the same latitude, and in the short space of a month and ten days, we took five hundred and forty barrels of sperm oil, and at the close of a month and twenty seven days, we had six hundred barrels of sperm oil, and one right whale. Our cruise being up, we sailed again on our course. Saturday the 7th of February, we rounded Cape Horn. We had not a very serious time, but long and tedious, with head winds and blustering weather. After rounding the Horn, we laid our course for the Islands of Juan Fernandez.

We made the island on the 4th of March, and went ashore to get some fruit, but to our sad disappointment, fruit was not ripe, we came on board, set things to rights and made straight wake for the Sandwich Islands, nothing more of importance transpiring on our passage. Yours very respectfully,

AMBROSE M. GARD,
From the Forecastle.

☞ A slave master of Jamaica, when in the act of applying the lacerating whip to a poor slave, said to him, "What can Jesus Christ do for you now?" "Him teach me to forgive you, massa," was the reply.

☞ There is a law in Holland which obliges the government to bring up, at its own charge, the seventh child of every family in which there are already six living.

☞ Believe about a sixteenth part of what you hear, and possibly you may be near the truth. If you believe a quarter, you are green; if a half, you are soft; if the whole, you are a fool.

THE FRIEND.

HONOLULU, JUNE 1, 1847.

"At a late temperance meeting in Norwich, Conn., Cha's W. Rockwell, Esq. stated as a fact illustrative of the progress of the temperance cause, and of the homage done to that cause by men who did not, personally practise upon its principles, that one of the standing regulations of the Tremont House, the most fashionable Hotel in Boston, was, that every person in and about the establishment, in the capacity of waiter, servant, &c. was required as one of the first and indispensable conditions of his receiving employment there, to "sign a pledge of total abstinence from all that can intoxicate."

The above extract is copied from a late American paper. Such tributes to the beneficial effects of temperance principles are abundant. We could, for example, mention names of masters and owners of ships, who will not allow their sailors to taste a drop of intoxicating liquors during the passage from port to port, yet those very masters and owners are engaged in a domoralizing spirit-traffic that is perpetuating drunkenness over the world. For ourself, we could, with Hudibras, as soon see the difference between the "south and south-west side of a hair," as perceive why selling rum by the hogshead was any more respectable than dealing it out by "the glass!" Yet the world makes a difference. If it be low business to mix a glass of grog for a poor drunkard, it ought to be considered lower to sell enough to make a hundred topers. Yet this is what large spirit dealers are doing, and they can no more escape from the moral guilt connected with their business, than the guilty and unfortunate drunkard can escape the awful consequences of his intemperance. Ere long it will so appear to their minds, however much the golden profits may now dazzle their moral vision.

Oregon.

By the brig Henry, we have received a full file of the Spectator, from No. 1, Vol. I, to No. 6, Vol. II. The editors have our kind acknowledgements for the favor. We have always taken a lively interest in the rising prospects of Oregon. There may be obstacles to the advancement of the people there which those abroad may be unable to appreciate, but from all we are able to gather, an industrious and thriving population will ere long people that region. We are glad to see that the interests of education are by no means neglected, while public roads and other public undertakings are in progress. The establishment of a pilotage at the mouth of the Columbia River is all important. The person appointed for that business, we have heard spoken of as well qualified. See Pilotage regulations in another column.

Dr. Cox and the Theatre.

"Rev. Dr. Cox writing from the World's Temperance Convention, in London, having adverted to the fact that it was held in the theatre, Covent Garden, takes the occasion to say:—

"This is the only time I have entered the *theatre* in Europe, and it will probably be the last. Some men, I chance to know, are very free and cruel in charging the clergy indiscriminately with visiting the theatre, the opera, and other such places of criminal amusement when abroad; but if a very few have in part authorized the calumny, and deserved the censure, I still believe it to be applicable only in rare cases; and none of my friends and companions in travel have I ever known guilty in the matter at all. For myself, I went to such a place for amusement, and as others go, last in the city of New York, in January, 1812, and never since have I gone or desired to go, in a single instance—and this I write for some special reasons."

"What those "special reasons" are, the Reverend gentleman does not say."—*N. Y. Express.*

We cannot confidently assert what those "special reasons" were, but we *guess*, that the Doctor had been reported as having visited the theatre, when on his European tours. Right glad are we to hear his denial of the charge, for even as far off as the Sandwich Islands, have we heard the Doctor's example quoted as authority for visiting such places. Often have we heard the charge brought against American Clergymen, that when abroad they laid aside their puritan principles. It may be true in individual instances, but as a general thing, we believe it false. Among the scores of Evangelical American Clergymen in London, attending the meetings of the Evangelical Alliance and World's Temperance Convention, we do not believe one was found inside of a theatre, or opera house, unless under such circumstances as described by Dr. Cox in the above extract.

Typee,

A Peep at Polynesian Life; by Herman Melville. The publishers, Wiley & Putnam of New York, have issued a second edition of this work, *revised* by the author.—"Several passages wholly unconnected with the adventure, have been rejected as irrelevant. Such for example as those referring to Tahiti and the Sandwich Islands." If the author had erased other passages, we think he would have shown good judgment and exhibited "a sober second thought." Such a course would certainly have led him to suppress some of those glaring facts respecting his habits of gross and shameless familiarity not to say unblushing licentiousness, with a tribe of debased and filthy savages of Marquesas. In chapter XIII, *revised* edition, he refers to an annointing process, performed every evening, when the girls gathered about him on the mats. "I used," he remarks, "to hail with delight the daily recurrence of this luxurious operation, in which I forgot all my troubles, and buried for the time every feeling of sorrow!" In Chapter XVII, revised edition, there is the following remark, "Bathing in company with troops of girls formed one of my chief amusements!!"—Scores, aye, hundreds of passages might be quoted, showing that the writer sunk lower than the debased people among whom he took up his temporary abode.

On the islands of Polynesia, are scattered multitudes of young men from Europe and America, who are living in the same condition of Rosseau-society, and it only needs the pen of a Melville to make such a life worthy of praise!

It surely is not strange that such a man could find but little to praise and much to blame in the efforts of his missionary countrymen. At some future time, we may make additional quotations and remarks upon this book.

☞ A correspondent at Monterey writes thus, under date of April 27. "Mr. Wheelwright, the able originator and manager of the Steam Company in the Pacific, has gone from Lima to the U. S., to arrange for the carrying of the mails by steam from California to Panama." May success attend the enterprize.

Mexican Church Property.— The question has been seriously discussed in Mexico, of raising $20,000,000 by the "hypothecation" of Church property. According to the latest reports, a decree had passed the Mexican Congress, to raise $15,000,000 on the property of the Church.

NOTICE.

☞ A Lecture will be delivered at the next meeting of the Oahu Temperance Society, on Friday evening, June 4, by His Honor, William L. Lee. The community are respectfully invited to attend. Per order.

An act for the establishment of a pilotage on the bar of the Columbia River, and from thence to the limit of navigation on the Columbia and Willamette Rivers, Oregon Territory.

§ 1. *Be it enacted by the House of Representatives of Oregon Territory*, That the Governor, with the advice and consent of four commissioners, to be by him selected and appointed, may examine candidates for the pilotage, and appoint one or more suitable persons to be pilots on the bar of the Columbia river, and to the head of navigation on that and the Willamette Rivers, giving each of the said pilots a branch or warrant for the execution of his office, with authority to appoint deputies in the cases, to be specified in such branch or warrants; provided each pilot shall report his said deputies for the approbation of the Governor.

§ 2. Every such pilot and deputy, shall, before entering upon his office, give bond with sufficient surety, to the Governor of the Territory, in the sum of two thousand dollars for the faithful performance of the duties of his office.

§ 3. Every such branch pilot, is authorized and directed, by himself or his deputy, to take charge of any vessels bound into the Columbia river, except vessels of less than one hundred tons burthen, engaged in the coasting trade, the said pilot first showing his branch or warrant to the master of any such vessel, if required; the authority to take charge having effect only from outside or on the bar, to Baker's Bay.

§ 4. The pilot or pilots appointed, shall always keep one decked boat in good repair, and one or more suitable row boats, as may be necessary.

§ 5. The Governor, with the advice of the commissioners, is authorized to determine the fees of pilotage of the pilot or pilots by him appointed, and to specify the same in their respective warrants.

§ 6. If any vessel, while under the charge of a branch or warrant pilot, or his deputy, shall be lost or run aground, or sustain any damage, through the negligence or unskillfulness of such pilot or deputy, such pilot shall be liable, both for himself and his deputy, to pay all damages sustained by any person interested in such vessel or her cargo, and may, moreover, be removed from his office.

§ 7. Any master of a vessel, other than such as are excepted in the third section of this act, who may choose to pilot his own vessel, from outside the Columbia bar to Baker's Bay, across said bar, shall be permitted to do so, but he shall notwithstanding, when bound into the river, pay to such pilot as shall first come on board his vessel, outside of the bar, one-half the pilotage according to the fees specified in his warrant; but in case no pilot shall come on board his vessel outside or on the bar, he shall be exempt from paying any fees for pilotage.

§ 8. It shall be optional with ship masters, to take pilots when outward bound, and no payment shall be demanded, unless a pilot shall have been employed.

§ 9. The Governor and commissioners are authorized to hear and determine all complaints exhibited against the pilots appointed by him, as aforesaid, and their deputies, and to suspend or remove them, and appoint others in their place.

§ 10. Should any ship master omit or refuse to pay the pilotage fees in any instance where, by this law he has become liable, then his consignees shall become liable for the same.

§ 11. The pilot who shall board and bring a vessel into port, shall have the preference to take said vessel out to sea upon her departure, provided the master of said vessel cannot prove misconduct or incompetency on his part.

§ 12. That all penalties, forfeitures, and complaints incurred under this act, shall be tried and determined in any court of record having cognizance of the same.

§ 13. It shall be the duty of the Secretary to publish a copy of this act in the Oregon Spectator as soon as practicable.

§ 14. This Act to take effect, and be in force from and after its passage.

Attest, A. L. Lovejoy, Speaker.
N. Huber, Clerk.
Approved, Oregon City, 19th Dec. 1846.

Deception.—All deception in the course of life, is indeed nothing else but a *lie* reduced to *practice*, and *falsehood* passing from *words* into things.—[South's Sermons.

Whoever knew Truth put to the worse in a free and open encounter?—[Milton.

DIED.

Lahaina, May 27, 1847.

Dear Brother Damon:—In looking over your last paper, I find an error or two in the reports of deaths. It is stated that Capt. Edwards, of ship Ann, Sag Harbor, was buried at Lahaina. It ought to be, a native Sailor was buried from the ship Ann, Capt. Edwards, of Sag Harbor. Very truly, yours,

C. FORBES.

Died in the U. S. Hospital at Lahaina, May 12th, Manuel Bartholomew, of New London, where his family reside. Mr. B. was a native of Fayal, and his father and brothers still reside there. He was an officer on board the whale ship Black Warrior; got hurt by a whale, and left the ship at Lahaina, August 1846, since which time he has had severe attacks of raising blood, and died suddenly during one of the attacks.

In the Hospital at Lahaina, May 26, Elisha M. Harrington, aged 21, of Chenango, New York. It is thought his mother resides in Rochester, N. Y. He left the whale ship Uncas, in April last, sick of consumption, and rapidly sunk into the grave.

At the Navy Yard, Pensacola, Sept. 24th, of billious fever, Rev. Charles Henry Alden, Chaplain in the U. S. Navy. He was for many years a very successful teacher in Philadelphia. About five years since he accepted a chaplaincy in the navy and devoted himself wholly to the duties of his office. He preached Christ crucified, and labored diligently to do good to those whose spiritual interests he was appointed to watch over. In his last sickness he manifested an entire resignation to the will of God, and a confident hope of eternal life, through the merits of the Lord Jesus Christ.

Died on the 8th————at Bergen Hill, New Jersey, William C. Wetmore, Commander U. S. Navy, aged 49. Mr. W. entered the naval service at the age of thirteen years, and took part, at that early period of his life, in much active service.—He was in Com. Chauncey's flag ship in his several engagements on Lake Ontario, and took an active part with the naval service at the battle of Little York, where Gen. Pike fell. The services of this gentleman have been very strongly marked by personal bravery—a strict disciplinarian—one of the best navigators of his grade in the service—he was the possessor of all that constitutes an accomplished officer.

PASSENGERS.

In the Francesca for Francisco—Don Osio, lady, five children and two servants, Mr. and Mrs. Ellis and three children, Mr. and Mrs. Lincoln and two children, Messrs. Thomas Douglas, Ridley, Mitchener and Storer.

In the S. S. for Tahiti—Mr. Robert Boyd, Ahsing and five others.

In the Xylon from San Francisco—Mrs. Millington, Messrs. C. F. Lafrenz, Wm. McCloud and Geo. Cupper.

In bark Clement from New Zealand, at Lahaina—Mr. Robert Brankes, lady and 3 children, Mrs. Margaret Rowen.

In the Columbia for Oregon—Benjamin Stark, Jr.

In the Montreal for Hongkong—Mrs. Nye and child, Mr. Eli Jones and Mr. Brown.

In the Xylon for Manila Mrs. Millington.

Per Sarah Ann from China—Capt. Hackford and 2 Chinamen.

MARINE INTELLIGENCE.

PORT OF HONOLULU.

25—Am. ship Montreal, Doane, for Hongkong.

26—Am. ship Xylon, Millington, for Manila.

CLEARED.

Am. bark Toulon, Crosby, for Oregon.

MEMORANDA

Whaleship Jane, Capt. Eddy, of Warren, R. I.—This vessel left here Oct. 15, 1845, with 2900 bbls. of oil, for the U. S. Nov. 18, she was spoken off the Society Islands. Since then up to Dec., 1846 nothing had been heard of her by her owners. From Mr. Vida, of the firm of Vida & Von Pfister of this town, we learn that late in Dec., 1845, or Jan., 1846, he does not recollect which month, the Jane anchored below Point Vincente, near Talcahuana, for potatoes. The officer of the port ordered her to Talcahuana that he might secure his anchorage dues, &c. Capt. Eddy refused to go, and sailed immediately for the Island of St. Mary's—farther down the coast—and anchored at high tide close in. Mr. Vida boarded her to purchase oil, and at the captain's invitation, staid all night. When the tide fell, the ship thumped heavily, unshipped her rudder, knocked in her round house and began to leak. Mr. Vida advised the captain to put into Talcahuana and ascertain damages. He refused to do this, saying that if the leak should prove bad, he could put into Chiloe. The next day he got under weigh and stood out to sea. Since then, nothing has been heard of the ship, and the probability is that she foundered.

We learn that two American whaleships have been seized by the Chilean authorities at Chiloe for sailing through and anchoring in some of the passages between the main land and islands, which is an infringement of the laws of Chile, prohibiting the use of such to foreign vessels. The crews were put ashore, and the case referred for decision to head quarters. Result not known.

Monterey.—Arrived, April 17, Hawaiian schr. Com. Shubrick, VonPfister, hence—advertised for sale.

The coasting trade was still open to neutrals. The Danish schooner Matilda and Peruvian bark Guipuzcoana, were upon the coast; the latter sailed 24th April, for San Francisco; Am. brig Elizabeth, King, for do.

☞ The whaleship Philip Tabb, injured in a typhoon of April 11th, has been condemned.

☞ The Henry left at Columbia River H. B. M.'s ship Modeste, to sail for these islands in a few days. H. B. Co.'s vessels Cadborough and Cowlitz. The American schooner Com. Stockton (late Pallas) had sailed for California.

PORT OF LAHAINA.

ARRIVED.

April 25.—Am. bark Philetus, Hathaway, Stonington, 20 mos., 325 sperm, 500 whale, 225 sperm and 350 whale season.

May 9.—Am ship Rousseau, Smith, New Bedford, 20 mos., 750 sperm, 50 whale, 50 sperm season.

12.—Am. bark Clement, Lane, New London, 10 mos., 60 sp., 250 whale.

May 14—Am. ship Mechanic, Potter, Newport, 6 months 70 sperm.

21—Fr. ship Espadon, Ratau, Nantz, 4 1-2 months, 60 sp., 60 whale.

PORT OF HILO.

During the year 1846, there arrived at the port of Hilo, Hawaii, as follows:

BY ORDER OF THE SECRETARY OF OREGON TERRITORY.

AN ACT to prevent Desertion, and for the recovery of deserting or absconding Seamen.

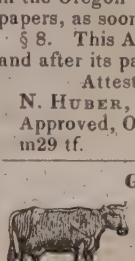
§ 1. *Be it enacted by the House of Representatives of Oregon Territory,* That when it shall be made to appear to any Justice of the Peace, by the affidavit of any person, that any person has deserted or absconded from the service of any master or captain of a vessel claiming the services of such deserting or absconding person, upon contract or agreement made and entered into, either in this or a foreign country, the said Justice of the Peace shall immediately issue his warrant for the apprehension of such deserting or absconding person, and cause the accused to be brought before him, or some other Justice of the Peace of the county in which the original writ issued.

§ 2. The officer having the warrant, or any other person who may be duly authorized to serve said warrant, may arrest said accused deserting or absconding person in any county in this Territory, and bring him forthwith before the Justice of the Peace who issued the warrat, or some other Justice of the Peace of the same county.

§ 3. Upon the trial of the case, if it shall appear that the master or captain of said vessel is entitled to the further services of said deserting or absconding person, it shall be the duty of the Justice of the Peace, or the court trying the same, to cause said deserting or absconding person to be delivered up to the master or captain of said vessel, and all costs shall be adjudged against said deserting or absconding person, and a certificate of the same shall be delivered to the said master or captain, who shall thereupon pay the same.

§ 4. Any person who shall entice a seaman to leave his ship, or who shall knowingly harbor, secrete, employ, or in anywise assist a deserting or absconding seaman, shall, upon conviction thereof, be fined any sum not exceeding five hundred, nor less than 25 dollars for each offence; and all fines collected under the provisions of this Act, shall be paid into the county treasury, and be recovered either by indictment or action of debt, in the name of the county.

§ 5. That every ship master or captain, on the desertion of any of his crew, shall be bound in the penal sum of fifty dollars, to give immediate information of the same to the proper authority.



§ 6. That if the mate or first officer under the captain or master, and a majority of the crew of any vessel or ship lying in any port of Oregon Territory, shall discover that said ship or vessel is too leaky, or otherwise unfit in her crew, body, tackle, apparel, furniture, provisions, or stores, to proceed to sea, and shall require such unfitness to be inquired into, the master or captain shall, upon the request of the mate, (or other officer,) and such majority, forthwith apply to the presiding Judge of the county court, either in term time or vacation, and thereupon, said Judge is hereby authorized and required to issue his precept, directed to three persons, the most skilful in maritime affairs that can be procured, requiring them to repair on board such vessel or ship and to examine the same in respect to the defects or insufficiencies complained of, and to make report to the said Judge in writing under their hands, or the hands of two of them, whether in any, or in what respect, the said ship or vessel is unfit to proceed to sea, and what addition of men, provisions or stores, or what repairs or alterations in the body, tackle, or apparel will be necessary, and upon such report the said Judge shall adjudge and determine and endorse on the said report his judgment, whether the said ship or vessel is fit to proceed to sea or not, and the master or captain, and crew, shall in all things conform to the said judgment. If the complaint of the mate and majority of said crew, shall upon said report and judgment, be deemed just and well founded, the master or captain of said ship or vessel shall pay all costs of such view report, and judgment, and be taxed and allowed on a fair copy thereof, certified by said judge, but if the complaint of the said crew shall appear upon the said report and judgment to have been without foundation, then the said master or captain, or the owner or consignee of such ship or vessel, shall deduct the cost and reasonable damages for the detention (to be ascertained by said Judge) out of the wages coming due to the said complaing mate and seamen or mariners.

§ 7. It shall be the duty of the Territorial Secretary to cause a copy of this Act to be published in the Oregon Spectator, and the Sandwich Islands papers, as soon as practicable.

§ 8. This Act to take effect and be in force from and after its passage.

Attest, A. L. Lovejoy, Speaker.
N. Huber, Clerk.
Approved, Oregon City, 19th Dec., 1846.

For the Friend.

Wants of Seamen.

No. II.

2. *Seamen need better government.* In the minds of some masters, government admits of but three degrees of comparison, *stern, arbitrary, and cruel;* perhaps I should add a fourth, *brutal.* Beyond or aside from this, goes neither their knowledge or their practice. They can seldom give an order without an oath, and almost never without harshness, if not severity. For a trivial offence, which most likely he himself provoked, the offender is lashed to the shrouds and flogged, as one would be ashamed to flog his brute. And even where discipline is not carried to this excess, it is almost universally carried *too far.* However many exceptions there may be, it is a fact that seamen are not governed like reasonable men. They are ordered about more like slaves than men, and that often by those much their inferiors either in family rank, in morals, or intelligence, whose "little brief authority" depends on no other character but their ability to kill a whale and sail a ship. And what may we naturally expect as the result of such treatment? Just what we find. A swearing master hands down his oaths to his officers and crew. A stern order begets a surly reply. Flogging stirs up mutiny. Tyranny drives to recklessness, and threats to boldness in transgression. Trampled on, men will grumble and desert; frowned on at every step, they will inwardly curse their superiors, and defy their authority. Abused for every mistake, or every little fault made a crime, they will be eye-servants, and slight their work, or be provoked to deeds more worthy of punishment. Human nature must be changed, or unreasonable, despotic, or cruel government will every where and always engender discontent and trouble. The more closely confined the combustibles, the more extensive and terrific the disaster.—Our wonder is that such a degree and amount of misrule has not been more prolific of mutiny. "I am God Almighty on board of my ship," was perhaps never seriously upon the blasphemous lips of but *one* man, but the despotism that called forth the shocking expression has often scowled upon the brow, flashed from the angry eye, and forked in rage from the quivering tongue of many an ocean tyrant. But the bleeding backs and crushed spirits of the victims of cruelty will be swift witnesses against their oppressors in the day when God shall "make inquisition for blood."

What an insignificant *thing* is a tyrannical sea captain. A hundred feet by twelve bounds his domain. See his frame, often shaken by his own fears, or by the convulsiveness of his own passions. Hear his hoarse voice, lost in the next wave that breaks upon his quivering ship, or that may be choked in death by the next fly he brushes impatiently from his hardened face. Witness his pride over a few feet of plank and tar, which the next sea may unbolt, or yon lightning cloud consume in flame. With what a step he paces the quarter deck, that at best supports a wicked man, and at night or day shelters a thorny pillow. How his eye scans the frail rigging that may snap in the first blast that dismasts or founders his boasted craft. How imperious his demeanor, how stern his orders, how unmanly his treatment of men whom he must meet at a higher than an earthly tribunal, to feel in his turn justice without mercy, frowns and "stripes" without a remedy. How proud of his authority, when he cannot decently exercise it, much less govern his own spirit.—How little reason has such a man to claim affinity with his race. Of all men he has the least reason to be proud. Could he see himself as others see him, he would be glad of a smaller craft, could he only hide his littleness on a broader ocean, nor care much if disaster or his good fortune should strand him far from the gaze and contempt of mankind. There have been and are unreasonable and tyrannical men. Many have more blood upon their skirts and more unpitied victims to bar against them the door of mercy. But they had objects seemingly more worthy of human ambition. They had a kingdom to usurp, or a foe to crush. Perhaps a world under their feet would make them weep, like Alexander, for other worlds to conquer. But think of *lording it on a whale ship!* Four mates and thirty men to show off to, or keep under by hard words and twisted flax! An *ass* might well whirl his long ears in triumph, could he accomplish such a feat, but MAN on such a pinnacle should get down quick on the other side, and *hang* his for shame!

And yet for this petty tyranny we hear the plea of *necessity.* If so, that very tyranny has created it, and the further exercise of it will increase the demand. The drunkard pleads the same necessity for his cups. He quenches his passion by the very indulgence that afterwards adds fresh fuel to the flame. Iron rule was once thought the only guaranty for national stability, and every crowned head was a despot. But the burden was too great even for slavery to bear. Revolutions have bathed the sword of the oppressed in the blood of some tyrants; philanthropy and the advancing spirit of liberty have softened the hearts and changed the minds of others. Just in proportion as kings have sheathed the sword, and with the balance in one hand and the olive in the other, addressed and treated their subjects as men and sons, providing for their comfort, their education and their salvation, just so far have mankind been conciliated towards good rulers, and advanced in every important relation and interest of life. It is human nature, the fruit of good seed, the worthy and legitimate child of a worthy parent. But the sons of the ocean will always be bastards or deformed, should they always cower under oaths and stripes. But good rule and a just appreciation of men's rights have long been on the advance.—They have been slow in their march on the ocean. But their messengers are abroad over the waters. They have softened many a hoarse voice. They have taken the scourge from the hand of the changed master, and therewith chased from his decks forever the demons of tyranny and cruelty. They have made a beginning, and in time Christian philanthropy and sound reason will create a public sentiment that will complete the good work.

Necessary to be a despot, or nothing, on board ship? Then fear is the only element of true government, and the rod the only inducement to filial obedience. Prove this libel who can. Ten thousand experiences have disproved it. Men must so long have been the objects of misrule and oppression as to have become insensible to the law of love, who in ninety-nine cases out of a hundred, will not feel the force of kindness. A gentle word touches a gentle chord, and in true harmony begets gentle behavior. There have been ship masters in this ocean who might have thrown wide open the door of discharge, and not found a man willing to leave them. There have been others, who must keep their crew on board, or otherwise put them in security, or lose them all. Most find trouble enough on entering port with applications for discharge. Why is it? Not always, I confess, owing to wrong government. In most cases, however, I apprehend it is. What a fruitful source, then, of discontent to the crew and vexation and expense to the master. And with how little satisfaction must those upon whom the blame really rests review a voyage, at the close of which their decks show scarce a man that entered it with them, and whose Consuls' and constables' fees have almost swallowed up the shares that deserters have forfeited. On the other hand, that man has cause of self congratulation who returns home with the crew

he brought out, and, on discharging them there, all paid and in good condition, receives the thanks and respectful salutations of those who would wish no better master at sea or better friend on shore. This may be, and any other state of feeling ought to be the exception. But how rare! How unreasonably, how injuriously, how needlessly, how shamefully rare!

It may not be easy to determine the amount of power that should be vested in a master or under officer. But be it ever so absolute, the abuse of it is always reprehensible and mean. Good discipline should be enforced, but insolent and oppressive exercise of authority deserves never to be tolerated. When this and some associated evils are removed, we may hope that the means employed to elevate seamen will meet with more success. Under the old despotism of the Chiefs of these Islanders, the gospel would have run a short and crippled course. Christianity has been working out their deliverance and their lessening yoke has always reacted in promoting the blessings of christianity. Missionaries may be sent among other oppressed nations, even among the slaves of the U. S., but who is so visionary as to expect their emancipation from sin, while the blight and death grasp of slavery is upon them? While Nero or Hildebrand lives and reigns, safety, truth and freedom die. I am making no comparisons; I contend only for principle. Liberty in connection with judicious and humane government is essential to the best being and progress of any class or people in temporal or religious matters, on land or at sea, from the throne of an empire to the deck of a whale ship.

T. DWIGHT HUNT.

A Sailor's opinion of Ship Discipline.

Rev. S. C. Damon,

Dear Sir,—Since I have been in the Pacific, (about two years) the perusal of your "Friend" has afforded me oftentimes sincere pleasure; and I rejoice at the decided stand you have taken with regard to Temperance, being at the same time no less pleased with the course lately pursued by the Hawaiian Government, concerning the same matter; a course worthy of imitation by older, and as will be claimed, more enlightened governments. In addition to the amusement afforded to numerous seamen, readers of your sheet, no small credit attaches to you, for the instruction also afforded, thus combining the two great desiderata for a good newspaper, the *utile* with the *dulce*. Being well convinced of your having the interests of the sailor for the foundation of your labors, I venture to forward you a few articles, requesting you to give them an insertion, should you consider them admissible, and not trenching too much upon the space devoted to more important matters. I am induced to make this request, knowing as I do that your paper is much noticed by the editors in the U. S. with whom you exchange, and that any articles you may insert concerning the subjects upon which I write, will cause suitable enquiries to be made by those interested in the U. S., and thus, evils of which I am about to complain, may be obviated.

Much has been done for the benefit of seamen within the past few years; for their religious instructions in the providing suitable residences for them when on shore, whilst the exertions to promote temperance among them merit all praise. But a *great deal more* remains to be done; and some part of that which does remain is of *equal*, if not greater value to the true temporal welfare of the sailor than any of the reforms above adverted to, seeing that they are the *causes* which have rendered so many *reforms* necessary. Amongst these, not the least is the manner in which seamen are yet treated by masters and officers of ships.

That what has already been done for seamen, has to a certain extent, elevated them in the moral scale, cannot be denied; and this has brought with it a corresponding increase of self-respect,—a better knowledge of those unalienable rights, to which every human being is an heir,—and an increased sensitiveness to brutal treatment which the mass were formerly unconscious of, comparatively; while no concomitant amelioration of usages,—of provision for the increased comfort of the seamen; or the least moderation of the brutal and tyrannical system of punishments, has taken place. A reform *was* and *is* needed in another quarter, and it does seem to me, that while philanthropists have exerted themselves, to reform the degraded mariner; that their eager haste has not permitted them to perceive, "That in order to morally elevate the SLAVE the MASTER *must be changed corporeally or mentally.*"

For my part, I have been convinced from an acquaintance of twenty years with seamen, both on sea and land, that the moral degradation under which they labor, is as much owing to the treatment they receive whilst at sea, as to any other cause whatever. It is not to be expected that men to whom the most blasphemous and outrageous language, often accompanied with blows and kicks whilst at sea, is of daily occurrence, with but little or no chance of redress for the same at the termination of the voyage, will think otherwise, than that they are of small consideration amongst their fellow men. Degrade a man in his own eyes, and what is he? A mere nonentity, retaining nothing save the human form. That this species of abuse prevails to a much greater extent than most landsmen are able to imagine, I know, and in order to prove it, I have but to refer you to seamen themselves. Ask, Mr. Editor, of the seamen who call upon you at each season of the visit of the whaling fleet. Enquire *minutely*, for many are *afraid* to tell you the truth, lest their report should get to the ears of their captain, and when their ships again left the port, full well they know what the results would be. I am positively knowing to one instance where a young man went to you for the express purpose of informing you of a certain case of ill treatment of a very serious nature, but his heart failed him. I asked why did you not tell Mr. D? He replied, "The old man might find me out, and then I should have been murdered next season." He was not far from the truth. I should like, with your approbation, to give an account of some cases of the above nature, of which I have been a witness, suppressing names, however. This I imagine would have a favorable effect in this way; those who have been guilty of the offence would know the allusion, and for fear that a repetition of their crime would bring to light the real name of the parties, they would be more circumspect, for many dread "*public opinion*" more than they do *law*, in fact this is the case with all, for the punishments inflicted by laws are often evaded, but the force of public opinion is not to be resisted or escaped from. I have heard a captain of a ship make this remark, (he heard that one of his crew would publish his conduct in a newspaper) "He can take the law of me if he likes, but if he *publishes me*, I will shoot him so help me God." This is the best illustration of my purpose, and should you acquiesce in my offer, I will prepare statements for your next paper, which, in my humble opinion, will go farther towards reforming certain captains in these respects, than all the laws enacted since those of Oleron.

Yours &c.,

R. de Cruce.

Temperance Friend.

Miss Claret and Miss Ropes.

A new way of promoting Temperance at sea.

The captain of a ship had laid in a basket of claret for his own table. After being some time at sea, as he was overhauling his cabin, he thought more bottles were missing than he could remember of having used.—While reflecting upon the subject, the idea occurred to him that probably the cabin boy was the cause of the deficiency. To ascertain the truth of his suspicions, he concealed himself in a state room, and waited until the time for preparing dinner. The boy soon came in, and having arranged the table, went to the basket, took out a bottle, and said, "Jean von Dorster, born in Rotterdam, intends marriage with Miss Rosina Claret, born in Burgundy. Notice is hereby given for the first, second, and third times; if no

man appears to forbid the bans, the ceremony will immediately take place." The roguish fellow thereupon placed the bottle to his mouth, drained it, and cast it out of the window. The captain said nothing, but after dinner went upon deck, provided himself with a good rope's end, and called the boy to him.

"Jean," said he "I've got something interesting to tell you; I'm agoing to have you married."

"S—o," ejaculated Jean, casting an anxious glance at the rope's end, "have me married, captain?"

"Yes. Now listen and see that it is done according to law."

The captain elevated his voice so as to be heard all over the ship, and cried "Know all men that Jean von Dorsten, born in Rotterdam, intends marriage with Miss Barbara Ropes, born in Russia. Notice is hereby given for the first, second, and third times; if no man appears to forbid the bans, the ceremony will immediately take place."

Hereupon the jolly sailor raised his arm to perform this interesting ceremony, but before it descended, Jean proclaimed in a loud voice, "I forbid the bans."

"What, you rascal," said the captain, "did you not drink my claret?"

"Yes; but if you know it, you also know that I did it all according to law. If you had forbidden the bans as I do now, I should not have touched it."

The captain could not repress a hearty laugh. At length he answered, "This time I'll let you go, but remember, if you ever cast you eyes on Miss Claret again, you shall be wedded to Miss Ropes in such a style, that you'll not forget the ceremony to your dying day."

Sabbath Friend.

The American and Foreign Sabbath Union held its Third Annual Meeting at the Old South Chapel, Boston, May 22, 1846. President, Thomas S. Williams, Chief Justice of the State of Connecticut. Justin Edwards, Secretary; John Tappan, Moses Grant, Benjamin Smith, Benjamin Howard, Jacob Sleeper, Executive Committee.

The following, among other Resolutions, were adopted, viz:

Resolved, That as the Sabbath was *not* made or given to men for secular business, travelling or amusement, they have *no right* to employ it in that way.

Resolved, That as God has commanded men to "Remember the Sabbath day to keep it holy," all men *have a right* to the rest and privileges of that day, and no man can be deprived of that right, or induced not to exercise it, without great injury to him, and through him, to the community.

Resolved, That men, who on the Sabbath, prosecute their worldly business, or oblige others to do it, and devote the day to secular, and not sacred employments, debase the public mind, corrupt the public morals, and violate the rights both of God and of man.

A Sabbath Keeping Sea Captain.—Captain H—— of Boston, took charge of the brig L—— for the first time, as master of a vessel, on condition that he should not sail from port on the sabbath. His voyage was from New York. One of the owners being at that port, requested him to sail on the sabbath, giving as a reason that a fast sailing ship at Boston, bound to the same place, would probably sail on that morning; and should that vessel reach her place of destination before the L——, it would make, probably, a difference in their profits of some thousands of dollars. The captain insisted that the condition on which he took charge of the brig should be observed, and refused to sail on that day, notwithstanding it was predicted that the wind, which was then fair, would be ahead on Monday. Monday came and found the captain in port, but with a steamboat along side, early in the morning, ready to tow him to sea. The wind, as predicted, was directly ahead. The steamboat was discharged at the mouth of the harbor, and there our captain lay until Wednesday afternoon, with the wind blowing a complete gale, directly 'in his teeth.' The wind having abated, the vessel was got under way and beat out over the round shoals until she got an offing. The wind then favored, and for fourteen days all sails were set, making all the time a rapid advance towards the port of destination. She arrived in port fourteen days before the fast sailing ship which sailed with a fair wind from Boston on sabbath morning. Capt. H——'s brig had discharged, and was receiving her return cargo before the other vessel had arrived. She sailed from port and reached Boston, discharged her cargo and received another, and had been gone *fourteen* days before the other arrived! Capt. H——'s voyage was eminently a profitable one for the owners, and they made him a valuable present, saying as they handed it to him, "Captain H——, we will not ask you again to sail on the Sabbath."—[3d An. Rep. A. & F. Sabbath Union.

A Good Test.—We heard a story the other day which is too good to be lost.—Farmer Dickens, for so we call him, one of the neighboring York county farmers, alike noted for his shrewdness, and pretty girls, was visited by Jo Jenkins, under pretence of trading oxen, while his real object was to secure one of Farmer Dicken's daughters.—Finding no way to accomplish his real object without a direct appeal to the old man, he vetured to pop the question, and received in return a most decided negative. Jo was not shrewd enough to manage for *his* girls. Jo nothing daunted, pushed his trade in oxen, and in the end, the old man found himself "essentially shaved." At Jo's next appearanc at Farmer D.'s all was changed, the old man at once declaring that he might go ahead, for if he was shrewd enough to cheat him he could risk him with the gals. Jo went ahead, gained the object of his desires. and the old man's conclusions have been found correct.

☞ Much trouble is known to arise when scores and hundreds of English and American sailors are allowed liberty on shore where intoxicating drinks are sold. Time and again has it been so at these Islands. At Tahiti the same is experienced under the revenue laws of the French. The report has reached us, that the commander of the English vessel of war Grampus, would not give his men liberty on shore at Papiete, but for that purpose had gone to one of the other islands. His conduct is worthy of imitation. It is also reported that about Christmas last, some English sailors and French soldiers had a *fracas*, where several lives were lost on both sides. Sincerely we hope the report may not be true, but it certainly would be no more than would be expected, where the angry passions of hundreds are infariated by rum and brandy. The makers, venders, and advocates of ardent spirits, have much to answer for, and it will be no difficult matter to make manifest their guilt.

Judge Lee's Address.—The members of the Oahu Temperance Society and others enjoyed a rich intellectual treat in listening to Judge Lee on the evening of the 4th inst. His subject, *Decision of Character*, was ably discussed, and made most happily applicable to the practical duties of those pledged to the principles of total abstinence. The Society requested a copy for publication, and when published we shall furnish extracts, at least, for our readers. Truly the O. T. Society would not have existed in vain, if it had accomplished merely the calling forth of the monthly lectures. That upon Public Opinion, has already been published while that upon Virtue would have done credit to a University Professor of Moral Philosophy.—The humorous and instructive lecture of our worthy Vice President would read well if some Hogarth should accompany it with pencil illustrations!

Mr. Robertson is expected to deliver the next lecture on the first Friday Evening of July.

THE FRIEND.

HONOLULU, JUNE 15, 1847.

☞ The reader of to-day's paper, will find two communications upon the subject of discipline upon ship board. One is from a landsman, the other from one whose home has been in the forecastle. The writers send their articles entirely without the knowledge of each other. We have thought both ought to appear at the same time. We are however, unwilling to send them forth without offering a few remarks upon the subject which these writers have discussed. The tendency of both articles is to give the impression that in the minds of their respective authors, there is the belief that on board whale ships there exists much cruel, tyrannical and even brutal treatment. We are not going to deny that there is ground for the charge, for such is our own belief. Too much have we heard, and seen, not to be of that opinion. Our correspondents, however, as we believe, have taken a one-sided view of the subject. What they declare to be true in regard to whale ships in general, is only true of a part. They make the exceptions the foundation of a general charge against the whaling fleet.—There are doubtless ships to which their remarks will fully apply. We have known masters who merit every expression of censure which our correspondents utter, and we have known others, and their number is not a few, who are entirely free from the exercise of a cruel, tyrannical, and brutal discipline. This is true if the tenants of the forecastle bear good testimony, and those who are acquainted with Jack, will not charge him with lightly passing over the sins of those who live "abaft the mainmast."

The impression we would have our readers obtain, is not a one-sided, exaggerated and distorted view of the subject but that which corresponds with the truth. Let justice be done to masters and officers. They have many trials and vexations in the discharge of their duties, which would appal a landsman. They undoubtedly have to deal with, and govern many turbulent and refractory spirits, while circumstances bring many of a very different class under their rule.—The truth upon this subject as upon most others, lies midway between the extremes. It is hard to keep always "the golden mean."

As we have asserted, not a few masters will escape the censures of our worthy correspondents. In a late New York paper, we have met with the letter of one such, which we shall quote below with the remarks of the editor. It has never been our privilege to become acquainted with the captain of the "Crescent," but we have met with scores of ship masters in the whaling fleet whose characters are not altogether unlike the one referred to in the subjoined extract. If propriety would allow, we would gladly speak out their names. More than once, twice or thrice have we met them. They are men whom sailors respect and esteem. Jack says of them, "they are as good masters as ever walked the deck of a ship." Would that their number was larger. It is, we believe, increasing. This should encourage the friends of the sailor.

We copy the following from a late number of the New York Commercial Advertiser, whose editor ranks high in the profession of newspaper conductors.

A Delightful Letter.—There are two kinds of excellence in letter-writing. One is produced by vivid powers of description or by witty thoughts and graceful turns of expression; this kind of excellence is seen in the letters of Madame de Sevigne and Horace Walpole. The other manifests itself in the earnest, truthful utterance of pure, generous and noble sentiments, and of this, we think, an admirable specimen is given in the letter which we are permitted to copy, and which, in our poor judgment, does so much honor to the writer, that no addition could be made by the warmest language of eulogium. We veritably consider it one of the most beautiful epistolary compositions we ever read, albeit the writer is only the skipper of a whale ship, and undoubtedly never had the remotest suspicion that he was writing for the public eye. But we must tell how it comes to be published.

It is pretty generally known, we suppose, that adventurous young men even of those who have received a good education and belong to families in comfortable circumstances are very apt to indulge a roving disposition, by making a cruise in a whaler; one reason of which is, that probably, and perhaps the principal, that voyages of this kind, by their length seem to offer the greatest advantages to green hands, and present also the most tempting inducements to a truant fancy in the remoteness and comparative novelty of the regions to be visited. But whatever the cause, the fact is notorious; and there are, no doubt, at this moment, hundreds of young men, possessing the qualifications for very different employment, engaged in the not very savory business of harpooning, cutting up and trying out, far away among the watery wastes of the Pacific.

Now there has recently been published a volume of stirring and rather painful interest, narrating the experience of such a young man as we have described, on board a whaling ship which sailed from the port of New Bedford. This unlucky youngster had the misfortune to go sowing his wild oats under very unfavorable circumstances; and he describes his prolonged cruise as little better than a sort of living Purgatory. The book has been extensively read; and has very naturally excited much painful feeling among the relatives and friends of numerous young whalers of the amateur class referred to.—Supposing the true account of one whaleship to be a true account of all, parents who have sons far from home on voyages of this nature are filled with anxiety as well for the moral as the physical well-being of their truants; and as they read Mr. Browne's narrative their hearts are oppressed with sorrow and with fear.

But on board whale-ships as on board other vessels, the situation of the crew is greatly influenced by the character of the master, and it does not by any means follow that the masters of all whale-ships are such cruel tyrants as he who walked the quarter-deck of the vessel to which Mr. Browne has given the name of Styx.

Happening recently to visit an old friend, a widow, who has a son on board a whaler, the conversation naturally turned upon his condition and prospects; and we, having obtained some knowledge of Mr. Browne's revelations, were induced to express a hope that the young man had found a better commander. Our friend, in response to this, produced the letter in question, which she had received from her son's captain; and we were so pleased with it as to ask a copy for publication, feeling confident that it would be welcome to many other parents. Such is the history of the following letter:—

"Ship Crescent, at Sea,
Off Western Islands, Aug. 5th, 1846.

"Dear Madam,—In your letter of the 3d of July, you requested me to write you in particular about the vessel, and what disposition I had made of Frederick, but my time was so taken up I was unable so to do, but a beloved mother, I doubt not, has written you, ere this, all particulars about every thing you desired to know. Yet, dear madam, I feel it a duty I owe both you and your family (although perfect strangers to me) to write a few lines from this port about your son. He is before the mast at present, but should any vacancy occur during the voyage

I will promote him, for I feel more interest in him now than I formerly did, on your account; for, although he is a little wild, he has a feeling heart, and is willing to take my advice, which I always endeavor to give for his good.

He is very ambitious, full of perseverance, and entirely fearless. He will no doubt rise rapidly should he feel disposed to continue in the business. I regretted very much that I could not take him as a boatsteerer with me, but he is rather light and young, so that I think it for his benefit to go the voyage as a seaman; he is in my boat, and I shall always study his interests as though they were my own in all things. I am very sorry to say that I am not a professor of religion, yet it is something which I revere, for I have a praying *wife* and *mother*; and a *father* who I doubt not is in Heaven. I, too, like Frederick, had a good home, and all that was desirable to make me happy and contented, but could not rest without going to sea, which, at the best, is a hard life. To be deprived of society and sanctuary privileges at times seems more than I can bear, yet there is a sweet consolation in knowing that the once despised seamen now have numberless prayers offered up for them in their wanderings over treacherous oceans, and very many to care for their spiritual and temporal welfare.

I have at times, since you wrote me how your son was situated, felt almost condemned for inviting him to go with me,* but if he is determined to go to sea, I know he is better off than he would be any where else, for I do feel much for you. A parent's feelings I well know, and at your age it must be doubly trying to have him from you, yet I doubt not that God, "who holds the winds in his fists, and the seas in the hollow of his hand," will hear and answer your prayers in behalf of your fatherless boy, and you will yet see him all that a pious mother could wish.

I have as good a vessel as floats the ocean; my officers are excellent men, having my choice among a number, and the crew are the most moral set of seamen I ever saw. I have not heard an oath uttered since we sailed, or an unpleasant word spoken on board the ship. Should you feel anxious to know occasionally about the ship, you can inquire of my mother. I shall, dear madam, write you again from the Sandwich Islands, or wherever I shall recruit ship. My voyage will extend around the world, going by the Cape of Good Hope, and returning by the way of Cape Horn. Accept my sincere thanks for the interest you manifested for myself and crew on a perilous voyage, and believe me when I ask an interest in your prayers, and the prayers of all the people of God, that we may not only return laden with the riches of the ocean, but happy in the love of a Saviour. Respectfully yours,

LEROY R. WESTFALL.

P. S. It was impossible for me to write to you before I sailed, my mind was so distracted with the cares of such a voyage, and leaving all that I hold dear on earth, perhaps forever. L. R. W.

*He had made one voyage with the writer of this letter when he was mate of the ship.

New Work.

ETCHINGS OF A WHALING CRUISE, *with notes of a sojourn on the Island of Zanzibar, to which is appended a brief history of the Whale Fishery, its past and present condition. By* J. ROSS BROWNE. *Illustrated by numerous engravings on steel and wood.*— HARPER & BROTHERS, *Publishers. New York*, 1846.

In our last number we noticed a new work, entitled "*Typee*, or a peep at Polynesian Life," by H. Melville, who served in the forecastle of an American whale ship.— Another work has come to hand written by a person who served in the same capacity. We are extremely glad to meet with this production just at the present moment, and in connexion with the numerous criticisms which we find in the late American papers. An allusion to the work will be found in the remarks which we quote in to day's paper from the New York Commercial Advertiser.

Our readers may be gratified in obtaining an answer to the question, Who is J. Ross Browne, the author? From the book and a gentleman at our elbow, we learn that he is a Kentuckian by birth. At the age of nineteen he visits the city of Washington and becomes a popular stenographic reporter in the U. S. Senate, during the session of 1841–42. After the close of the session, in company with a young clerk from one of the public offices in Washington, he starts to see the world and visit "foreign parts."— From his own account of setting out on such an adventure with only $10,00 and falling in with a shipping agent in New York, whose *stories* he so readily believed, we must think that "*greenness*" is a characteristic not exclusively belonging to those who may have been born east of Hudson River! Having doffed his "long togs" and shipped in a whaler, he sails from New Bedford in July, 1842. The Barque "Styx," (alias Bruce,) touched on her outward bound passage, at the Western Islands, thence proceeded round Cape of Good Hope, touched at the islands of Madagascar, Johanna, and Zanzibar, where our author was discharged in May 1843. He remained on the Island until the following August when he sailed in a Salem Brig for the U. S., touching at St. Helena and arriving at Salem in October. The period embraced in the narrative is about one year and four months. Soon after his return to the U. S. he again visisted Washington and resumed his duties as a reporter, and according to the report of a gentleman recently from Washington, he is still engaged in that business, in which he has the reputation of being remarkably expert and successful. He now in Washington, goes by the name of the "whaler."

Having answered quite summarily, Who is J. Ross Browne? We now will offer a few remarks upon the work which he has written. It is a book we have read with much interest. Its style is simple and graphic.— The narrative is truthful. Having listened for the hundredth time to the verbal narratives of whalemen, we think that our author has portrayed a whaleman's life as it appeared to his own mind. In the preface of the work, he declares it to be his design "to present to the public a faithful delineation of the life of a whaleman." This we believe he has endeavored to do, and perhaps has done, so far as it is possible for one with his tastes, views, feelings and habits. It is most manifest that the writer's former associations and future plans not a little unfitted him for doing exact justice to all parties. He thoroughly detested the business, and hence all its hardships and annoyances were magnified. Perhaps an adventurous and enterprising whaleman would find full as much to disgust and ruffle his mind in reporting the long-winded and prosy speeches of Congressmen, as did our author in submitting to the discipline and trying out the oil on board the Styx. Every man must be allowed to be the best just judge of his own profession.

The picture which he has drawn is not such as would give a landsman a very favorable opinion of the business of looking out for and catching whales. His book will be read, and its reading we hope will do good; still like Dana's "two years before the mast," it will tend to make more young men desir-

ous of leaving home for the dangers of the sea, than it will deter from seeking employment in the whaling business. The reader of this work, however, must not imagine that all whale ships are like the Styx, and he ought to keep in mind that the master of the Styx must indeed, have been a paragon of excellence always to have kept his temper in dealing with such a crew as our author describes as tenanting the forecastle of said vessel. He relates but one case of *genuine* flogging that occurred while he was on board, and of that instance he has made all that was possible, having given an engraving of the scene. While we are most thoroughly and heartily opposed to the flogging system, yet we must think if ever two sailors deserved flogging, it was in the case described by our author. "Bully" and "Jack," were guilty of violating a law of the ship, and of most inhumanly attempting to fight and flog each other in the forecastle. For this offence they were both "seized up" and "flogged." The captain distinctly remarking, "Remember, now, this is for fighting." Would that every time a sailor is flogged, the master and officers had as plausible grounds.

In reading the narrative, these two causes seem to have been the principal occasion of the unhappiness and misery on board the Styx,—1st, Captain and officers did not sufficiently respect themselves, to refrain from using the most abusive, vulgar and profane language in addressing the men; and 2nd, some of the men, according to our author's own account, were any thing but promising characters, being *brutes, thieves and liars*, except a few clever chaps!

One point has been painfully manifest to us in the perusal of the book,—there was no sabbath on board the Styx. It is stated that the barque left New Bedford on the sabbath, but after that, the author in no way alludes to the Holy Day. Perhaps the real cause of this was the fact, that whale ships generally account all days alike. Profane language is quite too frequently introduced into the narration; we suppose the author thought it necessary for the sake of making it more truthful! As he takes upon himself to speak so confidently in regard to the whaling business, *we regret*, although *he may not*, that he did not serve longer and on board more than one whale ship. Had he done so, we think he would have modified some of his views and softened some of his expressions. As it is, the book is interesting and will be read.—Would that its perusal might deter from leaving home some of those who are seeking *a home* on the deep, but who will be inevitably disappointed.

Our limits will not allow us at present to give extracts from the work, but we shall hope to do so at some future time. Some of the author's sketches are excellent and his narrative of a residence in Zanzibar is quite instructive.

Our author concludes with some very noble sentiments. "I have a loathsome contempt for the shuffling arguments urged in support of tyranny." Sentiments like this are frequently to be met with in perusing the work. We hope the next time the author feels the need of relaxation from the arduous duties of a reporter in the U. S. Senate, that he will make a "land cruise" through his native State and other slave States, and then publish to the world a volume from his graphic pen, entitled, "Etchings of a rambling tour, with notes of a sojourn on a Mississippi plantation; to which is added a brief history of Slavery in the U. States, its past and present condition. Illustrated by numerous engravings on steel and wood." We express this hope because Mr. Browne on more than one occasion, evinces that there is a conviction in his bosom, that while he denounces the tyranny on board whale ships, some of his readers may with justice refer him to the "peculiar institutions of the South." Vide page 499. Not that we would utter the slightest note of apology in justification of bad treatment on board merchant or whale ships, still we should like to ask Mr. Browne if there is not a thousand times worse system of flogging on the Southern plantations, than exists in the American naval, merchant, and whaling service? Pardon us, Mr. B. for asking the question, should your eye ever glance on these hastily penned paragraphs. It is naturally suggested by your own train of remarks.

In conclusion we would acknowledge the compliment which is made in the appendix of the work to the "Honolulu Friend," and feel gratified if our humble efforts as editor, with the aid of our contributors, are calculated to diffuse abroad useful information respecting the Sandwich Islands, Seamen, or subjects in general. The Appendix of this work contains much well selected matter, upon the history and present condition of the whale fishery.

Native Schools.—On Tuesday, June 1st, an examination of native schools took place at the Rev. Mr. Armstrong's church. About 400 children and youth of both sexes were present, with their respective teachers. A more well dressed and well-behaved company of native children we have never beheld.—These schools are under the superintendence of a young Hawaiian who also teaches the Station-School, or select school for boys. This school appeared remarkable well in Arithmetic, and the rudiments of Geometry. Their teacher, we are informed, was a graduate of Lahainaluna, having been there educated by Mr. Hunnewell, of Charlestown, Mass., and formerly a resident at the Islands.

It was highly gratifying to witness the presence of His Majesty and the interest he manifested in the welfare of his young subjects. An address was made to the scholars by the Minister of Instruction, followed by some remarks by His Majesty. Judge Turrill, U. S. Consul, also made an appropriate address which was interpreted by the Rev. Mr. Armstrong. He expressed great delight in witnessing the present prosperous condition of the schools, especially as it was connected with the early labors of one at this station, with whom he was associated as a fellow student and college classmate† in years gone past.

We are rejoiced to learn that the interests of education receive so much attention, and we sincerely hope that attention may be increased rather than diminished. Good schools are a nation's best defence and glory. Capital judiciously expended in the instruction of the young, returns the very highest rate of interest.

---

† The Rev. Mr. Bingham, the Predecessor of the Rev. Mr. Armstrong.

FOR SEAMEN'S CHAPLAINCY.

Capt. Hackfield, $5,00

☞ The publication of the Friend for July 1, will be delayed a few days in consequence of the Editor's absence.

☞ During the absence of the Chaplain, Public Services may be expected every sabbath morning. The sabbath school continues as usual.

DIED.

In Honolulu, June 3d, William Thompson, belonging to the North of England. He has resided many years upon the Islands and left a wife and two children.

In New London, Conn., Capt. Benjamin Stark, 62 years.

In Fairhaven, Mass., ——, 1846, William Henry, aged 2 years and some months, only son of Captain William Whitfield.—[N. Bedford Reporter.

PASSENGERS.

In the General Kearney from California—Messrs. G. L. Gray, George P. Ryan, Herman Ehrenberg and Jacob Frankfurt.

In the Euphemia for California—H. Grimes, Esq., lady and child, Rev. C. S. Lyman, Messrs. Griffin and Furbush.

In the Mt. Vernon for Columbia River—Mr. Boardman.

In the Henry for Columbia—Messrs. Lawton and Post.

In the Janette, from Tahiti, Mrs. Dring and Miss Dring.

In the Sarah Ann for Tahiti, Capts. Hackford and Moore, and Mr. Painter.

MARINE JOURNAL.

PORT OF HONOLULU.

ARRIVED.

June 3.—Schr. Gen. Kearney, Menzies, 21 ds. fm. San Pedro.

4.—Eng. bark Janette, Dring, 30 ds fm. Tahiti. Reports Hawaiian schooner Swallow at Tahiti, May 3d, bound for Valparaiso. In port, Uranie frigate, Heroine sloop, 1 Am. whaler, and 1 Dutch and Hamburg ship. H. B. M.'s ship Grampus sailed, April 28, destination unknown. H. B. M.'s ship Juno had sailed for Navigator's.

June 6.—Schr. Carrency Lass, McLean, 28 days from Bodega, with lumber, to Dickson & Hay.

SAILED.

May 30.—Am. bark Toulon, Crosby, for Columbia River.

June 2.—Am. brig Henry, Bray, for Columbia River.

3.—Am. ship Mt. Vernon, Given, for Columbia River

4.—Hawaiian brig Euphemia, Rossum, for California.

June 12.—British bark Janette, Dring, for Columbia River.

MEMORANDA.

☞ Touched at Koloa, Kauai, May 20, American whale ship Richmond, Winters, Coldspring, 9 mos., 550 whale, 150 sperm. Last from Hobart Town, has on board a runaway from that place, who secreted himself and was not discovered until the ship was at sea. Supposed to be a convict and talks of procuring his discharge at Oahu, on the return of the ship from the North West.

San Francisco.—Transport bark Whiton, Gilson, 148 days from New York, arrived April 21th, with passengers for the Oregon.

Brig Prima Sera, Stenner, arrived same date from San Pedro.

May 1st. Brig Elizabeth, King, from Monterey.

5th Brig Com. Stockton, Young, from Oregon

Ship Barnstable, Hall, from San Pedro.

May 1st. Sailed ship Thos. H. Perkins, for China.

April 27. Ship Susan Drew, for China.

In May, ship Loo Choo, direct for Boston.

$500 REWARD.

WHEREAS, it has come to the knowledge of H. H. M.'s Government, that a secret *Lodge* or *Society* of rogues has existed and still exists at Honolulu, banded togother by an oath of fidelity under a desperate leader, (said to be about forty-five years of age, and once a man-of-war's man) and whose object is to get possession by stratagem of His Majesty's yacht, Kamehameha III., or some other fast sailing vessel, to cruise in these seas for purposes not yet disclosed, but believed to be piratical, and whose presence in this kingdom is dangerous to persons and property, the above Reward of Five Hundred Dollars, will be paid from His Majesty's Exchequer, to any person or persons who will give information that will lead to the detection and conviction of the whole or part of said *Secret Lodge or Society*.

It is believed that they have in their possession a new figure head, and a stern board to supply the place of the crown on the stern of the Kamehameha III. They have also sets of false papers and flags to be used as required. One set is Mexican. They designed to take the Kamehameha III., by taking passage in her for Maui, with their arms concealed in their chests, and to overpower the crew on the passage and put them ashore on Lanai. These particulars may aid in their detection, and put all persons on their guard against their attempts.

Honolulu House, May 1, 1847. tf

DRY GOODS.

JUST received per Montreal, from Boston, and for sale by the subscribers:

BY ORDER OF THE SECRETARY OF OREGON TERRITORY.

AN ACT to prevent Desertion, and for the recovery of deserting or absconding Seamen.

§ 1. *Be it enacted by the House of Representatives of Oregon Territory*, That when it shall be made to appear to any Justice of the Peace, by the affidavit of any person, that any person has deserted or absconded from the service of any master or captain of a vessel claiming the services of such deserting or absconding person, upon contract or agreement made and entered into, either in this or a foreign country, the said Justice of the Peace shall immediately issue his warrant for the apprehension of such deserting or absconding person, and cause the accused to be brought before him, or some other Justice of the Peace of the county in which the original writ issued.

§ 2. The officer having the warrant, or any other person who may be duly authorized to serve said warrant, may arrest said accused deserting or absconding person in any county in this Territory, and bring him forthwith before the Justice of the Peace who issued the warrat, or some other Justice of the Peace of the same county.

§ 3. Upon the trial of the case, if it shall appear that the master or captain of said vessel is entitled to the further services of said deserting or absconding person, it shall be the duty of the Justice of the Peace, or the court trying the same, to cause said deserting or absconding person to be delivered up to the master or captain of said vessel, and all costs shall be adjudged against said deserting or absconding person, and a certificate of the same shall be delivered to the said master or captain, who shall thereupon pay the same.

§ 4. Any person who shall entice a seaman to leave his ship, or who shall knowingly harbor, secrete, employ, or in anywise assist a deserting or absconding seaman, shall, upon conviction thereof, be fined any sum not exceeding five hundred, nor less than 25 dollars for each offence; and all fines collected under the provisions of this Act, shall be paid into the county treasury, and be recovered either by indictment or action of debt, in the name of the county.

§ 5. That every ship master or captain, on the desertion of any of his crew, shall be bound in the penal sum of fifty dollars, to give immediate information of the same to the proper authority.

§ 6. That if the mate or first officer under the captain or master, and a majority of the crew of any vessel or ship lying in any port of Oregon Territory, shall discover that said ship or vessel is too leaky, or otherwise unfit in her crew, body, tackle, apparel, furniture, provisions, or stores, to proceed to sea, and shall require such unfitness to be inquired into, the master or captain shall, upon the request of the mate, (or other officer,) and such majority, forthwith apply to the presiding Judge of the county court, either in term time or vacation, and thereupon, said Judge is hereby authorized and required to issue his precept, directed to three persons, the most skilful in maritime affairs that can be procured, requiring them to repair on board such vessel or ship and to examine the same in respect to the defects or insufficiencies complained of, and to make report to the said Judge in writing under their hands, or the hands of two of them, whether in any, or in what respect, the said ship or vessel is unfit to proceed to sea, and what addition of men, provisions or stores, or what repairs or alterations in the body, tackle, or apparel will be necessary, and upon such report the said Judge shall adjudge and determine and endorse on the said report his judgment, whether the said ship or vessel is fit to proceed to sea or not, and the master or captain, and crew, shall in all things conform to the said judgment. If the complaint of the mate and majority of said crew, shall upon said report and judgment, be deemed just and well founded, the master or captain of said ship or vessel shall pay all costs of such view report, and judgment, and be taxed and allowed on a fair copy thereof, certified by said judge, but if the complaint of the said crew shall appear upon the said report and judgment to have been without foundation, then the said master or captain, or the owner or consignee of such ship or vessel, shall deduct the cost and reasonable damages for the detention (to be ascertained by said Judge) out of the wages coming due to the said complaing mate and seamen or mariners.

§ 7. It shall be the duty of the Territorial Secretary to cause a copy of this Act to be published in the Oregon Spectator, and the Sandwich Islands papers, as soon as practicable.

§ 8. This Act to take effect and be in force from and after its passage.

Attest, A. L. LOVEJOY, Speaker.
N. HUBER, Clerk.

Approved, Oregon City, 19th Dec., 1846.
m29 tf. GEO. ABERNETHY.

GEORGE RISELY,

BUTCHER AND GENERAL MEAT SALESMAN, begs leave most respectfully to inform the residents of Honolulu and shipmasters generally, that he has taken the stand owned by Mr. French, and lately occupied by Messrs. Robinson & Co., where he is determined to sell none but the best of meat, and trusts that by cleanliness and strict attention to his business he may merit a share of public patronage.

For the Friend.

Wants of Seamen.

No. III.

Seamen need *better fare.*

I regret the necessity of this article;—but the neccssity exists. Poor food and short allowance have often added to the severity of the sailor's hardships. Often grossly deceived, oftener badly governed, not unfrequently overworked, he is, in many instances, sparingly fed. Many a day of excessive and unremitted labor has closed with only an ordinary supper. And how many a sailor has set down where he could to a dish his sharpened appetite alone enabled him to eat, and which two such allowances of wholesome food would hardly have satisfied. How cruel! How insufferably mean! And with what indignant shame do we hear of owners and agents for the sake of a few dollars, supplying their ships with second and third, and even *fourth* rates of food! "Good enough for foremast hands," is the plain language of their cupidity; *they* would hardly throw it to their dogs! This is certainly a bitter growth from the "root of all evil," and must yield poisonous, if not deadly fruit—a most uninviting dessert upon the tables of those thus enabled to fare "sumptuously every day."

And we cannot give just expression to our indignation at the base and impolitic conduct of some masters, who, for gain, or to avoid calling upon their owners, sell in our ports their best stores, and on the North West feed their men with an inferior article and in stinted measure. Some, to their credit be it said, go to the same beef and pork barrels with their men, and eat the same bread upon their tables. The steward draws alike and from the same containers for forecastle and cabin. A thousand oaths and envious glances and angry words are thus avoided. We would not insist on the cabin table being limited in variety to what would be good and wholesome and sufficient for foremast hands, but every reasonable and generous man can see why the provisions for the latter should be of the best quality and as healthful and good in its kind as that of the former. Should the owners or the masters and officers see fit to supply the cabin with richer viands and a variety of delicacies, neither asked nor expected for others, no man can intermeddle there with or condemn. Such a course is at their option. But to do it at the expense of their men, or at the same time furnish them with provisions of an inferior quality, or stint them in the use of good, is, in the fullest sense unmanly and unjust. It is one of the lowest forms of selfishness. It is below the penuriousness of the miser—*his* cupidity preys upon *himself.* The slave-holder is less infatuated, for experience has taught him what humanity had not prompted, that wholesome food and enough of it is wealth to him as well as comfort and content to his slaves.—We would go the extent of delicacies rather than diminish from the goodness and sufficiendy of substantial food. And a kind and provident master would look well to his men on occasions of extra toil, and order for them on their return from dangers and fatigue the best repast the ship could afford, and we are not sure but the *wisest* captain would even on occasions of great or unexpected success, keep "*thanksgiving*" *with his crew.* And when weeks and perhaps months have passed without "raising" a whale, and disappointment and discontent are setting on the brow and soiling the worse feelings of the heart, a thoughtful man might with great pleasure to himself and best effects upon his men, thus and with trifling expense, divert his mind and theirs from a common despondency, and perhaps a common calamity. And what if in *ordinary* times the master and officers should remember that foremast hands have *some* feelings in common with their own, that subjection to sea discipline and sea fare has not obliterated all the social and better feelings of their hearts. And what if following their gentler and more generous impulses, they should even then sometimes treat their men to an extra dish. This they might do and at their own tables, too, and in perfect consistency with their position and authority. Such a thing would do more than a thousand empty words or quarter deck declamations, to convince men of the sympathy, kindness and attachment of their masters and officers for them. I verily believe that such a course or something like it, would do much to soften the feelings and allay the jealousies and animosities so common at sea. The objection that such treatment would be making too much of sailors, and elevate them above their business, betrays two things; 1st, that if true, they have been too long the subjects of a short sighted and degrading policy, and therefore more urgently need habituation to a more generous and humane one; and 2nd, if *not* true, that the objector is either himself the guilty party, seeking extenuation of his fault, or pitiably ignorant of human nature, and the best means of securing the esteem, the obedience, the services, and the blessings of those under his authority. And more than all, we should lament if the course recommended did *not* make sailors feel like men, and elevate them socially and humanely far above their present position. And we should be equally surprised, if masters pursuing this course did not experience the *double* blessing of those who bless others and find their own position and authority correspondingly elevated.

But "it would add to the expenses of the voyage." A trifle; and if much, it would be money well expended, an investment with compound interest. Good food and enough of it, with an occasional extra, or, at the option of a prudent master, a social board, would be a cheap purchase of kind feeling and contentment. Vastly *less* expensive is it than *musty* bread or *strong* meat. "*Fourth rate*" is the *dearest* rate. Owners pay a *heavy duty* on such trash in the shape of protracted voyages, consul's fees, and deserved curses. Such unfeeling men merit the thorny pillow they sometimes get, and the reverse of fortune with which the God of the sea as well as of the land not unfrequently visits them.

"Such food is *good enough* for men who *fared much worse* on shore!" I will not attempt to look down far enough to reach the dark source of such a plea. It is certainly from the "*pit.*" A mind capable of producing it is too small for mental dissection, or we would exhibit its monstrosities. But it defies the most potent magnifier, the strongest light throwing only an ill shaped blur upon the canvas of reflection. The "father of lies" never degraded the species more than by making man the author of such a sentiment, and never so disgraced himself or betrayed his necessities, as when employing *such* an agent to accomplish even his vile purposes. It deserves no reply and shall have none. We despatch it back to its "own place," dark, contracted, empty, foul place—the *author's heart*

"But what shall I do," (says a master,) "I found my ship stored as it is. I was provisioned for *so* long a time. It must answer and it must last. To throw away my supplies, would ruin the voyage." Do? *Do for your men as you would do for yourself.* The displeasure of owners, nor the risk of your office, or your "*lay*" would bring *you* down to such fare. There would be money enough and ports enough where to expend it should you find your own table spread with the "cheap" viands. The insult you compel your men to bear, and perhaps blame them for resenting, *you* would not bear for a moment. Do? *Identify yourself with your injured men* and be their friend. Do them *justice.* Provision them well at the first port you can make. Free yourself from the blame if you are innocent, and cast it indignantly on them on whom it rests. But you will risk

your office! Choose between a title *dis*honorably sustained, and a good name *most honorably won;* the displeasure of a few men unworthy of your confidence and the approval of your own conscience and the commendation of all good men. But you must not draw upon your humanity and thus wantonly endanger your character, and the peace of the voyage. Draw to the full extent of your necessities. It will be a good lesson to owners. It is what they deserve. It will in the end be an advantage to yourself, for no humane or just act ever lost its reward. And just judgments never fail to reach the contemptible being that pursues his selfish ends regardless of or in defiance of the reputation, the happiness, and the rights of others.

It is too bad that poor food or short allowance should ever be found in the catalogue of sailors' abuses. Disaster or famine may bring the necessity upon them: then they know well how to bear it. But that the cupidity of man should coolly devise such despicable means to amass wealth, may well call forth the withering rebuke of every friend of his fellows. That masters or owners can have the effrontery to lift up their heads branded with this stigma, is almost as great a wonder as that their insulted species can tolerate their existence. But for the down trodden and abused sailor, we would have passed them by in contempt. We set up a way-mark to caution the unwary to avoid and hasten from them, and would that we might bear with us from their evil contact every injured son of the ocean.

T. DWIGHT HUNT.

New York Correspondence.

New York, Sept. 16, 1846.

Dear Sir,—In the U. S. Catholic Magazine for August last, is the following statement, viz:—"In 1840, there was but one Catholic chapel in the Sandwich Islands; now there are ninety Catholic churches, one hundred and ten schools, and upwards of fourteen thousand Catholics."

This Magazine is the official organ of the Archbishop; hence its statements receive the greater credit. But at least one Protestant calls in question these statistics, and wishes to know more about the these 90 churches 110 schools, and 14,000 Catholics! Are there in the Sandwich Islands one half or even one quarter as many Roman Catholic churches, schools and members? If so, there has been a prodigious gain since 1840. And now that I am on this subject, I will add that Romanism in the United States is not the formidable foe it was twenty years ago. It is becoming *Americanized.* It cannot, under the influences here every where felt, raise up the ignorant and bigoted subjects of priestly despotism. Under American institutions the mind cannot be chained, nor can the conscience be silenced. Freedom of opinion and of conscience is as dear to Romanists as to others, as soon as they understand it; and that freedom they will enjoy. The young in the Roman families cannot be the bigoted Romanists of the old world.

I was last evening conversing with a gentleman who is wholly devoted to the work of spiritually benefitting the Roman Catholics. He told me of a whole community in Vermont, not only reclaimed from their errors, but truly converted to the Lord. The priest has been over from Canada once and again, and coaxed and threatened, and finally excommunicated the poor heretics; but they stand strong in the Lord and in the power of his might. I believe that a score are thus emancipated where one leaves Protestantism for the thraldom of the mother of abominations. A few of the high church Episcopalians on both sides of the water have of late gone down to holy water, and images, and religious nonsense; and we are glad of it. Because, if such is their darkness, and such the spirit of their devotion, there is no hope of reclaiming them to a spiritual and rational religion; and by thus going their influence to do mischief is gone. They can exert very little in the Roman church and absolutely none upon Protestants. A few of our young ministers have lately tried it, and they find that overboard in a deceitful sea, is no desirable berth.

I rejoice to find a spirit of kindness towards Romanists and all men gaining ground. This will do more towards prostrating sectarian walls than any thing else.

With good will to every body, yours.

J. S.

In reply to our correspondent, respecting the increase of Catholicism at the Sandwich Islands, we insert the following paragraphs from the 3d edition of Jarves' "History of the Hawaiian Islands," just published.

"Romanism has gained considerably in numbers since its entire toleration, but without affecting the Protestant churches materially. The latter perhaps were never more sound and flourishing than at present, while the former have made many converts among the class ever adverse to the principles and restraints of their American teachers. Over these, its influence has undoubtedly been usefully extended. The Protestants report 270 churches and school-houses, used as places of worship. The Romanists 104, with a total population attending them, or supposed to be under their influence, of nearly 14,000. By a similar computation, more than 80,000 Protestants would be found on the islands, but in these gross computations great allowance should be made for those alike indifferent to religious rites of any kind, and who are equally fair subjects for the religious zeal of both. The national religion, as understood in the sense of that received by the rulers, the most intelligent of the people and the vast majority of all classes, is Protestantism in the form of a mild Presbyterianism, as practiced in New England churches. From all that has yet appeared, although the Romanists will undoubtedly become a respectable and even flourishing sect, yet the system and creed first implanted in the nation seems likely to continue and strengthen, subject only to such modifications as Protestantism itself is undergoing elsewhere.

"The Romanists have shown a creditable zeal for education and have enrolled 2,800 pupils, besides 600 children who do not attend school. In 1846 they commenced a high school at Koolau, Oahu. The Rev. Abbe Maigret has a select school at Honolulu, embracing several hundred scholars, who manifest a tolerable proficiency in the common branches of education. The French priests in the commencement of their career pursue a widely different policy from the American missionaries in regard to the economy of their operations. Which is the better adapted for solely religious objects it would be difficult to determine. The Frenchman in his clerical celibacy can well afford to be economic; but he does more; rejecting the softening influences of domestic life, he equally disdains its comforts and refinements, and putting himself upon a par with the native whom he has come to instruct, partakes of his coarse fare, sleeps on his coarse mats, and in his philanthropic tours, makes himself, so far as the mere fellowship of life is concerned, one of them. It would appear to be his policy to gain his neophytes' confidence by descending to nearly their level. Hardship and frugality with him are essential to his cause, and he cheerfully submits to a mode of living and a solitary routine of services which would appall his Protestant brother, accustomed as he is from childhood to rely upon the amenities of the social circle, and whose faith embraces the promise of the things of this life as well as those of the life to come. The Romanist loses sight of himself in the one great object of aggrandizing the holy mother church and bringing the entire world under her ecclesiastical sway. He is but a unit in a vast body, whose centre lies elsewhere. Educated to passive intellectual obedience and physical self-denial, if to these he adds a holy zeal and perfect faith, he makes a most effective religious agent, and there is nothing snrprising in his contempt of the common pursuits and desires of mankind. Neither is it strange that the Protestant missionary should cling to those ties which, by education and faith, with him constitute a part of his religion. The family he brings with him to his field of labor, serves to teach others to be faithful husbands and affectionate fathers. He desires to give a practical example to the heathen, of a well directed Christian household, as a manifestation of those bless-

ings which here attend religion and virtue. His desire is not to go down to the native, but to raise the native up to him. To him there is more of true religion in practicing the duties and refinements of domestic life than in denying them. Thus by their very creeds the Romanist and Protestant commence their work at extremes. The one as it were without scrip or coat, without wife or child, inured to toil, and educated to repress the natural emotions of the heart, throws himself boldly into the field of warfare without counting its cost; bound by no ties except those of his order, having no hopes except of ecclesiastical advancement here, or spiritual reward hereafter, he becomes an efficient, uncompromising soldier of the cross, to be deterred by no obstacles, to be appalled at no danger, and to shrink from no means of compassing his object. The other counting himself a disciple of Jesus, takes his instructions direct from His word; recognizes no medium between himself and heaven; esteems it gospel-wise to provide both scrip and coat, purse and wife; carries with him to combat with the principle of evil, all the aids to good that flow from the virtuous relations of life and intimate connection with his fellow-men. The Romanist brings an adoring multitude before the decorated altars of his church and enkindles emotion by appeals to their visible senses, directing their sympathies through the pictured sufferings of holy men to the cause for which they died. The Protestant sanctifies the domestic affections by lighting up an altar of purity in the heart. He desires to make the world within to correspond with the world without, and both to perform their mission of love from the Father. Intellectually we may admire the stern, self-denying discipline of the disciple of Rome, but mind and soul unite in proclaiming that best suited for man which, while it leads him to a rational use of the gifts of this life, best prepares him for the enjoyments of that to come."

Lord Chesterfield on Lying.

"It is the man who tells, or who acts a lie, that is guilty, and not he who honestly and sincerely believes the lie. I really know nothing more criminal, more mean and more ridiculous, than lying. It is the production either of malice, cowardice, or vanity; and generally misses of its aim in every one of these views; for lies are always detected, sooner or later. If I tell a malicious lie in order to effect any man's fortune or character, I may indeed injure him for some time; but I shall be sure to be the greatest sufferer myself at last; for as soon as ever I am detected—and detected I most certainly shall be,—I am blasted for the infamous attempt; and whatever is said afterwards, to the disadvantage of that person, however, true, passes for calumny. If I lie, or equivocate—for it is the same thing—in order to excuse myself for something that I have said or done, and to avoid the danger or the shame that I apprehend from it, I discover at once my fear, as well as my falsehood; and only increase instead of avoiding the danger and the shame; I show myself to be the lowest and the meanest of mankind, and am sure to be always treated as such. Fear, instead of avoiding, invites danger; for concealed cowards will insult known ones. If one has the misfortune to be in the wrong, there is something noble in frankly owning it; it is the only way of atoning for it, and the only way of being forgiven. Equivocating, evading, shuffling, in order to remove a present danger, or inconveniency, is something so mean, and betrays so much fear, that whoever practises them always deserves to be, and often will be kicked.

"There is another sort of lies, inoffensive enough in themselves, but wonderfully ridiculous; I mean those lies which a mistaken vanity suggests, that defeat the very end for which they are calculated, and terminate in the humiliation and confusion of their author, who is sure to be detected. These are chiefly narrative and historical lies, all intended to do infinite honor to their author. He is always the hero of his own romances; he has been in dangers, from which nobody but himself ever escaped; he has seen with his own eyes whatever other people have heard, or read of. He is soon discovered, and as soon becomes the object of universal contempt and ridicule.

"Remember then, as long as you live, that nothing but strict truth can carry you through the world, with either your conscience, or your honor unwounded. It is not only your duty, but your interest: as a proof of which, you may always observe, that the greatest fools are the greatest liars. For my own part, I judge of every man's truth by his degree of understanding."—[Letters to his Son.

Good Government.—What is the object of all Government? The object of all government is roast mutton, potatoes, a stout constable, an honest justice, a clear highway, a free school. What trash to be bawling in the streets about the Green Isle, the Isle of the Ocean! the best anthem of Erin go Bragh! A better anthem would be Erin go bread and cheese, Erin go cabins that keep out the rain, Erin go pantaloons without holes in them.—[Sidney Smith.

☞ Preserved Fish, Esq., a distinguished merchant of New York, died a few days since. His romantic name is said to have originated in his being found near Sandy hook, afloat in a basket, when an infant.—The captain of a Liverpool packet-ship rescued him—christened him *Preserved Fish*—and adopted and educated him. Mr. Fish has left a very large property.

Sabbath Friend.

Sailing on the Sabbath.

At the close of a meeting at Aberdeen, Scotland, when the Rev. Mr. Longmuir, of the mariner's church, made an address, the Chairman, Wm. Chapman, Esq., related the following touching anecdote.—[Richmond Observer.

A few years ago he was owner of a fine vessel which sailed from this port. Her captain had been brought up by him, from his youth, and, when sufficiently qualified, had been sent to sea as captain of this vessel, with orders never to sail from port on the Lord's day. For a long time these orders were faithfully obeyed. The captain—honest and industrious in his business—became highly respected by his employer. On one occasion all was ready to go to sea. The season was fine, and the captain had resolved to take his wife and child with him on the voyage. They were on board. Adverse winds sprung up, and the vessel was detained for several days. On the Lord's day morning the scene was changed; the wind was fair, and many vessels that had been wind-bound were getting under weigh.—Alas! the temptation was too strong for him, and he yielded to it. Within a little more than twelve hours after their crossing the bar at Shields, every one on board that vessel was lost. None were left to explain the circumstances which brought about this melancholy event; but it was supposed that the vessel had struck upon a sand bank, and that the captain, having lost the moral courage and self-possession, arising from a conscience at peace with God, had quitted his vessel, and, with all on board, had taken to a small boat, which was overturned in the surf, when the whole were called to appear in an eternal world. The vessel shortly afterwards floated with the rising tide, and came on shore apparently just as the crew had left it—the cabin dry, and a Canary bird hanging in its cage, full of life and vigor, singing as if all was well, and its shipmates occupying their accustomed places.

Spinning it Out.—In the street of Leicester, one day, Dean Swift was accosted by a drunken weaver, who, staggering against his reverence, said, "I've been spinning it out." "Yes," said the Dean, "I see you have, and you are reeling it home."

The Love of Freedom.—None can love freedom heartily, but good men; the rest love not freedom, but license, which never hath more scope or more indulgence than under tyrants. Hence it is that tyrants are not oft offended by, nor stand much in doubt of bad men, as being all naturally servile; but in whom virtue and true worth most is eminent, them they fear in earnest, as by right their masters.—[Milton.

THE FRIEND.

HONOLULU, JULY 16, 1847.

☞ In consequence of the Friend not being published on the 1st of July, it will appear during the remainder of the year, on every second Thursday, instead of the 1st and 15th of each month.

The Fourth of July.

As a matter of curiosity, it would be no uninteresting subject of inquiry, to consider the untold number of methods adopted by American citizens, and others, to celebrate the signing of the Declaration of Independence of the United States. At home, a variety of benevolent, literary, mechanical, political and religious societies, improve the occasion for public festivities. In by-gone years the day was almost universally characterized by much of most criminal excess in the use of intoxicating drinks. On no day of the year is there now to be witnessed a more happy and salutary triumph of Temperance principles. This is cheering and animating to the true patriot. Some would still revel in drunkenness to evince their love of liberty, but their "glory" becomes their "shame." Such persons, by their influence and example, not only disgrace themselves, but aid in perpetuating the direst of curses upon their country and the world.

It may not be of great importance to inform the world how we passed the anniversary of our country's independence, still, upon reflection, having no occasion to be ashamed of the manner we spent the day, we proceed to offer thereon a few remarks. We enjoyed the kind hospitalities of our missionary friends at the station of Kaluaaha, on Molokai.—Besides the members of the American Mission families, the Island contained not another American citizen, or white person, to our knowledge. Only two foreigners have taken up their residence upon the Island, and they left to spend the day at Lahaina. On the afternoon of Monday, July 5th, occurred the missionary monthly concert of prayer in the native church. Previous to the meeting the natives, adults and children, brought to the missionary's study their various monthly contributions. We would here remark that the missionaries, Messrs. Hitchcock and Andrews, have rather discouraged, than encouraged their people from bringing cash, but preferred that they would bring the products of the soil or of their hands. They have pursued this course, principally, that they might encourage industry among the people. It was interesting to witness the variety of Hawaiian wealth that was poured into the Lord's treasury. The men usually brought a stick of wood valued at 6 1-4 cents; the women and children brought mats, rope, twine, taro, eggs, fowls, potatoes, &c. The entire contributions, reckoned at Molokai price current, amounted to about $8,00. Additional contributions, we learned, would be brought during the month by persons living at a distance. This method of collection, subjects the missionary to far more trouble than would a collection in money, but it is, doubtless, far better for the people. He is very particular to record each donor's name, the article given and its value. Subsequently, he must find a market for the various donations. The following extract from a late American paper, will inform our readers respecting the disposition which has been made of some of the funds contributed by the christian people of Molokai:—

"At the Anniversary meeting of the New York and Brooklyn Foreign Mission Society, held a few days since, Rev. Dr. Armstrong, in the course of some remarks, made the following remarkable statement:

Twenty odd years ago two vessels sailed from this country—each with a company of missionaries. They continued the same track to the Equator, when they separated; one went Eastward, around the Cape of Good Hope, and landed her missionaries at Ceylon, among an ancient, proud and superstitious people, where they have preached Christ with great success. The other vessel proceeded Westward around Cape Horn, and thence Northward, and landed her missionaries at the Sandwich Islands, among an ignorant, savage and deeply degraded race. There they began to make known the Gospel. Now, said Dr. A., I have just received a letter from the Sandwich Islands, with a draft from the Church of Molokai, the contributions of the natives, derived from the sale of mats, of $100—to be paid to the Ceylon mission for the education of pious natives there for the ministry. Is not this indeed a wonder? Christians of the Sandwich Islands, twenty years ago in thickest darkness, now raising funds to educate the youth of Ceylon!"

We are happy to add, that this same people recently voted the sum of $20,00 for the benefit of their fellow Polynesians, the Tahitians, who have been called to pass through so much trouble. This amount is now in our possession to be forwarded by the earliest opportunity, accompanied by a well executed letter in the native language, written by a member of Mr. Hitchcock's church, and addressed to the native christians at Tahiti.

Religious services at the meeting house followed, "laying down the contributions." Knowing, as we do, (Mark 12, 43,) that it is not the gift, but the motive prompting the gift, which renders it acceptable to God, we could not but conjecture that some poor Hawaiian that afternoon might have cast in more than a score of "princely donations," which are trumpeted round the world. An audience of 200 assembled to pray for the extension of the Redeemer's Kingdom, and that the people of all lands might come into the possession of a purer, holier, and more rational liberty than is now enjoyed by the most favored nation on earth. We are happy to add our testimony touching the favorable reports which have gone abroad respecting the condition of the natives on Molokai.

On our return to Lahaina, we learned with unfeigned delight that our country's Independence had been observed in a most becoming and proper manner, by the friends of Temperance, at the U. S. Hospital. We requested one of the guests to furnish an account for our columns. He has done so in the following interesting communication.

4th of July Celebration.

Lahainia, July 9th, 147.

Mr. Editor :—As every advance in the cause of temperance is gain to the community, some of your readers may be interested to know whether a fourth of July can be celebrated at Lahaina, on cold water principles. A number of Americans at Lahaina, connected with our temperance society, knowing the fourth of July would be observed, felt desirous to observe it so as not to disgrace their country and characters. Knowing the revelry and intoxication so often indulged in on that occasion, and indeed by many deemed essential to a fourth of July celebration, they resolved to have a temperance dinner.

Early on the morning of the 5th, (the 4th being sabbath) the American hospital was gracefully adorned with our colors at one end of the veranda, and the temperance banner, with the motto, "*Pure water alone for me,*" at the other end. Along the front, in large letters on white canvas running the whole length of the building, was read

AMERICAN INDEPENDENCE, 1776.

Over the whole stood the noble Eagle, with

"*E pluribus unum.*"

The device was truly American and revived many an association of bygone days.

At two o'clock a respectable company sat down to a public dinner on the beautiful green plot in the yard, all screened from the sun by awnings. There too, at the head of the table, hung the banner, "*Pure water alone for me.*"

The dinner was every way worthy a *fourth of July.* There was all the party could wish to tempt them to a *social* repast. But nothing to tempt to revelry, neither brandy, rum, wine nor gin, nor any intoxicating beverage, not even the beer bottle, so common in Lahaina. Nothing but pure water from the fountain and plenty of good milk.

A certain enemy to cold water dinners, deeming some extra stimulus necessary, as an *act of benevolence,* offered the managers a *barrel of beer gratuitously,* that the occasion might not violate Lahaina usages. But the beer was not permitted by the company to enter the yard and the benevolence of the donor was *lost.* All passed off with good cheer. Two short addresses on the nature of true liberty, were delivered, and the company withdrew from the tables in *cheerful, healthful mood.* No bloated faces—no black eyes—no one jostling against his neighbor—no one overturned by the wall or knocked down by a post—no garrulous, belligerent squad of red noses, vociferating their loyalty around the nozzle of a beer barrel. No one disputing the claims of a certain quadruped for his post in the gutter, but like men in conscious independence, each could walk erect, and felt himself a man, testifying to the healthful blessings of pure cold water. At night the whole building was illuminated, when the eagle and motto appeared with fine effect. Multitudes of natives and foreigners assembled, but there was no call for *kaikos* there. The crowd was large, but no noise, no revelry, no one carried neck and heels to the fort. All was peace and quiet, and only the cheers for independence arose on the balmy evening air.

Such a celebration does honor to the Lahaina temperance society, and to those Americans who thus united to show their independence.

May the U. S. Hospital at Lahaina, never have occasion to be ashamed of any who claim independence.

The natives appeared to enjoy the festivity almost equally with the Americans themselves. The social freedom and hilarity with which Hawaiians enter into public festivities on temperance principles, whether the celebration be one of their own, or as on this occasion, one of foreigners, is much to their praise. How rarely we see an Hawaiian intoxicated. Even when you can count scores of reeling foreigners among them from all countries, Americans, English, French, Germans, Spaniards, Portuguese, Africans, Chinese and Indians, on almost any public occasion, you will look almost in vain, and be surprised to see a drunken native. May those who come here from lands boasting of their civilization, take lessons of the Hawaiians on this point, and may pure temperance principles soon bless every man who boasts that "*he 's no heathen.*"

Very truly yours, &c. ———

☞ If there is any one subject upon which men exhibit down-right madness, it seems to be in regard to spirit drinking.—The eyes of ship-owners and underwriters are now about half open—would that some of the frequent disasters occasioned by drunkenness might serve to make them *wide awake.* Who, after reading the following, would ever be willing to trust himself on board a vessel commanded and manned by *drunkards?*

"Gen. Flourney, of Kentucky, in his account of the accident which befel the Brittannia, in her passage out in July, says:—

" 'You may have heard something of my having been regularly shipwrecked, in the steam-ship Brittania, but you could not hear the particulars; *that* is impossible. All that I can now say is, that when the ship struck, and for half an hour afterwards, I would not have given a button for the life of every human creature on board. The captain himself was as pale as a sheet, and so was every body else, drunk and sober; the *drunker* the *paler.* Fellows with a quart of whisky in them, shook like an aspen. The ship had foundered, and was still thumping on the rocks; the water rushed in tremendously. The life boats were all let down in a moment for us to quit the ship before it should sink. The cannon were fired as loud and as fast as possible, with the hope that it might be heard in some direction. The shrieking of the ladies was truly heart-rending, and altogether indescribable. It was such as I never heard before and hope never to hear again. The ship did not quite sink, and of course nobody was drowned. The fog was very thick I agree, but the *whisky* was more to blame than anything else.'

If we have American steamers for the Atlantic, we trust that the officers and seamen will all be teetotallers."

Washington's Psalm.—The Rev. Mr. Waldo, an old revolutionary veteran from Connecticut, who attended the celebration at Westfield on the 4th of July, made himself quite interesting at the dinner table. He is now nearly ninety years old, but is in the vigour of a green old age, and was able to preach two sermons last Sabbath.

In his remarks he referred to the allusion made by the orator to Washington, and observed that he never heard even the name of that glorious chieftan and good man, "without feeling the cold chills through his whole system."

He remarked that there was a single incident that came within his personal knowledge, which he believed was not generally known. It was that Washington, on the day that he assumed the command of the American army at Cambridge, read and caused to be sung the 101st Psalm, a portion of which we publish:

If I am raised to bear the sword,
I'll take my cousel from thy word;
Thy justice and thy heavenly grace
Shall be the pattern of my ways.

No sons of slander, rage and strife,
Shall be companions of my life;
The haughty look, the heart of pride,
Within my doors shall ne'er abide.

I'll search the land and raise the just
To posts of honor, wealth and trust;
The men that work thy holy will,
Shall be my friends and favorites still.

In vain shall sinners hope to rise
By flattering or malicious lies;
Nor while the innocent I guard,
Shall bold offenders e'er be spared.

The impious crew, (that factious band,)
Shall hide their heads or quit the land;
And all that break the public rest,
While I have power, shall be suppressed.

This psalm the reverend worthy deacon read off to the company in true primitive style, a line at a time, which was sung to the tune of "Old Hundred," that tune being, as the old veteran said, "*just the thing for it.*"—[Massachusetts paper.

☞If our readers do not find suffiicient reading matter upon the subject of temperance in our colums, we would earnestly recommend the perusal of the Oahu Fountain.

☞Copies of Judge Lee's and Mr. Marshall's Addresses, before the Oahu Temperance Society, can be obtained at the Chaplain's study.

☞The Counting-House of Messrs. C. Brewer & Co. was in extreme danger of being destroyed by fire on the 5th instant.—The alarm was given just in time to prevent destruction of a great quantity of valuable papers and other property.

☞In a sermon preached at Newark, N. Jersey, by the Pastor of the Free Presbyterian church, on occasion of the death of the Rev. Mr. Torrey, who died in the Baltimore gaol, we find it stated that Mr. Torrey had been instrumental in assisting about 400 slaves to escape from their masters.—The statement is also made, that since the anti-slavery movement commenced at the North, more than 20,000 slaves had escaped to the Northern States and to Canada.

Erratum.—In our last number, it stated that the Superintendent of Schools, in the Rev. Mr. Armstrong's district was educated at Lahainaluna, by Mr. Hunnewell of Charlestown. We have been informed by the Rev. Mr. Alexander of Lahainaluna, that the young man educated by Mr. Hunnewell, is now a licensed preacher and a most promising young man, living at the west end of the island of Oahu.

An Englishman's Opinion of the American Navy.—A shrewd writer in the London United Service Journal, says, "There is no doubt that we, (the English,) have three powerful rivals in France, Russia, and the United States; but of these three, the Americans are the most important ones, on account of their origin, their courage, and their even greater activity and enterprise than our own." The writer then proceeds to show that our Navy, though numerically inferior to that of France, and even to that of Russia, is intrinsically superior to either, and contains the germ of a great and powerful fleet. We have the raw material, the workmen, and a sufficient merchant navy to arm as men of war, whenever called on to do so. Our Navy is a thing of life; it is procreative; that of the French and Russians resembles a huge and costly machine, which once destroyed, is not easily replaced.—[Am. Paper.

Education most effectual in rfforming mankind.—There are several ways of reforming men; by the laws of the civil magistrate, and by the preaching of ministers; but the most likely and hopeful reformation of the world must begin with children.—Wholesome laws and good sermons are but slow ways. The most compendious way is a good education; this may be an effectual prevention of evil, whereas all after ways are but remedies.—[Tillotson's Sermons.

Names.—A man that should call every thing by its right name, would hardly pass through the streets without being knocked down as a common enemy.—[Halifax.

Donations.

FOR THE FRIEND.

A Friend, Lahaina, $5,00

DIED.

In Honolulu, July 13, Robert Farmer, aged 19, formerly an apprentice in the Polynesian office.

In Honolulu, July 10, Mr Amos Ford, blacksmith, belonging to Boston, Mass. He has resided on these Islands since 1833.

In Honolulu, May last, Mr. D. C. Higgason, painter, belonging to Richmond, Va. U. S. A.

At Lahaina, 2d instant, Katharine Bruce, youngest daughter of Henry S. Swinton, aged 10 months.

At Waimea, Kauai, June 22, Mr. Benjamin Thompson, aged 64 years.

MARINE INTELLIGENCE.

PORT OF HONOLULU.

NOTICE TO WHALERS.

Honolulu is a free port to Whalers of all nations, the only charges being $2 for buoys and $1 for clearance—tonnage dues and pilotage being abolished by the law of 15th June, 1847. For further particulars see the Commercial Regulations on the last page.

ARRIVED.

June 23.—H. F. M.'s S. La Sarcelle, Capt. Leborgne, 12 guns, from Mazatlan via Hilo and Lahaina. Left at Mazatlan, H. B. M.'s S. Constance, Capt. Walker, and U. S. S. Independence and Cyane, Commodore Shubrick, the latter blockading.

June 27.—H. B. M.'s Ship Modeste, Capt Bailey, 14 days fm Columbia River. She was detained five weeks in Baker's Bay, waiting a chance to get out.

SAILED.

June 23.—Fr. schr. Currency Lass, McLean for Tahiti.

July 4.—H. B. M.'s S. Modeste, Capt. Bailey, for Valparaiso via Tahiti.

July 11.—H. F. M.'s S. Sarcelle, Capt. Leborgne, for Tahiti.

MEMORANDA.

The Hudson's Bay Co.,s bark Columbia, hence, arrived at Columbia River in 17 days.

Loss of another Whaling Brig and three lives.—The Clement, at Boston, from Charleston, fell in with on the 9th inst. lat. 38 22, long. 72 35, brig Maracaibo, of Plymouth, and took off Capt. Colinwood and 18 of the crew. The M sailed from Plymouth, 12th ult. on a whaling cruise, on 19th lat. 35, lon. 63, during a heavy gale from SSE. she was thrown on her beam ends. She was then got rouud before the wind, and scudded under fore topmast staysail. The vessel was then lightened by throwing overboard the tryworks, line tubs, &c. and the boats were cut away. At 4 o'clock P. M. a sea broke over her stern, knocking her down and washing overboard Wm Tripp of Tiverton, 2nd officer, and David Sylva, of Fayal, seaman. Geo. S. Ellis, seaman, was also drowned at the same time in the forecastle. The brig remained on her beam ends about 20 minutes, when her masts went by the board and she righted full of water. All hands then lashed themselves to the wreck, and remained in that position 96 hours, their only subsistence being a barrel of sugar which was wet with salt water. On the 23d, the weather moderating, they battened down the main hatch, and on the 24th rigged jury masts, and hove over provisions, wood and water, to lighten the brig. On tne 25th spoke ship Newton, of and from New Bedford for the Pacific, by which they were supplied with spars, rigging and quadrant, giving in return some beef and a tow line—all their nautical instruments, &c., having been destroyed. On the 28th, lat. 39, lon. 63 30, they experienced another gale, which carried away their fore jury mast, which however was got up again the same day and sail made. On the 29th and 30th they experienced heavy gales, but from that time to the 9th inst. the wind was variable —[N. Bedford Whalemen's Shipping List, Oct. 20.

PORT OF LAHAINA.

JOINT RESOLUTIONS.

FIRST.

Be it Resolved, by the Nobles and Representatives of the Hawaiian Islands, in Legislative Council assembled,

That, in order to encourage the visits of Whale ships of all nations to the ports of entry for such vessels now open by the existing laws, or hereafter to be declared open, they and each of them on and after the promulgation hereof in the Polynesian newspaper, be exempted from all anchorage fees, and tonnage dues, imposed by the existing tariff upon vessels exclusively engaged in the whale fishery; in all cases so long as said vessels shall not exceed in their trade or barter in foreign goods the amount of two hundred dollars *ad valorem* allowed by law to be landed from them free of duty, provided brandy, wine and other liquors which have an intoxicating effect, be entirely excluded from that trade or barter, any vessel trading or bartering in which shall wholly forfeit the advantage of this Resolution.

SECOND.

And be it further resolved, that from and after the promulgation hereof as aforesaid, the harbor or roadstead of Kealakeakua, on the Island of Hawaii, shall be, and is hereby created a port of entry and departure for whale ships, in accordance with the existing laws applicable to such vessels, at the other ports already opened to whale ships.

THIRD.

And be it further resolved, that the Minister of Finance be, and he is hereby authorized to pay, out of any monies in the exchequer, the drafts of the Collector General of Customs in favor of any duly appointed pilot, employed at the port of Honolulu, the sum of twenty-five dollars for each whale ship which shall have been promptly and faithfully piloted by him in and out of the port of Honolulu, in lieu of the one dollar per foot allowed by law to be charged for the pilotage of whale ships.

FOURTH.

And be it further resolved, that the Minister of Finance be, and he is hereby authorized to pay to the pilots appointed for Lahaina, Hanalei and Hilo, out of any monies in the exchequer, such gross sums per annum as may be recommended by the Board of Finance, in lieu of the charge which they are authorized to make for the pilotage of whale ships.

FIFTH.

And be it further resolved, that the joint resolution of 3d April, 1846, relative to brandies, wines and other spirituous liquors shall be understood and is hereby interpreted to mean as follows:

The permits to trade or barter given to vessels engaged in the whale fishery, do not and shall not include the trade, sale, landing or disposal of spirituous liquors, but all such traffic on the part of said vessels shall be and is hereby construed to constitute them merchantmen, and shall subject them within the meaning of said joint resolution to the payment of twenty cents per ton, tonnage dues, as well at the anchorage of Lahaina, and the roadstead of Honolulu, as at anchor in the harbor of Honolulu; and to all other legal liabilities.

SIXTH.

And be it further resolved, that from and after the promulgation hereof as aforesaid, so much of chapter second of the first part of the Act to Organize the Executive Departments, passed on the 27th day of April, 1846, entitled, "Of the Internal Commerce," as applies to the price or consideration to be paid to the Minister of the Interior for Licenses granted, shall be, and the same is hereby amended as follows, viz:

1st. Licenses for the wholesale vending of goods, wares and merchandise, at any place within this kingdom, to the sum of seventy-five dollars, instead of twenty-five dollars.

2nd. Licenses for the wholesale vending of spirituous liquors, in like manner to the sum of fifty dollars, instead of twenty-five dollars.

3d. Licenses for the retail vending of goods, wares and merchandize, in like manner to the sum of forty dollars, instead of twenty-five dollars.

4th. Licenses for the keeping of Hotels, in like manner to the sum of fifty dollars, instead of forty dollars.

5th. Licenses for the keeping of victualling houses and houses of entertainment, in like manner to the sum of forty dollars, instead of twenty-five dollars.

6th. Licenses for the keeping of Billiard Tables, in like manner to the sum of fifty dollars, instead of twenty-five dollars.

7th. Licenses for the keeping of Bowling Alleys, within the precincts of any town or village, fifty dollars, instead of twenty-five dollars.

8th. Licenses for public auctioneers in the town of Honolulu, in like manner to one thousand dollars, instead of five hudred dollars.

Provided always, that nothing herein contained shall be construed to act retrospectively upon the prices or considerations already paid for the use, exercise and enjoyment of the licenses now in existence, and already obtained, until the expiration of the full limit thereof by the existing laws.

SEVENTH.

And be it further resolved, that the Collector General is authorized and directed on the first day of July of each year, to collect from the owners of all hulks the charges exacted by law, providedhowever, that these charges shall not be exacted in cases where such hulks are intended to be broken up within a period of four months from their entering into the harbor.

EIGHTH.

And be it further resolved, that from and after the promulgation hereof as aforesaid, no clearance shall be given by any Collector of Customs, to any foreign vessels at any port in this kingdom where there is or shall be a Consul, Vice Consul, Commercial Agent, or Vice Commercial Agent of the nation to which such vessel belongs, until the master or Commander of such vessel shall produce to said Collector a certificate under the seal of his Consulate, that all legal charges and demands in his office against said vessel have been paid, and that he knows of no reason why said vessel should not immediately depart.—

Wreck of the Steamer Atlantic.

CAPT. CULLUM'S (U. S. ENGINEERS) NARRATIVE; LIST OF PERSONS SAVED AND LOST; VERDICT OF CORONER'S JURY; THE BELL OF THE ATLANTIC, OR "LINES," BY MISS F. M. CAULKINS, OF NEW LONDON.

NEW LONDON, CONN., Nov. 30th, 1846.

Exhausted in body and mind, and with a heart too full of mingled feelings of gratitude to God for my deliverance from the perils of the deep, and sadness for those whom it has pleased Him, in His inscrutable wisdom to take away, I have not been able sufficiently to compose myself, to give any suitable account of the loss of the ill-starred Atlantic, with her heroic commander, many passengers, and part of her crew.

On Wednesday evening, the 25th, we left Boston at the usual hour, (five o'clock) with about *one hundred* passengers; but, in consequence of the North East storm and drifted snow, we did not reach Allyn's Point till midnight, when it was still blowing violently from the N. E. Going on board the Atlantic, I shook hands with Capt. Dustan at the gangway plank, when he remarked, "Captain, I fear we sha 'nt be able to leave you at New London," (one of my stations) "tonight." I replied that I was going through to New York. "That 's lucky," said he, as I passed on board.

Before reaching New London, the wind changed to the west, and stars began to appear. Though blowing hard, the wind was off shore, which enabled the boat to land after considerable difficulty, at New London, where I would have stopped had not important public business called me to New York.

When outside New London light, I found it was blowing a gale from about W. N. W., which made a heavy sea in that direction, and somewhat opposed to that produced by the N. E. wind which had been blowing all day. Our course being S. S. W. for some miles after leaving the Thames river, we had to run nearly in the trough of these two cross seas, and were exposed to the violence of both, striking the boat alternately, on her starboard bow and larboard quarter. Though wrestling hard with the waves, I had no serious apprehensions of danger, as I knew the boat was very strong, and had a powerful engine. One of these sources of safety, however, soon proved fallacious, as the steam pipe burst nine minutes after leaving the light, and before we had reached the light boat on Bartlett's reef. A heavy sea struck the boat, and an explosion sharp and loud ensued. I rushed to the deck, when another sea struck her on the other side, and a second explosion took place, filling the lower and saloon deck with steam, at the same time extinguishing the lights. Not knowing what had burst, I returned to the cabin, closing the door after me to keep out the steam, and was ready to save myself from inhaling it, by throwing myself on the floor and wrapping a blanket around my head.

Scarcely had we recovered from our first alarm, when the chambermaid passed through the cabin, telling us that the boat was on fire and asking us to go on deck to assist in extinguishing it. We all, of course, ran to the stairs, but Stetson, the 2nd captain, meeting us, said, "Keep cool, gentlemen, you may depend upon our doing every thing for your safety, and that we shall be the last to leave the boat—keep cool." I stepped up to him and said that I was disposed to keep perfect cool, but if I could render any assistance, I wished to do so. He said we could do nothing, and again begged that we would keep cool. Lieut. Norton, myself, and one or two others, obeyed him, but many persisted in going on deck. I afterwards learned that the boat had been on fire, but that it was immediately extinguished. the alarm was greatly heightened by the throwing out of the fire from the furnace, as the wind, sweeping it by the vessel in sheets of flame, gave her the appearance of being a prey to the devouring element.

As soon as the steam had partially lifted, I went above to learn the condition of things. Most of the passengers whom I met said the steam chest had burst. This was a mistake, as I afterwards ascertained by a personal inspection of the engine. It was not the steam chest which had burst, but the vertical steam pipe, (about 18 inches in diameter,) connecting with the steam chest, and into which the two inclined steam pipes from the boilers on the guards, lead. The seas striking first under one guard and then under the other, lifted the boilers as much as the yielding of the timbers would permit, which acting upon the vertical steam pipe, by means of the long levers furnished by the inclined steam pipes, caused the vertical one to burst, or rather to be wrenched off about three feet below its top, or midway between the saloon and hurricane decks. It is common to have the vertical steam pipe made with a slip joint to guard against such accidents. But the Atlantic's steam pipe had no such provision.

At the time of my going on deck I found the wind still blowing violently from the W. N. W., but with our anchors we could probably ride the storm till morning; when I had no doubt the New Haven would come out to our assistance. Morning came, however, but with it came no assistance. The noble vessel still rode o'er the raging sea, seeming to defy the powers of the howling tempest and the breaking waves, whose cresting tops dashed high over her. During the night I judged we had drifted about three miles; yet as we were still four from Fisher's Island, and had escaped all danger of being thrown on the rocky reefs of Black and South East Ledges, by passing a little south of them. I had no serious alarm for our safety, as I thought that at 12 o'clock on Thursday the wind would certainly abate. The gale, however, continued with undiminished fury. All fires were extinguished, the stoves removed, and the vessel lightened of about forty tons of coal. About 9 A. M., we saw the New Haven come to the mouth of the harbor, but she dared not venture further into the boiling sea.

The morning hours grew long and weary, the cold was intense and hunger began to gnaw. Fortunately a basket of soda crackers was brought, and thankful were we for this sad and meagre thanksgiving feast.

By ten A. M., we had drifted within half a mile of the rocky shore, against which the lofty waves dashed their foaming crests in majestic grandeur. It was a sight as sublime as terrible. Every moment we expected would be our last. Hope now began to wane. The pilot house, chimney tops, saloon, bulk heads, and everything moveable which could hold wind, had been cut away. Every one supplied themselves with life-preservers, of which the boat had an abundance. A *scrag anchor*, made of cast iron grate bars (nine feet long), tied separately, at short intervals, after the manner of a boy's kite tail, was thrown overboard. This made three anchors, as Capt. Dustan himself told me.—Subsequently I was told that, besides the scrag, we had out one anchor weighing 1360 lbs., and two kedges, one of about 500 and the other 700 lbs.

Soon after 10 A. M., the Massachusetts came near us, and seeing our position and signal of distress, she checked her headway. All hearts beat light for a moment, to be cast down the next, as she passed on her way to Stonington without offering us any assistance.

About 11 A. M. the Mohegan was seen coming, and again our hopes were raised to be as cruelly disappointed. She did not approach near enough to be within hailing distance. Soon after the Mohegan left us, I had a long conversation with Capt. Dustan. I asked him if it would not have been possible for the Massachusetts to have dropped

under our stern, and throw us a line, with which she could have towed us, stern foremost, before the wind, into Stonington. He replied, "he did not think it could be done." The Mohegan, he said, knew our danger, and would be out again to render us assistance as soon as the wind abated. I am not a sailor, and do not esteem myself a competent judge of what either of the steamers could have done; but I give it as the opinion of Lieut. Maynard, an experienced sailor of our gallant navy—who was on board; and one of the best whaling captains of N. London who ever sailed a ship—that an anchor could have been dropped ahead of us, and a cable floated to us by means of a buoy.—With another anchor, like our best, we would have probably ridden out the storm. "I would give," said Dustan to me, "$1000 for another anchor today."

All hope from human aid now vanished, and our only trust was in God, and to him went up devout prayers for our deliverance. All the passengers, numbering according to my own and the estimation of many others of that sad company, about *one hundred* souls, were assembled in the cabin. A portion of scripture was read by Dr. Armstrong, followed by a prayer that, as when our Savior went down in a ship, with His disciples, and a storm arose, He would now rebuke the wind and the raging of the water, and that they should cease and be calm. A gentleman from Cincinnati addressed us with the voice of prayer, and told us of his conversion and present reliance on Jesus who came once to save the world. Prayer is ever solemn, but never did those present find a more awakening echo within their own bosoms.—A few frail planks and cables separated us from eternity. A few moments and all might be summoned at the bar of God. I feel sure that not one left that cabin without a purer heart and more virtuous resolves.

From 12 M. to 5 P.M., the howling storm and tempestuous sea, ceased not their wrath. The gale had become a hurricane. Onward towards the dread breakers we still drifted. Calm resignation set on every brow. Our noble captain, like a guardian spirit, moved undismayed wherever danger threatened.—The queenly steamer proudly breasted the foaming billows. Though exposed to the fury of the tempest for a day and a night, not a seam had opened, and not a cable had parted. The sun went down, and with it set the last rays of hope. * * * * * * Daylight had gone and the moon had ceased to lend her cheering rays. Darkness had spread her funeral pall, and the sublimity of horror was at its height; yet not even the whisper of fear was uttered. The parting farewell of friends had been spoken, the adieus to the loved ones at home had been breathed in our hearts, and the silent prayer to God, "Thy will be done," had gone up on high. Oh! it was a fearful and solemn scene, which would sink deep even into an adamantine heart.

At half past four on Friday morning, the 28th, a tremendous sea struck her, which made every joint and timber in her entire extent tremble and groan as in her death struggle. The cable of our large anchor which had held on so faithfully for a day and two nights, parted, and, immediately after, those of the kedges and scrag snapped like threads.

* * * * * * *

At the time she struck, I was standing with surgeon Hassler, Lieuts. Norton, Maynard, and Stewart on the starboard side, immediately aft the triangular skylights, which light the after cabin, or about twenty feet forward of the after gangway. Hassler, Norton and myself took hold of a post which supported the saloon deck. Hassler had the lower hold, which he considered the best, as he thought it would part above, Norton the next and I the highest. Supposing from the appearance of the shore, that the captain would bring her head around to the north when she struck, we hae chosen the starboard as the safer side, which proved, however, to be the least so. The third sea broke the post off at the bottom, and the strong undertow carried away poor Norton and Hassler violently against the store rooms along the waist of the boat, by which they were probably so much stunned and injured and injured as to leave them at the mercy of the next sea which swept them overboard. I, fortunately, by clasping the post tight and lifting my feet escaped the fury of the undertow. * * * * The third time I reached the rock I obtained a more secure hold, and resisted the undertow. The ten remaining feet I passed over among sunken rocks, with much difficulty, and was thrown by a sea on my face. Here, with my face down, I became entangled with my life preservers and clothes, and though on the edge of the shore, was nearer drowning than ever. Though completely exhausted, my presence of mind did not desert me. With my icy fingers I succeeded in unbuttoning my overcoat and getting at my knife with which I cut away my life preservers, and thus relieved myself from my perilous situation. On shore I first gave thanks to God for my deliverance, and with the little strength I had left, I clambered up a steep rock behind which I laid down to die. I was so much exhausted that I was indifferent to life. Soon after, two of the deck hands ran past me which seemed to give me new energy, and I endeavored to follow them. Though they were much in advance of me, I with feebler steps, wandered about in the piercing wind for two miles, when I reached the house of Mr. Winthrop with my outer clothes frozen stiff. Though within a house I could not come near the fire, around which the first comers were collected. Fortunately an Irishman, who had worked at Fort Trumbull under my superintendence, recognized me, and gave me and also Lieut. Stewart a shirt and a bed. He said I had been kind to him. I trust I had, and this kindness was requited with more than ten fold interest.

The escape of others was no less miraculous, and to record the perils of each would fill volumes. Most of those who were saved were on the larboard guard, from which they jumped and swam ashore. I regret that I do not know the names of several who again periled their own lives in saving others.—among them was a brave fireman, William Edwards. Stetson, the 2nd captain, was very active; Gould, the express-man, rendered valuable aid; and Monroe, the conductor, did good service, But no one was more self-sacrificing than Lieut Maynard, who, up to his middle in water, stood braving the waves till after daylight, and with heroic constancy, maintained his post of danger till scarce one was left upon the wreck, and not until he was relieved by one of the Islanders.

Over the horrors of that awful scene of death and woe I would draw a veil. The thought of the sufferings of that melancholy night oppresses my brain—the howling tempest still chills my veins—the earthquake roar of breakers yet stuns my senses—the crashing of falling timbers still makes me shudder—the fearful grinding on the rocks yet grates on my ear—the death shrieks of women and children as they sank in their cabin coffin, into their watery grave, still rends my heart—and the solemn knell of that slow tolling bell, as it pealed the sad requiem of the many noble and loving hearts, will forever ring in my memory.

To those noble and brave men of Mystic, Captain T. Elliot, C. H. Mallory, G. Gates, Ira Clift, E. Spicer, Joseph Potter, Jr., and Messrs. John Crocker, W. Burrows, E. Daboll, Charles Murphy, Geo. Crary, and others, who in the smack Planet ventured out in that tempestuous sea on Thursday to rescue us, I would return my most heartfelt thanks and sincere wishes that heaven may own and prosper them. Capt. J. Holmes and the crew of the sloop Leeds, I would also warmly thank.

To the citizens of New London generally, I feel under a debt of gratitude for their kindly sympathy, which I have more than once experienced.

It was my intention to have added a list of the saved, but as it has been already published, and my time is extremely limited, I must omit it in this hurried and oft interrupted narrative. I cannot, however, omit saying that everything was done for our comfort and safety by the noble and gallant Dustan which he thought was in his power to accomplish. Generous man!—thy brave heart has ceased to beat—that eye, where was enthroned the majesty of command, is set in death—those lips, which spoke the words of kindness, are still—and thy noble

form lies low. Would that I could write thy fitting eulogium!

And to you, Hassler and Norton, my unfortunate companions in peril, I would offer a fitting tribute to your worth, but sad memories crowd my brain—and my pen is still.

GEO. W. CULLUM,
Capt. U. S. Engineers.

LIST OF PASSENGERS SAVED.

Joel R Andrews, N. London, Nathaniel Atwood, Eastham, Mass., Richard Atwood, Orleans, Mass., Seabury Brewster, N. Y., E. V. Booth, Boston. T. F. Baldwin, Cincinnati, Capt. George W. Cullum, United States Engineers, C. C. Comstock, N. London, Chas Cadnedy, N. Y., Thomas Gooding, John C. Gardner, Boston, Peter Hanna, Portland, F. Herrick, Boston, Calvin Houghton, Bradford, Vt., Wm. Leverett, Plymouth, N. H., Lieut. E. Maynard, U. S. N., Varnum Marsh, N.Y., Ed. Madden, Boston, Chas. Mitchel Norwich, C. C. Orr, Louisville, Ky., Chas Patridge, N. Y., C. Peterson, Boston, G. W. Rogers, N. London, Nahum Rice, N.J., William Rhodes, Brooklyn, N.Y., Lieut. S. C. Stewart, U. S. Engineers, Hiram Tarbox, Lisbom, Conn., Thos Truesdall, N.Y., Robert Vine, West Newbury, Mass., Henry Van Wart, Birmingham, Eng., Jacob Walton, West Newbury, Mass., James Wilson, Boston.

LIST OF PASSRNGERS LOST.

C. H. Hassler, Surgeon, U.S.N., Lieut. Allen H. Norton, U. S. A., John Walton, Mrs. Walton, Mrs. Vine, and three children of Mr. Walton, West Newbury, Mass Moses B. Kimball, N. Y., Samuel E. Cassiday, Phila., A. T. Collamore, Boston, Rev. Dr. Armstrong, N. Y., Charles French, Orlando Pitts, Boston, Mrs. Elizabeth Thompson and child, Danvers, Mass., Wm. Burbank, Brooklyn, N. Y., Dr. Weston, Phila., W. B. Solace, Bridgport, Vt., Mr. and Mr. Ames, Wilmantic, Robert E. Hope, Brooklyn, Miss Mary Jordan, Boston. H. H. Cunningham, N. Y., Archibald Austin, Thos Symes, Westport, Mr. Tinkham, Mr. Putnam, Miss Smart, Dr. Toorney.

The following persons belonging to the boat, so far as we can ascertain, with others not known to us, were lost, viz:—Capt. I. K. Dustan, Michael Dougherty, Lawrence Kelley, Thomas Gedney, Mary Ann Hilton, Sarah Johnson, and Saray Ruby.

The above list of those who were saved, was taken from the N. London Democrat, and is believed to be correct. The list of those who were lost, contains all the names as far as ascertained.

VERDICT OF THE CORONER'S JURY.

STATE OF CONNECTICUT, NEW LONDON Co. SS. }
Norwich, Nov. 28, 1846. }

We, the undersigned, a jury of inquest, under oath to make diligent enquiry and a thorough examination into what manner the several persons before us, being 18 in number, came to their death—having made such examination, do say that the death of said individuals, most of them to us unknown, was caused by bruises or by drowning at the time and in consequence of the stranding of the steamer Atlantic on the westerly end of Fisher's Island, about 4 o'clock on the morning of the 27th inst., and that in our opinion the primary cause of said disaster was the bursting of the steam chest of the engine of the said boat about 2 o'clock on the night of the 26th inst.

(Signed) John Breed, Thos. Robinson, Wm. W. Coit, James L. Day, Rob't Johnson, John D. Ford, Ebenezer Fuller, Samuel Mowry, Charles Coit, Livingston H. Smith, Jedediah Spalding, D. E. Sykes.

THE BELL OF THE ATLANTIC.

BY MISS F. M. CAULKINS.

[When the steamer struck the shore, the dashing of the waves against her frame, caused the bell to toll. The tone of this bell is uncommonly shrill and clear, and heard at such a time must have seemed like a peel from another world. It has been frequently heard since the consummation of the catastrophe and is still sending forth at intervals, its solemn and piercing sound.]

Storm-spirits ye did well,
To swing the funeral bell,
That sad night:
Noting down with iron pen,
When the struggling souls of men,
Took their flight.

Mid the raging tumult round,
How the shrill entrancing sound,
Fills the air!
Overmastering the gale,
Childhood's shriek, woman's wail,
Man's despair.

From eternity's dark land,
On whose cold brink they stand,
Hark! it rolls;
Pealing forth the notes of woe,
Ringing loud, ringing slow,
For the souls.

Ah! 'tis not the broken deck,
Man, Man's the only wreck,
Worth a tear;
Oh ye seas! what a prize,
What a costly sacrifice,
Ye took here!

Yet they perished not in vain:
From their peril, from their pain,
Let us turn.
To the lessons they unrolled,
Worth an argosy of gold,
But to learn.

For the sons of God were there,
Men of faith, men of prayer
Unsurpassed.
And the love of Christ had power;
'T was an anchor in that hour,
Holding fast.

There was *one** whose face was seen,
Like a shining and serene
Crystal sea.
Sublimed, as if the soul,
Had already passed the goal,
And was free.

There was *one* † of manly brow,
"*We are nearer Jesus now*,"
Was his cry:
Then the rushing surge swept o'er
And the loosened seraph bore
To the sky.

One calmly said, § "Of old
My Savior's voice controlled
All my woe:
And if through the raging sea,
He now says, *Follow me*,
I will go."

No thought amid the strife,
Of his own death or life,
Had the Chief;‡
The burden on his breast,
Was the lives of all the rest,
And their grief.

They dropped into the wave,
Some found in it a grave,
Some an ark:
Down, down into the deep,
As they fall, as they leap,
Hark! oh hark!

Now the loud and silvery bell,
Like an anthem seemed to swell,
Shrill and sweet:
And a group of angels came,
With their bosoms all in flame,
Friends to meet.

They caught the jewel's bright,
As they burst forth in light,
From the clay;
And the souls and seraphim,
In a sweet thanksgiving hymn,
Passed away.

Yet still upon the deck,
Mid the breakers and the wreck
Swings the bell;
Now an anthem floats around,
Now a low and dirge-like sound,
And a knell.

Above the thundering breeze,
And the heavy booming seas,
To and fro;
Like a requiem in the air,
Like a presence, it is there,
Swinging slow.

* Dr. Armstrong. The serene and heavenly expression of his countenance during the whole of that trying Thursday, has been mentioned by several of the survivers.

† This gentleman, (whose name was not known to the passenger who related the circumstance), was heard several times expressing his confidence in God, and encouraging others to trust in Him. He was in the Saloon, and was heard to utter the words quoted above, just as the sea broke over, and dashed the saloon from the deck, crushing or drowning all who were in it.

§ A gentleman from Ohio; name not known.

‡ The noble self-forgetfulness of Capt. Dustan cannot be too highly praised, since it seemed to spring from a high sense of the responsibility of his post, and his duty as a man and a Christian. Calm, gentle, self-possessed, assisting and counselling others, or toiling for their safety, without rest or refreshment during their protracted peril, he was probably too much exhausted and benumbed to struggle with the waves and secure his own safety.

Missionary Friend.

NEW PROTESTANT MISSION TO AUSTRALIA.—By the brig Eveline of Newburyport, arrived the Rev. John Geddie, lady, and two children, and Mr. Issac Archibald and lady; sent forth by the Presbyterian church of Nova Scotia. They are destined for the New Caledonia group, but are expecting to remain for a season at the Samoan or Navigator Islands. It may be interesting to some of our readers to learn, that the Presbyterian church of Nova Scotia is composed of 1 Synod, 3 Presbyteries, and about 60 congregations, with 30 settled Ministers. Several of these congregations have hitherto aided the cause of foreign Missions by contributing to the funds of the London Missionary Society, American Board, and United Secession Church of Scotland. About three years since a Board of Foreign Missions was appointed by the Synod. Their first object was to carrespond with other foreign missionary societies, and select a suitable field of labor. An appeal was made to the respective congregations for pecuniary support, which was most cordially responded to far beyond the expectations of the most ardent friends of the cause. An effort was then made to obtain the suitable men for the work. The Rev. Mr. Geddie having been a settled pastor for eight years on Prince Edward's Island, resigned his charge and offered his services as a foreign missionary. He was accepted, and spent one year in studying medicine, and otherwise preparing himself for his future labors. Shortly before Mr. Geddie left, the services of Mr. Archibald were also accepted as a lay missionary.

We are happy to learn that these missionaries are going to their field with the cordial approbation of the London Missionary Society, which supports the mission at the Samoan group. Their funds and supplies are to be transmitted through the agency of the London M. Society. At some future time we may furnish our readers with some interesting information respecting the New Caledonia group of Islands. We only add that Messrs. G. and A. remain here until an opportunity offers for the Society or Navigator Islands.

For the Friend.

Wants of Seamen.

No. IV.

Seamen need better *accommodations.*

Accommodations! there are *none!* There is a *place*, and it has a *name*, and most appropriately are seamen said to "*turn*" in and "*turn* out" again. One would think but little else but *turning* could be done there, and that turning *out* would be the most agreeable motion that could be thought of in so uninviting a place. "Forecastle." We have read of many castles, and the nearest resemblance we can find to the one just mentioned is Bunyan's castle of "Giant Despair."—Indeed it is much *smaller* than the pilgrim's prison, and perhaps *darker.* At all events the old tyrant has shut up many an unfortunate pilgrim there. Indeed it hardly admits of a conjecture but that the grisly "giant" disappointed in that instance of his victims, *went to sea*, like many a despairing man before and since his day. And who can doubt where he took up his abode? No one who has had the curiosity to look down the bows of a ship, or the courage to venture within that gloomy "castle." Few landsmen I presume, have made out to get down there, and get back again, but have blessed their better lot on shore, however humble, and pitied those who from preference or necessity embodied there a roving, a disappointed, an indignant, or contented spirit. Sympathy goes out unbidden for the decieved sailor who to his chagrin finds himself in such unwholesome and degrading quarters—while we pity the man whose ungovernable restlessness, or insatiable love of gain, or ambition of advance to favor and office, makes him at home and contented even for *one* voyage in the forecastle of an ordinary whaleship. And we should despair of elevating a man who could so servilely put his neck to the degradation as to feel no indignance at the insult, or feel happy there. His berth, and in most cases, the discipline to which he is subjected, and often the gross deception practised upon him at the outset—all together, and even separately, make us wonder that a foremast hand ever ventures a second time to sea. In all these respects, and especially those of government and accommodations there is too little regard paid to the sailor as a *human being.* And perhaps the two are wisely and inseparably connected together. The sufferance of one without the other would, perhaps, make its endurance less tolerable, or the banishment of the one would speedily draw after it its associate evil. Certain it is they have a common origin. They should share a common fate.

The fault of the evil we now deprecate lies far back. Much as masters and officers have to answer for, we will, for the most part, exonerate them here. We will take the discomforts, the injured bodies, the hardened hearts, and the numerous curses occasioned or fostered by the unfitness of their abode, and cast the burden upon the conscience of the guilty. Let *owners and ship builders* bear it. Let them acknowledge the deformed and sickly and depraved offspring of their avarice and littleness, and be ashamed of the unworthy progeny. Let them henceforth remember that *men* are to live and lodge before the mast, that officers are not all who have feeling and whose comfort is to be consulted. Sometimes they have their own superiors in the cheerless house of the sailor,—men who would be above the meanness of subjecting even *them* to such degradation. Let them *respect these*, if the common principles of humanity will not move them to regard the common sailor, and for the sake of a worthy class study more the comfort, the health and the morals of all. Make henceforth forecastles more suitable to the beings who are to tenant them. It is hardly possible, and still more improbable, that the occupants of such a place will feel or act with as much manliness and propriety as if better housed and better lodged. If their magnanimity do not resent it, their *degradations will degrade them.* But we are told "*They get used to it!*" Yes; and that is the *worst* of it. There would be more hope of this class of men if they yielded less readily to their circumstances. There would then be less fear that their abuses would be perpetuated. It is among the worst of all effects of any wrong, that it habituates and reconciles the injured to that wrong. Still more hopeless is the poor victim who is brought down to contentedness, and actual preference of wrong to right. "Used to it!"—and so a man might get used to *slavery* till he preferred bondage to freedom. Habit makes even excruciating pain more and more tolerable. Oft repeated scourging scarifies the sufferer to a toughness proof against ordinary stripes. Long confinement will make a man's cell his home even preferable to the freedom and fair fields of his boyish sports. Who does not feel that these effects are the clearest exhibition of the dreadful nature of their several causes? And who would plead, that men get used to slavery, to scourging, to pain, and to imprisonment, as an extenuation of the injury, or as a shield from deserved reproach? Again the little, whining voice of self-interest tells us, "*No more room can be afforded for sailors!*" True, while avarice occupies so large a place in the hearts of ship owners. True, while the cupidity of man swallows up every better feeling of his heart, and an undue haste to be rich, blinds his mind and sears his conscience alike to the claims of humanity and the demands of justice. Even then, if policy prompts it, there can be more room for masters and officers. And if prospects of gain were more flattering, there could be "more room" for *bone and oil*, and *less*, if possible, for the sailor. It is more *profitable* to owners to receive the rich avails of a *full* cargo, than to enlarge at the expense of a little *oil* room, the contracted lodgings of the crowded men. Bone and oil will *sell;* but the bone and muscle that grappled the monster and barrelled up his wealth, must be *paid. That* is the difference;—and as if grudging the poor sailor his well-earned pittance, they *make him pay his own wages!* The space which should have been made into his cabin for his comfort, *is left in the hold* for him to fill with oil! This is two-fold robbery. But "It is *just as well: they only go there to sleep.*" No wonder! Who would wish to do any thing else *there?* And it would be hard enough for you or me to do *that!* But would they not go there for other purposes, were there the least attraction or comfort there in any thing else? What does it argue for a man's home that he repairs thither only for sleep? And what does it say for the wisdom or goodness of that parent or guardian, or master, who, with ability to the contrary, provides a home for his dependents whose sole attraction, or hard necessity, is the time passed there in unconsciousness of their unworthy shelter? What wonder there is so little taste for reading—such a taste cannot with comfort be indulged. And where it exists there seems a necessity that it be for trash—there is no retirement, no suitable place for reflection or deep thought. Reading that requires but little reflection, or that is of an astounding or exciting character is all that the accommodations of foremast hands will ordinarily admit of. Hence, too, may ordinarily be traced the careless and lounging habits so characteristic of sailors. Did they enjoy a light and roomy cabin, they might often be tempted below to inform their minds. But storms and cold and fatigue alone drive them there. It is too dark to read at midday, and if at night, a smoky lamp scarce flickers its doubtful light upon their cheerless berths. The impossibility creates indifference, the prolific source of mental poverty and imbecility. But "We 'turned in' once, it is *their turn now!*" And did you like it? Is it not rather a recollection of past imprisonment that moves a retaliating spirit within you, and, by a singular misdirection, avenges itself upon your successors? An unenviable disposition, surely, that can wish for others the misfortunes or abuses that fell to your own lot: the best proof of the dreadful effects of such degradation upon the intellect and heart. The plea is worse than childish, its weakness and inconsistency proving the author but the wreck of a man, possessed only of a shattered judgment and a perverse heart. He is probably the contempt and dread of his crew, discovering the fact that the forecastle may be the worst of all schools for training up officers and masters. Some having felt the yoke, may righteously determine to *lighten*, if not altogether remove the burden; some, and perhaps most, have borne

it only to know *how to impose its weight upon others.* Such have profited ill by past trials. Severer tests may separate their dross: there is more reason to fear they would consume both good and bad together.

But "*It will do them good; it will inure them to hardships!*" Thank you! You have yielded the point! You could not have meant thus to own yourself a *hard* master. And you are so *benevolent* in the exercise of your severity. Really, you are doing them a *kindness* to crowd and degrade them. It is for their good, and the more you contract their quarters, and the further into the dark you compel them to give themselves up to indolence or rest, the more useful and humane your course! Admirable logic! and as wonderful philanthropy! Few could be guilty of the one—though many perpetrate the latter.

"*They are more easily governed if made thus to feel their inferior rank!*" True, if they are in training for the mines of Siberia, or the galley of the Turk. If kept there, with the iron heel of oppression upon them, they will, ere long, sink to the level of their titled superior. Lower they could hardly reach. But enough. We have kept our readers too long in the forecastle. But the sailor has been there longer, and I fear will not soon get out. We are sorry for those there who respect themselves, but we sigh most over the *sick* who inhale the nausea, and look sadly out upon the cheerlessness of their gloomy home. But bad as it is, there is encouragement in the fact that the sailor's home is larger and better than it once was. We will hope that he will yet find room and comfort, and the light and the air of heaven, a *kind master* and *true happiness* upon his chosen element.

T. DWIGHT HUNT.

☞ Honor be to all honest conditions of human life, and to that of honest poverty among the rest. Let the poor only turn their misfortunes to the improvement of themselves; let them not presume to think that suffering authorizes them to commit crimes or to foster hatred; and they cannot be wholly unhappy. Never, however, under any circumstances, ought we to be severe in our judgment of them. Have deep compassion upon the really poor, although they are often goaded by suffering and impatience even to rage. Consider how hard a thing it is to suffer extreme want on the highway or in the hovel, while within a few steps of the wretched man beholds his fellow-creatures, splendidly arrayed and daintily fed, pass by him. Forgive him if he have the weakness to regard you with malice, and relieve his wants, because he is a man.—[Coleridge.

It is common to men to err; but it is only a fool who perseveres in his error; a wise man alters his opinion, a fool never.

Extracts from late American Papers.

Naval.—Foster F. Rhodes, Esq., late U. S. Naval Constructor, who died at the Pensacola Navy Yard, 7th ult., was nine years in Constantinople, as Chief Naval Constructor of the Ottoman Porte, and while there, built *twenty-six* sail, which vessels bear the reputation, (as he did) of being second to none in the world. He built the famous "Mesradia," a Turkish frigate, carrying 74 forty-two pounders, (a heavier weight of metal than three-deckers, or ships of the line carry.) He also built the Jamestown, U. S. sloop of war, carrying 22 guns, which has proved herself the fastest in our navy. He was a good Christian, a man of strong common sense, and one of the best Naval Constructors in the world.

The following appointments have been made by the President with the advice and consent of the Senate:—

Lieuts. in the navy.—Henry P. Robinson, Isaac N. Brown, R. Delancy Izard, Napoleon Collins, and John L. Worden.

Surgeon in the navy.—Robert W. Woodworth.

Assistant Surgeons.—Randolph Mason of Virginia, and Joshua Huntington.

Pursers.—Edward D. Reynolds, of Illinois, and Levi D. Slamm, of New York.

Deaths in the U. S. Navy.—Since the last session of Congress, December, 1845, the following deaths have occurred in the Navy.

Commodores.—Elliott, Crane, Renshaw, and Nicholson.

Commanders.—Jones and Wetmore.

Lieutenants.—Todd, Keith, Henry, Graham, Bache, (drowned) Beverly, and Morris, (fell at Tobasco.)

Surgeon.—Hassler.

Assistant Surgeon,—Barton.

Pursers.—Rice, Spencer, Breese, and Waldron.

Passed Midshipman.—Jameson.

Midshipmen.—Bartlett, Chenoweth, Pilsbury.

Masters.—Catalano and Dowe.

Gunners.—Barr and Bright.

Carpenter.—Morrison.

Sailmaker.—Reed.

Chief Engineer.—Hebard.

Chief Naval Conssructor.—Humphrey.

Naval Constructor.—Rhodes.

There are numerous resignations. Two Lieutenants, one Assistant Surgeon, one Purser, one Passed Midshipman, two Masters, two Master's Mates, one Teacher of languages, one Gunner, and one Sailmaker, have resigned.

Among the dismissions, we notice Mr. Navy Agent Isaac H. Wright, of Boston, by withdrawal of nomination, June 20, 1846.—Chief Engineer Moss had his commission revoked, and the place of 2d Assistant Engineer offered him, which he has not yet accepted.—[N. London Advocate.

The United States Government has purchased of Wm. W. Goddard, Esq., the new and beautiful ship Crusader, of 550 tons, for about $45,000.—[Boston paper.

Loss of U. S. Ship Boston.—By the arrival at Norfolk of schooner Volant, Captain Mathias from Ragged Isabel, we are in possession of the following particulars of the loss of the Boston, bound to the Gulf of Mexico.

She left New York on the 8th of Nov., and had very pleasant weather until the morning of the 15th, when, during a heavy black squall, accompanied by thick rain, and going then at the rate of nine knots an hour, she struck on an outer reef on the northern part of the island of Eleuthera, (one of the Bahamas), and drove up within fifty yards of the shore, broadside on. Immediately cut away thh masts, and threw overboard shot. When daylight appeared, it brought clear weather. During the squall, the quarter boat was swept away, and swamped. All the officers and crew succeeded in reaching the shore in safety, where they have been living in tents for two weeks, when the Volant took off two officers, and ten men, whom she has brought to Norfolk. The officers are passed midshipmen G. W. Temple, and midshipman J. B. Smith. The remainder of the officers and crew were left on the island and expected to sail in few days, for Nassau, N. P., from whence they will take passage for Norfolk. They had already sent two schooners loaded with stores, &c., to Nassau, and expected to ship the balance by the vessel that was to carry them to that place.

The Boston now lies high and dry, and bilged within fifty yards of the shore, stripped of every thing except the guns and water tanks, which it was impossible to get out.

Exploring Expedition.—A memorial has been presented to Congress, signed by a large number of officers who accompanied the exploring expedition, praying that a committee may be appointed to investigate certain grave charges which are brought against them in the narrative of that expedition which has been published under the authority of Congress. Appended to the memorial is an extended statement of the particular points in the narrative which are specially referred to.

Naval examination.—The following young men have passed the examination required, and been admitted into the navy, as acting midshipmen, since the 10th of October:

Beverly Kennon, Inda., Edwin O. Carnes, Ohio, James Bredon, Penn., F. W. Robinson, Mass., J. P. Foster, Tenn., A. J. Dallas, Penn., Augustus Dodge, Ind., Jas. Waters, Mich., K. R. Breese, R. I., P. C. Johnson, Me., O. P. Allen, O., Chas. L. Smith, do., Lewis C. Sawyer, do., John D. Raney, Miss.

THE FRIEND.

HONOLULU, JULY 29, 1847.

☞An officer of the U. S. ——, thus writes us from Monterey:—

"I rejoice to learn through the Friend, 'that the cause of Temperance is advancing with you, and that you have the co-operation of some of your most worthy citizens. I read with much pleasure the address of Mr. Marshall, and with such assistance, the cause must prosper.' The prospect is a sad one here to all the friends of Temperance. Grog-shops are springing up in all directions, and 'Jack's' path is literally beset with these stumbling blocks. I fear it will be some time ere "public opinion" will rid the country of such nuisances."

Grog-shops nuisances,—were there ever greater?

Foreign Intelligence.

United States.—By the Eveline we have received Boston papers to the last of January. Later intelligence however has been received. The war spirit was raging, although there was a powerful opposition. Volunteer companies were in the progress of formation. In Massachusetts four companies had been raised; one was commanded by Captain Wright, recently of brig "Somers," lost off Vera Cruz, and formerly Assistant Surgeon on board the sloop-of-war Boston, which visited this port in Feb., 1843. A son of Daniel Webster commands another. Subsequently Captain Wright was appointed Lieuteuant Colonel of the Massachusetts Regiment for Mexico. The Hon. Caleb Cushing, formerly Minister to China, was elected Colonel. The demand for American produce in Europe had made freights high and trade good. The following statement will show that great quantities of bread stuffs were exported last year.

Export of Breadstuffs.—More than 4,000,000 bushels of grain were exported from New York city last year to *foreign countries*, besides 1,193,428 bbls. flour, equal to 5,000,000 bushels more, making a total of NINE MILLION BUSHELS, or its equivalent, from a single port. It is at the rate of 25,000 bushels in a day, the year round, Sundays and all. It is more than half a bushel to every white man, woman and child in the nation.—[Bost. Rec.

How much better to feed the starving nations of Europe than to convert the grain into whiskey and gin, to make the nations of the earth drunk.

Boston papers for November, December and January contain full and minute accounts of the loss of the steamer Atlantic. The loss of no vessel since the burning of the Lexington, seems to have so much excited the sympathies of the New England people. Volumes would not contain the published matter upon the subject. We regret that our limits will not allow a more extended publication of particulars. There were many incidents connected with the melancholy affair of most thrilling interest. No one can read these accounts without being most solemnly impressed with the inestimable value of the Christian's hope. It was in the hour of peril and when human strength was unavailing, that the terror stricken passengers gathered around the Rev. Dr. Armstrong, and listened to his words, not knowing but the very next wave might consign them all to a watery grave.

Two new missionaries, Messrs. Cochrain and Kinney, have been appinted by the American Board to the Sandwich Islands.

We extract the following prices current from the Boson Atlas:—

Boston Market, January 20.

Sales of Winter sperm bleached and unbleached,	1 10 a 1 15
Do. Spring and Fall,	1 08 a 1 08
Do. Crude Sperm,	98 a 1 00
Do. Whale refined,	50 a 56
Do. do. crude,	40 a 42
Do. Whalebone,	35 a 40
Do. California hides,	9 a 9
Provisions.	bbl.
Beef—Extra Mess,	$10 50 a 11 00
Do. Mess,	10 00 a 10 50
Pork—Clear,	13 00 a 13 50
Do. Mess,	11 50 a 12 00

Domestics.—The demnad continued good for all descriptions, and prices high.

California.—By the arrival of the Com. Shubrick, we have received the "Californian" and "Star." The Californian has been enlarged and removed from Monterey to San Francisco. From these papers and private correspondence, we learn the following:—Commodore Stockton left San Francisco, a few days since with a parto of some 30 men for the United States, over the Rocky Mountains. Commodore Biddle leaves in a few days for the United States, in the Columbus, via Cape Horn, when Commodore Shubrick becomes commander-in-chief.

The Californian of June 12th, reports almost the entire U. S. squadron at Monterey. For two months not a vessel of war had been seen at San Francisco. Gen. Kearney had left for the U. S. Considerable unpleasant, as well as pleasant feeling existed respecting the future appointment of Col. Fremont as Governor. Public meetings had been held. Col. Fremont is reported to have left for the U. S. with General Kearney.

From the "Star" of May 29, we copy the following letter respecting Mexican affairs:—

Monterey, May 24th, 1847.

Glorious news has been received by the sloop of war Portsmouth, which vessel anchored in this harbor about six hours ago. I thought I would write a line giving you what I believe to be a fair account of the matter.

Gen. Taylor was posted at Saltillo with 7000 men, while Santa Ana was at San Luis Potosi with 18,000.—Gen. Taylor feeling it unsafe to risk a general engagement, marched as though he would do so, but left in a certain pass or gorge in the mountains, his artillery of 26 field pieces and placed them so that they had complete command of the pass.

On the 22d of February, (ominous day!) Santa Anna advanced to meet Taylor, and that old fox retreated to his pass under a galling and destructive fire from Santa Ana, who on the 22d and 23d pressed hard upon Taylor's rear, cutting him up terribly; on the 24th Gen. Taylor gained the pass, closely pursued by the Mexicans, and then ordering the army to lie flat upon the ground, he opened his artillery upon Santa Ana and his now closely pressed and compact army, mowing them down as grass. 5000 were left dead of the Mexicans, and about 6000 scattered, the remaining fled with Santa Ana back to San Luis Potosi. Gen. Taylor lost 2000 men killed in his retreat, so says the Mexican account.

Before the Portsmouth left Mazatlan, the town was illuminated on account of despatches received from Santa Ana, stating that he had cut Taylor all to pieces, and that he was retreating before him; but I presume the candles had not yet burned out before the news of the 24th followed that of the 22d and 23d, placing matters in a far different light, at which there seemed to be an end of rejoicing at Mazatlan.

Gen. Scott had marched on to and taken the city of Vera Cruz, where he had posted himself, intending to starve the castle of San Juan de Ulloa. The fleet were much strengthened under Commodore Warrington, who had, or was to reinforce Commodore Conner with the Ohio, ship of the line, and several other sloops of war.

A transport ship was lost with troops for Gen. Scott, at Tuspan Bay, and every soul perished, said to be 500 in all. This is about all the news by the Portsmouth and Dale. The latter arrived yesterday from Panama, with ten or twelve letters at most, and the Portsmouth to-day from Mazatlan.

I have taken what I write you from a public document in the possession of Mr. T. O. Larkin, so that I think there is no doubt of its truth.

Society Islands.—By the schooner "S. S.," formerly "Mary," intelligence has been received down to June 28th. The new Governor had arrived, and the former one had left for France. The Queen and Governor were going round the Island of Tahiti, to visit and see all the people. All was quiet. A very important question had been decided between the English and French Governments respecting the leeward Islands, viz:—Huahine, Borabora, and Raiatea. These were declared independent of the French Protectorate;—hence the demonstration of hostilities at Huahine some 18 months since was altogether premature. Each Island, it is reported, will have a separate flag. It was reported that the English vessels of war, Grampus and Calypso, and French Corvette Arion would sail July 1, for the leeward Islands, to hoist and recognize their respective flags. It was reported that the Huahine flag would be a red stripe between two white; that of Raiatea, two red and three white; and that of Borabara, three red and two white. The Grampus was expected to leave for Valparaiso, and the Calypso to return to Papiete.

DIED.

In Cambridge, 10th ult., Thomas Breeze, Esq., Purser, U. S. N. In early life he was attached to the personal staff of Com. Perry, was in the combat of Lake Erie, and assisted in firing the last gun discharged on board the Lawrence.

At New York Commodore John Nicholson, of the U. S. N., aged 63. He died of apoplexy.

PASSENGERS.

Per Brig Eveline from Boston—Rev. John Geddie, lady and two children, Mr. Isaac A. Archibald and lady, Missionaries for Navigator Islands; Mrs. C. A. Goodwin, Captain's lady; Messrs. Hiram Clark and F. Sebastian Jewett, supercargoes.

Per Schooner "S. S." from Tahiti—Mr. A. McGuire, wife and 3 children, and Mrs. J. Stevens.

MARINE INTELLIGENCE.

PORT OF HONOLULU.

NOTICE TO WHALERS.

Honolulu is a free port to Whalers of all nations, the only charges being $2 for buoys and $1 for clearance—tonnage dues and pilotage being abolished by the law of 15th June, 1847.

ARRIVED.

July 18.—Am. brig Eveline, Goodwin, Newburyport, 167 days. Experienced severe weather off Cape Horn; in lat. 13, long. 120 W., Pacific, took a heavy gale from S. W., and lay to 24 hours.

22.—Br. bark Helena, Thornton, from Valparaiso, via Coast of Mexico, 20 days. Reports the Coast closely blockaded by the American squadron; had no communication from the shore. An American brig, with a cargo on English account, had been seized in attempting to run the blockade. Left at Valparaiso, in April, a bark purchased by Capt. Kelly, and the Danish ship King of Denmark, both loading for this port.

23.—Hawaiian schr. S. S., Mohran, 23 days from Tahiti. Left at that port, H. B. M.'s ships Grampus and Calipso, and an English merchant vessel from Sydney.

25th,—Haw'n schr. Com. Shubrick, Von Pfister, Monterey.

MEMORANDA.

☞ The low-decked brig Smith Tuttle, Sylvester, sailed from Newburyport for the Columbia River, Nov. 20th. She had not arrived at the river, June 12, when the Modeste left, which would give her 204 days out. She was a fast sailer and heavily sparred.

☞ The U. S. S. Saratoga, bound for California, reported by us some time since as having arrived at Valparaiso, after a passage of some 90 days from Rio, arrived at Norfolk last Dec., having put back to Rio in distress. We learn that the hurricanes to which the Saratoga was exposed in her endeavors to round Cape Horn, were awful and tremendous, beyond any thing of the kind that had ever been experienced by the oldest seamen on board, and it is almost miraculous that the ship weathered them with the loss she sustained in having all her sails (new) split into ribbons. She shipped a sea which took off all her quarter boats, damaged her spars and started her deck and stern frame. The Saratoga left the Cape on the 5th and arrived on the 26th October, at Rio, whence she sailed for this port on the 6th November.

Yankee Enterprize.—The schooner Indiana, of only eighty-seven tons burthen, cleared at the Custom House on Saturday forenoon, (Boston, Jan. 18,) for a trading voyage to the west coast of Central America, (California.) Among other articles comprising her cargo, are forty-eight Yankee clocks.

SUGAR MILL FOR SALE.

AT Wailuku, Island of Maui, on the 26th August, at 10 o'clock, A. M., will be sold at public auction, all the remains of the late Sugar Establishment at that place, consisting of Iron Rollers, Earthen Jars, and Wooden Boxes for drying sugar, Iron Pots, Fire Brick, Tools, House Timber, and many other articles.

$500 REWARD.

WHEREAS, it has come to the knowledge of H. H. M.'s Government, that a secret *Lodge* or *Society* of rogues has existed and still exists at Honolulu, banded togother by an oath of fidelity under a desperate leader, (said to be about forty-five years of age, and once a man-of-war's man) and whose object is to get possession by stratagem of His Majesty's yacht, Kamehameha III., or some other fast sailing vessel, to cruise in these seas for purposes not yet disclosed, but believed to be piratical, and whose presence in this kingdom is dangerous to persons and property, the above Reward of FIVE HUNDRED DOLLARS, will be paid from His Majesty's Exchequer, to any person or persons who will give information that will lead to the detection and conviction of the whole or part of said *Secret Lodge or Society*.

It is believed that they have in their possession a new figure head, and a stern board to supply the place of the crown on the stern of the Kamehameha III. They have also sets of false papers and flags to be used as required. One set is Mexican. They designed to take the Kamehameha III., by taking passage in her for Maui, with their arms concealed in their chests, and to overpower the crew on the passage and put them ashore on Lanai. These particulars may aid in their detection, and put all persons on their guard against their attempts.

HONOLULU HOUSE, May 1, 1847. tf

GEORGE RISELY,

BUTCHER AND GENERAL MEAT SALESMAN, begs leave most respectfully to inform the residents of Honolulu and shipmasters generally, that he has taken the stand owned by Mr. French, and lately occupied by Messrs. Robinson & Co., where he is determined to sell none but the best of meat, and trusts that by cleanliness and strict attention to his business he may merit a share of public patronage.

G. R. trusts nothing shall be wanting on his part to give satisfaction to those whom he may have the honor to serve.

N. B. Ox Tongues and Corned Beef cured in a superior manner. my22 1y.

NOTICE.

JAMES ROBINSON & CO. having opened their new Butcher Shop on the new wharf opposite the Custom House, respectfully inform their friends and former customers, that they will be able to supply them with the best BEEF the islands afford, at the usual prices, my22 1y.

CAVEAT.

THE public attention is called to the following facts:

1st. That on the 24th of November, A. D. 1841, the King and Premier of the Hawaiian Islands, signed a contract, without any proper or valuable consideration, by which Peter A. Brinsmade, William Hooper, or their assigns, were allowed to locate unimproved and unoccupied lands for certain purposes, until the 24th November, 1842, which right of location, was, on the 13th September, 1842, extended without further consideration to the 24th of November, 1845.

2d. That when there yet remained two years and six months of the term for such location, said Brinsmade, Ladd and Hooper, by their duly empowered Attorney, P. A Brinsmade, sold and transferred all their rights under said contract to the Belgian Company of Colonization, and by a contract executed at Brussels, on the 17th of May, A. D. 1843, with that Company, divested themselves of the right to locate and enjoy such lands.

3d. That the Belgian Company not having located or demanded the right of locating such lands, from the 17th of May, 1843, to the 24th of November, 1845, the time for such location has completely elapsed, and the said two contracts have become *void* by their own terms.

4th. That said contract of 1841, in accordance with the established custom of these Islands, having been made in duplicate, one being left in the hands of each party thereto, and each duplicate consisting of an English and Hawaiian version, duly signed and sealed, it has come to the knowledge of the undersigned, that Ladd & Co., notwithstanding they have sold and delivered the English version of said contract to the Belgian Company of Colonization, have lately assigned the Hawaiian version of said contract to other parties for purposes unknown to said King and Government.

Therefore, know all men, that in case any person or persons shall hereafter pretend to claim or asesrt any right under either of those void contracts by reason of purchase, transfer or assignment, such person or persons will meet the just and legal opposition of the Hawaiian Government.

And be it further known to all men, that whoever shall purchase said contracts, will purchase them at his or their own peril, and be deemed to have purchased a nullity.

Done by order of the King and Government of the Hawaiian Islands, at the Department of Finance, in Honolulu, Oahu, Hawaiian Islands, this 21st day of May, 1847.

G. P. JUDD,
Minister of Finance and Attorney for the King's Government. my 22 1y.

BREAD BAKERY!

THE undersigned would inform the inhabitants of Honolulu, that he has removed to the premises next to the place formerly known as Mr. Gravier's Hotel, and Mr. Vincent's lumber yard. He would likewise take this opportvnity of returning thanks to his numerous customers for the liberal patronage he has received since commencing the above business; and would further inform them that he can now supply them with fresh BREAD, both morning and evening. Also a large quantity of American and Chilean flour for sale in quantities to suit purchasers.

None but the best flour in market will either be sold or baked at this establishment.

***Terms cash.—No credit given.
my 1 tf J. BOWDEN.

The Poet's Corner.

SONG OF THE STREAM.

When nature was drooping and dying from thirst,
Forth from the mountain a fountain burst,
And it sent out a stream so pellucid and bright,
That it gladdened the heart and refreshed the sight.

It leaped down the mountain side, flowed round the hill,
Now, foamed a cascade, then a murmuring rill,
And it gave such a charm to the famishing earth,
That it seemed like a being of heavenly birth.

Not content to go silent and speechless along,
It gave voice to its murmurs, and broke forth in song,
Though the verses were rude, all the language was true,
And as I understood it, I'll give it to you.

"I was born in the mountain 'mid fair shady bowers,
Where dwell the sweet songsters, and spring the bright flowers;
But I'll hie me away to the plain below,
Spreading life, joy and beauty, wherever I go.

I will furnish my banks with a carpet of green,
Nothing withered or dry where I flow shall be seen,
But flowers fresh and fair shall spring up by my side,
Whose fragrance so sweet, shall diffuse far and wide.

I will water the roots of the stately tree,
Each leaf shall be nourished and fed by me,
While gracefully o'er me the willow shall bend,
And embrace with affection its ever true friend.

I will visit all dwellings the high and the low,
To man I'm a friend let who will be his foe,
I will not, like the wine cup, steal beauty and wealth,
But will add to his wisdom, his virtue and health.

To each lad and each lass, that shall venture to sip,
I'll give bloom to each cheek and a smile to each lip,
And I'll cause peace to reign 'tween the husband and wife,
Not like wine, gin and brandy, breed envy and strife."

Thus sang the cool stream as it glided along,—
May "Oahu Fountain" re-echo the song,
And send forth pure streams, spreading gladness around,
Till on this isle of the ocean no drunkard is found.

THE BIBLE.

Most wondrous Book! bright candle of the Lord!
Star of eternity! the only star
By which the bark of man could navigate
The sea of life, and gain the coast of bliss
Securely; only star which rose on Time,
And on its dark and troubled billows still,
As generation, drifting swiftly by,
Succeeded generation, threw a ray
Of Heaven's own light, and to the hills of God,
The eternal hills, pointed the sinner's eye.
By prophets, seers, and priests, and sacred bards,
Evangelists, apostles, men inspired,
And by the Holy Ghost anointed, set
Apart and consecrated to declare
To earth the counsels of the Eternal One—
This Book, this holiest, this sublimest Book
Was sent. [Pollok.

The Seamen's Friend.

For the Friend.

Wants of Seamen.

No. V.

Seamen need a *good library* on board ship. They have *mental* as well as bodily wants. They have not only the bone and sinew of other men, they have, also, in proportion to their cultivation, the same intellectual powers and the same capacity of mental elevation and enjoyment. They must be taught as other men, and the same importance attaches to the proper culture of their minds as is plead so wisely and successfully for the merchants, farmers, mechanics and day-laborers of their native land. The sphere of their influence is wider than that of the mass of laboring landsmen, and, for evil, that influence has hitherto been much greater and more lasting. It has entered every port and penetrated far into the interior of every empire. The wings of commerce have encircled the earth, and every where carried their physical and moral contamination. They are to vast multitudes in every clime, the representatives of the nation under whose flag they sail. Entitled to their country's protection wherever they may roam, they may, by ignorance, indiscretion or perverseness, cost more treasure and blood than the life services of all their numerous class could ever redeem. Hence they have a moral and national importance far beyond their individual worth. They are, in a sense, the speaking trumpets and travelling preachers of the world. Their own characters and deeds have often been the darkest message they have conveyed, and the best exemplification of the necessity of useful knowledge and sound religious instruction. New England *gospel* and New England *rum* have frieghted the same ship. The inconsistency and contradiction caught quickly the eye and stung deeply the heart of good men. But how few have discovered and mourned over the same as exhibited in the band of praying missionaries in the cabin, and the profane and licentious crew of the forecastle: intelligence and ignorance—prayer and cursing—the hymn and the ribald song—the sabbath and the day of lewd merriment—Heaven and Hell going together to the conversion of the world! The day will come when the union will be severed, and the shame blotted out. But it will not be till more is done for the sailor. Sermons on shore will not do it. Prayer alone on shore will not do it. Nor will seamen's chapels nor seamen's chaplains, unaided, bring about the desired change. No combination of good influences on land will reform or preserve the sailor *at sea*. Those influences must *follow* him around the world. They must be within his reach and by his side on his own element. They must be brought to bear upon him in his cabin and on deck; at the helm or aloft; on the "lookout" or in pursuit of the whale. Nor will any amount of *physical* reform accomplish the object. If all we have advocated, and much more should be done for seamen, and a fair understanding, good government, wholesome fare, and suitable accommodations should be secured to him, he would indeed feel the impulse and exhibit a change. But if not followed by other and higher reforms the sailor would, in the most important respects, remain the same. These changes in his physical condition would be necessary to the successful introduction of higher and better, and indispensable concomitants to complete reform. But they would *civilize* only, they could not essentially enlighten the mind. Certainly they could not renew the heart. And so intimately are the needed reforms linked together, that an *advance* beyond and above, is necessary to the performance even of physical improvement. Civilization unsustained by intelligence and religion, will exhaust its own energies, and relapse into an indolent and sordid repose, and if not resuscitated, die. The reforms we have been urging at the hands of masters and owners, if not followed by the better deportment corresponding elevation of character, increased intelligence, and rational enjoyment of their men, would only confirm them in their false reasoning and remand the half delivered captive to his prisons. It is therefore as necessary to *advance* as it was to come up to our present position. We have entered the enemy's territory and have taken a few fortresses, but complete victory must be gained at the *gate of the capitol* and in the very heart of the country. Our weapons, like the objects of our warfare, are not "carnal." Our colors are white and our terms of peace, like our badge of victory, *knowledge and godliness*. In council with the reader, I propose in this number, briefly to urge the first term of the treaty. As the best practical means of securing intelligence among seamen, and insist on *a library* adapted to their wants. Further than instruction in navigation, to those who may wish it, by the master or mate, and perhaps in reading to those ignorant of the art, by those kindly disposed, of their own number, we cannot urge the school system of instruction; nor this, only as ship's duties will permit. The impracticability of this mode of imparting and

gaining knowledge, makes the resort to books more necessary. Nor should the fragments of time at the sailor's command be wasted on *trash*. He should not be able to put his hand upon an unworthy book. The space it would occupy on the shelf, or in the mind and heart, had better be empty. *Comical, tragical and fictitious* writings, should, as a general rule, be kept from his perusal. Exceptions should be rare and made with unwonted prudence. The first tends, in the sailor's mind, to excessive and empty joviality. The second raises in his adventurous spirit a careless boldness, and has sometimes stirred him up to treachery and blood. The latter excites an uneasy curiosity or unhappy discontent, and often ends in desertion, and consequent exposure and disgrace. Better, if exceptions to entire exclusion of such works from the ship's library, be never allowed. The influence of such works on the little informed, and the immature in principle, is always questionable. Beside "*truth is stranger than fiction,*" and sobriety better than mirth, and the foul and bloody deeds of reckless men had better remain in the dark book of the judge for future reference in the trials of like criminals, than to be transcribed, and thus the "firebrands arrows and death" of hellish passions let loose on their fiendish errands of arson, murder, mutiny and treason.

Infidel and *licentious* works should of course never disgrace a respectable library. No wise owner would ever put such combustibles in contact with a sailor's magazine. Better far scourge him to excessive toil and fetter him a slave, than thus liberate him on the broad road to ruin. Mercy might rescue him in ignorance and in slavery, but in infidelity and the house of death, infinite love could save neither him, nor yet the *murderer of his soul*. Who would write, or print, or sell, or scatter the leaves of such a Upas, whose deadly influence would collect from the North and South and East and West, and from the ocean's depth and the ship's cabin, so many and such swift witnesses of woe?

But books of *history* are peculiarly appropriate to the library we propose. And the selection might be made with particular reference to the countries lying in the track of the voyage. This circumstance would give additional charms to the best written history of any nation, and often induce the otherwise indifferent sailor to peruse its pages. He will feel at home on a foreign shore if his memory has chronicled any of the events connected with the race who people it. It will be an introduction to the intelligent and the good if he can properly discover to them his knowledge of their national peculiarities, their soil, their wealth, their religious and literary institutions. Or if he had no liberty and no inclination or opportunity on shore, or its clouded hills alone told the land was there as they passed it; the knowledge he had acquired would create self-respect and a thirst for more. In connection with history, books on *natural science* would of course furnish ample amusement and valuable instruction. And these may be obtained in every dress and with every illustration and embellishment to suit the progress, style, age and language of the reader. Entertaining conversation, or simple narrative, or pictorial illustration, or the graver style of scientific research and discussion take the reader on through the various fields of useful knowledge, so various are the styles by which are pleased the equally various tastes of the reader.

Books of *travels*, of *voyages*, of *exploration and discovery*, should be found within the sailor's reach. They contribute to an interesting branch of knowledge, giving not only life sketches of the actual state of the world, but revealing the *progress* of mankind, and the resources and wonders on the surface and in the bowels of the earth. Such knowledge would be interesting to the sailor as he ploughs the deep, or touches here and there in his voyage round the globe.

But, above all, *religious* books should meet the sailor on every shelf of his library. And it is matter of rejoicing that while religious instruction is most needed by this class of men, it is at the same time conveyed to us in all the variety and attractiveness that invite the taste and secure the attention of mankind to others and less important branches of education. Doctrine, history, biography, devotion and practical duty are taught, related, illustrated and enforced in every style from the utmost simplicity to the height of dignity and sublimity. A suitable number and variety of these should tempt the sailor's eye and reach the sailor's heart.—This is but an imperfect sketch of an appropriate library for seamen. Good judgment, with a desire to benefit intellectually and morally this neglected class of men, could hardly fail of making a proper inviting selection. *Common school* books should not be overlooked. A judicious selection of periodicals would not be out of place. And first of all the *Bible* should be there; it should be his own. It needs hardly to be added, that these books should be for all; nor yet that a reasonable measure of time should be allowed for reading. With these facilities the complaint would soon cease that seamen have *no taste* for reading, or a taste only for books of a vile or unprofitable character.—There has been but little chance for the cultivation of a better. It would have been a miracle, if with all their physical wants and abuses, they should, even with the best opportunities have found any other. Nor need the proper use of this means of improvement interfere with the ship's duties. It should not and would not. And it would be a libel on human improvement to suppose that such a course would *make men above an honorable employment or respectful and proper subordination*. Owners, and masters too, would ultimately find such expenditure of time and means for *the interest of all*. While, then, so much is done on land to increase knowledge, and every town and village association, and school district has its library, let a generous portion of the leaves of this great Tree of life be scattered over the broad and peopled ocean. T. DWIGHT HUNT.

The Missionary Friend.

☞ The following tribute to departed worth has been placed at our disposal, and many of our readers will doubtless agree with us in the opinion that it comes from a most unexpected source. We can assure our readers that from long acquaintance with the writer, we have the fullest confidence in the sincerity and truthfulness of his statements. This moral portraiture of the character of one Hawaiian female, induces the belief that the sex is not so destitute of virtue and piety as one might be led to suppose who hears only the broad assertions of many. Our sympathies are strong in favor of the people among whom we dwell, having for years been witness to the ameliorating influence of the christian religion upon their civil, social, domestic and religious condition. While there is much remaining to be accomplished, yet a great and beneficial work has been achieved. Because the picture may present dark shades, they would have been still darker and the picture more hideous had not the mild rays of the sun of righteousness been diffused abroad. Upon the very same principle that some assert the work of missions a failure at the Sandwich Islands, and other once heathen countries, it might be proved that true religion was a stranger to the people of Old, or New England. Their reasoning proves too much, and hence fails to establish the point at issue. The statement of a few single facts being of more importance, in the elucidation of this subject, than the publication of whole sheets of vague assertions, we here conclude our remarks, leaving our readers to draw their own inferences:

HONOLULU, July 19, 1847.

DEAR SIR,—You wished me to pen a few facts illustrating the character of my wife, *Kaili*. I will do so—I scarcely know how to begin. If I give her story in full, it would be tiresome to a stranger—should I but enumerate her good qualities, it would be but so many barren words, producing no better results than if spoken on another occa-

sion, and no satifaction to me. I will be as brief as I consistently can.

I became accidently acquainted with her in the early part of 1843, when she was but a little girl. (She was born June 17, 1832.) In an attempt at conversation with her, she gave me to understand that she was a member of the church. With my then very imperfect knowledge of the native language, and prejudged opinion of this people, I supposed that but a desecrated garment to cover iniquity, but she very soon convinced me that she was not to be trifled with, and with a tone of voice and expression of countenance I shall not soon forget. I have ever respected *such* professions since. Our acquaintance continued for three years, when we were married; through this period I never saw or heard aught to spot her character. In truth her conduct, considering the circumstances of her birth, breeding and poverty, led me to consider her a prodigy of goodness and virtue. This secured my esteem, and what is often the case, when for the other sex—my love—hence our marriage, which I have never for one moment regretted.

Since, *like a husband*, I have known every secret of her heart, and a better one it seems impossible to be. She ever made me secretly ashamed of my own, and wonder, as I do now, that a human one could be so single and pure. Religion, or a sense of her relation to her Maker, as taught in the scriptures, was the predominant feeling of her heart. This *I* know, for never a day passed while we lived together, without some unequivocal manifestation of it; *all* her actions confirmed it; she never boasted of her piety, far from it; she always felt as if she was unworthy. This religious consistency *told* wonderfully upon me; from admiring it alone, I came to love it and sincerely desire it.

This quality, coupled with great natural endowments, acquired for her that ascendency over me, and all of *us*, which she justly deserved; in fact, she got to be the *head*, and her advice was sought in every thing of importance, and we always thought ourselves bettered when we followed it, she was always right. In abilities from circumstances alone, I was her superior, but in moral integrity and all that was good, she was immeasurably above me. Nothing could persuade her into evil, she was firm as a rock. Her unqualified exemption from all bad habits so prevalent among this people, was truly remarkable. She never used tobacco, nor gave her consent to its use in her house. In fact, she persuaded me from it as she did from all other vicious and idle habits which a single and careless man is so apt to contract. Never thought of rum—she never went to the street to see people passs on *any* day—never romped or went to festivals, except a very few religious ones, (school celebrations, &c.) I never heard her chaunt or chatter nonsense with her people—I never knew a silly word or action to escape from her. She detested gewgaws and finery, and would never consent to my getting for her more than what decency or necessity required.

I will relate a circumstance which I now recollect, that will show the cast of her mind more than any thing else I can say: Shortly after the birth of her child, I tried to persuade her to wear jewelry, telling her I was proud of her, and would purchase such as she wished, and that she had well earned them. She replied that God had sent her a jewel that pleased her more than all the *mea lapuwale* I could purchase for her. This reply reminded me of Cornelia, the mother of the Gracchii, and I told her the story. Her esteem and admiration for her was unbounded, and I could get no rest till I had told her much of the noble minded matrons of Rome. Such was the vein of her mind—she loved conversation if the topic was a noble one, if not, she listened to it with little patience. She loved her people as a nation, and ever deplored their condition. She looked back with peculiar horror upon the degradation of her ancestors, and forever wondered that the present generation did not more generally take advantage of the terms now offered them. She could never excuse any one for licentiousness or wickedness of any kind on the plea of ignorance; her reason was a simple and forcible one, viz: There was no Hawaiian but that had had the same advantages of education with her, and that *she always knew better*. I remember many instances of her praying and weeping in secret whenever any affliction overtook her; but when she found out that praying did not displease me, she rather sought me in those moments.

Her mother tells me a characteristic incident of her. A few days before her death, *they* all gathered around her sister, who was very sick, and was not expected to live; while asking one another what they should do, she sat silent for a while, when a flood of tears rained from her eyes, she said, "let us remember God in this our affliction, and he will not forget us."

I was absent at the time of her illness and death, and know no more than what I am told. Her mother tells me that she gathered to her all her beauties in death, and died without a struggle. If such is the death of a christian I can easily believe she met with no other. Her loss to me is irrepairable. Though our sojourn together was one continued sunshine, and never a discordant word between us—though I can have no other than the happiest hopes for *her* future, yet I feel as if I could never still this anguish of my heart; the sun and the world shine and smile no more for me. I only know that God's will has been done and that this affliction has made me a wiser and better man.

Yours affectionately, &c.,
T. METCALF.

To Rev. R. Armstrong.

The 4th of July at Lahaina.

Mr. Editor,—Noticing in your paper of the 16th ult., a communication from Lahaina with the description of the temperance dinner on the 5th ult., I would wish to modify and correct a few statements therein. A conversation arose in a beer shop some time previous to the dinner between some inmates of the hospital and other residents, during which the hint was thrown out that some liberal person might make them a present of beer for the dinner, at which intimation the proprietor of the house kindly offered them a barrel if they would accept it. No answer was returned, but upon applying to the Governor for permission to have the dinner, permission was also asked to have beer upon the occasion, and being expressly prohibited, the answer was returned to the donor of the beer, that it was not acceptable, and thus you will perceive that something otherwise than strict principles prevented the use of the intoxicating beverage, and I greatly fear that the slur endeavored to be conveyed in your former communication, will not have its full effect.

I submit this to you, respectfully asking pure impartially and justice, and sincerely hope that those who on the 5th advocated the principles of total abstinence, will for the future make principle and practice agree, and be conscious that the eyes of some of their fellow-residents in Lahaina are too widely open to be blinded. EQUITY.

For the Friend.

A Short Sermon.

Text—"Out with one's self."

What a misfortune! Nothing suits. It is too hot, or too cold; too wet, or too dry.—Neighbor A. is all wrong. Neighbor B. looks angry. Neighbor C. don't speak.—The milk-man brings chalk mixture. The butcher cheats. The servants steal. The market is miserable. The store-bill is enormous. The house rent is too much, and every thing too dear. At breakfast, the coffee is burnt; at dinner, the soup is cold; at supper the tea is weak. These are minor troubles. The whole world is topsy turvy.—The governments, the religions, the customs, the politics of the earth are all wrong. Every thing and every body displeases, while even "God's ways are not equal." To be "out with one's self," what a calamity, it makes one out with every body else. Every thing looks green, and why? simply because the man looks through green specks. Speak to such a person, and unless you are guarded and adapt your language to his whims, you may be sure to be either bitten or growled at. If your language suit not it will be equally potent with Ithuriel's spear, as described by Milton. "Out with one's self." Hearer, ponder well the text, consider its meaning, study its philosophy, and you will be the wiser man.

THE FRIEND.

HONOLULU, AUGUST 12, 1847.

Ascent of Haleakala.

EDITOR'S JOURNAL.—"June 25th, 1847. Started this morning at 5 o'clock, from the Rev. Mr. Green's station, Makawao. Our path led through fields of fennel, which grows wild and in the most rank luxuriance. I could not but contrast the abundance of this herb, with the stinted growth of the same, as it is reared in the flower gardens of the United States. After riding about two hours we had passed the woody region. During the remainder of our ascent only a few tufts of wild grass, with an occasional shrub, were to be seen. Our guide in several instances pointed to shrubs, saying *tabu*, and we learned that such were sandal-wood.—The ascent was extremely tiresome, although the roughness of the way did not compel us to dismount from our horses. Ere we reached the summit, the clouds were at our feet, and we looked down upon them! The broad side of the mountain was spread out before us, every where strewed with lava-rocks, while above us was the clear blue sky, and the sun, whose rays would have been most scorching had we not been favored with a fresh trade-breeze. At 10 o'clock we reached the cave, about two miles from the summit, where we partook of refreshment. Visitors often spend the night at this spot. It certainly did not hold out many attractions, and I have good reasons for believing it already possessed tenants that would sharply contend for occupancy with any way-faring and luckless wight, who might find himself there benighted. Their praises have recently been celebrated in doggerel rhyme and their services recommended to His Majesty, by a late visitor on our shores:—

"If the King wants troops that wont prove skittish,
But will fight like a bear, both French and British,
And raise the nation, both head, neck and shoulder,
Above all the nations that bully and scold her,
Let a bill at head-quarters be at once got through,
To enroll a Grand Army, as other Kings do;
But with this *improvement*, to enlist if they please,
Instead of *kanakas*, these veteran *Fleas*."

FRIEND, Nov. 1846.

Another hour's toilsome riding, along a zigzag path, brought us to the rim of the enormous crater. The first good view of the immense cavity, many miles in diameter, and thousands of feet deep, richly rewarded us for all our toil and trouble. I find the crater thus described in the 4th volume of the U. S. Exploring Expedition, 254th page: "The crater of Haleakala, if so it may be called, is a deep gorge, open at the north and east, forming a kind of elbow. The bottom of it, as ascertained by the barometor, was 2,783 feet below the summit peak, 2,093 below the wall. Although its sides are steep, yet a descent is practicable at almost any part of it. The inside of the crater was entirely bare of vegetation, and from its bottom arose some large hills of scoria and sand; some of the latter are of an ochre-red color at the summit, with small craters in the center. All bore the appearance of volcanic action; but the natives have no tradition of an eruption. It was said, however, in former times the dread goddess Pele had her habitation here, but was driven out by the sea, and then took up her abode on Hawaii, where she has ever since remained. Can this legend refer to a time when the volcanoes of Maui were in activity. Of the origin of the name Mauna Haleakala, or house of the sun, I could not obtain any information. Some of the residents thought it might be derived from the sun rising from over it to the people of West Maui, which it does at some seasons of the year." The gentlemen of the Exploring Expedition made the highest peak, 10,200 feet above the sea, or a few feet less than two miles. The limit line of wood is 6,500 feet. The crater is at least 8 or 10 miles in diameter, and 5 from the center to either opening. This spacious area contains something like 15 craters of no inconsiderable dimensions, varying from 200 to 600 feet high.

As I sat upon the brink of this most stupendous of nature's work, glancing an eye into its profound depths, from whence immense quantities of lava must have issued forth, or extending my vision across the channel, separating Hawaii and Maui, upon the snow-capped summit of Mauna Kea and Mauna Loa, lost in the clouds, these words of the Psalmist were most forcibly brought to my mind, "What is man, that thou art mindful of him? and the son of man that thou visitest him." It made me feel man's insignificance, although styled "Lord of creation." Mighty indeed do the works of Jehovah appear, when viewed from an eminence, like the summit of Haleakala, in a clear day. I wandered along the crater's brink, alternately looking downward into its fiery depths and outward upon the immense ocean of clouds that effectually concealed from my view the mountains of West Maui. While thus gratifying the soul with scenery, vast and sublime, I chanced to espy the fragment of an old newspaper, which proved to be a number of the Episcopal Recorder, published in Philadelphia. The date I could not learn, but to my surprise, I found the scrap contained sentiments and remarks not unfitting the spot whither the winds had driven it. The following is a quotation:—

"He who hath measured the waters in the hollow of his hand, and meeted out heaven with a span, and comprehended the dust of the earth in a measure, and weighed the mountains in scales, and hills in a balance. He with whom the nations are as a drop of the bucket, and are counted as the small dust of the balance, who 'taketh up the isles as a very little thing;' for whom 'Lebanon is not sufficient to burn, nor the beasts thereof sufficient for a burnt offering;' He has given them to me. And what have I given in return? The fragments of my feelings and the mere shreds of the joyous days and peaceful nights He has bestowed on me."

Never was I more favorably situated to appreciate the beauty, force and sublimity, of such language, paraphrased from that most sublime of old Hebrew Poets, Isaiah. I was standing upon one mountain more than 10,000 feet high, at a distance of more than 50 miles, I could see the summits of Mauna Kea and Mauna Loa, vieing in height with the Andes of South America and the Hamelek of Central Asia. The prophet and poet, Isaiah, represents the Almighty as weighing the mountains in scales and the hills in a balance. Far away stretched the broad Pacific, "majestical, inimitable, vast," yet Jehovah measureth the waters in the hollow of his hand. "The isles," what are they, and how disposed of? Them, He "taketh up as a very little thing." But how doth Israel's God view the nations? They "are as a drop of the bucket, and are counted as *the small dust of the balance*."

It is with good reason that the critics regard Isaiah as among the most, if not the most sublime of either uninspired or inspired poets. It might, with propriety and truth, be

said of him as it was said of a poet of modern times:

He——
——"Soared untrodden heights, and seemed at home
"Where angels bashful look.
"He, from above descending, stooped to touch
"The loftiest thought."

We commenced our descent about half past 12 o'clock, and safely reached the mission station at 5 P. M., having been absent just 12 hours. We had travelled between 25 and 30 miles, and on account of the roughness of the road were compelled to walk our horses nearly the entire distance. Weary and exhausted, we were thrice-glad to be kindly welcomed by our missionary friends. Thus ended a day's excursion excessively fatiguing, but we hope in the end it may prove invigorating to both body and mind."

Fourth Anniversary of the Restoration.

The 31st of July, appears to have become a national holyday among the Hawaiians. So far from discouraging its annual observance, we think it should be rather encouraged. A proper recognition of the day will foster a spirit of patriotism. The late anniversary appears to have been partly festive and partly religious. It was so intended.—All classes of our population were invited to a picnic at His Majesty's summer residence in Nuuanu Valley. Notwithstanding the unpropitious state of the weather, great numbers resorted thither, besides pedestrians, several thousands on horse back. Says the Polynesian, "one man hired to count them, commenced early in the day and made out 3,600, going up and 4,600 down—another 1,637 following the King, and 362 straggling. His account was only for part of the day.—The Governor's computation is 3,000, besides those that come from Koolau." Suffice it to say, probably a larger company has not been assembled for many years.

Our limits will not allow a detailed account of the animating scenes of the day. A multitude seemed much interested in the spear-exercise and other Hawaiian sports. A sumptuous entertainment was spread for foreigners, while the Hawaiians were served, in a style, that reflected great credit upon His Majesty, the Governor, Paki, John Ii, and others who were directly or indirectly concerned. We can truly remark, that we never witnessed so numerous a gathering, where such perfect order, propriety and regularity were maintained. "There seemed to be a place for every man and every man was in his place." The following summary of the various dishes served up for the occasion will show that the tables must have groaned under the weight of the viands:—

271 hogs, 482 large calabashes of poi, 602 chickens, 3 oxen, 2 barrels salt pork, 2 of bread, 3,125 salt fish, 1,820 fresh do., 12 1-2 barrels luau and cabbage, 4 do. onions, 18 bunches bananas, 55 pine apples, 10 barrels potatoes, 55 ducks, 82 Turkeys, 2,245 cocoanuts, 4,000 heads of kalo, 180 squid, Grapes and other etcetera, sufficient to feast 12,000 people.

We must not fail to notice one circumstance which was something new for this quarter of the globe. "A coach and four" was a new feature in the procession of a Polynesian chieftain. The Royal party rode in the carriage originally presented by Queen Victoria to her sister Queen, Pomare, but which the latter, in her poverty, was obliged to dispose of by sale. We very much doubt whether any King ever rode through the streets of the capital of his kingdom, when greater order and decorum reigned. To the triumph of Temperance principles among the Hawaiians and foreigners, must be attributed much of the good order that was every where apparent throughout the day.

In the evening, His Majesty, chiefs, foreign officers of government, many of the residents, and numbers of the native population assembled for religious service at the King's Chapel. A discourse was preached in native and afterwards repeated in English, by the Rev. Mr. Armstrong. The singing was good. The sermon of the Mr. Armstrong has already been published in the columns of the Government Organ. We hope it will be read.

Facts about Volcanoes.—They are generally found near the sea or some repository of water. Some stand alone, called central volcanoes, like Hecla, Ætna, and Visuvius, others form a chain, or line, like the volcanoes of South America, or Alutean Islands. There are about 200 active, and many thousand extinct craters upon the globe. "By far the greatest number of active volcanoes are found in the Pacific and Indian oceans, or on the shores of continents washed by them."—Trimmer's Practical Geology, 460 p. The Sandwich Islands, have the honor of containing the largest active, as well as the largest extinct crater on the earth. No active volcanoe on the globe will compare in size, with Kilauea, on Hawaii, while Haleakala, on East Maui, is larger than any other extinct crater. It has been estimated that every century 2,000 eruptions take place in different parts of the globe, or an average of 20 every year. According to recent intelligence, Hecla, in Iceland, is remarkably active, and has been for several months.—The Danish Government has sent scientific men to make observation upon the eruptions.

☞To such of our readers as are interested in the improvement of seamen, we recommend a thorough perusal of the article in the present number upon the "wants" of seamen. The importance of furnishing useful reading to seamen, is but partially appreciated by the community. As a means of doing them good, it will certainly rank next to the preaching of the gospel and Sailor's Homes. From attentive observation, we are almost disposed to give it the first place.—As an auxiliary, it is an agent of great power. Seamen will not be likely to derive benefit from either a preached gospel, or good boarding houses, if while at sea they have no reading, or a *species* worse than none.—Many seamen are inclined to read works of science, more will read history, while not a few need elementary school books. The calls for such books are rapily increasing. By sale and donation, we annually dispose of several hundred spelling books, among seamen. We are often asked why an edition of 2,000 copies of the Friend is issued, when our subscription list numbers only a few hundred. Our answer is, that we desire, to the extent of our limited means, to furnish reading-matter for every sailor visiting the ports of the Sandwich Islands. To meet the constant draft upon our stock of books and periodicals for seamen, we would invite the friends of the cause to forward such books and publications, as they may be willing to dispose of, by donation. We assure them that we shall most gladly scatter them abroad among persons by whom they will be read. "School books," "Travels," "Voyages," "Histories," as well as religious books, are respectfully solicited.

TEMPERANCE IN THE SANDWICH ISLANDS.—Rev. Mr. Coan, Missionary of the American Board, in a recent letter, writes:

"The number of sailors who visit Hilo, (where he resides,) is annually increasing; but the temperance has made such progress in this port, that sailors search in vain to obtain the maddening poison here, and we have, therefore, been very quiet, notwithstanding the thousands who have thronged our shores during the past year. One midshipman from an English man-of-war, feeling a little afraid to speak the word 'rum,' went from shop to shop among our traders, inquiring, 'Do you keep any thing here?' 'What thing?' asks the grocer; 'any thing to *distract the brain*?' On being answered, 'No,' the poor fellow went off, sadly disappointed, and cursing the port, by calling it a 'wretched dry place,' &c., notwithstanding our abundant rains and our sparkling cold water."

What an example of burning shame to such Bostonians as are sending their rum to heathen countries!

Mr. Coan notices the conduct of the officers in command of several ships-of-war, English and American, which were at Hilo last year, in terms of commendation.

Brother Sleeper of the "Boston Mercantile Journal," thinks that "such Bostonians as are sending their rum to heathen countries," are setting "an example of burning shame!" He expresses our opinion exactly. We hope a better spirit is pervading the mercantile community. Recently we heard of one Boston merchant, who, as he stood upon the wharf and saw the brig E. loose her sails, and "fill away" on her long voyage to our shores, remarked, "if I knew she had a cask of spirits on board, I would order her back and take it from her hold." This man expressed our mind exactly.

RECENT INTELLIGENCE FROM CHINA.—By the arrival of the Bark Don Quixote, and Brig Argo, intelligence has been received from China, up to about the first of June.—Nothing has yet been heard respecting the missing Brig "Wm. Neilson." We copy the following from the Chinese Resitory, for May:—

"Two French ships of war, the frigate Gloire and the corvette Victorieuse, arrived in the Chinese waters about the end of last month, from Cochinchina, where for sundry insults they destroyed a part of the king's navy. We have not space here for the details.

By the Howqua, from N. Y., the Rev. Messrs Lord, Carpenter, and Wardner, with their wives, arrived at Hongkong on the 28th ult. They come as missionaries to the Chinese. There have also recently arrived three or four Protestant missionaries from Germany.

Died at Serampore, on the 5th of March the widow of the late Dr. Marshman, at the advanced age of seventy; and forty-seven years resident in India. Dr. M. was one of the first missionaries to India."

The Repository for April and May contain a detailed account of the late troubles between the English and Chinese. It appears that the Governor of Hongkong, without notifying the Chinese authorities, ordered the naval commander to spike all the cannon along the river between Hongkong and Canton. His Excellency proceeded to Canton accompanied by 3 Steamers. The naval commander reports that more than 800 large cannon were spiked without opposition.—Several demands were then made upon the Chinese authorities, such as free access to visit the city of Canton, more land for stores, site for a church and burying ground. These were partially acceded to. In two years Canton is to be opened to British subjects. Much excitement existed among the Chinese. A strong opposition exists among the English against the late movements of the Governor. Opposition papers denounce him in the most violent manner. "The end is not yet."

☞ The attention of Parents and Teachers is respectfully called to the selection of Hymns just published, for the use of children. Although the sale must necessarily be quite limited, yet it is hoped a sufficient amount may be realized to cover the actual cost of publication and pay for those copies which may be gratuitously distributed. See advertisement.

"Washington Nautical Temperance Society," on board U. S. S. Cyane,	10 00

[From the Polynesian of Aug. 7.]

OPERATIONS AT VERA CRUZ.—The American forces landed under cover of the squadron on the 9th of March. On the 22d, the batteries being completed and the town thoroughly invested, Gen. Scott summoned it to surrender, offering favorable terms. Gen. Morales replied that he should defend it whilst he had a single soldier left. A destructive fire was immediately opened and continued during the night from 24 mortars and 20 Paixhans, beside the artillery.—The town was destroyed in several parts and set on fire, and by a Mexican account, 600 of the inhabitants and 300 of the garrison killed or wounded before Gen. Morales consented to capitulate. The American loss was some 16 men, including Midshipman Shubrick, from the Raritan, who was serving at one of the shore batteries under the charge of Capt. Aulick. On the 27th the following terms were allowed by Gen. Scott. The entire garrison to be prisoners of war, released on parole not to serve again until exchanged. The officers to preserve their side arms and personal effects—the forts and castle to be delivered over to the U. S. troops, with all their materiel, &c.—private property to be respected. On the 28th these conditions were complied with, and Gen. Scott, wishing to give the defenders of Vera Cruz a proof of his esteem for the unfortunate courage they displayed in its defence, granted that one general, 4 chiefs, 8 officers and 16 soldiers, drawn by lot, should be freed from their oaths not to serve again against the U. S. All the Mexican generals spontaneously offered the lot to be first drawn to Gen. Morales. On the 29th 10,000 American troops marched for the interior; 2,000 occupied the city and 1,000 the castle.

During the seige of 80 hours, 130 pieces of artillery of all kinds fired upon the town, keeping constantly six bombs in the air. The marksmanship was said to be wonderfully exact. One bomb followed another directly into the object aimed at; 4000 bombs fell upon the town, besides a much larger number of balls. The castle was surrendered because it was indefensible after the capture of Vera Cruz,—so the Mexican account states. They report their force in the town at 3,500. During a norther which prevailed at the time 15 American merchant vessels were lost.

	Collins, Boatswain,

ENGLAND,—Parliament has declared the ports of England open to the importation of grain free of duty, suspended the navigation laws, and proposed a reduction of duties on sugar. The misery among the poor continues unabated. The rich classes have opened subscriptions, and deprive themselves of the superfluities of life. The Queen has addressed a letter to all the English clergy, praying them to open subscriptions for the Irish and Scotch sufferers,—large sums had already been collected.

Aug. 9.—Am. Bark Toulon, Crosby, for Oregon.

Just Published.

HYMNS for children, selected from Dr. Watts and others. This is a small book of Hymns, designed to meet the wants of the numerous children speaking the English language on the Islands. Application has often been made to the Seamen's Chaplain for a book of hymns suitable for children to commit to memory. It is hoped this collection will be found to answer that purpose. Many of them are selected from "Watt's Divine and Moral Songs," which have obtained an unrivalled popularity in England and America.

Price $1,00 per dozen—12 1-2 cents single copy.

CAVEAT.

THE public attention is called to the following facts:

1st. That on the 24th of November, A. D. 1841, the King and Premier of the Hawaiian Islands, signed a contract, without any proper or valuable consideration, by which Peter A. Brinsmade, William Hooper, or their assigns, were allowed to locate unimproved and unoccupied lands for certain purposes, until the 24th November, 1842, which right of location, was, on the 13th September, 1842, extended without further consideration to the 24th of November, 1845.

2d. That when there yet remained two years and six months of the term for such location, said Brinsmade, Ladd and Hooper, by their duly empowered Attorney, P. A Brinsmade, sold and transferred all their rights under said contract to the Belgian Company of Colonization, and by a contract executed at Brussels, on the 17th of May, A. D. 1843, with that Company, divested themselves of the right to locate and enjoy such lands.

3d. That the Belgian Company not having located or demanded the right of locating such lands, from the 17th of May, 1843, to the 24th of November, 1845, the time for such location has completely elapsed, and the said two contracts have become *void* by their own terms.

4th. That said contract of 1841, in accordance with the established custom of these Islands, having been made in duplicate, one being left in the hands of each party thereto, and each duplicate consisting of an English and Hawaiian version, duly signed and sealed, it has come to the knowledge of the undersigned, that Ladd & Co., notwithstanding they have sold and delivered the English version of said contract to the Belgian Company of Colonization, have lately assigned the Hawaiian version of said contract to other parties for purposes unknown to said King and Government.

Therefore, know all men, that in case any person or persons shall hereafter pretend to claim or asesrt any right under either of those void contracts by reason of purchase, transfer or assignment, such person or persons will meet the just and legal opposition of the Hawaiian Government.

And be it further known to all men, that whoever shall purchase said contracts, will purchase them at his or their own peril, and be deemed to have purchased a nullity.

Done by order of the King and Government of the Hawaiian Islands, at the Department of Finance, in Honolulu, Oahu, Hawaiian Islands, this 21st day of May, 1847.

G. P. JUDD,
Minister of Finance and Attorney for the King's Government. my 22 1y.

BY ORDER OF THE SECRETARY OF OREGON TERRITORY.

AN ACT to prevent Desertion, and for the recovery of deserting or absconding Seamen.

§ 1. *Be it enacted by the House of Representatives of Oregon Territory*, That when it shall be made to appear to any Justice of the Peace, by the affidavit of any person, that any person has deserted or absconded from the service of any master or captain of a vessel claiming the services of such deserting or absconding person, upon contract or agreement made and entered into, either in this or a foreign country, the said Justice of the Peace shall immediately issue his warrant for the apprehension of such deserting or absconding person, and cause the accused to be brought before him, or some other Justice of the Peace of the county in which the original writ issued.

§ 2. The officer having the warrant, or any other person who may be duly authorized to serve said warrant, may arrest said accused deserting or absconding person in any county in this Territory, and bring him forthwith before the Justice of the Peace who issued the warrat, or some other Justice of the Peace of the same county.

§ 3. Upon the trial of the case, if it shall appear that the master or captain of said vessel is entitled to the further services of said deserting or absconding person, it shall be the duty of the Justice of the Peace, or the court trying the same, to cause said deserting or absconding person to be delivered up to the master or captain of said vessel, and all costs shall be adjudged against said deserting or absconding person, and a certificate of the same shall be delivered to the said master or captain, who shall thereupon pay the same.

§ 4. Any person who shall entice a seaman to leave his ship, or who shall knowingly harbor, secrete, employ, or in anywise assist a deserting or absconding seaman, shall, upon conviction thereof, be fined any sum not exceeding five hundred, nor less than 25 dollars for each offence; and all fines collected under the provisions of this Act, shall be paid into the county treasury, and be recovered either by indictment or action of debt, in the name of the county.

§ 5. That every ship master or captain, on the desertion of any of his crew, shall be bound in the penal sum of fifty dollars, to give immediate information of the same to the proper authority.

§ 6. That if the mate or first officer under the captain or master, and a majority of the crew of any vessel or ship lying in any port of Oregon Territory, shall discover that said ship or vessel is too leaky, or otherwise unfit in her crew, body, tackle, apparel, furniture, provisions, or stores, to proceed to sea, and shall require such unfitness to be inquired into, the master or captain shall, upon the request of the mate, (or other officer,) and such majority, forthwith apply to the presiding Judge of the county court, either in term time or vacation, and thereupon, said Judge is hereby authorized and required to issue his precept, directed to three persons, the most skilful in maritime affairs that can be procured, requiring them to repair on board such vessel or ship and to examine the same in respect to the defects or insufficiencies complained of, and to make report to the said Judge in writing under their hands, or the hands of two of them, whether in any, or in what respect, the said ship or vessel is unfit to proceed to sea, and what addition of men, provisions or stores, or what repairs or alterations in the body, tackle, or apparel will be necessary, and upon such report the said Judge shall adjudge and determine and endorse on the said report his judgment, whether the said ship or vessel is fit to proceed to sea or not, and the master or captain, and crew, shall in all things conform to the said judgment. If the complaint of the mate and majority of said crew, shall upon said report and judgment, be deemed just and well founded, the master or captain of said ship or vessel shall pay all costs of such view report, and judgment, and be taxed and allowed on a fair copy thereof, certified by said judge, but if the complaint of the said crew shall appear upon the said report and judgment to have been without foundation, then the said master or captain, or the owner or consignee of such ship or vessel, shall deduct the cost and reasonable damages for the detention (to be ascertained by said Judge) out of the wages coming due to the said complaing mate and seamen or mariners.

§ 7. It shall be the duty of the Territorial Secretary to cause a copy of this Act to be published in the Oregon Spectator, and the Sandwich Islands papers, as soon as practicable.

§ 8. This Act to take effect and be in force from and after its passage.

Attest, A. L. Lovejoy, Speaker.
N. Huber, Clerk.
Approved, Oregon City, 19th Dec., 1846.

The Poet's Corner.

From the Polynesian.

☞ The following beautiful lines were written by a young lady in one of the large cities of the United States, and placed within the Holy Bible, which she gave to a wild and thoughtless brother whose irregularities, had, in a degree, compelled him to leave his native land, the society of his friends, his widowed mother, to whom he should have been a support and stay, and last, but not least, the sister who could yet love, and write to and for him as follows, for a long and dreary voyage in a whale ship. I am sorry to say that he did not discover them until some considerable time after he had been to sea.

When the parting bosom bleeds,
When our native land recedes,
While the wild and treach'rous main,
Takes us to her breast again,
Father! view a sailor's woe—
Guide us whereso'er we go.

When the lonely watch we keep,
Silent on the mighty deep,
While the boisterous surges hoarse
Bear us darkly on our course,
Eye that never slumbers! shed
Holy influence on our head.

When the Sabbath's peaceful ray,
O'er the ocean's breast doth play,
Though no throngs assemble there,
No sweet church bell warns to prayer,
Spirit! let Thy presence be,
Sabbath to the mustering sea.

When the raging billows, dark,
Thundering, toss our threatened bark,
Thou, who on the whelming wave,
Did'st the meek disciple save.
Thou, who hear'st us when we pray,
Jesus, Savior! be our stay.

When in foreign lands we roam,
Far from kindred and from home,
Stranger's eyes our conduct viewing,
Heathen bands our steps pursuing,
Let our conversation be
Fitting those who follow Thee.

Should pale Death, with arrow dread,
Make the ocean wave our bed,
Though no eye of love might see,
Where that shrouded grave might be,
Thou who hear'st the surges roll,
Deign to save a sailor's soul.

The Seamen's Friend.

For the Friend.

Wants of Seamen.

No. VI.

The sailor needs a *Sabbath* at sea.

He has a *body* and a *soul*. These together constitute him a mortal and immortal being. His body needs the *rest* of the Sabbath; his soul, its salutary *checks* and its divine *instructions*. To enjoy it is alike his privilege and his *right*. God gave it to him, and no man may take it from him. He who *will* not observe it robs God and himself; he who, in addition, deprives his fellow of his day of rest robs God *and his neighbor*. In either case the guilt is fearful, only the latter adds tyranny to folly. Perhaps among no class of men has this robbery been so prevalent as among seamen. Certainly no class of seamen have so obstinately and impiously trampled upon the holy Sabbath as whalemen. And few Sabbath breakers have provoked the Lord of the Sabbath against more light, and with more shallow pretexts in support of the wicked practice. Never was there bolder effrontery before God, or more open defiance of His jealousy than is made on every occasion and on every ocean, by the whaling fleet. And, as if to mock God and add perjury to presumption, there are found among this wicked clan those who bear His name and are sworn to His covenant. What matters "custom," what matters the "expectation of owners," what matters the "command of an officer," what matters an apparent "loss," or a "protracted voyage," or what is blasphemously represented as a "providential assent" in the shape of a school of whales? "Remember the Sabbath day to keep it holy," is the unrevoked law of God. It is alike universal and perpetual. The sacred obligation rests upon all men every where. No class of men are excepted. No strength of temptation, no urgency of self-interest, no fear of man, no peculiarity of circumstance can justify its violation, or deliver from its penalty. As sure as the Sabbath sun dawns on the world, so surely and as widely and as unfailingly are its sanctions binding and supreme. "The Sabbath was made for man," makes the day of rest the world's birthright. No more so is the atmosphere we breathe. Its repose, its sacred enjoyments, are ours no less than the rains of heaven. It is as much the slave's as the master's, as much the poor man's as the rich. It is as inalienable as "life," or "liberty," or the "pursuit of happiness." No man may refuse the boon, none take it away. It is as much a duty as to love God or our neighbor, as wrong, as an act of transgression, to violate it as adultery or murder. And God will hold him none the less guiltless for the violation of His holy day, than for the vain use of his holy name. In the great day of reckoning no exceptions will be made in favor of whalemen. The Angel that shall proclaim time to be "no longer," is to put one foot on the sea and one on land. And when the blast of God's trumpet shall startle the hosts of earth from their graves, the sea too shall give up its dead. And when all nations shall await their sentence at the bar of their common Judge, all old ocean's sons will be there. Will the whoremonger escape his sentence? Will the blood of the murdered cry in vain for vengeance? Will the oppressed there let the oppressor go free? Will the blasphemer, or the parricide, or the defamer, or the hypocrite, meet an offended God in peace? No more will the Sabbath breaker—no more will the plea of "necessity," or "peculiarity," or "strong temptation," or fear of man, shield the Sabbath whaler from the punishment due the insult and the robbery. If this be true of an individual in his personal relation to this holy day, what shall we say of the owners, or masters, or officers, who, not only incur this guilt themselves, but oblige their dependents also thus to challenge the displeasure of God? Surely his will be "surer punishment." A man may overtask his own body, and trample on the laws of his Maker, by labor that knows no Sabbath, and his own body and soul will exact their "own with usury" at the bar of premature old age and irretrievable ruin. But to bow others to a similar yoke and alike crime, will add to his own the insupportable burden of their guilt and loss. Would that those whom it concerns could feel this. Then the fear of God and the law of God would be paramount in the hearts and lives of all. If they did not reverence and hallow the Sabbath, they would at least fear openly to violate it. But it is not enough that men be not compelled to desecrate the Sabbath. There should be a disgrace attached to its violation. The ill-gotten gains of Sabbath whaling should be as much abandoned as the "price of blood," for they are the price of souls. And Sabbath whaling, no less than gambling, should be loss of respectability, for it is bold robbery of God and man, a kind of privacy against heaven and earth. But the Sabbath should not only be given to seamen as their right, it should also be urged upon them as their privilege. They need it. The laws of the human constitution require its rest. Facts the world over prove that no less than a

seventh part of time is requisite for bodily repose. It is true both of man and beast. And every reason that can be urged for its observance on land, urge an equal claim at sea. It is as benevolent an institution for the sailor as the landsman; it should bring him as sweet repose. He may sail his ships or prepare for the approaching tempest, but whale on the Sabbath—never. Compel him to any thing beyond the sailing or the safety of the ship, and you break his Sabbath. Unnecessarily leave port on the Sabbath, and he is compelled to unnecessary work and is robbed of his day of rest. Put him on the "lookout," except in case of distress, and you break in upon holy time. The time is his own, or rather it is God's; he is at liberty to use it neither for himself nor for others, only as calls for necessity, or mercy demand his attention or aid.

But the soul of the sailor most requires a Sabbath. Should he not improve it, it would only increase the necessity of its observance. Nor would such a fact afford the least ground for depriving him of the day. The fact that he has not been allowed to observe it, or has not chosen to observe it, if allowed, is a prominent reason among many why sailors as a class are so wanting in principle and so abandoned in practice. From many causes seamen are notoriously reckless and licentious. Their songs, their conversation, their very walk, declare the same truth. The passions he indulged on shore, burn within him far out on the ocean, and kindle into fierce flame in anticipation at the next port of renewed liberty and indulgence. But let the Sabbath be proclaimed on board, let masters and officers be foremost in its observance, let there be quiet and rest, reading and retirement; or let it be merely a day of cessation from work, and let him realize that work is not allowed and why, and who can doubt the restraining effect of such a fact upon his mind. Though he "fears not God" and "restrains prayer," the Sabbath will operate as a powerful check upon his prevailing propensities. The tide of lust will be retarded. The growth of evil will temporarily receive a check, which in its frequent return may stint, and perhaps, in the end kill the monster passion within him. Better thoughts, and of the future, would necessarily come up in his mind, perhaps, to be suppressed; but up they would come again, and while they found a place there would be light in the dark chambers of his soul. This might go out with the setting sun; but the sun of successive Sabbaths would at least break up the midnight of his soul, perhaps bring there twilight and increasing day. But if not made a better man, the outward observance of the Sabbath might keep him from becoming worse. At all events it would tend to retard his downward course to ruin.

But seamen are not all thoughtless or vicious. To some the return of the holy day brings up tender associations of earlier days. Perhaps they used to break it, till at length they fled from it. Still a reverence for it clings to them, and they cannot, without a struggle, shake off its obligations. And how does the recurrence of the day remind them of the Sabbath bell, the faithful sermon, the praying mother, the heedless, prayerless son. If there be no Sabbath whither they have fled, from the sanctuary and the closet of a praying mother, these feelings will subside; scenes at first vivid and painful, grow indistinct and powerless, till at length the habitual Sabbath breaker cares for neither sanctuary nor the day of rest. How such seamen need the Sabbath. Its observance at sea would as it were, shut them into its hallowed influence. They could not escape its reach. It would throw its light so directly across their path, that blindness itself could hardly fail of discovering the pit-falls at their feet, and enemies in ambush along their track. In how many such minds would a train of reflection be awakened, that leading them on through conviction, alarm, despair, repentance, supplication, and faith, would terminate in conversion and eternal life. Such would be the tendency on such minds of a Sabbath at sea. How dangerous to deny the sailor his day of rest.

There are those, too, at sea, who love the Sabbath. If the rules of the ship require them to break it, what a conflict between fear of man and fear of God. If conscience yields, what a loss of peace, what a shock to their religious firmness! How devotion languishes, as breach of religious principle succeeds breach, and defeat treads upon the heels of weakness. How shame lurks in the heart, and mantles the cheek of the self-reproaching, Sabbath breaking disciple. Joy has long since left his troubled spirit. Hope is flickering on the neglected altar, conscience is fleeing before fear, while faith and love, awaiting the issue of the conflict, seem on the wing for flight. Perhaps he will conquer, if so, he will bear the reproach, the scourging, the hunger, the imprisonment that adherence to principle may cost him, but break the Lord's Sabbath he will not. His fall has humbled him, his conflict has strengthened him. But how cruel the necessity that caused him to stumble; how criminal the law that periled his christian hope! How such a sailor, (and there are such,) needs the retirement and devotion of the Sabbath. Give it to him and he would find a "secret" place of prayer, though the sneer, or the merriment, or the profanities of his fellows, should keep him within the peaceful enclosure of his own bosom. Make the Sabbath the law of the ship, and he will soon have companions in its observance.—Before the voyage is closed the Bethel Flag will undoubtedly float over a quiet deck and a praying band both in cabin and forecastle.

Seamen, too, should have all their Sabbaths. What a mockery to meet for prayer and for the reading of a sermon with a man aloft watching for whales, to break up the the devout assembly! What trifling with the Sabbath and with sacred things! One Sabbath praying God to deliver them from temptation and from sin, the next, or in the afternoon of the same day, shouting, rowing, lancing, cutting in, and boiling whale! Serving God when they cannot serve mammon, serving mammon whenever they can! Alas! for religion when subjected to such contempt! Alas for the poor sailor whose only Sabbath is such a mockery! Multiply opportunities and such men would banish the Sabbath from the world. They would do more than the infidel, more than the professed violator of the sacred day, to rob land and sea of rest and heaven.

T. DWIGHT HUNT.

Good News for Sailors.—A few weeks since a lady interested in the welfare of seamen, forwarded us a copy of the constitution of the "Ladies' Seamen's Friend Society" of New London, Ct. In glancing an eye over the list of officers for 1845–6, we are glad to see that persons are pledged to the cause from whom much may be expected. The following statement of facts was also forwarded, and we take pleasure in publishing the same, in as much as it will, doubtless, be read by many captains, officers, and seamen, who are attached to New London whale ships now in the Pacific.

Some of these ships will ere long return home "full," when it is to be hoped some of their respective crews will replenish the funds of the "Ladies' Seamen's Friend Society" of New London:

"On the 16th day of April, 1845, a number of ladies residing in this city assembled and formed a society called the "Ladies' Seamen's Friend Society" of New London.

The object of the society is to afford relief to seamen and their families, when in distress, and to promote their moral and religious welfare. To establish a home for the sailor when in health, and to afford him aid and comfort when sick. For these purposes the members of the said society have bound themselves to contribute from time to time, and have now, by their subscriptions, contributions and exertions, accumulated the sum of one thousand dollars, exclusive of what they have disbursed for the relief of sick and suffering seamen. But notwithstanding the exertions they are making and will continue to make, they find themselves unable to afford that relief and to accomplish all, or even half, of what their hearts would dictate, with-

out calling on the charitable for aid; and when the number of seamen sailing from this port, many of them young men well brought up, and all exposed to numerous temptations, are taken into consideration, they feel that their call on the humane and charitable is not made in vain."

New London, October 28, 1846.

For the Friend.

SHORT SERMON—No. II.

BY PARSON COMMON SENSE.

TEXT—"Don't burn your fingers."

This is a figurative and somewhat polite exhortation for the plain and unpolished proverb, "you had better mind you own business." Ears vulgar, no less than ears polite, cannot endure truth in its naked and unadorned state. An able parish minister once selected for his text, 1. Thess. 4, 2, "Study to be quiet and to do your own business." The text, not to say any thing of the sermon, was too applicable to the condition of the people, and he was compelled to seek elsewhere a pulpit. There may be circumstances when there is a moral necessity for a man to burn his fingers, then his scars will become marks of honor. The words of the text, however, have special reference to cases wherein a man unnecessarily burns his fingers. When a person intermeddles with difficulties with which he has no concern, he will be sure to get singed, perhaps scorched, it may be blistered, if not terribly burnt. Let my hearers beware how they meddle with the fires of religious persecution, flames of sinful lust and flashes of unholy anger. Family difficulties, quarrels of neighbors, disputes among friends as well as the wars of enemies, are awfully destructive fires, and will be sure to burn a man's fingers if thrust into them. Beware, also, how you venture near the volcanic fires that rage in the bosoms of newspaper editors and contributors. They often send forth tremendous streams of red-hot lava, scathing, wasting, desolating, destroying. The only way to avoid these streams is to maintain a good character for honesty, sobriety, virtue, integrity, and above all, consistency; the latter is a jewel as indestructible by fire as *asbestos*, and as fireproof as a salamander. Finally, my hearers, if you do not want your fingers burnt, follow this advice, keep to, or get some good and honorable employment, and then on all occasions and in every place, "mind your own business."

TEMPERANCE.—In a late number of the Californian, it was announed that a sailor belonging to the U. S. S. Columbus visited a grog-shop, where he drank so much that it very soon occasioned his death. The name of the grog-shop keeper and poor sailor are now forgotten, but it matters not as regards the principle involved. This circumstance led to the discussion of the following Resolution in the "Oahu Temperance Society:

Resolved, That the retailer of intoxicating liquors, who furnishes spirits to a customer which occasions his death, is morally, and ought to be considered as legally, accessary to that death.

This question was carried without a single dissenting voice. Judge Lee presided on the occasion.

In a late paper it was announced that a rumseller in Rhode Island had been indicted by the Grand Jury for manslaughter.

TEMPERANCE IN FOREIGN NAVIES.—A late London paper, gives the glad intelligence that the temperance society is having great influence over the sailors of the navy of Sweden and Norway. Out of the 444 men forming the crews of the Norwegian frigate the Freea, and the Swedish sloop the Nordsternen, which have just left Christiana for the Mediteranean, 302, that is more than two-thirds of them, have desired to receive rations of tea or coffee instead of brandy.

SUCCESSFUL OPERATION.—Yesterday morning, Dr. Morton, Dentist, No. 19, Tremont Row, at the invitation of Dr. Haywood, visited the McLean Hospital, and administered his preparation to produce sleep, to a person about to undergo the operation of the extraction of a tumor from the neck. We learn from a gentleman who conversed with one of our oldest and most respected physicians, who witnessed the operation, that the success of Dr. Morton's experiment was complete. The patient sitting in a chair, with every thing made ready by Dr. Warren, who extracted the tumor, inhaled the preparation for a very brief space of time, when he fell into a quiet slumber, and the surgeon proceeded to extract the tumor. The patient did not manifest the slightest symptoms of suffering, and no muscular action whatever. He appeared to be totally insensible to what was going on, till very near the close of the operation, which was quite protracted, when he drew a long sigh. It is quite as much for the interest of the surgeon as for the patient, that this preparation should be administered, for while it renders the latter insensible to the pain attending severe surgical operations, it affords the former the means of doing his work, from all interruptions on the part of the patient, and gives him facilities for performing operations in the most expeditious manner.—[Boston Journal.

DEPTH OF THE GULF STREAM.—The Savannah Republican says that Lieut. Bache, of the U. S. surveying brig Washington, whose loss at sea has been so much deplored, succeeded, after repeated attempts, in ascertaining at one point the depth of the gulf stream. The length of the line was twelve hundred fathoms, or about *one mile and a third.* This is probably three fourths of a mile deeper than plummet ever sounded before.

ENGLISH NEWSPAPERS IN THE PACIFIC.—Less than five years ago the "Friend" made its first appearance. At that time not an English newspaper was published in any part of the Pacific, or upon the western coast of the continents of North and South America. Since that time the "Polynesian" has been revived. Next appeared the "Samoan Reporter," at the Navigator Islands. Oregon has for 18 months been furnishing a "Spectator," of highly respectable appearance. The stars and stripes waved only a few days over California, and some old Spanish type are taught to speak "King's English," although advocating Republican, rather than "kingly" principles, in the columns of the "Californian." Up rises the California "Star." The Sandwich Island "News" follows, and now arrives the "Neighbor," "and who is my Neighbor?" It is a well conducted monthly, published at Valparaiso, Chile. Lastly, sparkling and bright, issues the "Oahu Fountain." It appears then, that in less than five years, 4 weekly, (Polynesian, News, Californian and Star,) 2 semi-monthly, (Friend and Spectator,) 2 monthly, (Neighbor and Fountain,) and 1 semi-annual, English newspapers have made their appearance in the Pacific.

"Westward the Star of Empire takes its way."

Mail for U. S. via Cape Horn.

The letter bag of Wm. Hamilton, may be found at the new store of G. W. Punchard & Co. Reported to sail Monday, 29th.

☞ The Chaplain will forward letters left in his care by seamen.

GRAPHIC.—A ditch is defined to be "a place in which those who have taken too much wine, are apt to take a little water."

THE FRIEND.

HONOLULU, AUGUST 26, 1847.

New Book on Mexico.

Recollections of Mexico, by Waddy Thompson, Esq., *late Envoy Extraordinary and Minister Plenipotentiary of the U. States at Mexico. Published by Wiley & Putnam, New York and London,* 1846.

As the title of the book indicates, this appears to be a work written not in Mexico, but after the author's return home. This would be a readable book at any time, but it is particularly so at the present. Mr. Thompson left New Orleans in April, 1842, and hence was a resident in Mexico during the years immediately preceding the war. When he arrived in the city of Mexico some of the Santa Fe prisoners were still in confinement, and for their liberation he made successful exertions. His impressions of the habits, customs, morals, and religion of the Mexicans, very much correspond to those of M. Calderon de la Barca, in her work, "Life in Mexico." This lady, being the wife of the Spanish Minister, enjoyed the similar opportunities with Mr. Thompson, for becoming acquainted with most of the leading political characters of the country. Mr. Thompson expresses a more favorable opinion of Santa Ana than that generally entertained by Americans. We shall furnish our readers with a few extracts:—

Mexico and Massachusetts.—Mexico was colonized just one hundred years before Massachusetts. Her first settlers were the noblest spirits of Spain in her Augustan age, the epoch of Cervantes, Cortes, Pizarro, Columbus, Gonzalvo de Cordova, Cardinal Ximenes, and the great and good Isabella. Massachusetts was settled by the poor pilgrims of Plymouth, who carried with them nothing but their own hardy virtues, and indomitable energy. Mexico, with a rich soil, and a climate adapted to the production of every thing which grows out of the earth, and possessing every metal used by man—Massachusetts, with a sterile soil and ungenial climate, and no single article for exportation but ice and rock—How have these blessings, profusely given by Providence, been improved on the one hand, and obstacles overcome on the other? What is now the respective condition of the two countries? In productive industry, wide-spread diffusion of knowledge, public institutions of every kind, general happiness, and continually increasing prosperity; in letters, arts, morals, religion; in every thing which makes a people great, there is not in the world, and there never was in the world, such a commonwealth as Massachusetts. "There she is! look at her!"—and Mexico.

Tortillas.—As you approach the city of Puebla, there are farms of considerable extent on both sides of the road. The grains chiefly cultivated are wheat, barley, and Indian corn. The wheat is used for bread by the better classes, and I have never seen better bread any where. The Indian corn is used chiefly, I believe entirely, by the Mexicans in making tortillas. There is not a corn-mill in Mexico. The tortilla is the bread, and the only bread of the great mass of the people. The grain is softened by soaking it in water, it is then ground on a smooth stone, with a long roller made also of stone; and after mixing the due proportion—which is always a very large proportion of chili and some lime, it is spread out in a thin layer and cooked as we do the hoe cake.—Corn is not used at all as food for horses; the only grain used for that purpose is barley, and the only fodder is wheat straw—an article generally regarded by us as of little or no value for food.

Santa Anna.—General Santa Anna, is now fifty-four years of age. He is about five feet ten inches high, with a finely proportioned person. His complexion is of an olive cast, but not indicating any mixture of blood, although I believe he is not of pure Castilian lineage. I do not know that I have ever seen a more striking and finely formed head and face; there is scarcely a feature or a point in either that Spurzheim or Lavater would desire to change. I remember to have heard a distinguished American statesman remark when Santa Anna was in Washington, that he had rarely seen a face indicative in a higher degree of talent, firmness, and benevolence; and when I say as I do, that I think that his face is not an inaccurate index to the volume of his character, I beg the reader not to start and lay down the book before he has read a few incidents which I propose to narrate, and for most of which I vouch, as they have passed under my own observation. I am well aware that I should better satisfy the great mass of readers both in this country and in Mexico, by speaking in a different vein of this now fallen man; but it would be both unjust and ungrateful in me to do so. I trust that I may without impropriety say, that the history of my mission will show that I never stooped to flatter General Santa Anna when at the height of his power, neither can I find it in my heart to traduce him now. He has at different times, at my instance, released from imprisonment more than two hundred Texan prisoners, and has so often afforded me that highest of all happiness, that of making others happy, that I should be gratified to know that in his present fallen state any thing which I may write of him has given him one moment's gratification. I shall not, however, be betrayed by this desire into writing one line which my own deliberate judgment does not approve.

Mr Poinsett had an interview with General Santa Anna in 1822. He saw and judged of him free from the false glare of high position and extended reputation. Santa Anna was then only colonel of a regiment. Mr. Poinsett was particularly struck with his high bearing and polished manners. Mme. Calderon de la Barca bears the same testimony to the grace, ease, naturalness of his manners, and the thoughtfulness and repose which are so striking in his countenance; and on this subject there is no authority so conclusive as that of a well-bred and accomplished lady.

Drones.—In walking the streets of Mexico, it would be very safe to bet that eight out of every ten persons you would meet would be officers, soldiers, priests, friars, or leperos, and it would be difficult to decide which class is the most numerous. All but the last of these classes are not only unproductive, but a charge upon the country. It does not seem to me that the whole productive industry of the country, so far as the Mexicans are concerned, and excluding the profits of the labor and capital of foreigners, would be sufficient to support these drones.

Fruits.—The apples and peaches of Mexico are not good, the latter decidedly inferior. The pears are very fine. They have one species of this fruit which is decidedly the best that I have ever seen; it is nearly the size of a goose-egg, and its flavor as delicious as that of the famous Philadelphia pear. All the fruits of the tropics—the orange, pine-apple, banana, mango, cherimoya, and last and least in size, but most exquisite in flavor, the tuna—are produced in Mexico in great perfection. I have no where eaten a fruit more refreshing and delicious than the tuna. It is the produce of one of the infinite varieties of the cactus, of which I have seen twenty different kinds growing on an acre of land. One of these varieties runs up to the height of thirty or forty feet, in the form of a beautifully-fluted column, and is used to enclose gardens, by planting close together.—That which produces the tuna grows to the height of thirty feet, and covers an area of twenty feet in circumference, with the leaves (if leaves they may called) dropping over each other like the shingles of a house.—These leaves are exactly like those of the prickly pear on our mountains, only larger, generally of twelve or eighteen inches in breadth. The fruit is about the size, and very much the shape, of a duck's egg. The combined flavors of a water-melon, a cucumber, and a lump of sugar candy, will give some idea of this delicious and refreshing fruit, as it melts in the mouth.

Voluntary torture and Clergy.—I have seen, in the church of San Augustin, one or two hundred people assembled at

night; the chapel was darkened, and they took off their clothes and lacerated themselves severely with pieces of hard, twisted cord, made like a cat-o'nine-tails. It was not such a flogging as Sancho gave himself to disenchant Dulcinea, but a real *bona fide* castigation. Of this I have no doubt, for I picked up one of the disciplinas, the instrument used, and it was wet and soaked with blood. I stood at the door as the penitents came out, and recognized amongst them some of the most respectable people in Mexico. No one in his senses can doubt the sincerity of those who will voluntarily inflict such torture upon themselves.

There was an amusng incident connected with this scene of self-castigation. Some mischievous boys (for boys are pretty much the same in Mexico as every where else) had contrived to get into the church, and for fear that the whipping would not be well done, they commenced operations themselves.—They were discovered, perhaps, from the greater severity of their blows than those which the men were inflicting on themselves, and there was a great commotion for a short time. The whipping lasted for ten or fifteen minutes, and the sound was very much like the pattering of hail.

I do not think that the clergy of Mexico, with very few exceptions, are men of as much learning as the Catholic clergy generally are in other countries. The lower orders of the priests and friars are generally entirely uneducated, and, I regret to add, as generally licentious. There is no night in the year that the most revolting spectacles of vice and immorality, on the part of the priests and friars, are not to be seen in the streets of Mexico. I have never seen any class of men who so generally have such a "roue" appearance as the priests and friars whom one constantly meets in the streets. Of the higher orders and more respectable members of the priesthood, I cannot speak with the same confidence; if they are vicious, they are not publicly and indecently so. Very many of them have several nephews and nieces in their houses, or, at least, those who *call them uncle*. The reason given for the injunction of celibacy, that those who are dedicated to the priesthood should not be encumbered with the care of a family, is, I think, in Mexico, much more theoretical than practical.

I cannot close these remarks without saying that there are men who belong to the priesthood of Mexico, whose pure, virtuous, and self-sacrificing lives would make them ornaments of any Christian sect in any age or country,—the Bishop of California for instance, who, after spending the prime of his life in doing the work of his Divine Master, returned to Mexico utterly destitute, and lived on charity. He had all his life been in the receipt of a large income, all of which he had expended in charities.

New Book—*Lectures to Young Men, on various subjects, by* Henry Ward Beecher, *Indianapolis, Indiana. Published by J. P. Jewett & Co., Salem*, 1846.—(*7th thousand.*)

This is a book which has secured a deserved popularity in the United States. The secular, as well as the religious press, cordially 'puffs' it before the reading community. A friend has loaned us probably the only copy that has reached the islands. Much should we rejoice to place a copy in the hands of every young man steppping upon our shores. Its talented author is a Presbyterian clergyman, being the son of Dr. Beecher of Cincinnati, Ohio. Once more the saying may in truth be uttered, "a chip of the old block.' Long has the father stood forth the eloquent and successful advocate of education, temperance, virtue, and evangelical piety, and now his mantle appears to be falling upon another son, for already one son, Edward, has a reputation vieing with that of his illustrious father.

Lecture I, is upon Idleness; its various grades and causes. Lecture II., upon Dishonesty, of which he specifies twelve causes. We shall extract a few paragraphs from each lecture, and at some future time continue our quotations, for the work abounds with much forcible reasoning and many eloquent appeals.

Industry and Idleness.—2. Industry is the parent of thrift. In the overburdened states of Europe, the severest toil often only suffices to make life a wretched vacillation between food and famine; but in America, Industry is prosperity.

Although God has stored the world with an endless variety of riches for man's wants, he has made them all accessible only to Industry. The food we eat, the raiment which covers us, the house which protects, must be secured by diligence. To tempt man yet more to Industry, every product of the earth has a susceptibility of improvement; so that man not only obtains the gifts of nature at the price of labor, but these gifts become more precious when we bestow upon them greater skill and cultivation. The wheat and maize which crown our ample fields, were food fit but for birds, before man perfected them by labor. The fruits of the forest and the hedge, scarcely tempting to the extremest hunger, after skill was dealt with them and transplanted them to the orchard and the garden, allure every sense with the richest colors, odors, and flavors. The world is full of germs which man is set to develop; and there is scarcely an assignable limit, to which the hand of skill and labor may not bear the powers of nature.

The scheming speculations of the last ten years have produced an aversion among the young to the slow accumulations of ordinary Industry, and fired them with a conviction that shrewdness, cunning, and bold ventures, are a more manly way to wealth. There is a swarm of men, bred in the heats of adventurous times, whose thoughts scorn pence and farthings, and who humble themselves to speak of dollars;—*hundreds* and *thousands* are their words. They are men of *great* operations. Forty thousand dollars is a moderate profit of a single speculation.—They mean to own the Bank; and to look down, before they die, upon Astor and Girard. The young farmer becomes almost ashamed to meet his schoolmate, whose stores line whole streets, whose stocks are in every bank and company, and whose increasing money is already well nigh inestimable. But if the butterfly derides the bee in summer, he was never known to do it in the lowering days of autumn.

Every few years, Commerce has its earthquakes, and the tall and toppling warehouses which haste ran up, are first shaken down. The hearts of men fail them for fear; and the suddenly rich, made more suddenly poor, fill the land with their loud laments. But nothing strange has happened. When the whole story of commercial disasters is told, it is only found out that they, who flung together the imaginary millions of commercial speculations, built upon the sand. When times grew dark, and the winds came, and the floods descended and beat upon them both—the rock sustained the one, and the shifting sand let down the other. If a young man has no higher ambition in life than riches, Industry—plain, rugged, browned-faced, homely clad, old-fashioned industry, must be quoted. Young men are pressed with a most unprofitable haste. They wish to reap before they have ploughed or sown. Every thing is driving at such a rate, that they have become giddy. Laborious occupations are avoided. Money is to be earned in genteel leisure, with the help of fine clothes, and by the soft seductions of smooth hair and luxuriant whiskers.

Parents, equally wild, foster the delusion. Shall the promising lad be apprenticed to his uncle, the blacksmith? The sisters think the blacksmith so very smutty; the mother shrinks from the ungentility of his swarthy labor; the father, weighing the matter prudentially deeper, finds that a *whole life* had been spent in earning the uncle's property. These sagacious parents, wishing the tree to bear its fruit before it has blossomed, regard the long delay of industrious trades as a fatal objection to them. The son, then, must be a rich merchant, or a popular law-

yer, or a broker; and these, only as the openings to speculation.

Young business men are often educated in two very unthrifty species of contempt; a contempt for small gains, and a contempt for hard labor. To do one's own errands, to wheel one's own barrow, to be seen with a bundle, bag, or burden, is disreputable.—Men are so sharp now-a-days, that they can compass by their shrewd heads, what their fathers used to do with their heads and hands.

Dishonesty.—12. Commercial speculations are prolific of Dishonesty. Speculation is the risking of capital in enterprises greater than we can control, or in enterprises whose elements are not at all calculable.—All calculations of the future are uncertain; but those which are based upon long experience approximate certainty, while those which are drawn by sagacity from probable events, are notoriously unsafe. Unless however some venture, we shall forever tread an old and dull path; therefore enterprise is allowed to pioneer new ways. The safe enterpriser explores cautiously, ventures at first a little, and increases the venture with the ratio of experience. A speculator looks out upon the new region, as upon a far-away landscape, whose features are softened to beauty by distance; upon a *hope*, he stakes that, which, if its wins, will make him; and if it loses, will ruin him. When the alternatives are victory, or utter destruction, a battle may, sometimes, still be necessary. But commerce has no such alternative; only speculation proceeds upon them.

If the capital is borrowed, it is as dishonest, upon such ventures, to risk, as to lose it. Should a man borrow a noble steed and ride among incitements which he knew would rouse up his fiery spirit to an uncontrolable height, and borne away with wild speed, be plunged over a precipice, his destruction might excite our pity, but could not alter our opinion of his dishonesty. He borrowed property, and endangered it where he knew that it would be uncontrolable.

If the capital be one's own, it can scarcely be risked and lost, without the ruin of other men. No man could blow up his store in a compact street, and destroy only his own. Men of business are, like threads of a fabric, woven together, and subject, to a great extent, to a common fate of prosperity or adversity. I have no right to cut off my hand; I defraud myself, my family, the community, and God; for all these have an interest in that hand. Neither has a man the right to throw away his property. He defrauds himself, his family, the community in which he dwells; for all these have an interest in that property. If waste is dishonest, then every risk, in proportion as it approaches it, is dishonest. To venture, without that foresight which experience gives, is wrong; and if we cannot foresee, then we must not venture.

Scheming speculation demoralizes honesty, and almost necessitates dishonesty. He who puts his own interests to rash ventures, will scarcely do better for others. The Speculator regards the weightiest affair as only a splendid game. Indeed, a Speculator on the exchange, and a Gambler at his table, follow one vocation, only with different instruments. One employs cards or dice, the other property. The one can no more foresee the result of his schemes, than the other, what spots will come up on his dice; the calculations of both are only the chances of luck. Both burn with unhealthy excitement; both are avaricious of gains, but careless of what they win; both depend more upon fortune than skill; they have a common distaste for labor; with each, right and wrong are only the accidents of a game; neither would scruple in any hour to set his whole being on the edge of ruin, and going over, to pull down, if possible, a hundred others.

Foreign Intelligence.

Chile.—The master of the "General Rivera," Captain Bellinger politely furnishes us with a file of the "Neighbor," which contains an excellent summary of news to the 26th of June. The President of Chile in his Message to Congress, reports the increasing prosperity of the Republic. Recommends a National Bank, and reform in custom House. The Government has ordered a "model bridge" from the United States. Public schools are improving. The income of the Government is increasing. A railroad from Valparaiso to Santiago, is in serious contemplation. Our enterprising countryman, Mr. Wheelwright, has projected the supply of Valparaiso with water by aqueduct, which has met the candid approbation of the government.

Peru and Bolivia.—"The President of the latter has, in addition to the former prohibition of commercial intercourse, now forbidden all communication of any sort across the boundary and ordering the return of all public agents from the Peruvian Territory."—[The Neighbor, June 26.

Oregon.—We would acknowledge a file of the Spectator, and are glad to learn that the country is prospering, as may be inferred from the following item from the Spectator of May 13:—

Oregon Exports.—The exports from Oregon during the month of April, 1847, has been as follows: H. B. Company's bark Columbia, 900 barrels of flour; American bark Toulon, 386 barrels flour, 94,000 feet of lumber; Am. brig Commodore Stockton, 450 bbls. flour, 7,000 feet of lumber; Am. brig Henry 70,000 feet of lumber, and 96,000 shingles—showing a sum total of exports of 1,736 barrels of flour, 171,000 feet of lumber, and 96,000 shingles. Independent of this, the Columbia completed her cargo with lumber and shingles, the precise amount of which, we do not know; of lumber, it could not have been much short of 20,000 feet.—The foregoing at least shows that there is something to ship from Oregon. In a few months, when harvest time will have passed, we shall have nearly *ten thousand barrels of flour* for export.

England.—News has been received to middle of May. Lord Cowley, brother of the Duke of Wellington, and formerly English minister at Paris, died April 27. The last heir of Sir Walter Scott has also died.

Ireland.—The famine continues to rage with unabated melancholly results. "An inquest being held on the body of a man who died of starvation, the coroner's jury found a verdict of 'wilful murder', against Lord John Russell."—[The Neighbor.

United States.—In Baltimore public attention has been much drawn to the question, "Will the abolition of slavery tend to the prosperity of the State?" Public meetings have been held, the minds of men are awake, and the affirmative has the decided advantage, it is said.

To our Patrons.

Many of our readers are aware of the manner in which the Friend is supported.—The total amount of receipts from our subscription list, advertisements, sale of bound volumes and donations for the current year has fallen below the expense of publication. The account stands thus:—

Publication of the Friend, 8 months,	$666 00
Total amount of receipts from Jan. 1, 1847, to Aug. 20,	355 87
Expenditures exceeded receipts	$310 13

We have delayed speaking of this increasing debt until our ports should again begin to be visited by the fall shipping. We are confidently hoping that before the close of the year our receipts will fully equal our expenses. Many seamen have hitherto rendered essential aid, by purchasing bound volumes, and thereby obtaining an equivalent for their money.

DONATIONS FOR THE FRIEND.

By Capt. Fisher of ship Wm. Hamilton—May 26, Edward Carey, 7 whales; June 2, Fabius, 4 do; 4, California, 1 do; 4, Canada, 3 do.—seen later with 5 large whales alongside; 9, Champion, Edgartown, 4 do; 13, George & Martha, 2 do; 19 Magnet, 3 do; July 18, Covington, 6 do; Portsmouth, 6 do; Bowditch, 4 do; Benjamin Rush, 2400 bbls.—wanted 3 whales; Nimrod, 2200; Canton, 1100; Alexander, 2900—wanted 2 whales; Brooklyn, 3800—full; Tiger of Stonington wanting 2 whales; Menkar—full; Chas. Drew, 1200 this season.

MEMORANDA.

AMERICAN WHALER IN A TYPHOON.—By the Schr. "Sam Slick," from Tahiti, intelligence has been received, that the whale ship "Factor," Hawes, master, put in there in distress, July 5th. On the 16th of June, the Factor experienced a severe typhoon, carrying away larboard bulwarks, rail, two boats, and plankshear. She sprung a-leak badly. At this time she was on her passage from New Zealand to Talcuana. As soon as the weather permitted, she put away for Tahiti.—She had 550 sperm, and 2,200 whale oil—33 months out. A survey had been called, which reported her sea-worthy with slight repairs; but the report did not satisfy the captain and crew, in as much as the vessel was very old. The men had refused to work unless they could be paid wages. When our informant left it was reported that a survey was about to be called from an English sloop of war, in port.

The above particulars are obtained from George Silva, a boatsteerer on board the Factor, who obtained his discharge, and shipped on board the "Sam Slick." The acting 3d mate, Grideon Devoll, also arrived. Four of the crew were coasting about the Society Islands. The remainder of the ship's company still remained attached to the vessel.

☞ The Am. Bark "Georgian," Kelley master, sailed from Valparaiso, for Sandwich Islands via California, May 13. Mrs. Walsh and daughter passengers.

NOTICE TO WHALERS.

Hilo, Byron's Bay, Hawaii, is a free port to whale ships of all nations, the only charge being $1 for clearance; pilotage being abolished by the law of 15th June, 1847.

No grog-shops at this port, consequently but little trouble or desertion among seamen. Wood $6 per cord, and recruits proportionably cheap, making it a desirable port for whale ships to recruit. There is not on record an accident to the shipping at this Bay. Always in readiness an old experienced pilot.

NOTICE.

B. PITMAN, Byron's Bay, Hilo, Hawaii, respectfully informs the masters of whaleships generally, that he has made arrangements for, and is now prepared to supply them with the best of BEEF at Honolulu and Maui prices.

Hilo, aug17. 28 3m.

FIRE-WOOD AND HEWN TIMBER.

ON hand and for sale by B. PITMAN, 100 cords Wood, 150 sticks Ohia (Hewn) Timber, from 24 to 40 feet in length, and from 5x6 to 8x9 square. Hilo, aug17—28 3m.

TO LET.

A new and commodious House just completed, containing four good sized rooms, with Kitchen and other necessary buildings. It is located in a pleasant and central situation either for a hotel or private dwelling. Rent low.

Apply to BENJ. PITMAN.

Hilo, aug17. 28 3m.

READY furnished Rooms, either by the week, month or year. Apply to

Hilo, aug17—28 3m. BENJ. PITMAN.

MOLASSES, SUGAR AND BEEF.

50 BBLS. Molasses, 10,000 lbs. Brown Sugar, 20 bbls. Mess Beef, on hand, and for sale by B. PITMAN.

Hilo, aug17. 28 3m.

Just Published.

HYMNS for children, selected from Dr. Watts and others. This is a small book of Hymns, designed to meet the wants of the numerous children speaking the English language on the Islands. Application has often been made to the Seamen's Chaplain for a book of hymns suitable for children to commit to memory. It is hoped this collection will be found to answer that purpose. Many of them are selected from "Watt's Divine and Moral Songs," which have obtained an unrivalled popularity in England and America.

Price $1,00 per dozen—12 1-2 cents single copy.

☞ Money advanced on liberal terms for Bills of Exchange on the United States, France and England. my22 tf.

F. RODRIGUEZ VIDA

WILL keep constantly on hand a general assortment of Ship Chandlery, Provisions, &c. usually required for whale ships touching at this port for recruits; and will supply them at the lowest market prices for cash or Bills of Exchange on the United States, England and France. my22 tf

CAVEAT.

THE public attention is called to the following facts:

1st. That on the 24th of November, A. D. 1841, the King and Premier of the Hawaiian Islands, signed a contract, without any proper or valuable consideration, by which Peter A. Brinsmade, William Hooper, or their assigns, were allowed to locate unimproved and unoccupied lands for certain purposes, until the 24th November, 1842, which right of location, was, on the 13th September, 1842, extended without further consideration to the 24th of November, 1845.

2d. That when there yet remained two years and six months of the term for such location, said Brinsmade, Ladd and Hooper, by their duly empowered Attorney, P. A Brinsmade, sold and transferred all their rights under said contract to the Belgian Company of Colonization, and by a contract executed at Brussels, on the 17th of May, A. D. 1843, with that Company, divested themselves of the right to locate and enjoy such lands.

3d. That the Belgian Company not having located or demanded the right of locating such lands, from the 17th of May, 1843, to the 24th of November, 1845, the time for such location has completely elapsed, and the said two contracts have become *void* by their own terms.

4th. That said contract of 1841, in accordance with the established custom of these Islands, having been made in duplicate, one being left in the hands of each party thereto, and each duplicate consisting of an English and Hawaiian version, duly signed and sealed, it has come to the knowledge of the undersigned, that Ladd & Co., notwithstanding they have sold and delivered the English version of said contract to the Belgian Company of Colonization, have lately assigned the Hawaiian version of said contract to other parties for purposes unknown to said King and Government.

Therefore, know all men, that in case any person or persons shall hereafter pretend to claim or assert any right under either of those void contracts by reason of purchase, transfer or assignment, such person or persons will meet the just and legal opposition of the Hawaiian Government.

And be it further known to all men, that whoever shall purchase said contracts, will purchase them at his or their own peril, and be deemed to have purchased a nullity.

Done by order of the King and Government of the Hawaiian Islands, at the Department of Finance, in Honolulu, Oahu, Hawaiian Islands, this 21st day of May, 1847.

G. P. JUDD,
Minister of Finance and Attorney for the King's Government. my 22 1y.

VOL. V.] HONOLULU, OAHU, H. I., SEPTEMBER 9, 1847. [No. XVII.

The Seamen's Friend.

An Address to the Commanders of Ships sailing from the Port of New Bedford.

The Board of Managers of the New Bedford Port Society for the moral improvement of seamen, have deemed it a matter of high importance, in furthering the designs of their Association, to address Commanders of ships sailing from this port, and to solicit their co-operation in the important work they are now laboring to carry forward among seamen. It may be presumed that most, if not all of you, are acquainted with our object and the measures we have adopted to accomplish it. To save a repetition of these we beg leave to refer you to the annual reports of our society.

We are aware, that in the discharge of the duties of your highly responsible stations you have an arduous and difficult task to perform. Connected as you are with men of all nations and dispositions, collected from all conditions of society, there cannot fail to be among them the elements of discord and mutiny. Hence the necessity of a careful and judicious exercise of that official power, which from the circumstances in which you are placed, is the most absolute of any exercised by any other class of men in the civilized world.

Your responsibilities therefore, are equal to the powers entrusted to you for the security of property, preservation of life, for maintaining good order, and for the prosperity of the voyage. Ship owners commit a vast amount of property into your hands, which requires care, skill and constant employment to manage to advantage. Hundreds of our fellow citizens depend for their subsistence on your fidelity, enterprize and success. No exertions therefore should be omitted to render the voyage successful.—The first grand object is to preserve good order and harmony, and a pleasant state of mutual exertion to secure a voyage. We shall not pretend to lay down rules for your conduct in the discharge of your duty, these must be drawn from experience, observation and immediate exigencies; but we beg leave to make a few suggestions which attentive and long observation satisfies us are important.

We think it would be well for every captain to take the earliest convenient opportunity to state to his crew the general outlines of the course he purposes to pursue, in preserving order and maintaining his authority, and then carefully adhere to it.

A mild, firm, decided and steady course is that which secures the most prompt and cheerful obedience. All abusive words and actions are sure to defeat such results. A single burst of unreasonable passion may frustrate every after exertion. When once the spirit of opposition is excited, it is like a spark thrown into the magazine, which no effort can quench, no power control. Every shipmaster should consider that all ears and eyes are open to his words and actions. His example cannot fail to have a powerful influence over his crew. We hardly need to remark that intemperance and profanity are the common failings of seamen, and that from the first of these, springs most of the serious evils which occur in the course of a voyage. The attention of the community is awakened to this subject. Temperance Societies are furnishing a fund of information and powerful motives to action in this cause. It is ardently to be hoped that every shipmaster may co-operate by example, precept and general influence to bring about a thorough reform among seaman from these degrading vices.

To rebuke men for drinking, profanity, vulgar language and angry passions, when they have occasional examples of indulgence before them, is but too add fuel to a raging flame. No sight can be more humiliating than to behold one vested with unlimited power for good, abusing it for the vile purposes of domineering, cruelty and revenge.

Refractory tempers will be inventive of means to irritate and vex hasty and ungovernable dispositions, and nothing better can be expected from many of our common sailors.

The captain of a ship stands in a very responsible relation to many of his crew as minors, who are directly, or indirectly placed under his care by parents and guardians of youth. Here the parental care and authority devolves upon the master—and it is reasonable to expect that he who takes this charge upon himself, should exercise a parental care over the health, morals, improvement and usefulness of youthful sailors.—Sailors are bound to submit and obey. The laws of our country subject them to the severest punishment for disobedience and mutiny; and the same laws, secure the men from cruelty and abuse. It is not expected that all men should be tractable to learn, ready to obey, or smart and capable to execute your commands. There will be continued calls for close, and discriminate attention, patient enduring, affectionate reproof, kind remonstrance, with prudent and fixed purposes to secure obedience.

Your responsibilities are also great to wards the officers whom you entrust to see your orders obeyed. They should never be permitted to call the men ill names, to taunt and vex them; to strike, kick, and abuse them. Brute force will never produce cheerful obedience to reasonable orders, and no others should be countenanced. The officers are responsible to you for the exercise of their power, and the proper discharge of their duty. The want of agreement between the captain and his officers is often attended with the most disastrous consequences. All collisions between them should be carefully avoided, and mutual consultations and efforts should mark the course of their operations to secure respect and obedience.

Captains of ships are emphatically placed as lights and guides before their men. In them centre the expectations of owners—the repose of wives—the hopes of children—the confidence of parents—the happiness of families—the peace of society—the honor of the nation—and often instrumentally the salvation of souls. Duties corresponding to all these views are to be conscientiously regarded by them.

As the holy scriptures furnish a guide to all good works, from them may be learned the principles and spirit for the performance of all duty. By reading them and recommending their perusal to others, a salutary influence may be diffused among all around you.

May we hope that you will recommend the objects and measures of the Port Society, to your men, that when ashore, they may seek temperance boarding-houses, visit the Seamen's Reading-Room, attend religious services at the Bethel, that they may receive the moral advantages which it is our aim to afford to seamen.

We are happy to believe there are many captains who cordially aim to co-operate with us in our benevolent purposes. Their exertions are worthy of all praise. Happy shall we be if our mutual efforts shall produce such a moral reform in our Whale ships, that instead of being the vehicles of corruption, and a disgrace to our nation in the ports they visit abroad, they may become justly celebrated for the wholesome, moral influence they may carry wherever our flag may wave, or a Whale Ship be known.

Signed in behalf the Society,
SAMUEL RODMAN, President.
WM. H. TAYLOR, Secretary.

WORSHIP.—The true worship of God does not consist in words (as many think) but in deeds.

For the Friend.

Wants of Seamen.

No. VII.

Sailors need *safe and pleasant places of resort on shore.*

The good influences begun at sea must be followed up on land. We will suppose the sailor to have reaped the benefit of the reforms we have been advocating. Before entering upon his voyage he was introduced, as far as practicable, into the circumstances of his new life. From its commencement he has experienced kind, though strict discipline. His fare, though plain, has been wholesome, and has been served up in a civilized manner and in generous quantity.—His accommations have been all he could reasonably ask. A good library has employed and instructed him in his leisure moments, while the Sabbath has shed its sacred light and rich blessings upon a quiet ship and sober crew. He has experienced little or none of the privations now so inseparable from sea life. Even with an unrenewed heart, or even insensible to his rare privileges, he has been, and is, a happier and a better man for what he has enjoyed. He has been under the influence of far less evil, and of much more good, than most men, and he has either been kept from going lower, or has been elevated by restraints on the one hand and by helps to virtue and intelligence on the other. But his ship has dropped her anchor in a foreign port, and he is for a season to become landsman again. He is to have "liberty on shore," and what kind of liberties will he take? Where will he go? What will he do? What kind of influences will meet him? Will he find any friends? Are there any places of entertainment and instruction, and will he reach them, past all the snares and pit-falls of the way? Having escaped the corruptions and perils of the sea, is he to become the prey of temptation and vice on land? Who shall look out for him, and what does he need on shore to preserve him? In the first place, let the master, before giving his men liberty on shore, clearly and affectionately admonish them of the dangers every where besetting their way. Let him set before them the folly, as well crime, of the vices so common to their class. He may hold up to them fearful examples of depravity and ruin, to intimidate them; nor should he fail to illustrate the blessings of sobriety and purity, to fortify and preserve them. Then let him, with parental prudence, withhold from them all means of purchasing wicked indulgence. A trifle is all they need, if indeed they need any. A wise master will study more the good of his men than their temporary gratification. Good seamen will appreciate the reasons for such a course, bad men it would be unsafe to indulge to the amount of their wishes. Beside, all would ultimately thank so thoughtful a guardian of their property, when the close of the voyage turned out to them their full wages, unconsumed and unreduced by foolish expenditures in foreign ports. Such a course too would save many a sailor, while it would vastly diminish the power of the wicked to do evil. It would tend greatly to diminish the amount of corruption at recruiting stations, and thus reversely reduce the number and power of the temptations that beset the sailor on shore.

Not far from the landing should be a *reading-room* for seamen. These are often too exclusively for masters and officers. If it be thought best let there be two; but by no means neglect the sailor. Let it be pleasantly located. Crowd him not into a cellar nor oblige him to go aloft; let it be convenient for him to step in and out at his pleasure. He has been months without intelligence from his native land. He has almost a dread to break the silence lest he get painful tidings of home or country. But he has the curiosity of other men. If he have any desire for information he will not wish to be wholly ignorant of the affairs of the world. The ship's library has awakened or cultivated his desire for knowledge, and he will welcome an airy and pleasant room for his reception and entertainment. There he finds files of various papers, political and religious. He glances at the latest dates for the most recent intelligence, and is surprised, delighted, saddened, or, perhaps, distressed at the information he acquires. He runs over the marriages and deaths of the whole file, and finds occasionally a familiar name, and a smile or a sigh betrays emotions corresponding to the nature of the intelligence. He laughs as a witticism touches a humorous vein; he buries his face in sorrow as a mother's or a sister's name darkens the catalogue of the dead. Inexpressible emotions thrill his soul as he learns of a destructive fire in his native town; and, perhaps, his own earnings of years just escaped, or wholly consumed! Hour after hour is whiled away, and he has learned much—much of the world—and something, perhaps, of his native place, possibly of his own family or kindred. He has been instructed, perhaps, saddened, and he feels profited by his day's liberty, and blesses the philanthropy that provided him so pleasant a resort. And right cheerily does he drop into the box, by the door, the "trifle," or, perhaps, more, than he received for his day's expenditure. Yes, a reading-room for sailors, sailors would sustain.

Before his next day's liberty he has, perhaps, heard of the seamen's Chaplain and the seamen's Bethel, both of which should be found in every important port. He determines to visit each at the proper time.—He does, and feels strengthened in all the good resolves he ever made. He receives, perhaps, a good book at the hands of the chaplain, at all events, he has lodged in his heart many a truth of the practical sermon and private advice he heard from his lips.—He is not one merely, he is the representative of a growing class, and perseverance in the use of appropriate means at sea and on shore, would soon swell the small number to a host. Seamen, provided with means of comfort and moral and intellectual improvement at sea, would meet on shore with kindred influences, which would unite to preserve and elevate them.

It is a bright feature of the times that the wants of seamen in this respect have been partially met. Our large ports have chaplains and Bethels. Reading-rooms, too, in many places, throw open their doors to the sailor. It needs only that these be multiplied, and that the religious portion of the community unite in every appropriate means for the sailor's rescue. Let them unite in getting up and sustaining temperance meetings. They have influence over masters, let it always be for the good of the ships' crews. Sailors "on liberty" often call at their houses; let them be welcome. A cup of water and a social talk, if time will allow it, will win upon their confidence and do them good. If other duties are pressing, a paper put in their hands, or a pleasant word and a shake of the hand, will leave pleasant impressions and a kind remembrance. A word may awaken a tender thought of home in the breast of one, and save him. It may take another, the next Sabbath, to the house of God. The paper or tract put into the hand of the third, may prove to him a healing leaf from the "Tree of Life." Even to sit on the chair of the resident, or to stroll in his garden and pluck a flower from the strange soil, or enjoy, for a moment, the mountain or ocean scenery from his piazza, will be a favor. The smallest attentions or privileges will be appreciated. He will not feel banished from the home of civilized and christian families, and necessitated to resort to places of temptation and crime. And how it would strengthen the resolve of the repenting prodigal or the fortunate sailor who has not yet fallen, could he feel assured that the virtuous sailor would have a place among the virtuous on shore that the temperate, the intelligent and religious would unite in bringing him up to their level, and to the enjoyment of their blessings.

Another help, important, though different in its influence, is found in attractive places of public resort, public gardens, rural groves, and pleasant burial grounds. Such sights and walks have a peculiar charm to seamen, and the influence on them must be happy. The change from the unvaried blue of old ocean to the green, and the fragrance, and the shade of a beautiful park, and from the roar and storms of his favorite element to the stillness and mild repose of the last rest-

ing place of the dead must give the rare visiter of these scenes a peculiar pleasure, if not yield him substantial good. If not lost to noble impressions, nature will in these attractive forms engrave important morals upon his heart. The sparkling fountain, the beautiful grove, the frolicsome gambols of happy children, the general gladness of the varied group that daily seek health or recreation there, must upon one, not lost beyond recovery, have a great and healthful moral power. But these walks and retreats are the purchase of years. They grow up in the progress of wealth and refinement, and, however, desirable they would be for the health and morals of seamen here, and throughout this ocean and the world, other and more valuable means must, for a long time to come, work out, unaided, the sailor's redemption.

Places there are, but they are scattered along the road to death. There is the gaming house. Close by is the mad house of intoxication. Farther down, and more crowded still, is "*her* house, the way to hell," going down to the chambers of the pit. The allurements are enticing, and the passions addressed, are the most powerful and habitual in a sailor's mind. "Like an ox to the slaughter," he is led on, thoughtless of his destiny, till he finds himself at the foot of a declivity he has no strength to retrace, with a fire in his bones he cannot destroy. And the roads descending thither are numerous, and the doors of entrance are as varied.—The keepers of eating houses are often ready porters at the treacherous gates.—Bowling alleys are at the entrance, and lead direct to the fatal course. But the house of the "strange woman" lies on the very borders, yes, is within the very entrance of poverty, blasphemy, wretchedness, and death. And to decoy the unwary, some of these roads set off in an opposite direction from that in which they terminate. Winding by imperceptible turns, the deluded victims at length set their face towards forbidden pleasures, and drawn out in hot pursuit, are beguiled into irretrievable ruin. Perhaps they had resisted the vile influence that beset them at sea. The contact with vice in the forecastle was too foul to tempt their embrace, and they leaped ashore glad to shake themselves of the contamination. But a more accomplished and a more honey-tongued tempter adroitly entices them to a healthful recreation. They enter the house of "amusement" and their feet are in the snare. But most seamen take the beaten track to bold gratification. They step ashore and go shamelessly down to the house of infamy.—And masters and officers are often found there, but they reach it by a more genteel entrance. It is in the enclosure and through the doors of ——— & Co.'s mercantile establishment. Or the invitation is in the shape of a ride into the country to spend a night or while away the Sabbath. It is a more pleasant route, but is as direct as the narrow lane down which the sailor spends his strength and earnings. Not far apart the master and his men go down the same abyss. But if the vices of seamen are notorious, equally so are the dangers to which they are exposed. Indeed, their exposures on land exceed those at sea. A more successful system of piracy and corruption there robs them of their wages, and dooms them to poverty and infamy. 'Till these floodgates are closed, and doors to safe retreats and rational enjoyment are opened to seamen as they step on shore, we can entertain no very sanguine hopes of their reformation or salvation.

T. DWIGHT HUNT.

For the Friend.

SHORT SERMON—No. III.

BY PARSON COMMON SENSE.

TEXT—"Every tub should stand on its own bottom."

Diogenes once lived in a tub, and the seven wise men of Gotham went to sea in a tub, but who first uttered the words of my text is a matter of uncertainty among the learned. There can be no doubt or uncertainty, however, respecting its meaning.—Men must walk erect, and without leaning upon their neighbors, if they expect to pursue an independent and honorable pathway through life. The merchant must not speculate upon another man's capital; the farmer must not carry forward his agricultural operations by borrowing his neighbor's ploughs and carts, the mechanic must build up a reputation of his own; the scholar must not too frequently quote his old teacher; the sailor, who is a *sailor* must not only "hand, reef, steer, knot and splice," but do any job of work on board ship in a seaman-like manner; no man ought to expect others to carry him, but he should go alone. There is, however, a vast deal of leaning upon other people, and hence, it is no matter of suprise that such multitudes fail in their pursuits, their hopes are blasted, and expectations never realized. The higher a man would build his house the deeper should he lay his foundation. The longer the journey, the more necessity for preparation. That man is knavish, dishonest and base, who is not willing to stand upon his own merits. Some tubs are easily upset, because too high for the bottom, so with some men who boast great things, but achieve no victories.

NOTE.—Observation teaches that sooner or later every man finds his proper level in society.

Late News from the U. States.

The schr. Indiana, Crosby, master, and Higgins, supercargo, arrived on the 6th, 36 days from Central America, bound with a valuable cargo of cochineal, to China. She brought New York papers to 3d June.

The war-spirit was still agitating the country. General Taylor has been nominated for the next President by a convention at Nashville, Tenn. He is gazetted as belonging to the Jeffersonian and Jackson school, in Politics.

Eight English Newspapers are now published by Americans on the MEXICAN territory!

The U. S. S. Frigate Macedonian, was fitting out with supplies for Ireland. From the circumstance that this vessel was taken from the English, during the last war, it was thought that some other vessel should have been selected.

The whale ship 'Sarah Esther,' bound to the Pacific, had been seized by the Brazilian Government, and sold, because she had violated the laws of the port, in landing and selling oil.

Melville, author of "Typee," is coming out with a new work, called "Omoo." Harpers, New York, and Murray, London, publishers.

Most sincerely do we rejoice to notice in the N. Y. Mercury, the appointment of a Seamen's Chaplain, for Lahaina, by the American Seamen's Friend Society. His name Rev. T. E. Taylor. Another Chaplain, the Rev. James Merrill, has been appointed for China.

The Famine continues to oppress poor Ireland. At latest intelligence, it was severer than ever. The demand for American bread-stuffs remains good. Every vessel comes freighted with specie. We noticed one steamer took £200,000, and previous to her sailing, an American house in London, drew £100,000, intended for the same vessel.

MELANCHOLY OCCURRENCE.—The N. Y. Mercury copies from a New Bedford paper, of May 11, the announcement of the arrival of the ship "Charles," Knox, with her valuable cargo of 1,000,000 pounds of whalebone. Thirty-four days after the Charles left this port, Mrs. Beck, a passenger, disappeared in the night. She occupied the after state-room, having a stern window.—When she retired the door was locked. Not making her appearance, as usual, in the morning, on opening the door it was found that she had escaped through the window. Before leaving the Islands she had manifested extreme dejection of spirits on account of her husband's death, who commanded the Atlantic.

THE FRIEND.

HONOLULU, SEPTEMBER 9, 1847.

THE GOLDEN MAXIM OF SIR MATHEW HALE.

"A Sabbath well spent
Brings a week of content,
And health for the toils of to-morrow;
But a Sabbath profaned,
Whatsoe'er may be gained,
Is a certain forerunner of sorrow."

It is no uncommon question, "Why so much stress laid upon an observance of the Sabbath?" We answer, because "the Sabbath was made for man," according to our Saviour's declaration. One seventh part of time was ordained for the high and holy purposes of religion. Man's physical and mental, as well as moral and religious well-being, demands this rest. Hear the politician reason upon the subject. Thus speaks J. Babington M'Cauley, in a recent speech in the British Parliament:—

"The day of rest occurring every week, and the hours of relief gained for every day labors, tend to elevate the whole man, physically, intellectually, and morally, and his elevation again tells on the commercial prosperity of the country in ten thousand ways."

Not only upon the principles of Divine revelation, but upon the principles of reason and undeniable facts, we maintain that the Sabbath breaker is practically, an enemy to himself, his country, his fellow-men, and his God, violating the plainest command of the Bible, and the most obvious laws of his physical, intellectual and moral constitution. The infidel and atheist, ought to shame professing christians into a proper observance of God's holy day. Recently we read an article from the "Boston Investigator, (a most notorious infidel paper,) in which, the writer most strenuously argued for the observance of the Sabbath. Shame, shame, then on those persons who profess to believe the Bible, and yet desecrate the Sabbath, by unnecessary labor or wicked recreation.—"Will a man rob God?" Yes—every Sabbath breaker does it. God never gave the Sabbath to man for labor or pleasure. The command, "Remember the Sabbath day and keep it holy," stands unrepealed. The man, whoever he may be, king or subject, ruler or ruled, rich or poor, learned or ignorant, that violates this command, does it at his peril!

☞ The following extract from an American correspondent, exhibits in a pleasing light the good impressions that may be made upon the mind of a stranger, although his sojourn may be of short duration among us.—This is only one of many similar cases that might be mentioned:

"Boston, Nov. 8, 1846. I passed a Sabbath last spring in N———, where more than 30 persons were received into the Old Church. Among them a son of our friend —— ———, is the man, who visited you at the Sandwich Islands. His visit there deeply impressed his mind, and made him feel the reality of a principle of which he was ignorant. After long striving with the spirit, he was brought to see against what love he had turned away, and his soul was melted and subdued. He gave himself to reading and reflection, and then went to the minister, ———, to know what he should do for the Saviour whom he slighted, and so much overlooked in all his plans and purposes.—He is now at the Sabbath school and at meetings for prayer and serious conversation."

Well do we remember the educated young man referred to in the above extract. There is doubtless much of truth in the declaration of a distinguished divine, a period will doubtless arrive in eternity, when the fact of having made one good moral impression upon an immmortal mind, will exceed worlds in value. The reason why we do not now view it thus, is owing to the blinding and preventing influence of sin upon our mental vision.

No errors of the Printers.—Not a few of the errors and blunders of authors, editors and speakers, are charged upon their luckless printers, while among them *one* poor wight has to bear the blame. The following blunders, however, must fall elsewhere:—

"Lord Kenyon, who understood law rather better than the gospel, closed one of his charges to a jury as follows: "Finally, gentlemen, I would call your attention to the example of the Roman Emperor Julian who was so distinguished for the practice of every Christian virtue that he was called Julian the *Apostle*."—(Apostate.)

A brother editor, report says he was a *clergyman too*, once referred to *Daniel* as having persecuted the saints before he became a christian.

Who informed Waddy Thompson, while in Mexico, that Lazarus, the brother of Mary and Martha, was also the poor beggar that lay full of sores at the rich man's gate, for in his "Recollections of Mexico," speaking of the Hospital of Lazarus, he says, "the inmates would have rivalled in sores and rags, the brother of Mary and Martha!"

Two members of a State Legislature at the close of the session, addressed a circular to their constituents—"We hope the course we have pursued and the votes we have given, will meet your approbation. We hope you will say to us, as Nathan said to David, "Well done, good and faithful servants."

A hearer was once heard to remark respecting a favorite preacher, "he seems so much like Christ that he is an *Anti*-Christ."

The Irishman declared that *both ends* of the rope were cut off, when Jack had merely spliced them together!

"Rev. Mr. Taylor, said he believed if there was a sheep killed in Boston, there would be more stir made about it, than about the destruction of thousands of poor children by the liquor traffic."

The above is extracted from a characteristic address of Father Taylor, the seamen's preacher. Probably not less than 20,000 are killed by intemperance in the United States in a single year, yet the majority of the population are perfectly unconcerned respecting the killing effects of the "liquor traffic." In Great Britain, the melancholly effects of intemperance are probably tenfold more ruinous and disastrous to life and property than the famine now raging in different parts of Ireland and England, yet the United Kingdom promptly pays an annual cost of intemperance, estimated at *one hundred millions of pounds sterling!* This is the pecuniary waste merely, but who can estimate the enormous waste of human life and happiness, resulting from the "liquor traffic."

Truth will be uppermost, some time or other, like cork, though kept down in water. —[Sir W. Temple.

[From the Polynesian.]

HILO, August 18, 1847.

MY DEAR SIR:—On this sheet I send you an abstract from my Journal of Rain at Hilo, from August 1, 1846, to July 31, 1847. The amount of rain for each day is recorded in inches and thousandths of an inch. The total amount which fell during the year, you will see to be 182 and 7 thousandths cubic inches. Of this, 90,730 fell in the night. The greatest amount which fell in a day, is 10,466 inches. This was on the 21st of March. The greatest quantity which fell in any one month, was 38,156 inches. This was in March. Taking the year together, it has been the most rainy of any we have experienced since our residence at the Islands. Most truly yours.

TITUS COAN.

J. J. JARVES, Esq., Editor of Polynesian.

INFIDEL INFLUENCE.—Infidelity may take away the christian's hope, but cannot afford consolation in the dying hour. There is melancholly proof of this fact in the following account of Hume and his mother:—

"It seems that Hume received a religious education from his mother, and early in life was the subject of strong and hopeful religious impressions; but as he approached manhood they were effaced, and confirmed infidelity succeeded. Maternal partiality, however alarmed at first, came to look with less and less pain upon this declaration, and filial love and reverence seem to have been absorbed in the pride of philosophical skepticism; for Hume now applied himself with unwearied, and unhappily, with successful efforts, to sap the foundation of his mother's faith. Having succeeded in this dreadful work, he went abroad into foreign countries; and as he was returning, an express met him in London, with a letter from his mother, informing him that she was in a deep decline, and could not long survive; she said she found herself without any support in her distress; that he had taken away that source of comfort upon which in all cases of affliction she used to rely, and that now she found her mind sinking into despair; she did not doubt that her son would afford her some substitute for religion; and she conjured him to hasten home, or at least to send a letter; containing such consolations as philosophy can afford to a dying mortal. Hume was overwhelmed with anguish on receiving this letter, and hastened to Scotland, travelling day and night; but before he arrived his mother expired.

No permanent impressions seem, however, to have been made on his mind by the most trying event; and whatever remorse he might have felt at the moment, he soon relapsed into his wonted obduracy of heart.—[Quarterly Review.

THINKING.—Thinking is the least exerted privilege of cultivated humanity.

Lahaina Chaplaincy.

MR. EDITOR,—As various friends of the cause both on the sea and the land, have from time to time contributed liberally for support of the Chaplaincy here, I desire to make the following statement for tthe satisfaction of all concerned:

At a meeting of captains and officers, held at Lahaina, October, 1846.

Captain John H. Dease, Chairman.

Captain Dagget moved that the old Reading-Room be sold to the highest bidder, which motion was carried.

It was also resolved that Rev. Mr. Forbes act as agent to dispose of the funds accruing therefrom, in fitting up a room under the Seamen's Chapel for a reading room for seamen; also, that a paling be placed around the chapel.

Accordingly, in November, the old Reading-Room was sold at public auction by Mr. Swinton for the sum of $82,50, deducting auction fees.

A fence has been placed around the chapel and a room fitted up beneath, for a reading-room at the following expense:

For lumber and fixtures,	$115 04
Lime and plastering,	26 37
Carpenters work,	79 97
Painting,	9 31
Shingling the veranda, lath and iron work,	33 62
Sexton's pay until Jan., 1848,	21 75
	$286 07

The following are the sums which I have received towards the above bill:

Nov., 1846, I received of H. L. Swinton, Esq., for sales of the old reading-room,	$82 50
Donation of Mr. Swinton for reading room,	10 00

DONATIONS FOR CHAPLAINCY.

Capt. Leavy,	4 00
Mr. Pierre,	2 00
" Burns,	2 00
" Cook,	1 00
" Lane,	50
" Baine,	50
John A. Deck,	25
Geore Stavey,	50
Mr. Lake,	2 00
" Babcock,	1 00
Capt. Breyton,	3 00
" Wilber,	5 00
" Gillett	5 00
A Friend,	5 00
	$124 25

After deducting $124,25 from $286,07, there is still left the sum of $161,82 due the chaplaincy, which sum, as it has not been expended for private nor for individual ben-

efit, every friend of the cause will feel the importance of discharging.

Any of our sea-faring friends who feel disposed to aid in paying off this bill will find a subscription list open at the office of the chaplain every afternoon.

C. FORBES,
Seamen's Chaplain.

Lahaina August 26, 1847.

Recent News.

By the "Mt. Vernon," direct from California we have received intelligence up to August 14. From the "Californian," and private correspondence, we have gleaned a few items of news that may be interesting to our readers.

Mexico.—In regard to Mexico, we have not learned any news additional to that received by the "Cyane." The Californian of Aug. 14, contains General Scott's Proclamation to the Mexicans, and General Taylor's official despatch, of March 6th, which have already been published. In addition, the "Address of General Santa Anna, President *ad interim* to the Mexican Nation," of May 22d. In many respects it is an interesting document. It breaths a spirit of despair in regard to the condition of his country. He was as a last resort endeavoring to defend the city of Mexico. He remarks, "Surely there has arrived the moment of risking all to save all!" While lamenting the reverses of the fortune of war, he asks, "Am I controller of victory, to hold her as my slave?" When addressing the clergy, Santa Anna uses this language, "The clergy cannot in conscience consent to the domination of a people who sustain as a principle of political economy, the toleration of all kinds of religious teaching. Are they resolved already to witness Protestant churches rise in front of those where they adore the Holy Host?"

A correspondent thus writes, from San Francisco, Aug. 11, 1847:

"The 'Independence," Com. Shubrick, and Congress, Capt. Lavelett, also sloop-of-war Portsmouth, are now here drilling their men, expecting soon to attack Mazatlan."

Another correspondent writes from Monterey, Aug. 4: "A month ago I landed in California, at San Francisco, a busy little town of shanties, poop-cabins, and tabernacles, where every man is prospectively getting rich as crœsus. The land is already too narrow to hold the expansive spirit of speculation. I have seen lots 50 yards by 16, sell for $100 each, though 30 feet under water, in the Bay! A week and a half since I rode from St. Francisco to Monterey in a waggon. Nature has furnished a good road the whole distance, 140 miles, over an almost perfect level."

From all accounts we are compelled to believe that a most lamentable state of immorality and drunkenness prevails at both San Francisco and Monterey.

To our Patrons.

Many of our readers are aware of the manner in which the Friend is supported.—The total amount of receipts from our subscription list, advertisements, sale of bound volumes and donations for the current year has fallen below the expense of publication. The account stands thus:—

Publication of the Friend, 8 months,	$666 00
Total amount of receipts from Jan. 1, 1847, to Aug. 20,	355 87
Expenditures exceeded receipts	$310 13

We have delayed speaking of this increasing debt until our ports should again begin to be visited by the fall shipping. We are confidently hoping that before the close of the year our receipts will fully equal our expenses. Many seamen have hitherto rendered essential aid, by purchasing bound volumes, and thereby obtaining an equivalent for their money.—[August 26, 1847.

☞ Since the publication of the above notice, funds to defray the publication of the Friend have been received, to the amount of $50,00. We hope our readers in the whaling fleet, will do as well as those on board vessels of war.—[Sept. 9.

A Card.—The Seamen's Chaplain would respectfully acknowledge the receipt of $20,00 for the support of the Seamen's Chaplaincy, from Capt. S. F. Dupont, U. S. S. Cyane, which donation constitutes him a "*Life-Member of the American Seamen's Friend Society of New York.*"

☞ The Seamen's Chaplain would also acknowledge the receipt of $63,00 from the crew of the U. S. S. Cyane, and $6,00 from two ward-room officers, subscribed for the Honolulu Chaplaincy and the Friend. One half will be devoted to each object. In acknowledging these various contributions, by the officers and crew of the "Cyane," it is becoming to speak of their generous aid of $100,00 rendered at Hilo, for the purpose of fitting up a "Bethel." This contribution, the Rev. Mr. Coan will doubtless acknowledge in due time.

Donations.

Sept. 7.—Crescent.

" 7.—Ontario.

PORT OF LAHAINA.

ARRIVED.

Aug. 24.—Am. whaleship Tiger, Brewster, Stonington, 22 mos., 2670 whale.

Aug. 22.—Am. whaleship Wm. Hamilton, Fisher, New Bedford, 26 mos., 100 sp., 4100 wh., 1400 season.

26.—Am. whaleship Ontario, Green, Sagharbor, 24 mos., 20 sperm, 3700 whale.

MEMORANDA.

☞ It must be of commercial interest to read the following account of a passage through the Straits of Magellan, performed by Capt. J. Longmuir of the British bark Cape Horn :

"On the 16th of November, at 8, P. M., the Evangelists bore N. N. E. 5 miles; at midnight. Cape Pillar bore S. S. W. 3 miles. The 17th, at noon, we entered 'crooked reach;" 10 P. M.; off Port Famine. The 18th, at 4.30, P. M., came to in Gregory's Bay; good holding ground; 19th, at 3.30, A. M , got underway; 7.30 A. M., entered the first narrows, last half flood. At noon, we were clear of the Straits. And now, after the experience of four voyages around Cape Horn—in Sept, 1843, Aug., 1844, and Aug., 1845—I must say, considering the wear and tear the vessels then received, the weather encountered, and the heavy cross seas prevalent between the Straits and the Cape, there is no comparison between the passage around and that through Magellan, from the West coast Had I another passage to make at the same season, or in winter with moonlight, I would altogether prefer the Straits to the Cape Horn passage. By this, you see we accomplished the passage in 60 hours, and out of that lay 12 hours at anchor."—[Neighbor, Valparaiso, April 27.

Capt. Fish, Columbus, reports Navy with 12 whales. Canada bound to Hilo, 2100, 1000 this season, (took 6 whales at two lowerings.)

Capt. Smith, Metacom reports Copia, Taber, 500 this season. Euphrates 2100 this season. Martha, Fairhaven, 800 this season.

Reports from Kamschatka unfavorable.

SAN FRANCISCO.—Arrived August 6, Chilean ship Confederacion, Jones, 15 days from San Pedro. Brig Laura Ann, Thomas, 62 days from Manila.

Aug. 7.—Maria Helena, W. Curphey, 70 days from Valparaiso, cargo assorted. Schr. Santa Cruz, Lowe, from Santa Cruz. Bark Whiton, Gelston, from Oregon.

Aug. 13.—Brig Francisca, from Santa Cruz, with lumber. Ship Mount Vernon, Gibbon, from Oregon.

SAILED, Aug. 5 —Ship Barnstable, Hall, for San Diego and intermediate ports. Brig Thomas H. Benton, Harding, for New York and Boston.

Bark Georgian arrived at San Francisco, 26th July, from Valparaiso, while entering the harbor she went on shore, where she remained one or two days, but got off safely, after discharging a part of her cargo.

A CARD.

We, the subscribers, Missionaries from the Presbyterian Church of Novia Scotia to the South Seas, have been compelled by circumstances to take a circuitous route by way of the Sandwich Islands to our prospective field of labor. During our sojourn of nearly two months on these Islands, it has been our privilege to receive numerous acts of kindness, and to enjoy a degree of hospitality which lays us under obligation to tender public acknowledgements to His Majesty who kindly furnished ourselves and our families with a free passage to and from Lahaina—to His Majesty's Ministers, Messrs. Wyllie and Judd; to Wm. Miller, Esq., Her Britannic Majesty's Consul General, and to the Consul of France; to the Seamen's Chaplain, and the American Missionaries, generally. Please, gentlemen, accept our sincere thanks accompanied with our fervent prayers for your prosperity, spiritual and temporal. We leave with many regrets, but still confidently hope that a gracious Providence will smile upon our humble endeavors to do our Divine Master's will. JOHN GEDDIE, Missionary,
ISAAC A. ARCHIBALD, Assistant.

Honolulu, Sept, 7, 1847.

P. S. Will the Editors of the Friend and Polynesian have the kindness to insert the above card in their Journals, and oblige J. G. and I. A. A.

A CARD.

The undersigned would take this, the earliest opportunity of tendering his most sincere and grateful thanks for the kind and prompt attention shown him by Mr. and Mrs. Lyons, resident missionareis of this place, during a dangerous and severe illness. He was conveyed in a helpless state to their house by their express orders, where Mrs. Lyons, during the absence of Mr. Lyons, attended to and administered to all his wants with a mother's care; her kindness to him, as well as Mr. Lyon's solicitude for his recovery, will be ever gratefully remembered. He would also beg to tender his thanks to A. W. Singleton, Esq., who prescribed his medicines and attended upon him with all possible kindness. He would also thank several other individuals for their attention to him during his illness.

JOSEPH WADE.

Waimea, Hawaii, Aug., 1847.

WILL keep constantly on hand a general assortment of Ship Chandlery, Provisions, &c. usually required for whale ships touching at this port for recruits; and will supply them at the lowest market prices for cash or Bills of Exchange on the United States, England and France. my22 tf

CAVEAT.

THE public attention is called to the following facts:

1st. That on the 24th of November, A. D. 1841, the King and Premier of the Hawaiian Islands, signed a contract, without any proper or valuable consideration, by which Peter A. Brinsmade, William Hooper, or their assigns, were allowed to locate unimproved and unoccupied lands for certain purposes, until the 24th November, 1842, which right of location, was, on the 13th September, 1842, extended without further consideration to the 24th of November, 1845.

2d. That when there yet remained two years and six months of the term for such location, said Brinsmade, Ladd and Hooper, by their duly empowered Attorney, P. A Brinsmade, sold and transferred all their rights under said contract to the Belgian Company of Colonization, and by a contract executed at Brussels, on the 17th of May, A. D. 1843, with that Company, divested themselves of the right to locate and enjoy such lands.

3d. That the Belgian Company not having located or demanded the right of locating such lands, from the 17th of May, 1843, to the 24th of November, 1845, the time for such location has completely elapsed, and the said two contracts have become *void* by their own terms.

4th. That said contract of 1841, in accordance with the established custom of these Islands, having been made in duplicate, one being left in the hands of each party thereto, and each duplicate consisting of an English and Hawaiian version, duly signed and sealed, it has come to the knowledge of the undersigned, that Ladd & Co., notwithstanding they have sold and delivered the English version of said contract to the Belgian Company of Colonization, have lately assigned the Hawaiian version of said contract to other parties for purposes unknown to said King and Government.

Therefore, know all men, that in case any person or persons shall hereafter pretend to claim or asesrt any right under either of those void contracts by reason of purchase, transfer or assignment, such person or persons will meet the just and legal opposition of the Hawaiian Government.

And be it further known to all men, that whoever shall purchase said contracts, will purchase them at his or their own peril, and be deemed to have purchased a nullity.

Done by order of the King and Government of the Hawaiian Islands, at the Department of Finance, in Honolulu, Oahu, Hawaiian Islands, this 21st day of May, 1847.

G. P. JUDD,
Minister of Finance and Attorney for the King's Government. my 22 1y.

The Poet's Corner.

TOMMY AND HIS SHILLING.

BY MRS. S. W. JEWETT.

Little Tommy found a shilling,
As he came from school one day;
"Now," said he, "I'll have a fortune,
For I'll plant it right away.

"Nurse once told me, I remember,
When a penny I had found,
It would grow and bear new pennies,
If I put in the ground.

"I'll not say a word to mother,
For I know she would be willing;
Home I'll run and in my garden
Plant my precious, bright new shilling.

"Every day I'll give it water,
And I'll weed it with great care,
And I guess before the winter
It will many shillings bear.

"Then I'll buy a horse and carriage,
And a lot of splendid toys.
And I'll give a hundred shillings
To poor little girls and boys."

Thus, deluded, little Tommy
Laid full many a splendid plan,
As the little coin he planted,
Wishing he were grown a man.

Day by day he nursed and watched it,
Thought of nothing else beside,
Day by day was disappointed,
For no signs of growth he spied.

Tired at last of hopeless waiting,—
More than any child could bear,—
Little Tommy told his secret
To his mother in despair.

Never was a kinder mother,
But when his sad tale she heard,
'Twas so funny, she, for laughing,
Could not speak a single word.

This was worse than all. for Tommy
Thought his sorrow too severe,
And, in spite of every effort,
Down his cheek there rolled a tear.

This, his tender mother spying,
Kissed it off before it fell;
"Where to plant your bright, new shilling,"
Said she to him, "let me tell."

"Peter Brown's two little children
Long have wished to learn to read,
But their father is not able
To procure the books they need.

"To their use if you will spend it,
Precious seed you then may sow,
And ere many months are ended,
Trust me, you will see it grow."

The Seamen's Friend.

For the Friend.

Wants of Seamen.

No. VIII.

Lastly, sailors need *religion* at sea—they need it, too, on shore—they need it always and every where. And masters and officers need it. Landsmen and the *whole world* need it. It is the common want of the human family. The lack of it has darkened alike land and ocean. Its absence and its counterfeits have always impoverished, and enslaved and destroyed mankind. Its opposite is now, as ever, the worst foe to liberty, to civilization, to virtue, to happiness and to immortality. The possession and universal extension of it is the only hope of the race. It is the only thing that will elevate man to a just appreciation of the dignity of his nature. It is the essence and perfection of human improvement. It is the embodiment of the noblest sentiments and the purest affections. It is personal excellence united with philanthropy, and both united with high aims and a pure worship. It is light—it is life—it is strength—it is hope—it is joy—it is love—it is holiness—it is Heaven It identifies man with his neighbor—it unites earth and Heaven. It humbles man to a knowledge of himself yet exalts him to a knowledge of his Maker. It is divinity in humanity, elevating a "worm of the dust" into filial relationship with God! This is the religion of Christ. He exemplified it among men. His own life's blood purchased the rich legacy, and he invites the whole human family to the heavenly inheritance. His dying command makes it incumbent on his followers to offer the "unspeakable gift" alike at the door of cottage and palace, forecastle and cabin, Mountain top and vale—plain and ocean—are to be made to rejoice in the "glad tidings of great joy." How the dark-hearted of earth need its light. How the diseased in body and mind need its life. How the weak in resistance of evil, and in purpose of good, and the fearful of man more than of God, need its strength. How do the despairing need its hopes. How lone widowhood and bereaved orphanage, the broken hearted, the deserted and the crushed victims of oppression and crime, need its joys. And what but its love can put an end to the animosities, the treacheries, and the barbarities of a groaning world? What but its holiness can cleanse the guilty race of their impurities? What but its sacred truth can rid the earth of its bigotry, its errors, and its abominable idolatries? And are the nations of the earth to become one family, to acknowledge but one Father and Head, one Savior and King, one law, love, and one home—Heaven? Who but the Divine Author of the *Christian religion* can so move upon the hearts of men and so capacitate them for happiness and glory? Civilization says, "It is not in *me*." Nor yet in *me*, acknowledges human wisdom. And bold fronted infidelity shakes its head in impotence and shame. No, nor is it in hell to help or hinder the Almighty. The Bible, the readers, the lovers, the preachers, and distributers of the Bible; and the Author of the Bible will yet regenerate the world. In His own time God will accomplish it. But it will not be by miracle. It will be by the ordinary means of human influence. There will be an adaptness of means to ends, and seamen will to a great extent be the agents on their own element, no less than landsmen on theirs. But the elevation of a class is accomplished by the individual improvement, and we hope for the salvation of seamen and dwellers on shore, only as religion is made a matter of personal adoption and practice. In addressing them as a community, let each individual take the appeal to his own heart as though he alone were to be convinced of the necessity of religion at sea.

In the first place, you need religion as much and for the same reason as other men. You are as subject to disease, to disappointment, to bereavement, to temptation, to sin and to death. You need as much the consolations, the instructions, the hopes, the holiness and the life that animates and sustains them. You are alike immortal. Your soul will live as long in happiness, or in misery. By nature you are as unfit for Heaven. Unbelief will consign you to as fearful a doom. Procrastination will as much harden your heart, and continued transgressions diminish as fearfully the probabilities of your salvation. Excuses will serve you as little as self-righteousness, or hypocrisy, or yet proud obstinacy, will bar as effectually the door of mercy. You have the same need of repentance, the same need of pardon. You have as much to lose, as much to save. The same resurrection morn will stand you by their side at the bar of the "Judge of quick and dead." His anger towards you will have as fiercely to consume, or his love will in as tender accents and as warm a welcome. Hell will be to you as insufferable, or Heaven as inconceivably blissful and glorious.—And you can have your chice; you can have and enjoy religion. The same helps are proffered you, the same mercy seat can be approached, the same spirit be sent to your aid; yea is promised you, on sea as on land. Choose life and it will be your infinite gain.

Refuse it and choose death, and, as with other men, the eternal loss will be your own.

But religion has peculiar claims upon seamen. Your privations are greater than those of other men. They live and move as it were in a religious atmosphere. They rise, eat, work, pursue their business or their pleasures, sleep and rise again, within sound of the church bell. In a thousand ways they are brought under religious restraint. A thousand saving influences are, consciously or not, bearing them up and award with the progress of society in intelligence, morals and true piety. They can go down but only with an impetus, and to a depth proportioned to the force with which they break over the obstacles with which a christianized public sentiment has intercepted the road to death. Numerous and fearful wrecks are there made of body and soul, and corrupting legions thicken fast and with fearful power upon the hardened and profligate, but the wicked there sink only as they sever themselves from as numerous inducements and helps to susttain and bless them. How different your circumstances, your very calling shuts you out from the sanctuary, even a Bethel is a stranger upon the ocean. Prayer is heard in but few cabins. Oaths are almost the only prayer from the forecastle, and licentious songs the only hymn of praise. In part you have more enemies than friends; your feet tread only among snares. Most of your number yield there to passion within and temptation without. You are beset with most of the corruptions that seduce so many on shore, while you ordinarily enjoy scarce a privilege that secures so many on shore from paths of infidelity and infamy. Now, add to this alarming difference in circumstances, the invariable and ruinous tendency of the heart of man downwards, and how perilous is your situation! Without the aid of religion to secure you in virtue, how almost certain you fall! How vain has proved self-respect, and for pride of character, or the best resolve not founded on christian principle and in the fear of God. And how many with principle enough, or fear of man, or pride enough to sustain them on shore, have at sea made a pitiable exhibition of their weakness as men, and of their piety as christians. But religion has stood firm at sea and saved many. And, reader, it can save you; if you have already fallen it can raise you up; if you are on the brink of ruin grasp its friendly hand and you shall be rescued. If still on the level of sobriety and purity you can be raised to the higher dignity and security of the christian's hope and peace. Again, your perils are greater than those of most men.

You are upon a treacherous element, deceitful winds waft you on your course. The ship you boast of is a play-thing in their fury. A plank only is between you and death! A blast, and you may plunge to rise no more! A hidden rock or an unknown Island may suddenly dash you upon the shores of eternity. A cross or unexpected sea may sweep your decks and in a moment founder your frail bark. Clouds, dark and foreboding, mutter their deep thunder across your track; think, your tall ship is the only perishable mark for the lighting and the storm! What if the whirlwind cross your path, or the fearful water-spout break upon your deck! What if the bloody pirate be God's executioner to your shrieking crew! Without religion, what would then become of you? Death revels on the deep—he sits upon the storm cloud and driven by the winds draws angry waves, like the dust of the plain, in the tracks of his rolling chariot.—And the suddenness of his coming adds fearfulness to his awful visitation. Sailor, his home is on your chosen element, he is always lurking about your ship, especially is he in pursuit of the whaleman. He employs a huge monster to lie in wait for his frail shallop. It is a toy in his rage—a shivered straw in his recoiling strength. How many are thus hurried, in the twinkling of an eye, to the world of retribution? Reader, there is a more "troubled sea" beyond, where you may toss a wreck, and in wretchedness forever. Clouds and deep thunders of Divine wrath gather and break in anger there.—Death in more awful forms and with unceasing agonies awaits the desperate venturer upon that ocean. Will you launch your soul there? But while impenitent and prayerless, destitute of true love to God, and thoughtful only or supremely worldly interests, or sensual pleasures, you are heading direct for the fatal passage, to its broad and stormy depths. If the dreadful oath is familiar to your lips; or your vitals are feverish with intoxicating fire; or, worse still, your ready feet have learned the crowded road to "her house, the way to hell;" you are already in the whirling rapids, fast nearing the fatal plunge. "Ready about," sailor, or you are lost forever! Christ is walking upon these troubled waters and awaits your signal of distress. Welcome Him as your Pilot and deliverer. Embrace Him as your last and only hope. Commit all to His direction and take and keep the "course" he gives you. Obey Him and you are saved from wreck. He will certainly take you to the heaven of rest and bliss. There, sailor, may we meet, safely moored, the storms and perils of life all over, and in our Father's house rejoice in the beauty, the perfection and the sweets of *Home*.

T. DWIGHT HUNT.

☞ One of the applicants for change of name, at the late session of the Massachusetts legislature, gave as a reason for the change, that he "had been a great drunkard, and he hoped by the grace of God to live a new life, and therefore he wanted a new name."

The Libertine.

IV. I fear that few villages exist without a specimen of the Libertine.

His errand into this world is to explore every depth of sensuality, and collect upon himself the foulness of every one. He is proud to be vile; his ambition is to be viler than other men. Were we not confronted almost daily by such wretches, it would be hard to believe that any could exist, to whom purity and decency were a burden, and only corruption a delight. This creature has changed his nature, until only that which disgusts a pure mind pleases his. He is lured by the scent of carrion. His coarse feelings, stimulated by gross excitants, are insensible to delicacy. The exquisite bloom, the dew and freshness of the flowers of the heart which delight both good men and God himself, he gazes upon, as a Behemoth would gaze enraptured upon a prairie of flowers. It is so much pasture. The forms, the odors, the hues are only a mouthful for his terrible appetite. Therefore, his breath blights every innocent thing. He sneers at the mention of purity, and leers in the very face of Virtue, as though she were herself corrupt, if the truth were known. He assures the credulous disciple that there *is* no purity; that its appearances are only the veils which cover indulgence. Experience shows that the worst men are, often, the *most* skilful in touching the springs of human action. A young man knows little of life; less of himself. He feels in his bosom the various impulses, wild desires, restless cravings he can hardly tell for what, a sombre melancholy when all is gay, a violent exhilaration when others are sober. These wild gushes of feeling, peculiar to youth, the sagacious tempter has felt, has studied, has practised upon, until he can sit before that most capacious organ, the human mind, knowing every stop, and all the combinations, and competent to touch any note through the diapason. As a serpent deceived the purest of mortals, so now a beast may lead their posterity. He begins afar off. He decries the virtue of all men; studies to produce a doubt that any are under self-restraint. He unpacks his filthy stories, plays off the fire-works of his corrupt imagination—its blue-lights, its red-lights, and green-lights, and sparkle-spitting lights; and edging in upon the yielding youth, who begins to wonder at his experience, he boasts his first exploits, he hisses at the purity of women; he grows yet bolder, tells more wicked deeds, and invents worse even than he ever performed, though he has performed worse than good men ever thought of. All thoughts, all feelings, all ambition, are merged in one and that the lowest, vilest, most detestable ambition.

Had I a son of years, I could, with thanksgiving, see him go down to the grave, rather than fall into the maw of this most besottted devil. The plague is mercy, the cholera is

love, the deadliest fever is refreshment to man's body, in comparison with this epitome and essence of moral disease. He lives among men, Hell's ambassador with full credentials; nor can we conceive that there should be need of any other fiend to perfect the works of darkness, while he carries his body among us, stuffed with every pestilent drug of corruption. The heart of every virtuous young man should loathe him; if he speaks, you should as soon hear a wolf bark. Gather around you the venomous snake, the poisonous toad, the fetid vulture, the prowling hyena, and their company would be an honor to you above his; for they at least remain within their own nature; but he goes out of his nature that he may become more vile than it is possible for a mere animal to be.

He is hateful to religion, hateful to virtue, hateful to decency, hateful to the coldest morality. The stenchful ichor of his dissolved heart has flowed over every feeling of his nature, and left them as the burning lava leaves the garden, the orchard, and the vineyard. And it is a wonder that the bolt of God which crushed Sodom does not slay him. It is a wonder that the earth does not refuse the burden and open and swallow him up. I do not fear that the young will be undermined by his *direct* assaults. But *some* will imitate, and their example will be again freely imitated, and finally, a remote circle of disciples will spread the diluted contagion among the virtuous. This man will be the fountain-head, and though none will come to drink at a hot spring, yet further down along the stream it sends out, will be found many scooping from its waters.—[Beecher's Lect.

Money Planted.—We would refer our readers to the advice of Little Tommy's Mother. (See first page.) Another mother placed in our hands, a few days since, the sum of $40,00, remarking that the money belonged to her four children, most of it being the fruits of their industry. It was their request that it might be devoted to some benevolent object. We mentioned the circumstance that Portuguese seamen were exceedingly desirous of obtaining copies of the Bible in their own language, adding that by a late New York paper, we had learned an edition of the Bible in Portugeese had just been published by the American Bible Society. She immediately said, let it be devoted to that purpose. The names of the youthful donors will be enrolled as Life-Members of the Hawaiian Bible Society, and the money transmitted to New York for the purchase of Portuguese Bibles.

So far the circulation of the sacred scriptures relates to seamen, no publication could be more opportune than a Portuguese edition of the Old and New Testaments. It is an every day occurrence to meet with seamen of that nation, who never saw a Bible in their vernacular tongue! Many have the money in hand to pay the full price, but hitherto, we have been unable to supply the demand. We have disposed of several hundred copies of the New Testament in that language, but the call is for the "whole" Bible. By the next arrival from New York we hope to receive a full supply to meet the constant demand.

☞ We have noticed with much pleasure the increased attendance of the sea-faring community at the Bethel on the Sabbath.—When seamen are knowing to the fact that masters and officers attend, they will be far more likely to visit the House of God. It is far from being an unimportant circumstance that many attend the native churches. We think every visiter, master, officer, or sailor, owes it to himself and friends to attend once, at least, although he may not understand a word. In not a few instances we have known good and permanent impressions thus to be made upon the mind. There is an instance upon record of one man who was seemingly benefitted by hearing the old and familiar tune of "Greenville," sung by a native choir.

On the Sabbath public services are held, in Honolulu, as follows:

Native churches open at 9 1-2 A. M.; Seamen's Chapel, 11 A. M.; Native churches, 2 1-2 P. M.; Seamen's Chapel, 7 1-2 P. M.

N. B. Strangers attending native churches are oftentimes inclined to leave before the services close, probably, in consequence of not understanding the preacher. They should avoid doing so, as it is liable to interrupt the order and decorum of divine service. We are requested to say, that strangers attending native churches will be provided with seats.

Mr. Truth and Mr. Talkative.—"Come, neighbor Talkative, all you may say about sailors running away and other evils of Honolulu, may be true, but why not state all the truth?"

"What do you mean, Mr. Truth, do you accuse me of lying? Is it not true that sailors runaway, get drunk, and every way annoy their masters and officers?"

"I do not say, but what you say is a part of the truth," says Mr. Truth, "but as your tongue runs so glib, and words flow so readily, why not speak of the 'Fabius,' 'Timour,' and other vessels, almost daily leaving port, from which not a man runaway, or otherwise made trouble? Why not tell us about nineteen temperate and sober sailors, who come ashore and go off without any disturbance as well as forever rate away about 'Jack Fid,' who gets drunk, fights, and Sheriff Potter puts in the Fort and Justice Hopkins fines $6,00?"

☞ Mr. Talkative replied not a word, but turned off into Falsehood Alley, while Mr. Truth walked directly down the Street that is called "Straight."

☞ Of late years a very sensible custom has arisen among the masters of vessels visiting the Pacific, that of being accompanied by their wives. We have heard of some close-fisted and niggardly owners who object to the custom, but every body knows that their objections are founded upon the lowest principle of selfishness. It would not perhaps be becoming in us to discuss this subject and state all the arguments that might be adduced *pro* and *con*, yet we are candidly of opinion that those in favor of the custom will greatly overbalance all that could be produced on the opposite side. Some may differ from us in their opinion. Very well, we are willing they should enjoy their views. The system, however, works so well, that we predict it will become more and more fashionable. You, reader, may not think so, well, wait and see!

☞ It is with feelings of grateful emotion, that we have to acknowledge such substantial aid for the support of the Friend. The certificate of ship-masters is a testimonial that we most gladly publish, especially as it is accompanied with such generous donations. This is a response to our call for funds to publish the Friend, that animates and cheers us forward. We would renewedly pledge our sea-faring friends and patrons, that the columns of our paper shall be filled with useful reading matter, to employ and beguile many weary hours while far away from kindred and country.

Items from Late Papers.

THE KEDGE-ANCHOR; OR, YOUNG SAILOR'S ASSISTANT. By Wm. Brady, S. M., U. S. N.—This work, as its title imports, is designed as an assistant for the young Sailor, through the various branches of his arduous profession.

In addition to many suggestions, which will prove valuable to every grade of seamen, it contains more thorough descriptions of innumerable articles belonging to the various classes of vessels, than any other work ever published in this country; and is embellished with over seventy engravings, in illustration of the subjects treated of in its pages.—The work is furnished with over one hundred pages of tables, which are valuable not only to the seafaring man, but to all who are in any way interested in maritime pursuits. The entire work is contained in a volume of 420 pages, octavo, stereotype, edition. It is printed on fine paper, and bound in handsome style. For sale R. L. Shaw, No. 222 Water street, New York.

An Irishman who had been begging piteously was taken up before the Warrington Magistrates the other day, and on searching him nothing was found but a large ball of soap. He prayed they would not take that from him, as he liked to be clean, though he was poor. The earnestness of his entreaty led the gentlemen to cut the piece of soap in two, and inside was found 16*l.* in gold.

MISS HERSCHELL.—A letter from Hanover says that on the 16th ult. Miss Caroline Herschell, sister and for a long time assistant of the illustrious astronomer, celebrated the 97th aniversary of her birth-day. The King sent to compliment her; the Prince and the Princess Royal paid her a visit, and the latter presented her with a magnificent arm chair, the back of which has been embroidered by her royal highness; and the minister of Prussia, in the name of his sovereign remitted to her the gold medal awarded for the extension of the sciences.—[Globe.

☞ Rev. S. R. Brown, lady and two children, arrived in the Huntress, from Canton. Mr. B. has been for several years principal of the school of the Morrison Education Society, at Hong Kong. He brings with him Wong Ashing, Yung Kwing, and Affun, three of the most advanced pupils of that institution, sent out by several American merchants at Canton to finish their education in the United States.

DREADFUL DISTRESS IN SWITZERLAND.—A physician writing from Schull, in the Canton of the Grisons, on the 28th February, says:—"The parish of Schulls is one vast charnel-house. A frightful mortality reigns here. Each day from forty to forty-five dead bodies are interred. There is scarce a humble dwelling in the Canton, into which fever, dysentery or death have not entered. Graves cannot be prepared in sufficient numbers, and the bodies are so hastily interred, that the dogs, scraping off the dirt, draw them out, and batten on their flesh. The feebleness of the inhabitants prevents them from digging deeper. The master of a public school, who had a year since a hundred and forty scholars, now has not one. Half are dead, the rest incapable of raising themselves. The master, to support his family is working on the roads."

☞ Five whales were taken off the coast of Long Island, between South Hampton and East Hampton, on Wednesday last.—April, 22.

☞ Says the Morning Post.—"We have again the gratification to announce the approach of an event calculated to increase the domestic happiness of our Soverign and the Prince Consort. Her Majesty's accouchment, it is confidently stated, will take place in August, next.

ALLIGATOR OIL.—A letter from St. Augustine, dated April 12th, says:— "I suppose you may not have heard that we have discovered the utility of alligators. An alligator is found to be as valuable in his way as a spermaceti whale. An expedition has left this place for the river of St. John's and the dark tributary stream of Black Creek, swarming with these hideous creatures, with the view of killing them to obtain their oil.

"The oil of the alligator is said to be better for lamps than even whale oil, and it is extracted from the animal in considerable quantity and without any great difficulty. For this discovery we are indebted to the Indians, who have been in the habit, for how long a time I know not, of extracting the oil of the alligator and using it for various purposes. It makes a fine transparent fluid and burns admirably.

"You know how many of these enormous animals are shot out of wantonness from the decks of the steamboats that plough our waters. I expect hereafter to hear of laws passed for their protection. Every time an alligator of eighteen feet long is shot in the long grass of the river banks, or while he is swimming, a barrel or half a barrel of oil is wasted. This should not be. We must allow them to be killed only at the proper season, when they are fattest, and not permit their destruction at the season when they lay their eggs.

"The alligator is a formidable looking creature, it is true, but he is generally harmless. His office is to prowl in the sluggish water of this Southern region, pick up what he can, and digest it into excellent oil for the illumination of our houses. Alligators will be hereafter esteemed as useful animals as pigs—perhaps more so, for their keeping costs nothing. The danger is that, now that the world has discoverd what they are good for, their race will be exterminated."—[Evening Post.

THE FRIEND.

HONOLULU, SEPTEMBER 23, 1847.

OREGONIAN STATISTICS.—From a source that is deemed worthy of reliance, we have gleaned the following facts respecting Oregon: The entire white population would fall a little below 7,000. About 400 are Catholics, mostly of Canadian descent. The Methodists are the most numerous. There are 6 Itinerating Methodist Episcopal preachers, who hold meetings at 30 or 40 stations, and 8 or 10 local preachers, besides 2 Protestant Methodist clergymen. Baptist Missionaries, 2; Congregational or Presbyterian clergymen, 4; and several Campbellite preachers. Regular Physicians, 1; Quacks, number unknown; educated Lawyers 4; Pettifoggers, number unknown. Saw-mills 8 to 10, and Flour-mills 4 to 6. The amount of exports this year exceeds that of any former year. Considerable attention has been paid to schools. An Edition of Webster's Spelling Book has been published at the "Spectator" office. One paper is published in the country. While there are many encouraginng facts in regard to the present condition of the Oregon Territory, there is *one* that appears dark and portentous. There are many of the newly arrived imigrants resolutely opposed to any restrictions upon the manufacture and sale of intoxicating liquors. Some traders having taken advantage of the change in the laws of the country, have flooded the place with rum and brandy. We hope the friends of teetotalism there will not falter or yield one inch of territory without manful resistance. We have heard enough of the country to believe that a thriving, wealthy, prosperous and moral community will ere long dwell upon the banks of the Oregon and Willamette. We hope the settlers of that region will not fail to read the origin and history of the colonies of New England. Like causes will produce like effects.

Oil Price Current, New York Market, May 24.

Whale oil, - -	33 to 35 cts.
Sperm do. crude - -	95 to 96
Summer do., - -	$1 10
Winter do., -	1 12 to 1 15
Flour, - -	8 00 to 9 00

A Letter from Father Matthew.—The following letter from the Right Rev. Theobald Matthew, by the Cambria, was received just as our paper was going to press:

Cork, 31st March, 1847.

My Dearest Friend:—The magnificent humanity evinced by our beloved Brethren in the States, for the suffering Irish, has inspired every heart in this island with ardent gratitude.

We shall ever regard America as our Delivery in the hour of bitter calamity. The immense supply of Indian Corn, wafted into the Cove of Cork, the last few days, and the Free-Gift cargoes daily expected, have had an unexpected effect on the Corn Market. Maize has fallen from £19 to £10 the ton. In the darkest hour of calamity we should not despair. The mercies of the Lord are above all His wondrous works. I am resolved, God willing, to leave Ireland for the States next summer. It shall be my constant, anxious prayer, that the Lord may remove every obstacle, and allow me to indulge this darling desire of my heart.

As soon as the expected Bread-stuffs vessels will arrive in Cork, I shall have the pleasure of writing to you again, expressing my thanks. Presenting kindest remembrance to all my friends,

I have the honor to be,
Dear Mr. Weed, yours affectionately,
THEOBALD MATTHEW.

The above letter is copied from the Albany Evening Journal. Since its date it is reported that *nine* vessels freighted with American bread-stuffs have sailed for Ireland. We have noticed in the papers the names of three, Frigate Macedonian, sloop-of-war Jameston, and merchant Bark "Boston."—The latter was supplied by the generous donations of the Quakers of the United States. The Jamestown's cargo, exceeded 8,000 barrels, in measurement. The noble sum of $121,000, has already been contributed in the United States for the famishing Irish.—It is a most blessed undertaking, and one that we hope may not be abandoned until the hungry in Ireland, and every other land "have bread enough and to spare." The promise is, "give and it shall be given unto you; good measure, pressed down, and shaken together, and running over, shall we give unto your bosom. For with the same measure that ye mete withall, it shall be measured to you again."

A most destructive famine, according to last accounts, was raging at Madeira, and flour selling from $18 to $25.

A good hint, perhaps.—As Seamen's Chaplain, we have a tolerably good opportunity of learning the feeling which exists among sailors towards their respective masters and officers. During several years of constant intercourse among them, we have necessarily heard much that, perhaps, had better never been uttered. One thing is, however, certain, we never heard, according to our present recollection, a sailor speak disrespectfully of his master or officers, when they had evinced a sincere desire for his physical comfort, intellectual and moral improvement.—When a master has taught some of his crew to read, or when to readers he has loaned interesting books, it has engendered a wonderful kind feeling. In numberless instances have we known this to be true. Kindness has fostered respect and esteem. When over sailors is exercised a steady, firm, and rigid discipline, tempered with self-respect and kindness, rarely will difficulties arise between the fore and after part of a vessel. Some, perhaps, may derive a useful hint from these remarks of a friend to all that "go down to the sea in ships, that do business in the great waters."

"Gen. Taylor an L. L. D.—Since the battles of the 8th and 9th of May, General Taylor has had L. L. D. attached to his name by one of the Southern Colleges."

Some wag has had the *impudence* to say that *Generals generally*, are Doctors of Lynch Law.—[American Paper.

Belgium is afflicted with a terrible famine.

☞ Our readers will find in our columns to-day a full report of whale ships, so far as intelligence has been received this season.

For the Friend.

SHORT SERMON—No. IV.

BY PARSON COMMON SENSE.

Text—"In every body's mess, and nobody's watch."

Among sea-faring people there are not a few pithy sayings. There are some that landsmen could not understand or appreciate. The words of my text are not of that character. How aptly do these words describe many men, who are forever meddling with other people's business, or rather they are ever ready to *eat*, but not to *work*. Political economists would call them *consumers* but not *producers*. They seemingly are hard workers, but bring nothing to pass. St. Peter would style such a man, "as a busy-body in other men's matters—"In every body's mess, and nobody's watch." This class of people not only are found on board war-ships and other vessels, but every community and profession has a share of them. This mainly results from either the fact that they have no regular and useful employment, or if they have one do not apply themselves to it. Such characters are ever getting other people into difficulty, and they would be in a constant trouble themselves if they were considered worth minding. The virtuous and industrious should not encourage such useless drones in the hive. "If a man will not work neither should he eat." Parents and guardians should be extremely cautious how they foster habits of idleness in children. It is a quaint, but true proverb, "an idle man's head is the devil's work shop." He never allows his servants to be idle.

"For Satan finds some mischief still,
For idle hands to do."

It was a good practice among the ancient Jews, that every boy should be bred to some useful trade. It would now be a more excellent practice if all who have trades and professions adhere to them.

Remark. Let every body, busy himself about something useful.

A Yankee Mate.—Some time since the Yankee Schooner, Sally Ann, under command of Captain Spooner, was beating up the Connecticut river. Mr. Comstock, the mate was at his station forward. According to his notion of things the schooner was getting too near certain flats which lay along the larboard shore. So aft he goes to the captain, and with his hat cocked on one side, says, "Captain Spooner, you are getting rather close to them are flats; hadn't you better go about?" To which Captain Spooner replied, "Mr. Comstock, do you go forward and attend to your part of the schooner; I'll attend to mine." Mr. Comstock "mizzled" forward in high dudgeon. "Boys," said he, "see that are mud-hook all clear for letting go." "Ay, ay, sir; all clear." "Let go," said he. Down went the anchor, rattled the chain, and like a flash the Sally Ann came luffing into the wind, and then brought up all standing. Mr. Comstock walked aft, and touching his hat very cavalierly, "Captain Spooner," said he, "*my part* of the schooner is at anchor!"

NOTICE.

The Oahu Temperance Society will hold its regular Quarterly Meeting for the choice of officers, on Friday evening next, September 24th.

☞ On the following Friday evening, Oct. 1, an address will be delivered by Mr. Parsons. It is hoped no member of the Society will be absent on either evening. The public generally are invited.

Meeting of Ship-Masters.

At a meeting of the Ship-Masters of the American vessels, in port, agreeable to appointment, it was resolved, that in consequence of the funds for defraying the expenses of publishing the newspaper called "*The Friend*," falling short this year, some three hundred and sixteen dollars, that we the undersigned will endeavor to raise part from our respective officers and crews, and we recommend to our brother Captains, officers, and crews to do likewise.

Signed, Joseph Adams, master ship Brutus; F. C. Smith, Metacom; Fred. Fish, Columbus; W. E. Brewster, Tiger; J. W. Norton, Navy; J. J. Smith, Fabius; W. H. Reynard, Canada; G. F. Neil, Elbe; N. Edwards, Timour; N. B. Heath, Hope; Thos. H. Smith, Benj. Rush; J. O. Given, Mt. Vernon.

COMPLETE Sets of the Hawaiian Spectator, for the years 1838 and 1839, for sale at the Polynesian Office. Price $1 per volume.

E. H. BOARDMAN,

Watch and Chronometer Maker,

HONOLULU, OAHU, H. I.,

OFFERS FOR SALE AN ASSORTMENT OF

Clocks, Watches, Jewelry and Fancy Goods,

Sextant and Quadrant Glasses silvered and adjusted. Chronometers repaired and accurate rates given. Particular attention paid to watch repairing.

EVERETT & CO,

Auction and Commission Merchants,

A. P. EVERETT, JAS. J. JARVES, } HONOLULU, OAHU, H. I.

☞ Money advanced on favorable terms for Bills of Exchange on the United States, England and France.

S. H. WILLIAMS & CO,

General Commission Merchants,

HONOLULU, OAHU,

S. H. WILLIAMS, J. F. B. MARSHALL, WM. BAKER, JR. } HAWAIIAN ISLANDS.

Exchange on the United States and Europe, taken on the most favorable terms.

WALDO & CO,

DEALERS IN

Ship Chandlery and General Merchandise,

MAUI AND OAHU,

G. WALDO, E. S. BENSON, A. LANGLOIS. } HAWAIIAN ISLANDS.

BUSH, MAKEE & CO,

DEALERS IN

Ship Chandlery and General Merchandise,

LAHAINA, MAUI.

Ships supplied with recruits at the lowest market prices. Money advanced on reasonable terms for Bills of Exchange on the United States and Europe.

F. RODRIGUEZ VIDA

DEALER IN

SHIP CHANDLERY AND PROVISIONS,

HONOLULU, OAHU, H. I.

Ships supplied with recruits at the lowest market price, for Cash or Bills on the United States or Europe.

CORNELIUS HOYER,

DEALER IN

General Merchandise & Hawaiian Produce,

HILO, HAWAII.

Whaleships supplied with Recruits on favorable terms, in exchange for Bills or Goods adapted to the market.

The Poet's Corner.

TO A SISTER.

[PUBLISHED AT A SAILOR'S REQUEST.]

Yes, dear one, to the envied train
Of those around, thy homage pay;
But wilt thou never kindly deign
To think of him that's far away?
Thy form, thine eye, thine angel smile,
For many years I may not see;
But wilt thou not sometimes the while,
My sister dear, remember me?

But not in Fashion's brilliant hall,
Surrounded by the gay and fair,
And thou the fairest of them all,—
O, think not, think not of me there.
But when the thoughtless crowd is gone,
And hushed the voice of senseless glee,
And all is silent, still and lone,
And thou art sad, remember me.

* * * * * *

Remember one—but not to join
If haply some thy friends should praise;
'Tis far too dear that voice of thine
To echo what the stranger says.
They know us not—but should'st thou meet
Some faithful friend of me and thee,
Softly, sometimes, to him repeat
My name, and then remember me.

Remember me—not I entreat,
In scenes of festal week-day joy,
For then it were not kind or meet,
Thy thought thy pleasure should allov;
But on the sacred solemn day,
And, dearest, on thy bended knee,
When thou for those thou lov'st dost pray,
Sweet spirit then remember me.

Remember me—but not as I
On thee forever, ever dwell,
With anxious heart and drooping eye,
And doubts 'twould grieve thee should I tell;
But in thy calm, unclouded heart,
Where dark and gloomy visions flee,
Oh there, my sister, be my part,
And kindly there remember me.

[Edward Everett.

REASON AND INSTINCT.

Whether with reason or with instinct blest
Know, all enjoy that power which suits them best;
To bliss alike by that direction tend,
And find the means proportion'd to their end.
Say, where full instinct is the unerring guide,
What Pope or council can they need beside?
Reason, however able, cool at best,
Cares not for service, or but serves when prest:
Stays till we call, and then not often near;
But honest instinct comes a volunteer.

[Pope's Essay on Man.

The Seamen's Friend.

Brave Bobby.

There was an American ship called the "Washington," bound for China, filled with passengers; on board this ship was an officer of the army and his wife, with their only child, a little boy of five years of age, and a large Newfoundland dog, called "Bobby."

Bobby was a great favorite with all the people in the ship, because he was so brave, so good tempered, and so funny and playful. Sailors as well as passengers all liked brave Bobby. He would romp on the deck with any body that chose. Sometimes when the wind was calm, and the ship was going slow, he would jump overboard, and dash through the sea after a biscuit, or any thing else that might be thrown in for him.

But his most constant playmate was the little boy, the son of his master. This boy was a merry little fellow, and as fond of Bobby as Bobby was fond of him. They used to make a fine noise in their droll games o play, rolling over and over each other like a couple of young porpoises. And though the little boy was sometimes rather rough in his frolics with Bobby, and hit him on the head and back, yet Bobby was always gentle as a lamb to him.

The voyage had been very safe and pleasant until within three days sail of the Cape of Good Hope. Evening was coming on—the sun was setting in dark clouds, so that the dusk had commenced unusually early. The night-watch of the ship had been set and the wind had risen so that the ship was sailing very fast. The boy and the dog were romping together, tugging each other, when on a sudden the ship gave a heavy roll, and the child fell overboard splash into the deep sea!

It had by this time become so dark that objects could not be distinguished many yards distant. A general cry of "A hand over!" was made by the men on deck who saw the boy fall. Two or three men ran heaving down lines, and a stray coop that was found lying near the capstan, while the officer of the watch sung out, "Bring the ship to—bring the ship to, or the boy is lost."

This order was scarcely given, when Bobby, now for the first time missing the child, gave a loud bark, and seemed to guess what had happened, cleared the taffrail like a shot; and the captain and boy's parents, with the other passengers, who had come on deck to learn the cause of the outcry and bustle, saw the dog swimming away like a mad creature in the direction of the stern.

It was too dark to see him distictly, however he was dimly perceived to dive, and then dimly apppear again above water, and snatch at something. It was, however, too dusky for any body on deck to be sure what it was he really saw. The dog was now out of sight, and nothing was visible but the surface of the water. The mother covered her eyes with her hand, and not daring to look out, fearful lest she should see the corpse of her darling child floating on the waves; while the father equally unhappy, jumped into the jolly boat, which the men in all haste had been getting ready, that he might spare no effort to recover his beloved son.

It was many minutes before the jolly boat could be lowered and manned, the men rowed with all their might in the direction they had seen the dog take at first. The darkness had so much increased, that the sailors could hardly see, and began to give the child up as lost.

The father, in great misery, sat at the head of the boat, trying to see through the surrounding gloom, and listening anxiously to every sound. "I hear a splash—I hear a splash on the larboard quarter," cried he, starting up; "pull on, be quick, it must be my child."

The helmsman turned the tiller, the men pulled with redoubled force, and in a moment, the faithful Bobby, with the child in his mouth, was alongside! Poor creatures! they were nearly spent when they were hauled into the boat. The father took the child into his arms, and the faithful Bobby sank down to the bottom of the boat, panting and almost lifeless.

The men then rowed back to the ship.—Great indeed was the mother's joy when she saw her child, that she thought was gone forever, in the arms of his father, and good Bobby with him also. They all got safe on board the ship again, and the father, thanking the sailors for helping him to recover his son, went down into the cabin with the mother, child, and dog. Every remedy was used that the doctor of the ship advised, to make the half-drowned boy well again.

Bobby after he had shaken the water from his thick shaggy coat, could not be persuaded to leave the child's side. There he stood, and licked one of his little hands till the child became so much better as to be able to stroke and hug him as usual. Brave Bobby seemed as happy as any body, when both the father and mother hugged and praised him too. And when the boy could speak again, they made a happy little party in the cabin, where, before, all had been so sad.

After this circumstance of saving the child's life in so brave a manner, there was not a man on board that ship but loved the dog as a father might love his child, and well did Bobby deserve it.

At the Cape of Good Hope some of the passengers were to be landed, and, among others, the master of Bobby, with his wife and child. All those who remained in the ship were very sorry to part with good Bobby.

The boats were prepared for the passengers and their luggage. All those who were to leave had got into the boats, the little boy was in his mother's lap, and Bobby, whom the sailors were holding to pat and take a kind leave of, was just going to leap into the boat after his master, when the officer stood up, and told the sailors to hold him tight by the collar, until the boats should have rowed some way towards the shore. "You will see what a strong swimmer Bobby is," said he; "let us start before him, and he will soon overtake us; when I hold up my handkerchief let him go."

"Ay! ay!" cried the sailors, and two of them held Bobby tight by the collar. Poor fellow! he thought he was to be left behind, and he did not like it. He tugged, and hauled and yelled, and barked, to get to his friends, but it was of no use. The boat puts off without him.

All the people in the boats, as well as those on board the ship, were eyeing Bobby with delight; and he had just reached midway between the ship and the boats, when the creature set up a loud shrill howl, and threw himself half out of the water. Every body thought he had got the cramp; but oh, no! the flash of white that glanced like lightning close against him the next minute, told the truth; and "a shark, a shark!" sounded from boats to ship, and from ship to boats, in one loud cry. All stood trembling, with their eyes fixed upon the unfortunate dog.—The boats stayed still for an instant, the men resting upon their oars as if panic struck.—But, again, in another instant, one of the boats was to be seen putting back, the men rowing with all their might.

Poor Bobby! he kept swimming away right and left, now diving, and now doubling, as if he knew his danger, while every now and then he gave a short fierce howl, and showed his grinders, never giving the vile shark time to turn on its back, which it must do before it can give the deadly bite.

The poor dog swam and dodged with a skill and speed, and maintained the unequal contest, in a manner that surprised every body, but it was evident that his strength was nearly exhausted, when the boat which had put back came sufficiently near for him to hear himself called, and encouraged to hold out longer. In this boat were his master, and the little boy, whose life the poor dog had saved three days before. They could now plainly perceive the great black fins and back of the shark, as he rose every minute to the surface of the water, pursuing and trying to gripe the dog. The poor dog swam with all his might towards the boat that was coming to save him.

Just as he nearly reached the boat, and could see and hear his master calling out, "Here Bob! here," the shark turned on his back and opened his horrid jaws—"Poor Bobby! dear Bobby!" shrieked the little boy; and a lad who stood at the head of the boat, hoping to save the dog, threw a handspike that he held at the ravenous monster. But the lad was in such a flurry, from terror and anxiety, that he missed the shark, and the spike fell into the water.

At this failure the child screamed aloud with agony of fright and sorrow, "Oh! save poor Bobby! save my dear Bobby!" and every body thought poor Bobby was gone, when the father of the child, who, ever since the boat had come within gunshot of the shark, had been watching for the proper opportunity to save the faithful dog, fired. The gun was levelled with so true an aim, that he shot the cruel shark through the head, and splintered those horrid jaws that were open ready to devour poor Bobby. The shark sank, the sea became tinged with blood, and the officer throwing down the gun, stretched out his arms, and pulled the dog, exhausted with fatigue and terror, into the boat, before the shark, who was not quite dead, could again rise to the surface of the water. The child threw his arms round the poor dog's neck; the sailors in the ship who were all intently on the watch, and the men in the boats, set up one loud shout of joy? "Hurra! hurra; Bobby is safe—the shark is killed—hurra! hurra!"

For the Friend.

Pitcairn's Island.

Copy of a Report made to the Admiral relative to Pitcairn's Island.

I consider Pitcairn's Island to be in latitude 25° 4′ south, and longitude 130° 16′ west. The island is about 1200 feet above the level of the sea, and above 4 1-2 miles in circumference, and in clear weather, may be seen above 45 miles off. The soil is very alluvial. The climate is good, and adapted for the growth of many of the vegetable productions of every part of the globe. The coast is fringed with formidable barriers which seem to present insurmountable obsticles to all access, except in Bounty Bay, situated on the north-east side, where the landing is at all times difficult, and even here the communication is impracticable when the sea is high. Tall spiral rocks appear on every side, and lofty cliffs, skirted at their basis with thickly branching evergreens, afford a welcome retreat from the burning rays of an almost vertical sun. I beg to inclose a list of questions I put to the inhabitants, the answers to which, contain a great deal of interesting matter relative to them. I communicated to them in writing (a copy of which accompanies this) the resolutions of Her Majesty's Government relative to the appointment of a Governor or official person to reside in the island. The decision did not appear to disappoint them, as they said it was more a suggestion of Commander Hunt, of the Basilisk, than their own. They appear perfectly satisfied with their own adopted government, and when I consider that to lawlessness and violence has succeeded the beautiful scenery of good order and peace; that those rude beings who were wont to wander to and fro, have settled to the quiet occupation of industry, plying the handicraft and agriculture, now present the aspect of a well disciplined society, that the district which has heretofore, both morally and physically, been little better than a desert, now puts forth the token of a vigorous culture, and the Sabbath bell summons from scattered cottages a smiling population, linked together by friendship, and happy in all the sweetness of domestic charities, I cannot consider that an alteration in its government would improve it. They, however, expressed a strong hope that Her Majesty's Government would still consider them under their protection, and not allow other nations to molest them. On this score they had no complaints; on the contrary, they spoke well of the conduct of the masters and crews of the vessels that have reached here, and traded with them.

Questions put to the inhabitants of Pitcairn's Island, by S. O. Woodridge, Esq., Lieutenant and Commander of H. B. M.'s Brigantine, 'Spy,' on the 26th day of February, 1847, and their replies:

Q. What is the size of the Island?

A. Four and a half miles in circumference, and one and a half miles any way the greatest length.

Q. How many inhabitants are there on the Island?

A. Total 134—males 69, females 65.

Q. How many of these are natives?

A. All except four, three Englishmen and one Tahitian woman, who came in the Bounty.

Q. What is the age of the oldest inhabitant?

A. Fifty-three years, (that is of those born on the Island), her name is Mary Christian, daughter of Fletcher Christian of the Bounty. This person is the heroine of the Poem called the "Maid of the South Sea Islands." The Tahitian woman is between 70 and 80.

Q. How mnny Englishmen are there on the Island?

A. Three, John Buffett, John Evans, and Geo. Nobbs.

Q. Are there are any Americans, French or Foreigners?

A. No.

Q. What is the average number of vessels that call here during the year, and of what nation?

A. The average of six years is 28, chiefly Americans. During the last year, 1846, forty-nine vessels visited the Island, of these 47 were American, 1 Bremen and 1 English.

Q. Are there any Missionaries?

A. No regular Missionaries, but Mr. Geo. Nobbs is Schoolmaster, and performs all the rules of the Church.

Q. Are there any Schools?

A. There is a very good one, the same room is used as the church, and the building reflects on them infinite credit; 47 children attend the school.

Q. Who do you consider your head or leading man, and how is he chosen, and what is your form of government?

A. The leading man is a magistrate, who is elected on the first of every January, by a general vote ol males and females above 18 years of age, those married before that age are entitled to vote. There are also two counsellors chosen at the same time, one selected by the magistrate, the other by the people, when there is a dispute to be settled we call a jury of seven, to whom the matter is referred, the most votes decide the point at issue, which is final, the present magistrate is Fletcher Christian, grandson of Fletcher Christian of the Bounty, elected 1st January, 1847.

Q. What do you most require?

A. A good and well assorted Medicine-Chest, with full and plain instructions (devoid of technicalities,) a corn-mill of a size to grind for 150 persons, a couple of whale-boats, some Prayer books, Watts' Hymn books, and agricultural instruments, such as hoes, spades, pick-axes, &c.

Q. What is the last man-of-war that touched here?

A. H. B. M.'s Ketch, 'Basilisk,' Liutenaut Hunt, July 28, 1844.

Q. What is the produce of the Island?

A. Irish potatoes, yams, sweet potatoes, a small quantity of taro, (mountain kind,) a small quantity of bread-fruit, plantains, and some Indian maize; bread-fruit and taro do not thrive well.

Q. Are there any of the Bounty's people alive?

A. No, but one of the Bounty's men's wives is still alive, her name is Susanah Young, age near 80.

Q. What quantity of land is cultivated?

A. About one half the Island, which is guessed to amount to about one half an acre for each adult, male and female.

Q. How many boats have you?

A. None, we had one whale-boat but it is worn out, there are about 20 canoes.

Q. What is your form of marriage, christening, and of burial.

A. All according to the Protestant church, and performed by Mr. Nobbs, schoolmaster.

Q. What are the prevailing diseases?

A. Asthma, consumption, bilious fever, and influenza, rheumatism, and Opthalmia.

Q. What is the difference since the Basilisk's visit?

A. When she was here in July, 1844, there was 121 inhabitants; 60 males, 61 females. In 1845, there were 7 births, deaths none. In 1846, 7 births, deaths 1, (child burnt to death).

Q. What is your chief sustinence?

A. Vegetables, usually meat once a week. There are some cod and red snapper fish caught, but from having to fish in 121 fathoms of water, they are difficult to procure; we do not get more than sufficient to supply each family with one meal per week.

Q. Have you any medical men.

A. No, but Mr. Nobbs, schoolmaster, takes charge of the medicines we have, and administers them to the best of his knowledge, as they are required.

(Signed) S. O. WOODRIDGE.

Temperance Friend.

A Sailor's Yarn or an Old Man-of-Warsman's Story.

"Several years ago, while lying at Malta, in H. M.'s ship, the 'Rochford,' 84 guns, Captain Shamburgh, I and a shipmate, named Balfour, obtained leave to gon on shore. On landing, the first port we made was, of course, a grog-shop; I say of course, for it was the custom, and is now, aboard men-of-war, to create and foster an appetite for rum by an allowance of half a pint a day, and then to punish a poor fellow for going on shore to indulge it. We hadn't been long in the drunkery before we fell into the company of an Italian seaman belonging to a ship on quarantine. He was full of good nature and had plenty of money. He offered to treat me and my shipmate with as much liquor as we liked to drink. We were not slow in accepting his offer, and soon got 'three sheets in the wind.' In this condition we adjourned to another low haunt of iniquity, where there was music and dancing. While we were there, some peace officers and soldiers entered the house and charged the Italian with being a deserter. He, being drunk, swore like a fiend, but hadn't the prudence to explain that he belonged to a ship on quarantine, and, as we were in the same state, we didn't say so. He was placed alongside a Maltese soldier and marched off towards the watch-house. On his way thither he secretly unscrewed a small dagger out of the stem of a Turkish tobacco pipe, which he had in his hand, and turning suddenly upon the Maltese, thrust the sharp blade of the weapon right through his heart. The poor fellow dropped on the ground, crying in a sharp tone 'Imah! Imah!' which means, 'Oh dear! Oh dear!' and died immediately. The Italian ran off—but in three days he was recaptured and then tried and executed.

I once knew a mariner whose name was 'Johnson.' He was a well behaved young man when sober, but very fond of grog.—One day, under its influence, he took it into his head to knock down the ship's corporal, and to try to shove him under a gun with his foot, singing out the same time, "Yes, sh-hoy!" as is usual in pulling and hauling. At that moment the lieutenant came on deck, and ordered the master to put Johnson in irons. Infuriated and maddened by drink, he struck the lieutenant. After being seized and confined, with both legs in irons, he was tried by a court-martial, and would have been hung at the yard arm, but for its being testified by the shp's corporal that, in consequence of having his skull fractured with the butt end of a musket, in boarding the ship, he was made quite mad by a little grog. He was therefore only sentenced to receive 200 *lashes round the fleet, to forfeit two years pay, and to be discharged from the service.* The flogging was dreadful; I shall never forget it. It quite unmanned him. He was disabled for all active service, and the last time I heard of him he was a crippled beggar, sweeping a crossing in London. He was as smart a young man as ever trod a ship's deck until he was thus nearly *flogged to death,* through *two or three glasses of grog.*

I remember a plan that was concerted aboard our ship between two young men, in order that they might get an extra allowance of grog. They agreed to swim ashore 'under the new act,' that is, without leave, for the express purpose of drinking. In attempting to swim back to the ship, the same night, very much in liquor, one of them found his strength failing, and shrieked out, 'I'm sinking! I'm sinking!' His mate, who was ahead of him, being drunk, had as much as he could do to keep his own head above water, and he couldn't help the drowning man. He, however, managed to climb the ship's side and give the alarm: 'A man overboard!' Our sailmaker, an excellent swimmer, jumped out of his hammock, ran on deck, jumped overboard, swam out to the sinking man, and with very great exertion got him alongside the ship. But, alas! such was his state of helplessness that just as the rope was being passed round his body for the purpose of hoisting him on board, he slipped from the sailmaker's grasp, and sank. Thus his body went below to the depths of the sea, and his soul was summoned aloft to the judgment of its Maker. The other man who escaped death at this time, was punished the next day so severely, by flogging, that he screamed in my hearing, during its infliction, 'Oh! oh! would to God *I had been drowned instead of my shipmate.*'

The case of a marine comes to my mind,

who was as fine a young man as I ever saw. He stood more than six feet high, and was clean made and stout in proportion. He was also a clever, sober, and good-tempered fellow. During four years of service, I never heard of anything being laid to his charge. It happened, though, one day, that it came to his turn to be cook of his mess. Each of these took his turn in waiting upon the rest at meal-time, for which he had a fourth part of the grog of every other man in the mess. This is called in the navy, 'the plush.' The cook for the day shares this over allowance of grog with one of his mates called 'his chum,' who gives a share, in return, on his cooking day. Thus, through this bad custom, when the hands are piped to grog, two men in each mess get three pints of grog. The marine had just had his plush, and was stowing away the mess gear below, when the master-at-arms ordered him, he being the ship's fifer, to go on deck and play a tune while the vessel was being got under weigh. Sad to say, instead of the cheerful, 'Aye, aye, sir,' which would have come from his lips, had he been a teetotaller, he replied impertinently and did not obey.—Disobedience to orders, in the navy, is a great crime. He was instantly reported to the officer of the watch, on the quarter deck, and the next day received two dozen lashes. The blows of the cat-o'nine-tails not only cut the flesh from the bones, (for his back was tender) but seemed to cut into his spirits, for though I knew him a long time afterwards, I never saw him look cheerful again."—[Ipswich Tracts, No. 44.

THE FRIEND.

HONOLULU, OCTOBER 7, 1847.

☞ We are confident many of our readers will peruse with interest the communications in our present number, respecting Pitcairn's Island. They were kindly forwarded by the Rev Mr. Armstrong, English Chaplain at Valparaiso.

Capt. Fales, of the "Solomon Saltus," now in port, remarks that he visited the island in January of the current year, and spent two nights on shore. He speaks in the most encouraging manner respecting the people. We were somewhat interested in the novel method, which he reports, the new Governor, Mr. Quintal had adopted to rid the island of rats. He had issued an order, that every male over 15 years of age should catch 100 rats per month or pay 75 cents cash! The people had turned *trappers* in good earnest, all were busy making and setting traps. One man had caught 150 of the troublesome visiters ere the expiration of the month, the over plus being passed to his credit!

Capt. Fales adds that a new style of bonnets had made its appearance among the ladies at Pitcairn's. Report said that the fashion originated from the wife of the Commander of the ship Ontario who landed there a few months since!

Most highly do we approve of the item, in the report to the English Admiral respecting the government of the islanders. They should be let alone We know of no people who get along more quietly and peaceably.

Good Tidings.—It is extremely pleasant and enconraging, also, to receive a letter from the master of a whale ship, from which such an extract as the following can be made:

"We are all well on board the ———, and are, by the blessings of God's infinite mercy, still progressing in the cause of our Great Master. We have had evening meetings constantly, since leaveing Honolulu—never missing but twice and then I was absent from the ship. There are many on board who are very attentive to the meeting, and I have reason to think, that there are six who have obtained the "one thing needful," and a number more anxiously inquiring the way to salvation. O, may they be led to acknowledge their wickedness and call upon Jesus, (who stands ready to receive them,) before the door of mercy is forever shut against them." * * * "Perhaps a description of our meetings and service may not be uninteresting to you. At 7 P. M., we ring the bell, when those who feel disposed to come down in the cabin, take their seats. Sometimes we have ten, at others thirty, and never less than eight. I commence service by offering up prayer to Almighty God, I then select a hymn in which they all join, after which, I select and read a portion of the sacred scriptures, with Doddrige's Paraphrase on it; we then sing another hymn, and then offer prayer to Almighty God, dismissing with the Apostolic Blessings. The only difference I make on the Sabbath is that I always have two meetings and read a sermon. It is very remarkable that we never yet have been obliged to omit service on account of bad weather, although we have been continually afloat on the bosom of the troubled ocean, since leaving your place, which is 187 days. I am very sorry I did not take a large supply of Bibles for this ———. I have given away four."

We would merely add that this whale ship has met with more than ordinary success since leaving home. May success, both temporal and spiritual, attend them throughout their voyage. We doubt not that they and all others will find it "good to acknowledge God in all their goings."

Stewart's Island.—This is an island directly south of New Zealand. It has been much visited by whale ships for supplies.—We have frequently heard the masters of whale ships speak of touching there, and of the character of the people. The facts communicated in the following extracts may not be devoid of interest. So far as the natives, as well as foreigners, are concerned, we are glad to hear these statements confirmed by the Captain of the Fabius, who sailed from this port only a few days since.

Capt. Brown of the whale ship Peruvian, of New London, thus writes the Rev. Mr. Forbes at Lahaina, Feb. 20th, 1847.

"We are now lying at an island where there are some 40 white men living, but not all in one settlement, not over 10 in a place, but they have nearly all been on board at our religious meetings, although they live over 10 miles from the ship. Last Sabbath we had an English schooner lying close by us, and a great number of the crew attended divine service on board of us. We have had nearly all the natives, 30 or 40 in number, attend our meetings every evening, they are nearly all *missionaries*, as they call themselves. They have no white missionary on Stewart's Island, but there is one that lives on Rolukar, which is an island in the middle of Foveaux's Straits, but the weather is always so bad that there is no chance scarcely, of having communication with Stewart's Island. The natives of New Zealand who reside on Stewart's Island are fast becoming christianized, they are very strict in their observance of the Sabbath, they will not even go in their gardens to get a potatoe to boil on the Sabbath, but always prepare enough on Saturday to last until Monday, and if they fall short they go without. All the white residents here were formerly sailors, who either were sealmen or

whalemen. There are no rum shops, nor do they ever have much unless some vessels sell it to them. I must acknowledge that many of them, in behaviour, are far superior to the majority of people in any other place I ever visited, nor is there any lack of the cause of Christ; they seemed to be much pleased with our religious meetings, always attended whenever the weather would permit, coming sometimes 10 miles. Being on shore one evening, and it blowing so hard that I could not get on board, they requested me to hold a prayer meeting in one of their houses, which I readily agreed to, and they all attended. They all said they wished there was somebody to read and pray to them living with them, they would cheerfully attend. I distributed all the religious books I had among them, which they all seemed to be eager for; 4 Bibles, Seamen's Hymn books, Baxter's Call, Doddridge's Rise and Progress, Alleyn's Alarm, Persuasives to Eearly Piety, Religion and Eternal Life, and a large number of Tracts. They felt very much the want of Bibles, and I was very sorry we had no more to part with."

For the Friend.

THE NECESSITY OF BEING BORN AGAIN.

"Except a man be born again he cannot see the Kingdom of God." John III., 3.

The expression, Kingdom of God, in this declaration of our Saviour, doubtless means the perfect felicity of holy spirits and of redeemed sinners. To see the Kingdom of God, is to enjoy that unspeakable felicity.

But this felicity which is eternal in its duration, which is beyond the power of imagination to conceive, is designed for the children of God. If we are children, then are we heirs; heirs of God and joint heirs with Christ. (Rom VIII., 17.) The inheritance is incorruptible, and undefiled, imperishable; and it is reserved for a certain class, for those who are kept by the power of God, through faith unto salvation. (Peter I., 4 and 5.) It is the inheritance of the saints in light, (Col. I., 12,) and none will—none can enjoy it except the children of God—those who have been born again. All others are alienate from the life of God, (Eph. IV., 15,) without Christ, having no hope, and without God in the world. (Eph II., 12.) Thus it is that while eye hath not seen, not ear heard, have entered into the heart of man, the things which God hath prepared for them that love him, (1 Cor. II., 9,) there is a class who have no right to anticipate these things; a class, who, not having been born again, cannot be heirs to the inheritance of God's children.

And there is a consideration which may help us to perceive more clearly the reasonableness and the truth of our Saviour's declaration, "ye must be born again." Heaven is represented in the Bible as a holy place, and the society of heaven as composed of holy beings. But those, who have not been born again are not holy, and without holiness no one shall see the Lord. (Heb. XII., 14.) Now, as it is necessary, in order to enjoy the society of Botanists, that one feel an interest in Botany and possess some knowledge of the science, so also is it necessary, in a far greater degree, in order to enjoy the society of the holy in heaven, that one's heart be imbued with holiness. Without holiness how can he participate in spiritual employments with any relish? It is impossible. Could a person who has not been born again be admitted to heaven, he would not be happy. The songs of the redeemed would weary him. Their conversation would disgust him. The incessant service of God, so delightful to saints and angels, would be to him an intolerable hardship.

Dear reader, do not be deceived with delusive hopes of heaven. Thou must be born again. Thou must be a partaker of the divine nature. For, "neither fornicators, nor idolators, nor adulterers, nor effeminate nor abusers of themselves with mankind, nor thieves, nor covetous, nor drunkards, nor revilers, nor extortioners, shall inherit the Kingdom of God." (1 Cor. VI., 9 and 10.)

L. E.

Lahaina, Sept. 27, 1847.

Mr. Editor,—At a meeting of the residents and Sea-Captains, held at Lahaina, October 27, 1846, it was resolved that a committee be appointed to select a suitable piece of ground, enclose and fit it up properly for a burying place for seamen and resident foreigners.

It was also "voted that said committee be empowered to collect subscriptions for this object.

"Resolved, further that Messrs. Punchard & Co., be appointed treasurers for the funds." On the 6th of Nov., 1846, the committee selected a spot of ground, which was accordingly purchased for the sum of $225, and walled in, good gates furnished, and a bier, for the sum of $146,81.

The following sum has been collected and paid into the hands of the Treasurer:

From resident foreigners,	$128 00
From seamen,	246 50
Total,	374 50

On behalf of the Committee,

C. FORBES.

☞ Childhood is like a mirror, catching and reflecting images from all around it. An impious or profane thought, uttered by a parent's lips, may operate on a young heart like a careless spray of water thrown upon polished steel, staining it with rust which no after scouring can efface.

VOLCANIC ERUPTION AT THE VAVAU ISLANDS.

The following are a few particulars relating to a new Volcanic Eruption at a small uninhabited Island, belonging to the Vavau group. Toku is the proper name, but known on the Charts as Amagura. They have been furnished principally by J. C. Williams, Esq., U. S. Consul, and Capt. Samson, ship "Charles W. Morgan."

The Island of Toku lies about 60 miles in a N. W. direction from Vavau. It is Volcanic formation, but there is no recorded eruption for a very long period.

On Tuesday the 9th of June, and two following days, severe shocks of earthquakes were felt at Vavau, during every fifteen or twenty minutes. They could be easily perceived on board the vessel lying at anchor in the harbor. On the night of the 11th bright flashes of light were perceived in the direction of Toku, reflected against the heavens, but at a very high angle.

On the morning of the 12th every thing was covered with a thin dust, the trees and grass presenting a strange appearance. The Samoan natives who were with Mr. Williams, remarked, that the dew in that country was somewhat different from that at their own Island! A strong suffocating smell of sulphur was perceived.

Mr. Williams left Vavau on the 13th the Island of Toku lying nearly in their course. As they approached it, they could perceive immense volumes of smoke and dust ascending, as they came still nearer to it, they could form some idea of the immense extent of the crater, which is described as being of very great diameter.

The most interesting fact connected with this eruption, is, the very great distance to which the ashes were carried, and in a direction contrary to what might be expected during the regular N. E. trades. About 2 o'clock, on the morning of the 12th, and at least 3 degrees in a N. E. direction from Toku, Captain Samson of the "Charles W. Morgan," when on his way from Eooa, one of the Tonga Islands, to this group entered a shower of ashes. At the time, it was blowing a double reefed topsail breeze from the North East, but it was a beautiful clear star light night.

Before they entered, it appeared like a squall, so soon as they got into it, the eyes of the men on watch were filled, and the deck began to be covered with the fine dust. Captain Samson put the ship about, but being persuaded that there was no land near, he continued his course.

So soon as the sun arose, the dust appeared of a dark red color, rolling over like great volumes of smoke, presenting an awful appearance; at 8 o'clock it was so dark that candles had to be lighted in the cabin; at 11 A. M., it began to clear a little, the sun appearing occasionally. By noon they had

got out of it, being then in 17° 45' W. and 11° 2' S. having sailed across the shower at least 40 miles. Captain Cash of the Ship "Massachusetts," got into the shower about the same time, though at least 60 miles to the East of Captain Samson, and not far from Savage Island.

The ashes penetrated every crevice of the ship, and fell in such quantities, that Capt. Samson believes tons fell on the deck, which had to be cleared from time to time.

The question is, how could such a shower be carried so far, right in the teeth of the prevailing winds? It can only be explained I think, by supposing, that the ashes had been thrown at once with great force, and to a very great height, into an upper current of air, and after being borne several degrees to the east, then fallen into the under stratum, and so carried back again towards the Island from whence they came.

The dust is of a dark gray slatety color. Of specific gravity 1,076, containing a large proportion of sulphur, and so much of free sulphuric acid as to give it a sharp taste. It also contains a small proportion of iron. No doubt a minute analysis would give the usual combinations of silica, and several of the sulphates usually found in volcanic dust.

WM. MILLS.

Fast horse-back riding.—We have often heard it said that a man could ride horse-back, 100 miles a day, but we have regarded such statements as belonging to the extravagant language peculiar to the "turf." The South American horses are considered as remarkable for their speed and "long-winded" properties, while their riders are equally remarkable, if all reports be true. A Valparaiso correspondent, thus writes us, "Mr. ——— has just come back from Mendoza, having visited B. Ayres and M. Video. He rode one day 43 leagues, and 1,000 miles in about 9 days! Only think of that, all done on horse-back!"

Navigator Islands.—We have received the "Samoan Reporter," for March, 1847. This is a publication ever welcome. It abounds with much interesting intelligence, respecting that portion of Polynesia. Our limits will only allow us to copy an account of a remarkable volcanic eruption, on one of the barren islands. What is quite remarkable, ashes fell 60 miles from the crater, and in an opposite direction from that which the wind blew.

☞The lovers of music in Honolulu, have on numerous occasions listened with great delight to the soul-stirring song, of the "New Foundland Dog," as sung by M. Johnson, Esq. A friend has directed our attention to a most touchingly narrated incident, which might have been the origin of the song. We furnish it for our readers on the first and second pages of to-day's paper.

Recent Intelligence.

Tahiti.—By the "Currency Lass," we received intelligence from the Society Islands. The political affairs of the group are becoming more settled. Agricultural operations have been vigorously resumed, and in a few months, it is expected the present exorbitant prices will be much reduced. It was almost impossible, at any price, to recruit a ship. One correspondent thus remarks respecting missionary movements: "I cannot say any thing yet, as to our prospects, as the minds of the people have not yet settled down, but the first feeling of mortification consequent upon their being conquered, is now subsiding, and more in our favor than, as Englishmen, we could expect."

Mr. Howe, one of the English missionaries, has returned from England, and resumed his ladors.

A CARD.

On taking my departure from Honolulu, I cannot but leave my public and profoundly grateful acknowledgments, of the undeviating kindness with which the foreign community have given to me their confidence, in the social relations to which I have been received in the prosecution of my professional toil, until the broken condition of my health forced me to retire from activity, and in the sufferings of a protracted confinement. More especially I owe them my gratitude for the prompt and generous manner in which they have responded to my wants for the means of defraying the expenses of a passage for myself and family to the United States, in the ship Mount Vernon, about to sail.

GILBERT WATSON.

Honolulu, Sept, 27, 1847.

PASSENGERS.

NOTICE TO WHALERS.

HILO, Byron's Bay, Hawaii, is a free port to whale ships of all nations, the only charge being $1 for clearance; pilotage being abolished by the law of 15th June, 1847.

No grog-shops at this port, consequently but little trouble or desertion among seamen. Wood $6 per cord, and recruits proportionably cheap, making it a desirable port for whale ships to recruit. There is not on record an accident to the shipping at this Bay. Always in readiness an old experienced Pilot. sept. 25

ON hand and for sale by B. PITMAN, 100 cords Wood, 150 sticks Ohia (Hewn) Timber, from 24 to 40 feet in length, and from 5x6 to 8x9 square. Hilo, aug17—28 3m.

REUGLAR PACKET FOR LAHAINA.

THE Clipper Schooner KAMEHAMEHA III., Captain ANTONIA, having fine accommodations, will run regularly between this port and Lahaina, except when required on His Majesty's service Her days of departure from Honolulu, as near as can be calculated upon, will be Monday, at 5, P.M.; from Lahaina, on Thursday evenings. She will carry mails and take freight and passengers, but will not be accountable for damage sustained by freight.

Apply to Captain on board or to J. PIIKOI.
my 22 tf.

GEORGE RISELY,

BUTCHER AND GENERAL MEAT SALESMAN, begs leave most respectfully to inform the residents of Honolulu and shipmasters generally, that he has taken the stand owned by Mr. French, and lately occupied by Messrs. Robinson & Co., where he is determined to sell none but the best of meat, and trusts that by cleanliness and strict attention to his business he may merit a share of public patronage.

G. R. trusts nothing shall be wanting on his part to give satisfaction to those whom he may have the honor to serve.

N. B. Ox Tongues and Corned Beef cured in a superior manner. my22 1y.

NOTICE.

JAMES ROBINSON & CO. having opened their new Butcher Shop on the new wharf opposite the Custom House, respectfully inform their friends and former customers, that they will be able to supply them with the best BEEF the islands afford, at the usual prices. my22 1y.

BREAD BAKERY!

THE undersigned would inform the inhabitants of Honolulu, that he has removed to the premises next to the place formerly known as Mr. Gravier's Hotel, and Mr. Vincent's lumber yard. He would likewise take this opportvnity of returning thanks to his numerous customers for the liberal patronage he has received since commencing the above business; and would further inform them that he can now supply them with fresh BREAD, both morning and evening. Also a large quantity of American and Chilean flour for sale in quantities to suit purchasers.

None but the best flour in market will either be sold or baked at this establishment.

*** Terms cash.—No credit given.
my 1 tf J. BOWDEN.

NOTICE.

WALDO & CO. would inform their friends and the public that they have established themselves in business at Oahu in connexion with their house at Maui, and will keep constantly on hand at both places, Beef, Pork, Bread, Flour, Canvas, Cordage, and a general assortment of merchandise usually required by Whalers touching at these Islands for recruits.

☞ Money advanced on liberal terms for Bills of Exchange on the United States, France and England. my22 tf.

F. RODRIGUEZ VIDA

WILL keep constantly on hand a general assortment of Ship Chandlery, Provisions, &c. usually required for whale ships touching at this port for recruits; and will supply them at the lowest market prices for cash or Bills of Exchange on the United States, England and France. my22 tf

CAVEAT.

THE public attention is called to the following facts:

1st. That on the 24th of November, A. D. 1841, the King and Premier of the Hawaiian Islands, signed a contract, without any proper or valuable consideration, by which Peter A. Brinsmade, William Hooper, or their assigns, were allowed to locate unimproved and unoccupied lands for certain purposes, until the 24th November, 1842, which right of location, was, on the 13th September, 1842, extended without further consideration to the 24th of November, 1845.

2d. That when there yet remained two years and six months of the term for such location, said Brinsmade, Ladd and Hooper, by their duly empowered Attorney, P. A Brinsmade, sold and transferred all their rights under said contract to the Belgian Company of Colonization, and by a contract executed at Brussels, on the 17th of May, A. D. 1843, with that Company, divested themselves of the right to locate and enjoy such lands.

3d. That the Belgian Company not having located or demanded the right of locating such lands, from the 17th of May, 1843, to the 24th of November, 1845, the time for such location has completely elapsed, and the said two contracts have become *void* by their own terms.

4th. That said contract of 1841, in accordance with the established custom of these Islands, having been made in duplicate, one being left in the hands of each party thereto, and each duplicate consisting of an English and Hawaiian version, duly signed and sealed, it has come to the knowledge of the undersigned, that Ladd & Co., notwithstanding they have sold and delivered the English version of said contract to the Belgian Company of Colonization, have lately assigned the Hawaiian version of said contract to other parties for purposes unknown to said King and Government.

Therefore, know all men, that in case any person or persons shall hereafter protend to claim or asesrt any right under either of those void contracts by reason of purchase, transfer or assignment, such person or persons will meet the just and legal opposition of the Hawaiian Government.

And be it further known to all men, that whoever shall purchase said contracts, will purchase them at his or their own peril, and be deemed to have purchased a nullity.

Done by order of the King and Government of the Hawaiian Islands, at the Department of Finance, in Honolulu, Oahu, Hawaiian Islands, this 21st day of May, 1847.

G. P. JUDD,
Minister of Finance and Attorney for the King's Government. my 22 1y.

BENJAMIN PITMAN,

DEALER IN SHIP CHANDLERY, General Merchandise and Hawaiian Produce, BYRON'S BAY, HILO, Hawaii.

On hand, and for sale, a general assortment of Merchandise usually required by whaleships touching at these islands for recruits.

☞ Money advanced on liberal terms for Bills of Exchange on the United States, England and France. aug28 6m.

SUGAR AND MOLASSES.

THE subscriber is constantly making, and has on hand, a superior quality of molasses and brown sugar, for sale cheap for cash or approved credit. Apply to WM. A. McLANE, or to *Makawao*, Maui, 1846. J. T. GOWER.

The Poet's Corner.

For the Friend.

A VALITUDINARIAN'S VALEDICTORY,

To his highly esteemed and dearly loved Christian friends at the Islands.

It was the Golden Rule, I fear,
Unrighteously reversing,
For me to bring among you here
An invalid for nursing;
But ye were all so very kind,
My modesty—dull Quaker—
I fear *has slept!* while I, resigned,
Had quite forgot to wake her!

And so, long days and nights have flown
In rapid alternation,
Till you may think my *visit* grown
A downright *visitation;*—
Proving in *me*, forsooth, the art
Of keeping conscience plastic;—
In *you*, a friendship and a heart,
Composed of *gum-elastic!*

Your heart-warm welcome of the blues,
Hath lent me power to smother,
And kindness, worlds beyond my dues;
You've shown, as towards a brother.
The debt of love that hath accrued,—
I tremble when I say it,—
Is now so vast that I, if sued,
Must go to gaol to pay it!

And yet, if kindness *can* be paid,
By Adam's son or daughter,
And *friendship* be exchanged in trade,
(Men oft have sold and bought her!)
For *warmer friendship* in return,
And *sense of obligation*,
There sure I feel within me burn
The *paying-off* sensation.

One sweet, responsive string I've kenned
Upon my heart's guitar,
That deeply vib ates when the hand
Of mem'ry lingers there.
Forth, now, it pours its music wide,
As 'twere, a heavy ocean,
And swells my bosom with a tide,
Of grateful, fond emotion.

Of all your noble deeds and kind,
Not one unheeded passes;
For oft doth love, though reckoned blind,
Wear magnifying-glasses.
The 'cup of kindness' ye have lent,
A stranger's heart to gladden,
May Heaven to your own lips present,
When aught your souls may sadden.

So take ye now my parting hand,
My parting love expressing,
God smile upon your noble band;
God grant you every blessing;
And crown your toilings with success,
Your pathway all made even,
And cheer you while you onward press,
To gain the goal of Heaven. C. S. L.

Honolulu, June 1st, 1847.

The Seamen's Friend.

The Mouldy Biscuit.

BY E. D. ADAMS, SEAMEN'S CHAPLAIN, HAVRE, NRANCE.

Judge Peters was distinguished for his integrity, genius, and wit. These characterized his legal decisions. Whenever a trivial or unworthy cause came before him, his views of it were made known, to the shame of the offending party, and to the great amusement of others.

A ship's crew brought into his court a complaint, alledging the unwholesomeness of the provisions laid in for the voyage. One of the evidences in support of the charge was an apparently mouldy biscuit. The counsel for the plaintiffs, in opening the cause, produced this buiscuit, and it was handed to the judge. But when the witnesses, *pro* and *con* were called in, the mouldy biscuit, upon which so much reliance was placed by the opening counsel, could not be found. At length one of the jurymen reminded the counsel that he had handed it to the judge, who, it appeared, had, little by little, eaten it up. There was a hearty laugh in the hall, and the complainants who had evidently brought this action from spite against the captain and owners, were foiled in their prosecution. Eating the biscuit was a very ingenious way of showing what the court thought of the accusation, and a fair proof that the provisions was better than it had been represented.

Seamen are no doubt often abused by their officers. There is a disposition on the part of some masters, to wring from their men the very last mite of labor, and to show their brief authority by every unreasonable and overbearing command. But, on the other hand, there are freqnent and deep provocations. A crew sometimes comes on board with the full, concerted intention to create trouble. Their suspicions and ill will, inflamed by debauch, at once discover themselves when there is the greatest need of obedience and activity for the safety of the ship. Besides, sailors, even in their sober moments, often show the basest ingratitude—the most consummate hypocrisy—the utmost destitution of real, generous, noble feeling. Of this, my friends, you are fully aware, and you cannot well blame me for saying it. I do not enter into wholesale condemnation; neither do I go with those, who not intimately knowing you, in their laudable zeal to do you good, are in fact doing you a great injury, by so much exalting your virtues, and drawing a veil over your vices. The truth is, you are men. You have all the characteristics of human nature—its faults and its virtues. Circumstances have developed some of your traits in a peculiar manner, but they have not made you a distinct species of beings, though you are a distinct class of men. You have peculiar trials, and powerful, adverse influences; and by your own conduct have given the world an impression of you, made up of these contradictory elements—*romantic admiration and criminal contempt!* It is for you to correct this impression. Your virtues, your piety and actions are to secure for you the claims of reasonable, self-respected, moral beings—whilst the name of "Jack Tar" and "Old Salt," and all designations of obloquy shall be forgotten. Let the mighty objects which nature holds up to our view, enlarge and ennoble your minds; and let the Bible, and Christianity be the light and the life of your souls.

I wish in this little tract to call your attentention to two thoughts.

1. *Do not think that the world expects you to do wrong.* From my knowledge of you I am convinced this thought greatly influences your conduct. You have an idea, and it is true that you are expected to sin. You hear people say, "*Oh, he is only a sailor.*" And this silences conscience and makes you feel at ease in sin. Your past wickedness is made an excuse for its continuance. You say "because I *have* sinned, I will go on,"—the very reason why you should cease.

God looks on you as a man—as an immortal!—as a ruined sinner!—"His thoughts are not as man's thoughts." Ask yourself—*what does God think of me?* If the world calls you a "mouldy biscuit," a good-for-nothing being—do not admit it!—be above it!—never deserve it!

2. *Despise littleness of thought and action.* I do not mean that you should neglect or be ashamed of little duties. But I refer to your childish wants and tricks. They show one extreme in your character. The opposite is fearless and sublime action. You have both. But it is painful to see you descend from the height of one to the depth of the other. Let manliness be found in your whole demeanor. In humility be children, but not in folly.—Never does a man seem so mean as when he *fawns* about a master, and *begs for money* that he may *drink and be a fool!* No one will respect you in such a case. You cannot respect yourself. Think what you have been!—how fallen!—what your friends are, and wish you to be; what, by enterprize and virtue, you may be; nay, what Christ would have you be—what he can make of you—by giving you a new heart. Repent—believe—obey and live! The bar to which you must

go at last, will not be clothed with the pomp of human authority, but with the most certain tokens of an infinite law! and Christ will be there, "not to destroy it!" "But who may abide the day of his coming? and who shall stand when he appeareth?" Mal. III., 2.

☞ As a minister of the gospel, as well as editor, we have been censured by some as taking rather too high ground, or as advocating too rigid principles in regard to what are called the fashionable amusements of the age. Our views have been contemptuously styled *Puritanical*, and our principles *New England*. It is not our design at present to enter into a defence of these principles; we have, however, met with an Essay upon this subject that so exactly harmonizes with our opinions, that we most candidly recommend its reading to all who desire to be known as the humble and consistent followers of our Lord and Saviour Jesus Christ. We attach the greater importance to this Essay, from the circumstance, that it was written by an Episcopal Clergyman, who died some years since, while officiating as Pastor of one of the largest Episcopal churches in the city of Philadelphia. Not only was he highly esteemed and beloved by his own people but he had acquired a most enviable public reputation for talents, piety, and zeal. Among christians of all denominations, the Rev. G. T. Bedell, D. D., Rector of St. Andrews church, Philadelphia, was admired and beloved. His memory is precious. Would that all who officiate as ministers of the gospel might accomplish as much, during their lives, for their Divine Master, and die as triumphantly as did the Sainted Bedell. It is an honor, indeed, to be styled *Methodistical*, or *Puritanical*, or *Evangelical*, with such men as Bedell and Leigh Richmond for associates.

We would merely add that this Essay was originally published as an Appendix, to a "Treatise on the Lord's Supper," by the Rev. Mr. Bickersteth, who for so many years has been one of the leaders in the Evangelical party of the church of England, laboring "shoulder to shoulder" with the Rev. and Hon. Baptist Noel.

"The grand object of a Christian, especially of one who sits himself forward as a real follower of Christ, is the salvation of his soul; and to this, must every energy of the man be directed; for salvation is a difficult thing—as, asks an apostle, "if the righteous *scarcely* be saved, where shall the ungodly and the sinner appear?"—And if a real Christian has a proper impression of the weakness and infirmity of his nature, he surely should be the last to give the world and nature an undue advantage over him.—Besides this, the Scriptures declare that there is a decided and strongly marked difference, between a follower of the Lord, and a mere worlding, and that difference is to be measured, by the actual disagreement in the conduct of the two; and the difference in the conduct, where that conduct is uniform and consistent, marks the difference in the *principles* by which they are actuated. *Love* to the Saviour, where it is "shed abroad in the heart, by the Holy Ghost," is an absorbing principle; and love to the Saviour, and love to the amusements of the world, are opposite and contradictory. "*Love* not the world, neither the things which are in the world; for whoso loveth the world, the love of the Father is not in him."—True religion, and the world, are, and ever have been, at variance. Our Saviour has not only established this truth, but absolutely laid down the utter impossibility of a neutral state for the soul.—"He that is not with me is against me, and he that gathereth not with me, scattereth abroad." I am fully persuaded, by the experience which I have had in my intercourse with professing Christians, that those, whose conversation was turned upon religious topics, and whose "meat and drink" it appeared to be "to do the will" of their heavenly Father, were the very persons who expressed themselves most strongly on the subject of the *anti-spiritual effects* of worldly conformity; while those, most generally, who gave in to the amusements of the world, seemed to have an indifference and lukewarmness on the subject of religion, which chilled religious intercourse, and painfully impressed me with the idea that they delighted in having their "conversation" every where but "heaven." This I would be understood as saying, has been my experience *generally*. I have found some exceptions, but they have been rare, and under very extraordinary circumstances.

But I enter on the reasons which have induced me to believe that communicants cannot enter into the amusements of the world and yet maintain a consistent and Christian character.

1st. What are called the common amusements of the world have a direct tendency to destroy every thing like *personal religion*. Apart from the previous circumstances of preparation, which destroy so much of that invaluable talent, *time*, and apart from the unhallowed passions of "envy, hatred, malice, and all uncharitableness," which dress, and attentions, and such like, are sure to waken in the mind, which is intently set on amusements as a chief good, the dissipated thoughts and the wearied body, induce an almost necessary indisposition to the serious exercises of devotion. This is a matter which can fairly attach itself to the experience of the reader, who engages in these amusements; and how can it be supposed, that after many hours spent in nothing but a round of indulgencies, a person can return to his home, perhaps far beyond the midnight hour, and spend a sufficient period in those duties of devotion, without which all claims to the Christian character, are no more than a "sounding brass and a tinkling cymbal."—Whatever interferes with the hour which should be consecrated to God—whatever indisposes to the exercise of that prayer, which is a real Christian's delight, and a conscious sinner's dearest privilege, is totally divested of its character of innocent; and becomes evil and sinful in the highest degree. I know that it is the way of many, to talk of the *abstract innocence* of common amusements; but language of this description has no meaning. I doubt whether any one could tell me, what he meant by amusements *abstractly considered;* and to enjoy an amusement abstractly is to me entirely absurd. These things are completely made up of circumstances, from which they never have, and never can be abstracted; and it is in these unavoidable circumstances that the evil is to be found.—If attending at the theatre—at public and private balls, and a variety of other things of lesser evil, interfered with no absolute duty to God or man—cut short no hour which ought to have been wholly consecrated to the immediate service of our Maker in prayer and supplication and thanksgiving—produced no languidness of soul—no spiritual weariness—no real waste of time—no unhallowed passions—then might they be enjoyed to the full. It alters not the force of the argument, to say that the evil of these depends on the *excess* to which they are pursued I have no hesitation in affirming, that they never were, and in the nature of the thing, they never can be pursued without excess; for if the infringement of a *single duty*, let it be ever so trivial in itself, be the consequence, the pursuit which is the cause of that infringement is excessive and sinful.

It is objected to this, God is so good that surely he never could mean to debar his rational creatures the gratification of the pleasures of this world; and that if to "renounce the pomps and vanities of this wicked world," be understood in the sense, which is contended for by many, the situation of the disciple of Christ would not only be far from enviable, but positively wretched.

An objection of this kind assumes the point, that amusements of the description alluded to are *absolutely necessary* for the happiness of rational creatures; and it consequently deprives all those who conscientious-

ly oppose them, of all claims to any thing like worldly happiness. The objection commencing with an assumption, which is not founded on fact, all subsequent reasoning on it is entirely fallacious. Why should it be thought a hard thing if our Lord, in the self-denying precepts of his religion, should direct his followers to relinquish these vain and trifling pursuits, and enjoyments, and turn their attention to things of a more important and decidedly religious character? Biddulph, in a work on worldly conformity, puts this matter in a very strong light.

"Has the Creator dealt hardly with the papilio, because, in consequence of his ordinance it changes its nature, ceases to crawl on the ground, and mounts aloft in the air, deriving its pleasure from a new source? Has the captive, long a prisoner and a slave in the Siberian mines, any reason for accusing his sovereign of barbarity when his chains are knocked, and he is restored to the light of day, and to the pleasures of society on the surface of the earth; because he is now separated from those low gratifications to which he was obliged to resort for want of better, while he was confined in subterranean caverns? The objection is built on falsehood; for it supposes the things of the world to be suited to the faculties of an immortal mind, which is made far the enjoyment of God, and which nothing but God, his favor, and friendship, can ever satisfy.—but the believer is become, by regeneration, "a new creature; old things are passed away, and all things are become new." The aspect of all those things with which he has hitherto been conversant is now changed.—The follies of the world have lost their power of giving him contentment; if, indeed, they can be said to afford it to any persons His hopes and fears, his desires and aversions, his joys and sorrows, arise from new causes, and are directed to new ends. What he receives in lieu of the bubble which he relinquishes, is sterling. Had the prodigal son any cause of complaint when in consequence of the gracious reception which his father gave him, he was no longer under a necessity of feeding on husks with the swine which his former master had set him to keep? Let the Christian who is enjoying the privileges of his profession, be asked, whether the requisition of renouncing the world be harsh; and whether God who makes it be an Egyptian task-master. He will know how to answer the question, by replying, "I am dead; and my life is hid with Christ in God." (Col. III. 2).

2d. Another very prominet evil, arising from the circumstance of communicants attending amusements of the description all along alluded to, is, that it weakens the influence of religion in the minds of others.—Let those communicants who indulge in these amusements think what they please on the subject, the fact is unquestioned, that the eye of the world is upon them; and from them is expected, even by those who care nothing about religion, a consistent and godly, outward demeanor; and it were folly for them to attempt to conceal the truth, that the conduct they pursue, brings a measure of reproach on religion, by lowering it to the level of the world. A professing Christian is supposed to stand on an eminence of spiritual attainment, far above the common mass by which he is surrounded; and where that character is truly *possessed*, as well as *professed*, the supposition is most correct.—About the real Christian character, while there is a mildness and sweetness of deportment, which makes men admire and love, there is also a gravity and dignity of deportment which can make no fellowship with the lightness and frivolity of a theatre or ball-room. A professing Christian then, engaged in such pursuits, loses at once the dignity of his assumed character, and lets himself down to the level of those who make no pretensions to religion. I have heard it asserted by many, who were "lovers of pleasure more than lovers of God," that though they engaged in such scenes, yet they could not but *lose respect* for those who called themselves Christians, when they saw them as fond of these vanities as themselves; and that they were consequently fully impressed with the idea that religion set very lightly upon them. The conclusion of such persons is undoubtedly legitimate, and it is one, among the many tributes, which mere worldly men pay to religion, that they think it demands a more circumspect and dignified demeanor; and absolutely requires a measure of consistency which is apart from the love and practice of these f llies I say it, because I know it to be true, that the most frivolous of the giddy throng, whose motto seems to be "let us eat and drink, for to-morrow we die," look with the utmost supicion on the religion of those, who engage with them in their pursuits, and not only *think*, but *speak* unfavorably of them, and of consequence of the religion which they profess. Professing Christians then, enter ye the theatre—the ball-room—sit down to cards, and such like, and the very persons, with whom you are engaged, while they consent that you should minister to their pleasure, censure you in their hearts; and did they dare, or were they honest enough to tell you what they thought, they would confess to you that you had lost in their respect.

3d. Another reason why it is evil for communicants to join in these amusements is, that it is a stumbling block in the way of many, and gives unnecessary offence to the feelings and views of many a Christian brother.

[To be Continued.]

If thou would'st keep thy conscience pure and clear.

For the Friend.

WHAT IT IS TO BE BORN AGAIN.

The Lord Jesus in his conversation with Nicodemus most solemnly declared that except a person be born again, he cannot see the Kingdom of God. (John 3.) What is meant by being born again? This is an important question, and it demands the serious consideration of every one, who desires to see the Kingdom of God; a misapprehension of its meaning may be followed by the loss of Heaven.

Is a public profession of religion the same as being born again? Some affirm that it is. But in making a public profession of religion, the individual declares that he loves the Lord Jesus more than any earthly friend; more than any earthly possession. Now the person making this profession is either sincere, or he is not. If he is sincere, if he loves the Lord Jesus as he professes, he has, doubtless, been born again; for "he that loveth is born of God." (1 John IV., 7.) If he is not sincere he is a hypocrite, and the doom of hypocrites will be his. In vain will be his profession of religion. In vain will he cry out, 'Lord, Lord, have I not prophesied in thy name;' for the judge will declare, "I never knew you." (Mat. VII., 22 and 23.) It seems then, that making a profession of religion is something different from being born again.

What is it then, to be born again? I answer, it is a great and radical change in the feelings, and in the motives of action. This is implied in the language employed, born again, and in its equivalents, born of God, and born of the spirit. It is the change which takes place in passing from the condition of children of the wicked one, (Mat. XIII., 38, and 1 John III., 8,) to the condition of children of God. All men by nature are children of wrath. Those who have been born again are children of the Kingdom and heirs to a glorious everlasting inheritance.

The same great change is described in the Bible under other figures. The Saviour declares, "He that heareth my word, and believeth on Him that sent me, hath everlasting life, and shall not come unto condemnation; *but is passed from death unto life.*" (John V., 24,) "and you hath he quickened, who were dead in trespasses and sins." (Eph. II., 1.) As a dead person is destitute of perception and of enjoyment, so are all destitute, by nature, of spiritual perception and spiritual joy. The change is as life from the dead. To the person, who has experienced it, old things are passed away and all things have become new. He feels that he is a new creature. (2 Cor. V., 17.) He sees himself in a new world. Sources of enjoyment, such as he never dreamed of, are opened to him, and he has new fears and new hopes.

Reader have you experiened this great change? Have you become reconciled to God so as to regard his character and his government with complacency and delight? L. E.

SPLENDID NAVAL VICTORY.

We have received intelligence by the arrival of the Caledonia of one of the most splendid naval victories ever achieved under the American flag.

The accounts say that the U. S. Sloop-of-War Jamestown, Commodore Forbes, on the 12th of April, made a gallant attack on the city of Cork, in Ireland, which resulted in the unconditional surrender of the place to our brave tars. The passage of the Jamestown was so short from this country that the city came nigh being taken by surprise. We learn that the appearance before the city caused great excitement among the forces of the enemy, and that 'Rear Admiral Sir H. Pigott dispatched an officer, to see if any immediate assistance was required.' The alarm was rung by 'the bells of Shannon' and of the 'Cathedral,' and a requisition was promptly prepared, calling on the Mayor to summon a meeting of the citizens to devise measures for the attack. It was subsequently agreed to attempt to carry the ship by boarding, and a 'deputation of the gentry of Cork,' was detailed for that purpose.

The attack upon the city is said to have been one of the most brilliant exploits in the history of maritime war. Every shot from the ship appeared to *tell* upon the city and go to the very hearts of the enemy. Never was a naval battery better served than on this occasion. Shell, in the shape of barrels of flour; and grape and canister from corn bags, did immense execution, and many poor Irishmen were penetrated by these missiles. Sometimes whole families would receive the contents of a shell which fell among them from the noble ship. At the latest date, the gallant Commodore and his crew were throwing round shot and shells into the city, and will probably continue to do it until their amunition is expended, notwithstanding the place had capitulated.

This glorious victory was accomplished without the loss of a man on our side, although the officers and crew were several times during the bombardment in great peril. At one time Com. Forbe's forces, after the landing, were completely surrounded at a place called the Cove, and came near being taken prisoners. The shot of the enemy told with great effect upon our men, being directed mainly at their stomachs. The defence was admirably conducted, but the superior quality of the armament and amunition of the Jamestown rendered resistance hopeless.

We understand that Com. Forbes is of opinion that the whole of Ireland if not England and Scotland may be conquered in the same manner, whenever it may be expedient to invade those countries. We shall look with anxiety for the official dispactches giving a true account of this victory. We are inclined to think that this brilliant affair will shed more glory on those engaged in it and on the country than all our victories in Mexico.—]Danvers Courier.

THE FRIEND.

HONOLULU, OCTOBER 21, 1847.

Arrivals Extraordinary.

For a long season our community has been in doubt what vessels might be expected, or whether any had sailed from the U. States for this port. The Minstrel, Doane, 123 days, and Angola, Varney, 128 days, are unexpected, but welcome, visiters. Both vessels arrived the same day, having made remarkably quick passages. The Medora, Shoot, is reported to have left Boston, May 19th, for this port direct, and has now been out over 150 days, hence her arrival is hourly expected.

The following extract from a lettter of an old resident at the Islands, but now living near Boston, contains some items of public interest:—

West Newton, U. S., June 12, 1847.

"You will probably learn from your papers all the news that may be of interest.—The most exciting topics at present are the war between this country and Mexico, the appalling distress for food in Ireland, and other parts of England, and the continent; the alarming state of many affairs in England, the bank of that nation being on the verge of suspending specie payments, the enormous price of every description of breadstuffs in this country, and in all parts of Europe, and the prospects of the most distressing failures of British merchants, in consequence of the money pressure, which has stopped all accommodation by the banks, even to the refusal to discount such paper as that of the Barrings. * * * There are, however, men of foresight, who believe that a reaction must ere long take place, and distress follow hard on the steps of prosperity." Speaking of the Mexican war, our correspondent remarks, "I will not go into the causes, justice, or injustice of the present war. I may, however, say that under the most favorable points of view, the Administration has no reputation to throw away. The majority of the American people look upon it as unnecessary, impolitic, and unjust." J. C. J.

☞The Rev. Townsend E. Taylor, Chaplain elect to Lahaina, is a graduate of Union Theological Seminary, New York, and was expected to sail by the first convenient opportunity. He will probably leave in the earliest fall vessel.

Mr. Eddes, passenger in the Minstrel, is a native of Allenstown, N. H., and comes

out to assist the Rev. Mr. Green, at Makawao, as a farmer.

Horace Hawes, Esq., arrived passenger on board the Minstrel, on his way to Tahiti, there to officiate as U. S Consul. He belongs to Erie, Penn.

Our correspondent, "J. C. J.," writes that "I shook hands a few days since with Father Taylor, (the Pioneer of the seamen's cause,) as he got into the cars for New York, to join the Macedonian, as distributer amongst the starving Irish in their own Isle, of the charity which has been sent by that vessel. He is a valued friend of mine, one whom I esteem as the true Christian and Philanthropist. God speed him on his errand of mercy."

Abbott Lawrence, Esq., of Boston, has given $50,000 to Harvard University for the encouragement of the practical sciences.

Temperance.—The 13th instant was characterized by a most happy effort in the way of a Temperance Picnic, among the adults, teachers and youths of the Reverend L. Smith's Society, in Honolulu. It occurred on the day following the examination of schools. There was a most commendable display of "civilization," on the south side of the Ewa road, just over the bridge. Many hundreds were there assembled, beneath temporary tents, while there was no want of the good things of this life! After the close of the festivities, the crowd marched in procession, to the church, where appropriate addresses and songs extolled the virtues of cold water. Whatever may be said of the Hawaiians, as a nation, they are most valiant soldiers in the "Teetotal Army."

New Bethel Chapel at Hilo.—From a communication from the Rev. Coan under date September 22d:

"Our Bethel goes on well. The chapel part, though not complete, will be, we trust, in a state to be occupied by next Sabbath. The Cyane gave us a good lift, $94,00, and not $100,00, as stated in the Friend. We shall report on the subject when the subscriptions is full and the chapel is finished.

But few whale ships have come in since I opened the subscription, but these have done well, some of them nobly. Masters, officers and Jack, have, generally, lent a generous and willing hand in the work. Thus it should be, for every Bethel is a Lighthouse, and a peaceful port to the tempest stricken sailor.

We have had but three whaleships here this season, up to this date. Our fields and skies have been splendid, and our climate delightful, for three months past."

For the Friend.

Lahaina Chaplaincy.

Mr. Editor,—Having acted as Seamen's Chaplain at Lahaina from the 1st of June, 1846, up to the 1st of October, 1847, you will permit me to make the following statement relative to public funds which have passed through my hands, as I am in a few days to leave these Islands.

From the 1st of June, 1846, up to Oct. 1, 1847, I have received as follows:

For expenses of Lahaina Chaplaincy,	$202 75
Donations for the Friend,	75 62
For Bibles, Testaments, &c.,	35 00
Total,	$313 37

I have paid out as follows, from the 1st of June, 1846, until the first of October, 1847, for various repairs on the Bethel at different times, $124 75

Sexton's services, hymn books for chapel, &c.,	78 00
To Editor of Friend,	75 62
Hawaiian Bible Society,	35 00
Total,	$313 37

N. B. There still remains unpaid a debt against the Bethel at Lahaina, for repairs, amounting to the sum of $82,62

Capt. Cleaveland,	$2 00
" French,	2 00
" Corwin,	2 00
Officers and crew, of the A. H. Howland,	16 00
Mr. Boardman, (resident,)	5 00
Mr. Blanchard,	1 00
Mr. Goss, (resident,)	1 00
G. B. Hollister,	1 25
Capt. Hull, Georgia,	3 00
	$33 25

C. FORBES.

We have examined, in company with the Rev. Mr. Forbes, his account of receipts and expenditures, and feel it due to him, hereby to express our most unqualified approbation of the manner in which he has discharged his duties as a temporary Seamen's Chaplain. So far as pecuniary receipts and expenditures are concerned, he has been very minute and specific. The benevolent public have found time a faithful servant in managing their charitable contributions. We sincerely regret to have him retire from the station and leave, with his family, this quarter of the globe. May the smiles of a kind Providence ever attend them. His station, as chaplain, we rejoice to learn, will soon be supplied by one, concerning whom a very favorable report has reached our ears.

POSTSCRIPT.

Scarcely was the ink dry announcing that the "Medora" was hourly expected, ere her arrival was reported in the offing. This makes the third merchant vessel from Boston direct. The news by her is of an older date than that received by the previous vessels. She brought, however, a large mail. Although she sailed in May, yet we have the Pictorial "Yankee Doodle," and "Brother Jonathan," for July 4th! This is truly taking time by the "fore lock," but this is the way of doing things at present; for example, by the Magnetic Telegraph, the people of Buffalo receive Albany news several minutes sooner than the sun travels that distance! An item of news starts, say at 12 M., it will be known in Buffalo, several minutes, before 12 o'clock!!

Donations.

FOR THE FRIEND.

From master, officers and crew, ship Huron,	$11 50
From master, officers and crew, ship Hope,	22 00
Capt. Canning, ship Hannibal,	5 00
Mr. Thompson,	2 00
Ship Georgia,	5 00
Mr. Eddy, B. Rush,	3 00
Two Sailors,	1 00
Officers and crew, Saratoga,	17 00
Master, officers and crew, ship William Tell,	15 37
Officers and crew Solomon Saltus,	12 00
Mr. Chapman,	1 00

N. B. Names of donors on board these several ships, necessarily omitted for want of space.

FOR CHAPLAINCY.

A Friend in Honolulu,	12 00
Capt. Fales, Solomon Saltus,	6 00

Notice—All persons having private property, books cushions, &c., in the Chapel, are hereby respectfully notified that repairs now commenced, will require said property to be removed as early as Tuesday, Oct. 26.

DIED.

In the U. S. Hospital, Lahaina, Sept. 13, 1847. Mr. James O Gould, aged 20. Mr. Gould had a brother, editor of a paper in New York.

In the U. S. Hospital, Lahaina, Sept. 27, 1847, a Society Islander.

Killed by a whale on Kamschatka, Aug. 3, 1847, Mr. George Bailey, 3d mate of ship Cortes, of New Bedford. Mr. Bailey left a wife and one child in N. Bedford.

Of disease of the heart, on Northwest, Mr. Samuel Jessup, 2d mate of the bark Ellis, of Sag Harbor. Mr. Jessup left a wife and 3 children in Sag Harbor to mourn his untimely death.

Little do those, who live at ease in their own quiet homes, realize the dangers and deaths to which the poor sailor is exposed.

June 13th, on board ship Adderson, Capt. West, of New Bedford Daniel Borden, of New Bedford, 34 years of age. Mr. Borden was 1st officer of said said ship, and has left a wife and children.

FOR SALE LOW!

75 BOXES super Window Glass, assorted sizes, viz.:—12 × 15, 12 × 16, 11 × 18, 10 × 16, 10 × 14, 12 × 17, 10 × 13, 10 × 15, 9 × 14, 10 × 14; 1 Fairbank's patent platform Balance, weighs 1000 lbs, 1 do do do, weighs 1700 lbs, 1 do do do, on wheels, weighs 2000 lbs. VOL. V] HONOLULU, OAHU, H. I., NOVEMBER 4, 1847. [No. XXI.

The Poet's Corner.

☞ The story of the Newfoundland dog, or "Brave Bobby," in our No. 19, took wonderfully among our youthful readers. From one quarter there comes this report, "Brave Bobby is a good story—real good Our children are delighted, and are fierce for having a Newfoundland dog." We should be very sorry to increase the number, although we should be glad to see the canine genus improved.

We now insert the words of the song of the "Newfoundland dog," which the crowded state of our columns prevented in the two last numbers.

Life saver! wave stemmer! deep diver! away!
Night's shadows are closing the portals of day;
On the breast of the billows we hear his low wail,
We have put up the rudder and furl'd up the sail.

No signal from Heaven will show where he be;
And where e'er he be driven we men cannot see,
Ho! Carlo! Newfoundland! go follow his cry,
As it gaspingly answers the sea moaner's sigh;

The boat shall be lower'd, the men shall belay,
Life saver! wave stemmer! deep diver! away!
Away, fetch him out! fetch him up! seize him! ho!
Mount the wave dog, mount the wave dog! ha! down below!

Hark! watch! bear a hand—bring a light—not a sound,
Hark! there's a moan, yes, the waves moaning over the drown'd;
God's spirit preserve him, Amen, and Amen,
Hist! a flash—and a motion—ha! Carlo! ha! Carlo! again.

Good dog then—good dog then—bear a hand, pull tight;
A boat-hook—a boat hook—he's in and all right,
Come Carlo—quick fellow—fine fellow—hard strife,
Wave stemmer! deep diver! we owe you a life.

TO —— ON SEEING HIS BROW CLOUDED WITH CARE.

For the Friend.

BY MRS. M. L. GARDINER.

What if the scenes of earth depart,
Must man forever sigh?
Forever, must his anxious heart,
Be mirrored in his eye?
Must his high brow be knit with care,
And fires consume his soul,
Lest all that's beautiful and fair,
Must yield to death's control?

Must he forever mourn and sigh,
That changes are his lot?
That those he loves must fade and die,
And he, himself, forgot—
This life is but an opening bud
Of an immortal flower;
Which through Eternity will bloom,
Unfolding every hour.

Thrice happy he, around whose board,
At morning, noon, and even,
Appears a joyous smiling band,
All candidates for heaven;
What happier state can mortals know,
What sweeter, purer bliss?
Amid this world of weal and woe,
Than childhood's nectared kiss?

What more can man require of God,
Than God to him has given,
A beautiful, a glorious world,
An endless life in heaven?
Then cheer thee up—'tis thine to fill
A nobler seat above,
When joys like morning dews distill,
And all the air is love.

Sag Harbor, 1845.

THE FRIEND.

New York Correspondence.

NEW YORK, May, 1847.

MY GOOD FRIEND,—The present condition of the United States has no parallel in the history of nations. At war with a foreign power, city after city taken, victory after victory announced, and yet so quiet at home as to have scarcely a ripple on the surface of society raised.

Showering bullets in one direction, scattering bread, by sale and donation, in another, and endeavoring, at the same time, to send the gospel every where. Importing immense quantities of goods from Europe, and still keeping the balance of trade in our favor. Sending ship loads of provisions from the hand of beneficence to save her starving poor from death, and enlarging our almshouses and taxes to feed the paupers the ships bring home.

The warring and financial measures of our government—having recently contracted a a loan of $22,000,000 to prosecute the war—in the estimation of many, wicked and ruinous, yet all the departments of business in a high state of prosperity. And amidst the rumors of war, the bustle of business, the anxieties of gain, and, I may add, the forgetfulness of God, sharing, in addition to the full supply of temporal mercies, in special spiritual blessings from above. War and wordly gain beyond any thing else divert from God; yet in the midst of all this, in various parts of the country, not a few are seeking after God if haply they may find him. And many, including a considerable number of youths in our colleges and seminaries, have found him to their unspeakable joy.

Through the papers you will have learned the particulars about the great Evangelical Alliance Meeting and measures in London. Plans are maturing for carrying the principles there adopted through the United States. It promises well in the beginning and bids fair to carry with it the great bulk of the mind and heart of the good. As it shall lead christian men to contemplate their points of agreement, they must lose their mutual jealousies, love each other more, and act with increased harmony and strength in the great work of saving a perishing world. Blessed day! when the watchmen shall see eye to eye, and Ephraim and Judah, having ceased to envy and vex, shall be only ambitious in the holy strife of loving and serving God the best.

When speaking of the war with Mexico, I should have added, it is generally deprecated by christians as uncalled for; as unwise in its commencement and wicked in its prosecution. I have heard of but one minister who prayed in public for the success of our arms; and he is a pet of the powers that be.

The business of President making is beginning to wax warm. Gen. Taylor is the prominent candidate, and I should not be surprised if both political parties should so far unite in him as effectually to destroy each other. But I will not perpetrate another Presidential prediction; you will remember that I put Henry Clay in the chair, but some how James K. Polk supplanted him.

Political abolitionism is trying to rally again; but it was so obviously instrumental of electing a slaveholder, in 1844, for President, as greatly to weaken confidence in its measures, and drive many good men either to silence, or to vote elsewhere. I have, in former commmunications, expressed my belief that the days of slavery in this country are numbered, and are hastening to a close. There continues to be frequent developments which strengthen this conviction, i. e. the discussion of what was called the Wilmot Proviso in the last Congress, the late movement to declare Maryland free, and the present agitations of the evils of slavery in Kentucky.

The population of this country, particularly of the Western States, continues to increase with wondeful rapidity. It is not 60 years since Ohio was permanently settled, yet it has a population of 1,732,000.

About 14 years ago there began to be a rush to Michigan, now it has 300,000 people. Indiana has gained since 1830 more than 500,000 in its population; and though it has been a State but 31 years has 900,000 inhabitants. Illinois as a State is but 29 years old, and has 700,000 inhabitants.—Iowa, which 10 years ago was the home of the Indians, and a few Indian traders, now has more than 100,000 settlers scattered over its beautiful surface. Wisconsin has gained 100,000 in five years. One portion of territory, 33 miles by 30, which 10 years ago was a wilderness, has now 30,000 inhabitants, and the comers of each succeeding day report more on the way! Where do they come from? Why, from the four winds, particularly from the East, beyond the great waters, and when planted they seem to grow spontaneously without culture. Whether they shall be suitably furnished with the gospel and its attendant blessings, is the great problem we are now working out. Noble efforts are made in this direction, and with the most blessed results. Yours for my country and the world, J. S.

New Book.

Sketches of Modern Literature, and eminent literary men, (being a gallery of literary portraits,) by GEORGE GILFILLAN.

The work embraces sketches of the leading literary characters of the passing age. The author remarks in his preface that "the life of every thinking man may be divided into three eras—the era of admiration the era of action, and the era of repose." He acknowledges that he has not passed, as yet, through the first era, and his productions evince that the ardor of youth has not passed away! Although not deep and profound, yet there is a vigor, life and freshness exhibited in so many of his pages that the book is highly interesting and instructive. It is just such a book as will interest the reader of the leading Reviews and Quarterlies of the age. Many of the sketches contain very good delineations of the most prominent writers in these publications. Lord Jeffrey, so many years the editor of the Edinburgh Review, is placed at the head of the Gallery. Hazlitt, Robert Hall, Dr. Chalmers, Carlyle, Foster, Professor Wilson, Brougham, Coleridge, Lamb, and many others, occupy prominent positions.

In a portion of the Gallery, we notice some American writers have found a place. Our narrow limits will only allow us to make a few short extracts, yet they are such as will be read with interest by many of our readers:—

COOPER.—Of Cooper we say little. "He is not a god of the mountain but of the plain." Be the plain that of ocean, or that of the wild billowing prairie, or that of the vast level forest, it is equally his "own domain." He describes a ship as a lover his mistress. In a storm, his style sinks and swells with the billow; and as the masts are toppling and crashing over-boad, you hear it speaking, like the captain through his trumpet, above the wild turmoil of waters. His introductions are leaden and dreary,—his dialogues spun out; but few have grappled so with the two mighty elements, storm on ocean, and solitude on shore; and we predict that his name, and many of his works, will live as long as the sea-surges sound, and the heart of the old woods is silent.

JOHN NEALE.—John Neale was a rough egotistical Yankee, who thought America the greatest country in the world, and himself the greatest man in America. He made no secret of either conviction. And in the union of boastful egotism and glorying nationality, lay such power as the man had.—His works were chiefly novels, "Logan," "Seventy-six," "Brother Jonathan," &c., and, though full of faults, and running riot with all kinds of wilful extravagance, and exciting, in some instances, strong suspicions of the man's sanity, contained many vigorous passages, "equal," *he* was wont to say, "to any thing ever written;" descriptions homely as the log-hut, and fresh as the forest; and, above all, a bold sweeping independence of tone and manner which contrasted well with the creeping and circumspective character of his country's literature. His books are all now defunct, or retain a precarious existence among the upper shelves of the circulating library; the last glimpse we get of himself is in the establishment of Jeremy Bentham, where we find him storming and dogmatizing at a great rate. Since then we have lost sight of him; but our impression is that he has subsided into a professional man, in one of the cities of his native land.

MOSES STUART.—Moses Stuart of Andover University, is the prince of American exegesis. His works on the Hebrews, the Romans, the Divinity of Christ, &c., are too well known to require criticism. He is a strong, literal, plodding Polyphemus. His great error lies in pushing verbal criticism to excess. He does not "allow for the wind." He feels not, that to apply, in all cases, a literal interpretation to Scripture language, is to do violence to a "thing so majestical" as the mother tongue of Heaven. He has lately injured his reputation by a book on the Modern Geology, in which he seems afraid lest the progress of modern science should interfere with the celestial claims of Christianity; a terror as absurd as though one were to tremble lest the scythe of a mower, plying in the summer meadow, should shear the sun of his beams; and, in one place, almost blasphemes, or, at least, raves at the idea of God permitting the earth to be tenanted, for ages, by reptiles; talking as though, on this supposition, it were made in vain,—as if man had a right to dictate to the Almighty in what time or order he should produce his works;—as if Sahara were made in vain, because there still the lion is the lone lord;—as if Cotopaxi were made in vain, because the vast wing of the condor alone shadows it;—as if the depths of the ocean were made in vain, because the shark is the ruler there, and man they may never see, till he descends, amid their awful realms, a corpse;—as if the heights of the sky were made in vain, because inhabited only by the storm and the eagle, the meteor and the thunderstone;—as if the very multitude of the ages which proceeded the coming of man were not a proof of his dignity;—as if the fossilized remains were not gems in his crown. We see no use in divines thus fighting like maniacs, against the science of the civilized world.

DANIEL WEBSTER.—Daniel Webster is, since the era of Patrick Henry, the best of Yankee orators. His eyes "open, and open, and you would think they never would stop opening." It is impossible to pass a verdict on one we never saw or heard; but our impression, founded upon many testimonies, is, that but for "one Mirabeau," and "one Chatham," and "one Fox," and "one Brougham," no speaker, entirely his match, has trode the world-stage, for full two centuries.

PRESIDENT EDWARDS.—"Edwards," said Hall, enthusiastically, "is the greatest of the sons of men." He is certainly the acutest analyst the western world has hitherto produced. His work on the "Freedom of the Will," discovers consummate intellectual powers, thrown away on the most barren logomachy ever started; a question which one sentence might, for every practical purpose, set at rest forever, *All is free ere it has occurred, all is necessary after.* And yet this question, we perceive, they are still vexing in America, with vain industry and acuteness! We admire, as much as any man, the naked and rigid grandeur of Edwards' analysis; still more the depth of insight into human nature, displayed in his treatise on the "Affections;" and even yet more, the fervour of his sincerity, and the holy daring with which he pushes his views to their utmost consequences.

In private he was one of the most austere, abstemious, and purged of human beings.—His own family approached him trembling. He ate his spare diet out of silver. He assumed a manner high, remote, inscrutable. In the pulpit, his triumphs were those of the calm cherubic Reason. Unmoved himself, he sometimes set his audience in flame. He reminded you of Milton's line, "The ground burns frore, and cold performs the effect of fire." A signal instance of this is recorded. A large congregation, including many ministers, were assembled to hear a popular preacher who did not fulfill his appointment. Edwards was selected to fill his place, principally because, being in the habit of reading his discourses, he happened to have a sermon ready in his pocket. He ascended the pulpit accordingly, amid almost audible marks of disappointment from the audience, whom, however, respect for the abilities and character of the preacher prevented from leaving the church. He chose for his text, "Their foot shall slide in due time," and began to read in his usual quiet way. At first he had barely their attention; by and by he succeeded in riveting every one of them to his lips; a few sentences more, and they began to rise by twos and threes; a little farther, and tears were flowing at; the close of another particular, deep groans were heard, and one or two went off in fits; and ere he reached the climax of his terrible ap-

peals, the whole audience had risen up in one tumult of grief and consternation. And, amid all this there stood the calm imperturbable man, reading on as softly and gently as if he were in his own study. And, in reading the sermon, we do not wonder at the impression it produced upon an audience constituted as that audience must have been. It is a succession of swift thunder claps, each drowning and deafening the one which preceded it. We read it once to a distinguished *savant* who, while disapproving of its spirit, was compelled, literally, to shiver under the "fury of its power."

The Seamen's Friend.

Obituary Notice of Mrs. E. E. Adams.

Amid the intelligence of storms and tempests and wrecks and loss of life at sea, with which our pages have been filled, it becomes our painful duty to record the death of one of the most faithful friends of seamen, and a devoted missionary among them, in the foreign field—the wife of Rev. E. E. Adams of Havre, France. Mrs. A., with her husband, returned to this country last Spring, with the hope that a sea voyage and a visit to her friends might improve her declining health. Her health through the Summer seemed somewhat better. She loved the cause in which her husband was engaged, and longing to return to their field of labor, came to New York in November to embark for Havre. But God, who knows best, had appointed her another sphere of action, or rather of REST. She died in New York, Dec 4th, 1846.

Mrs. A. was born in Guildhall, Vt., in 1815; became pious at the age of 16, in Newbury, Vt., where she united with the Congregational Church. She was in early life always fond of study; apt at teaching, systematic in every thing; loved to depend on herself, very daring and resolute in enterprise. In 1837 she went alone to Georgia and took charge of a ladie's high school; where for three years she exerted an extensive influence, and was much beloved. She wrote often while there, upon some of the great questions of the times; also poetry, which was publicly commended.

She spent six weeks taking Gen. Harrison's portrait, which she presented to the Georgia Whig Convention. In 1840 she went to England, and was married in London to Rev. E. E. Adams. She spent a season with her husband in St. Petersburg and Cronstadt, where by her conversation, letters and example, she more than doubled the number of the Bethel congregations—attending herself with her husband on shipboard. In London she wrote many of the letters to children, published in the Bethel flag. Every where she was beloved as a woman of uncommon judgment and intelligence; of great simplicity of character, of tender affection and consistent piety.

The near prospect of death did not divert her mind for a moment from any little necessary duty. She seemed so prepared for the event that, like Elijah, she could look on the descending chariot in which she was to be borne to immortality, with the same eye and features that she looked upon the rising morning. Her last hours were hours of much physical suffering; but not a complaint escaped from her lips. She was cheerful to the last, and whispered with her dying breath in almost audible accents, as to beings in the spirit-world, "Oh, come! come! come!" and fell asleep in Jesus.—[Sailor's Magazine.

☞John B. Gough, since leaving Albany, has labored in Troy, Cohoes, Waterford and Lansingburgh, addressing crowded houses with his usual power and effect. The people not only hear and feel, but resolve to act. The pledge is signed on the spot by large numbers, and having existing organizations and societies prepared to take up and carry on the work, the effect is not lost but becomes permanent. Waterford is an exception. Mr. Gough spoke here two evenings with unusual power, seeming to carry the entire audience; but there was no pledge or any efficient organization.

INFLUENCE OF SUNDAY SCHOOLS.—A Committee of the House of Commons has ascertained, by examination of the prisons in London—in which 700 children, from the age of 8 to 19 were confined—that only *two* had ever been in a Sunday School. The Recorder of London stated to this Committee, that not more than one out of a thousand juvenile delinquents brought before him, had ever been favored with Sunday School instruction.

Communication.

REPORT of the Committee of Management of the Nuuanu Cemetery Asssociation, October 27, 1847.

On behalf of the Committee of Management of the Nuuanu Cemetery Association, I would respectfully submit the following Report:—

My last Report before this Association was dated June 16th, 1845, nearly two and a half years since. During that period many changes and improvements have been made in the Cemetery. Many lots have been tastefully enclosed, the trees have flourished, and the Cemetery has become an ornament and credit to the town.

The mortality among the foreign residents and strangers here has been unusual during the past two years, and many have found within the walls of the Nuuanu Cemetery a quiet spot for their last resting place.

By the report of the Treasurer, in June, 1845, you will notice that there was at that time a balance in his hands belonging to the association of $60,86. By his report of this date you will learn that the receipts since have been, (including the above balance, $510 86
and the expenditures, 235 75

leaving a balance of $275 11
now in the hands of the Treasurer. The heaviest item of expenditure was $105 for a stone wall along the road, which became necessary in consequence of the dilapidation of the adobie wall. I would recommend that the balance on hand, which has arisen partly from the sales of lots and partly from subscription, should be appropriated to the purchase, in the United States or England, of a substantial Iron Gate for the principal entrance, which is much needed, the old gate being much out of repair, and which would be at once serviceable, substantial, and ornamental. Granite gate-posts would be better than any other in this case, and should the balance on hand not be deemed sufficient to cover the expense of a gate of this description, a subscription would, I think, rasie the sum required. Or the amount might be devoted to procuring a suitable monument for the circular mound in the centre of the ground; or, if the association should prefer, a small chapel as before contemplated, might be built on this mound.—But these suggestions will of course be considered by you, and such a disposition of the surplus funds made as may seem to you proper. I would again recommend that a suitable person should be procured as superintendant, who should live on the ground and have the use of the unoccupied land for his services.

That portion of the cemetery allotted for the burial of indigent seamen, has been placed in charge of the seamen's chaplain, Rev. S. C. Damon, who has collected funds enough from subscriptions and the avails of a concert given for that purpose, to enclose the lot with a neat wooden fence, and erect an obelisk in the centre, making it an ornament to the ground. It is rapidly becoming tenanted with those for whom it was designed, and for whom there has heretofore been no suitable burying place.

In offering to the association this report, which has been made hastily, amid a press of other business, I must also tender my resignation of the office which I have held ever since this association was formed, as I am about to leave the Islands.

All which is respectfully submitted,
JAMES F. B. MARSHALL,
For the Committee of Management.

THE FRIEND.

HONOLULU, NOVEMBER 4, 1847.

Letter from a Sailor's Mother.

It is no small amount of trouble to officiate as "Post-master General" for sailors, (and not sailors alone,) in the Pacific, yet it is not unattended with a peculiar kind of delight. Who would not exert himself to bring into communication friends who are separated by the earth's diameter, and who may have lived or pined in ignorance of each others welfare for years? A letter came directed to our care by a late arrival, written by a mother to her son residing at the Islands. With his permission we copy the opening paragraph:

GROTON, CT., May 10, 1847.

MY DEAR, LONG LOST J,—The emotions of my heart are such that I know not what to write first, for it would take a great many sheets of paper to write all I wish. In the first place I heard you was left sick in Africa, and it was not expected you would live. My feelings I will not try to describe, but my heart was pained within me day and night, until I heard that it was not so. The next news I heard was that you had left the ship at New Zealand, and oh, another dagger to my heart. Aunt —— tried to console me, and she prayed for me, and would say, "I pity you Mrs. ——," but O, the nights of grief—I had no where to go but to my heavenly Father, and blessed be his holy name that I can go to Him, for he hath said, "him that cometh unto me, I will in no wise cast out." Well, I never heard again from you for nearly two years, and I but very little thought you was living, I thought you must be eaten by a cannibal, or killed by a whale, or was drowned, or starved, or had died with sickness, and it has almost killed me.

Here follows a long and interesting letter of family news.

We hope our long letter-list of to-day s paper may facilitate the progress of some long wished for epistles to their ultimate destination.

THE SAILOR'S LIFE AND DEATH.—Mr. Douglass, mariner's preacher in Philadelphia, states that about *one hundred* vessels had been wrecked on the coast of the United States during the past year, and *seven hundred* persons swallowed up by the raging sea. He also stated that it had been estimated, that out of about three hundred and sixty vessels loaded with provisions in American ports for the suffering in Europe, about seventy were partially or totally wrecked.

NUUANU CEMETERY ASSOCIATION.—A meeting of this body was held on Wednesday. The report of the Chairman, J. F. B. Marshall, was read and accepted, and the thanks of the Association voted to the late officers. Dr. R. W. Wood was then elected President for the ensuing year, W. Paty, Esq., Vice President, Rev. S. C. Damon, Secretary and Treasurer; W. Paty, Thos. Cummins, F. W. Thompson and R. W. Wood, Esqrs., Committee of management. The Association voted to place $100 at Mr. Marshall's disposal to purchase an iron gate in the U. S.; the Committee were instructed to ascertain the expense of putting a substantial wall around the premises. The balance of funds in the Treasurer's hands was $275.

THE BRIG HENRY, OF NEWBURYPORT.—MYSTIC, (Conn.) January 29th, 1847.—I see by your paper of the 28th inst. that "fears are expressed of the loss of the brig Henry, of Newburyport, bound to Oregon. The Newburyport Herald says, she left St. Catharines early in June, and had not arrived at her destination early in October."

It is in my power to communicate some intelligence concerning this vessel, of interest to her owners and the public. In the middle of September last, I was applied to in Montevideo by a Mr. Swasey, who represented himself and family as having been on board the brig Henry, of Newburyport, on a voyage to Oregon. There was, according to his statement, $11,000 of Missionary money and a quantity of rum on board, which were appropriated and divided by the crew, before her arrival at St. Catherines.—Against this, Mr. Swasey, being Agent for the owners, remonstrated to the Captain, which so exasperated him and the crew, that an attempt was made to throw him overboard in the night; he held on to the lanyards of the lee main rigging till his wife, hearing his cries, ran to him and plead for his life till these pirates released him. After this they were in constant alarm for his life.

On arriving at St. Catherines, he swore to the above facts before our Consul, Mr. Wells, but the Captain, and a Doctor, who was a passenger, as well as the crew, swore that his statement was false, and that Mr. Swasey was insane, and not to be relied on.

So great was Mr. Swasey's sense of responsibility to those who had entrusted their property to his charge, that he would have continued in the vessel till her arrival at some other port, had not his wife been apprised that there was a plot on foot to make way with her husband shortly after leaving St. Catherine's. He consequently determined to sell out his share at a great sacrifice, and to leave the vessel; he did so at the above named port, and came with Mrs. S. and his children to Montevideo, where I saw them. Mrs. Swasey is a beautiful and highly accomplished lady, who has very respectable conexions in Boston. She confirmed Mr. Swasey's narrative, and could not describe the circumstances without weeping.

Mr. Swasey said that there were some guns put on board at Newburyport, for ballast, and that he had not the least doubt that her destination was for some port in the Sandwich Islands, where she would be fitted out as a pirate or privateer, as she was a fast sailing vessel.

When I last saw him, he was about to start for Valparaiso, on his way to Oregon, with the hope of getting track of the vessel, leaving his family at Montevideo.—[Corr. N. Y. Express.

The above is about as rare a bit of romance as we have seen in print of late. This Mr. Swasey was disliked by the crew, who actually did attempt to throw him overboard one night, but were prevented by the interference of a passenger. Hence his story. To set the correspondent of the N. Y. Express right, we tell him that the Henry arrived here in October, 1846, and has since been peacefully employed in freighting lumber and fish from the Oregon to this port—that she is as Quaker-like a looking vessel as ever floated from down east,—that she has no guns, and is not remarkable for her speed. Nine of her passengers settled at Honolulu, and very worthy people have they proved themselves. Dr. Watson and family have since embarked for the U. S. Mr. Lee, the lawyer, is at the head of the Hawaiian bench, beloved and respected by all. Mr. Bishop is clerk to the U. S. Consul. Mr. Wood is doing a flourishing business in the shoe line, and two others are in the firm of Bent & Co., enterprising and successful house builders. So far from being pirates, no vessel ever landed on these shores a more respectable and welcome set of passengers, and we hope they will long remain among us, examples of New England thrift and character.—[Polynesian.

HUMANITY OF LOUIS PHILIPPE.—Lord George Bentinck mentioned in the House of Commons, on the 25th of February, a fact highly to the credit of the present King of France and his Ministers—that, while 25,000 persons had been allowed to perish of starvation in Ireland, notwithstanding the warnings received by Lord John Russell as to a defective harvest in Europe, Mons. Guizot and his colleagues had bought, in time, not less than two millions of quarters (eighteen millions of bushels) of grain, and it was so managed that not a man, woman or child, had died in France of starvation. Several journals, quoted in the *Nation*, estimate the deaths in Ireland, from absolute want, at 50,000, and it is stated that such is the police report of the constabulary office in Dublin.

☞The Society of Friends in England, who number in all about 23,000 souls, (men, women and children,) have contributed to the relief of the suffering poor in Ireland, the liberal sum of £35,000—or $170,000.

☞ The President of the United States has recognized Schuyler Livingston, of New York, as Consul General of the Hawaiian Islands for the United States.—[Bost. Transcript, Feb. 27.

Items from Late Papers.

NATIONAL RESPONSE.

FOREIGN OFFICE, }
London, March 31, 1847. }

SIR,—I have received your despatch, No. 8, of the 12th ult., stating that measures have been taken for the purpose of raising a subscription in the United States for the relief of the destitute Irish poor.

And I have to instruct you to take every opportunity of saying how grateful Her Majesty's Government, and the British nation at large, feel for this kind and honorable manifestation of sympathy by the citizens of the United States for the sufferings of the Irish people. It might, indeed, have been expected, that a generous and high-minded nation would deeply commiserate the sufferings which an awful visitation of Providence has inflicted upon so large a population, descended from the same ancestors as themselves. But the active and energetic assistance which the people of the United States are thus affording to the poor Irish, while it reflects the highest honor upon our transatlantic brethren, must tend to draw closer, and to render stronger and more lasting, those ties of friendship and mutual esteem, which Her Majesty's Government trusts, will long continue to exist between the two great branches of the Anglo-Saxon family—separated, indeed from each other by geographical position, but united together by common interests, to which every succeeding year must add increasing extension and force.

I am, &c.,
PALMERSTON.

To the Right Honorable Richard Pakenham, &c., &c., &c.

☞ Twelve hundred and eighty persons signed the total abstinence pledge at the public meetings during Mr. Gough's five addresses in Albany.

The meetings were all crowded; the largest churches being quite too small for the occasion. The last two evenings the aisles, stairways and spaces were crowded with a dense mass of standing people, and by estimate, from one to two thousand each evening went away, unable to get in.

The last evening, nine clergymen were in the pulpit, and many others present. Mr. Gough spoke with his usual plainness, and yet without offending even the dealers in intoxicating drinks, so far as known. He said many things that will not soon be forgotten, especially as to festive occasions, and particularly as to "New Year's" day, showing their influence in forming new or reviving old habits of dissipation. The effect of these meetings is most happy and powerful, and will long be felt upon the morals and welfare of our city.—[Albany Journal.

GOD-FEARING MEN.—Many pious men have been lately met with on board some of the large American ships that have recently visited the London Docks; from some of them I have been informed, that when they were recently at the Isle of France, there were Bethel meetings held on board their ship every Sabbath; and that on those occasions several sailors found peace in believing, and very many attended these means of grace. The captain of this American ship held two services every Sabbath, when himself and a pious man, the chief mate, addressed the sailors alternately. I have conversed with several of the sailors belonging to this ship; they are, I trust, God-fearing men. They have attended the services at the Sailor's Church, both on the Sabbath and week evening services since they have been in London, and I have been much pleased with their sober, consistent conduct.

Those sailors are all total abstainers from intoxicating drinks, and are thereby preserved from the evils their brethren are exposed to from intemperance.—[London Sailor's Magazine.

TEMPERANCE AMONG THE LAW-MAKERS.—The Governor, Lieut. Governor, President of the Senate, and Speaker of the House of Representatives of Mass., are tetotalers.—One hundred and fourteen members of the Legislature have joined the Legislative Temperance Society during this session. Many of them were members before. It is interesting to see those in high places thus honoring themselves and their constituents by engaging in this great enterprise.

Information for the People.

Letters and packages have recently been deposited at the study of the Seamen's Chaplain, addressed as follows:—

Capt. James K. Turner, (several,] Capt. David Marston, (several,) Francis L. Ripley, Capt. John R. Taber, E. F. Nye, Leonard Hammond, Benj. C. Tuckerman, George W. Higgins, Thos. H. Smith, James H. Boomer, George B. Sherman, Chales W. Faulkner, J. R. Lawrence, Capt. J. Bottom, Capt. B. T. Folger, Capt. E. M. Baker, William Carver, George E. Day, George Doan, James M Willis, Jonathan Davis. Capt F. Fish, E. C. Rodgers, Joseph Thurstwell, Charles H. Taber, 2.

Late News.—*O'Connell dead.* Intelligence has been received from Europe via Tahiti, that Daniel O'Connell, the Irish Agitator, died in Italy May 20, being on a visit to the Pope. His remains were interred at Rome.

The Order of the Bathe has been restored to the Earl of Dun Donnell, better known as Lord Cochrane, who performed such signal service during the Revolutions in South America.

Society Islands.—Capt. Ricardi, and crew, of a small French schooner, have been massacred by the natives of "Barclay de Tully," one of the Paumotu Islands, a dependency of Queen Pomare. A French war-steamer visited the island and brought away 20 natives. They were tried by the authorities at Tahiti. Ten had been acquitted, four sentenced to forced labor for life, and six condemned to death. Of the latter six, three were reprieved until their cause should be plead before the King of France. The remaining three under sentence of death, were conveyed in a war-steamer to their native island, there to be executed. They were accompanied by the Rev. Mr. Thompson, English Missionary.—On trial it appears that all were implicated in the massacre. They acknowledge the deed but plead in extenuation that formerly Capt. Ricardi had fired upon some of their canoes and killed some of their people. This Ricardi has been for a long time notorious for his hostility to the natives. He was connected with the famous "dog" affair at Tahiti, and was the prime instigator of the bloody affair at Huahine in the spring of 1846, when the French burnt the town, and lost more than 100 of their men, while only a few of the natives were killed. Ricardi's death appears a most remarkable instance of retributive justice, executed by those towards whom he had manifested such bitter hostility.

Chile.—A copy of "The Neighbor" has been received for July 27. The Congress of Chile is still in session, and urging forward internal improvements. Mr. Wheelwright's project for a Railroad between Valparaiso and Santiago is still under discussion.

Religious toleration, we rejoice to learn, is so far advanced that our brother chaplain, Rev. D. Trumbull, is permitted to issue the following public notice:—

"Strangers, seamen and foreign residents are most cordially invited to attend the worship of God in the Free Chapel.

This is situated at the corner of the calle de la Aduana and calle del Almendro.

The hours of service are 11 A. M., and 7 1-2 P. M."

Teetotalism Progressing.—Numerous hand bills and newspaper notices, calling upon the working men and mechanics of Honolulu to assemble for a discussion of the subject, shows that the "leaven" of total abstinence is at work. We hope it may not cease "working" until the whole "lump" of society shall be affected. There is no question but a healthier tone of public sentiment is spreading in our community, touching both the vending and drinking of spirituous liquors.

☞ Those masters of vessels who are exerting themselves to collect funds for the support of the Friend have our special thanks. A full report will ere long be published.

Notice.—While the Bethel is undergoing repairs and alterations, public service will be held every Sabbath morning at the Rev. Mr. Smith's meeting house.

☞ Next Sabbath at 3 P. M, religious services will be held on board the English Brigantine, "Laura Ann," Capt. Thomas.

☞ Lahaina subscribers will find their papers at the office of the collector of customs.

DIED,

In Honolulu, Oct 31, Capt Griswold, master of Am. whale ship "Audley Clark'." The deceased was a native of Weathersfield, Ct. For several days previous to his death he had exhibited evident proofs of insanity. His remains were accompanied to the Nuuanu Valley Cemetery, by a highly respectable company of shipmasters, seamen and residents.

PASSENGERS.
